## COLONIALS

- 3001** 1652 Oak Tree Shilling Genuine PCGS. Crosby 7-B, Noe-14, W-530, R.4. 52.01 gn. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AG specimen that has been damaged. A well worn cream-gray Oak Tree shilling that is somewhat wavy due to a number of tiny digs. The date and denomination are clear, as is about half of the peripheral legend on each side. The Spiny Tree is only indistinctly apparent. Listed on page 37 of the 2011 *Guide Book*. MRB AG3.

### Very Rare Noe-11, W-510 1652 Oak Tree Shilling, XF Details

- 3002** 1652 Oak Tree Shilling—Improperly Cleaned—NGC Details. XF. Crosby 6b-E2, Noe-11, W-510, R.6. The obverse line running through the THU of MASATHUSETS is diagnostic for the very rare Noe-11 die pair. This is a well-defined coin for the time, straight-clipped at the left relative to the obverse. Though peach-tinged silver-gray surfaces show evidence of past cleaning, the overall eye appeal is considerable. Listed on page 37 of the 2011 *Guide Book*. MRB XF40.  
Ex: C.H. Stearns Collection (Mayflower, 12/1966), lot 41.  
From the W. Philip Keller Collection of U.S. Colonials.

### 1652 Pine Tree Sixpence, VF Details Popular Noe-33 Variety

- 3003** 1652 Pine Tree Sixpence—Reverse Scratched—NGC Details. VF. Crosby 1-A, Noe-33, W-670, R.3. NGC incorrectly identified this piece as an Oak Tree sixpence. The Pine Tree coinage replaced the earlier Oak Tree motif, probably around 1667, but the 1652 date was retained. The Noe-33 variety is characterized by the position of the tree distant from the beads, and the presence of a pellet on either side of the tree. The obverse of this piece is well centered, when it is usually seen slightly high. The devices are well detailed, but a few thin scratches are evident under the date. Listed on page 37 of the 2011 *Guide Book*. MRB VF20.  
Ex: C.H. Stearns Collection (Mayflower, 12/1966), lot 140.  
From the W. Philip Keller Collection of U.S. Colonials.

### 1652 Noe-33 Pine Tree Sixpence, AU Details

- 3004** 1652 Pine Tree Sixpence—Environmental Damage—NGC Details. AU. Crosby 1-A, Noe-33, W-670, R.3. 34.0 grains. Most known examples of Noe-33 have the obverse clearly off-center, as does this piece, with the reverse normally centered. Traces of luster are still evident, with lightly corroded surfaces. Listed on page 37 of the 2011 *Guide Book*. MRB XF40.

### Late State 1652 Noe-8.2 Pine Tree Shilling

- 3005** 1652 Pine Tree Shilling, Large Planchet PCGS Genuine. Noe-8.2, W-740, R.6. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been heavily clipped. The 48.76-grain weight is two-thirds of the shilling standard employed at the time, suggesting that one-third of the original diameter is missing.  
The Noe-8.2 variety is a late die state of Noe-8, with a heavy break on the beads of the reverse, at about 11:30. This piece, while heavily clipped, has light to medium gray surfaces. The central designs and beads on both sides are completely intact. Listed on page 37 of the 2011 *Guide Book*. MRB Fine 12.

- 3006** 1652 Pine Tree Shilling, Large Planchet—Damaged—NGC Details. Fine. Crosby 4-F, Noe-2, W-700, R.5. 62.3 grains. This piece has light to medium gray surfaces with some bending that probably occurred well after production. Some obverse features have the appearance of being reengraved or strengthened, but if so, the workman was a true artisan. Listed on page 37 of the 2011 *Guide Book*. MRB Good 5.

**1652 Pine Tree Shilling, XF45  
Large Planchet, Noe-1**

- 3007** 1652 Pine Tree Shilling, Large Planchet XF45 NGC. Crosby 12-I, Noe-1, W-690, R.2. The Pine Tree shilling was minted as late as 1682, but always retained the 1652 date. This issue is considered the quintessential Colonial coin. The W-690 variety is recognized by the position of the Pine Tree pointing to the S at 12 o'clock on the obverse. This coin shows a few planchet flaws below the roots of the tree, and a few die breaks on the reverse near the date. Listed on page 37 of the 2011 *Guide Book*. MRB XF40. Ex: William C. Boston; ANA Convention Sale (Jim Kelly, 8/1956), lot 8.  
From the W. Philip Keller Collection of U.S. Colonials. (#23)

**1652 Pine Tree Shilling, Fine 15  
Small Planchet, Noe-16 Variety**

- 3008** 1652 Pine Tree Shilling, Small Planchet Fine 15 NGC. Crosby 21-L, Noe-16, W-835, R.2. The pine tree motif used on the 1652-dated Massachusetts coinage was taken from the flag of the Massachusetts Bay Colony. The small planchet shillings were produced in large numbers, beginning circa 1675. The W-835 is an available variety, distinguished by the position of the top of the pine tree pointing to the left side of S in the legend. The present coin is well-centered, with moderate, even wear showing on the strongly impressed devices. Listed on page 37 of the 2011 *Guide Book*. MRB Fine 15.  
Purchased from Max L. Kaplan (8/4/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#24)

**1652 Pine Tree Shilling, XF40  
Small Planchet, Noe-26**

- 3009** 1652 Pine Tree Shilling, Small Planchet XF40 NGC. Crosby 15-O, Noe-26, W-900, R.5. The small planchet Pine Tree shillings were actually produced circa 1675-1682, although all pieces bear the 1652 date. The small planchet issues were struck on a screw press, while the earlier large planchet coins were struck on a rocker press. The coin offered here represents the very scarce W-900 variety, identified by the position of the tree top pointing to the right edge of the V in the legend. This example is struck a little off-center to the left on the obverse, with attractive, well preserved surfaces. Listed on page 37 of the 2011 *Guide Book*. MRB XF45. Census: 8 in 40, 18 finer (9/10).  
Purchased from Paul Seitz (8/9/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (#24)

- 3010** Group of 11 Colonial Coins Uncertified. St. Patrick farthings, three pieces Fair to Good, all Ex: W.E. Johnson (3/20/1961); 1773 Virginia halfpence, four pieces, No Period, Newman 9-B, Good, Ex: Behringer (8/21/1958); No Period, Newman 9-B, Good, Ex: Adamski (2/7/1959); With Period, Newman 23-Q, VG, Ex: Becker Est. (Brunnerville, 3/18/1961); With Period, Newman 26-Y, AG, Ex: R. Donaldson (2/25/1962); 1778 Machin's Mills halfpence, three pieces, Vlack 11-78A, VG, Ex: A.D. Hoch (1/28/1962); Vlack 11-78A, Fair, Ex: R. Donaldson (2/25/1962); Vlack 13-78B, AG, Ex: A.D. Hoch (3/17/1962); Mexico half real, 1779-Mo FF, VG, Ex: Earl Fair (8/1951).  
From the W. Philip Keller Collection of U.S. Colonials. (Total: 11 coins)

- 3011** (1670-75) St. Patrick Farthing—Damaged—NGC Details. VG. Breen-213. Stars in legend, "sea beasts" below the king. Surfaces are chocolate-brown save for the yellow-brass of the splasher. The obverse, though well-worn, displays nicely, though the reverse has a number of digs at the interior that account for the designation. Listed on page 39 of the 2011 *Guide Book*. MRB Good 4.  
Purchased from Stack's (7/17/1962).  
From the W. Philip Keller Collection of U.S. Colonials. (#42)

- 3012** (1670-75) St. Patrick Farthing Fine 12 NGC. Breen-208. "Nothing below king," per Breen, and this piece is notable for the absence of a splasher. Chocolate-brown color overall with a planchet void noted at the rim over the B in PLEBS. Listed on page 39 of the 2011 *Guide Book*. MRB Fine 15.  
Purchased from Stack's (10/11/1952).  
From the W. Philip Keller Collection of U.S. Colonials. (#42)

**Important Undated St. Patrick Farthing  
Breen-213, VF30**

- 3013** (1670-75) St. Patrick Farthing VF30 PCGS. CAC. Breen-213. "Sea beasts" below the king, with stars following the legend. Housed in a green-label PCGS holder, this piece has dark brown fields and lighter tan devices. The surfaces are quite smooth and attractive, certainly above average for one of these coins.

An item of important historical significance, as the farthings clearly circulated in New Jersey. MRB VF20. (#42)

**Breen-208 St. Patrick Farthing  
VF30, Possibly Finer**

- 3014** (1670-75) St. Patrick Farthing VF30 NGC. Breen-208. Nothing below king. The brass splasher is more subtle than often seen but distinctly present as a caramel patch at the crown, compared to the blue-inflected chocolate-brown colors present elsewhere. Graded at VF30 by NGC but with far superior glossy luster and detail for the issue. Listed on page 39 of the 2011 *Guide Book*. MRB XF40.

Ex: Paul S. Seitz (3/16/1963), lot 970.

From the W. Philip Keller Collection of U.S. Colonials. (#42)

**Choice VF St. Patrick Farthing  
Breen-212, 'Masonic Punctuation'**

- 3015** (1670-75) St. Patrick Farthing VF35 NGC. Breen-212. One of Breen's stronger flights of fancy, the "Masonic Punctuation" has a three-dot symbol after REX and PLEBS, a symbol now often associated with logic proofs in mathematics. Great surface quality, the brass splasher low and under the crown, simply a great all-around example of the St. Patrick farthing with only a few rim faults. Listed on page 39 of the 2011 *Guide Book*. MRB XF45.

Purchased from Douglas (10/7/1953).

From the W. Philip Keller Collection of U.S. Colonials. (#42)

- 3016** (1670-75) St. Patrick Halfpenny—Damaged—NGC Details. Good. Vlack 4-E, Breen-204. "Very rare" per Breen. Extensive wear has rendered the surfaces smooth with deep walnut-brown color. A depression is noted within the harpstrings, while the reverse has a number of small digs intermixed with planchet flaws. Listed on page 39 of the 2011 *Guide Book*. MRB Good 4.

Purchased from W.E. Johnson (3/20/1961).

From the W. Philip Keller Collection of U.S. Colonials.

**Vlack 4-E, Breen-204 St. Patrick Halfpenny  
An Attractive VF Example**

- 3017** (1670-75) St. Patrick Halfpenny VF20 NGC. Vlack 4-E, Breen-204. Described as "very rare" in Breen. Void in splasher area; it probably fell out prior to striking, as the crown design seems unaffected. A smooth VF piece, disturbed at places on the rim as usually seen but with few interior troubles. Blue and violet tints grace deep brown surfaces. Listed on page 39 of the 2011 *Guide Book*. MRB VF20.

Purchased from C.W. Fletcher (9/12/1964).

From the W. Philip Keller Collection of U.S. Colonials. (#46)

**3018** (c. 1828) American Plantations 1/24 Part Real, Restrike XF45 NGC. Newman 5-D, W-1160, R.5. A tin restrike from c. 1828, struck from the original dies but in a non-original configuration. Lightly worn with considerable oxidation around the peripheral obverse and over much of the reverse. Listed on page 39 of the 2011 *Guide Book*. MRB AU50.

Ex: Hollinbeck-Kagin (6/29/1963), lot 153.

From the W. Philip Keller Collection of U.S. Colonials. (#52)

**3019** (c. 1828) American Plantations 1/24 Part Real, Restrike AU50 NGC. Newman 4-E, W-1155, R.5. Even as a restrike, the American Plantations tokens are rare. This Newman 4-E example has areas of significant oxidation at the rims as well as considerable overall texture, yet the general eye appeal is strong and the coin shows little wear. Listed on page 39 of the 2011 *Guide Book*. MRB AU50.

Ex: James Kelly (9/1951), lot 589.

From the W. Philip Keller Collection of U.S. Colonials. (#52)

**London Elephant Token, XF45  
Elusive Thin Planchet Variety, W-12040**

**3020** (1694) London Elephant Token, Thin Planchet XF45 PCGS. Hodder 2-B, W-12040, R.2. The London Elephant tokens were produced at the Tower Mint in London around 1694, and it is doubtful that they circulated to any extent in the Colonies. The present coin displays the elephant's tusks near the rim on the obverse, and the dagger in the first quadrant of the shield on the reverse, identifying it as a representative of the W-12040 variety. The design elements are boldly defined on this medium brown example, with a few planchet cracks on the obverse the only distractions of note. This example was struck on a thin planchet, much more elusive than the thick planchet variety. Listed on page 44 of the 2011 *Guide Book*. Population: 1 in 45, 9 finer (9/10). MRB VF30. (#58)

**3021** (1694) London Elephant Token, Thick Planchet Fine 15 NGC. Hodder 2-B, W-12040, R.2. A charming example of this desirable Colonial issue. The elephant is fully outlined, and the reverse shows nice design definition. A few small marks and planchet flaws on either side do not merit individual mention. Listed on page 44 of the 2011 *Guide Book*. MRB Fine 12.

Purchased from "Douglas" (9/27/1951).

From the W. Philip Keller Collection of U.S. Colonials. (#55)

**Seldom-Seen 1694 Carolina Elephant Token  
PROPRIETORS, W-12120, VF20**

**3022** 1694 Carolina Elephant Token, PROPRIETORS VF20 PCGS. Hodder 2-F, W-12120, R.6. The "corrected" version with an O punched over an E as the final vowel in PROPRIETORS. Thickness of planchet ambiguous due to the holder. The London "Elephant" tokens that reference American Colonies enjoy great popularity, matched only by their great rarity. This is a glossy chocolate-brown example with considerable remaining detail. Planchet voids are scattered on each side, as seen on many survivors, but post-striking marks are few. A remarkable opportunity for the Colonial enthusiast. Listed on page 45 of the 2011 *Guide Book*. Population: 2 in 20, 4 finer (9/10). MRB Fine 15. (#73)

**3023 Large Lot of Two Dozen Rosa Americana Pieces Uncertified. Undated Twopence:** Obverse Good, Reverse blank, Ex: W.E. Johnson (6/17/1959); **Undated Twopence, Motto on Label, Martin 2-B:** VG, Porous, Ex: W.E. Johnson (6/17/1959); **1722 Halfpenny, DEI GRATIA, Martin 3-C:** AG, Damaged, Ex: W.E. Johnson (6/17/1959); **1722 Penny, GEORGIUS, VTILE DVLCE, Martin 2-A, Short Ribbons:** VG, Porous, Ex: F. Langworthy (3/22/1961); **1722 Penny, UTILE DULCI, Martin 2-C:** XF, Pitted, Cleaned, Recolored, Ex: Richard Picker (8/11/1961); VF, Porous, Scratched, Ex: W.E. Johnson (6/17/1959); VG, Pitted, Ex: Richard Picker (8/11/1961); Good, Ex: W.E. Johnson (6/17/1959); **1722 Penny, UTILE DULCI, Martin 2-D:** XF, Heavy Corrosion, Ex: W.E. Johnson (6/17/1959); VF, Porous, Ex: W.E. Johnson (6/17/1959); VG, Ex: W.E. Johnson (6/17/1959); VG, Cleaned, Ex: R.T. Hooper (10/25/1966); Good, Porous, Ex: Richard Picker (2/12/1962); **1722 Penny, UTILE DULCI, Martin 3-D:** VG, Cleaned, Pitted, Ex: G. Creed (9/3/1960); **1723 Penny, No Stop After Date, Martin 2-E:** AG, Ex: W.E. Johnson (6/17/1959); AG, Ex: Greco (9/23/1960); **1723 Penny, No Stop After Date, Small 3, Martin 2-E:** VF, Cleaned, Ex: Richard Picker (8/11/1961); VG, Cleaned, Ex: W.E. Johnson (6/17/1959); VG Scratched, Ex: Greco (9/23/1960); VG, Porous, Ex: Greco (9/23/1960); **1723 Penny, No Stop After Date, Large 3, Martin 2-E:** VG, Porous, Ex: Richard Picker (8/11/1961); **1723 Penny, Stop After Date, Martin 2-F:** Fine, Porous, Ex: J.D. Frates (12/5/1960); **1723 Twopence, Martin Obverse 4:** VG, Ex: W.E. Johnson (6/17/1959); AG, Ex: W.E. Johnson (6/17/1959).  
From the W. Philip Keller Collection of U.S. Colonials. (Total: 24 coins)

**3024 Undated Rosa Americana Twopence, Label VF30 NGC. Martin 2-B, W-1322, R.6.** A double-struck specimen of this rare variety, with the doubling showing strongly on the bust. This undated twopence is identified as a representative of the W-1322 variety by the placement of the motto UTILE DULCI on a label, rather than the field. Listed on page 40 of the 2011 *Guide Book*. MRB VF20.  
Purchased from Douglas (6/16/1952).  
From the W. Philip Keller Collection of U.S. Colonials. (#92)

**3025 1722 Rosa Americana Halfpenny, D. G. REX—Environmental Damage—NGC Details. AU. Martin 2-B, W-1218, High R.4.** This 1722 Rosa Americana halfpenny is an example of the scarce W-1218 variety, with the characteristic abbreviations AMERI and D:G: in the legends. This piece exhibits some areas of light porosity, and some marks are present on the obverse rim, but the devices are generally well preserved. Listed on page 40 of the 2011 *Guide Book*. MRB XF40.  
Ex: Fifty First Sale (New Netherlands, 6/1958), lot 31.  
From the W. Philip Keller Collection of U.S. Colonials.

**3026 1722 Rosa Americana Halfpenny, DEI GRATIA, UTILE XF40 NGC. Martin 3-C, W-1222, R.2.** A few areas of orange mix with darker brown patina on both sides. The peripheral details are partially obscured by the surface porosity, but the central design elements are bold. Listed on page 40 of the 2011 *Guide Book*. MRB VF30.  
Purchased from Richard Picker (8/11/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (#104)

**3027 1722 Rosa Americana Halfpenny, DEI GRATIA, UTILE VF30 NGC. Martin 3-C, W-1222, R.2.** Each side of this piece has deep brown patination with just a hint of lighter colors in the protected areas. The surfaces show moderate porosity but there are no individually significant marks. Listed on page 40 of the 2011 *Guide Book*. MRB VF30.  
Ex: James Kelly Auction (2/8/1954), lot 37.  
From the W. Philip Keller Collection of U.S. Colonials. (#104)

**1722 Rosa Americana Halfpenny, AU55  
DEI GRATIA, W-1222**

**3028 1722 Rosa Americana Halfpenny, DEI GRATIA, UTILE AU55 NGC. Martin 3-C, W-1222, R.2.** An especially well preserved example of the W-1222 Rosa Americana halfpenny dated 1722, with the diagnostic UTILE and DEI GRATIA fully spelled out. The medium brown surfaces are smooth with no porosity, and hints of red outline the devices. Listed on page 40 of the 2011 *Guide Book*. MRB AU50. Census: 1 in 55 Brown, 3 finer (9/10).  
Purchased from Richard Picker (8/11/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (#104)

**3029 1722 Rosa Americana Penny, VTILE VF30 NGC. Martin 2-A, W-1256, R.6.** Several varieties of the 1722 Rosa Americana penny are known, with this specimen representing the rare W-1256 type. Note that NGC has mistakenly called this piece the UTILE DULCI variety on the holder, but the spelling on the coin is definitely VTILE DVLCI, with GEORGIUS in the obverse legend. Moderate, even wear shows on the devices of this coin, but the planchet was well produced, with no areas of granularity. Listed on page 40 of the 2011 *Guide Book*. MRB VF25.  
Ex: MANA Convention Sale (New Netherlands, 10/1953).  
From the W. Philip Keller Collection of U.S. Colonials. (#110)

**3030 1722 Rosa Americana Penny, UTILE VF30 NGC. Martin 2-D, W-1268, High R.4.** The Rosa Americana coinage was made of Bath metal, a composition of copper, zinc, and silver, and the weight of the pieces was considerably less than that of the corresponding English copper denominations. As a result, the coinage was not readily accepted in the Colonies. The present coin shows moderate, even wear on the dark brown surfaces, and the rosettes before and after ROSA AMERICANA identify it as an example of the very scarce W-1268 variety. Listed on page 40 of the 2011 *Guide Book*. MRB VF20. Census: 3 in 30 Brown, 12 finer (9/10).  
Purchased from Richard Picker (8/11/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (#113)

**3031 1722 Rosa Americana Penny, UTILE—Corroded—ANACS. VF30 Details. Martin 2-D, W-1268, High R.4.** The 1722 Rosa Americana penny is scarcer than its 1723 counterpart. This specimen has grayish-brown patina over moderately corroded surfaces. Although there are no significant marks, we note two small areas of corrosion at the left and right sides of the reverse. Listed on page 41 of the 2010 *Guide Book*. MRB VF20.  
Purchased from Kenneth W. Rendell (9/29/1958).  
From the W. Philip Keller Collection of U.S. Colonials.

**3032 1722 Rosa Americana Penny, UTILE—Damaged—NGC Details. XF. Martin 2-D, W-1268, High R.4.** In spite of some rim damage at 11 o'clock on the obverse, the present coin is an attractive example of the scarce W-1268 variety, identified by the rosettes before and after ROSA AMERICANA. The smooth chocolate-brown surfaces show a tiny patch of red near the eye. Listed on page 40 of the 2011 *Guide Book*. MRB VF30.  
Ex: MANA Convention Sale (New Netherlands, 10/1953).  
From the W. Philip Keller Collection of U.S. Colonials.

- 3033 1722 Rosa Americana Penny, UTILE XF40 NGC. Martin 2-D, W-1268, High R.4.** According to Thomas Snelling, writing in 1762, the Rosa Americana coinage was struck by “an engine that raised and let fall a heavy weight upon them.” The coins are surprisingly well struck for an issue coined on a drop press. The present coin shows planchet flaws at 7 o'clock on the obverse and 11 o'clock on the reverse. The W-1268 variety is identified by the rosettes located before and after ROSA AMERICANA. Listed on page 40 of the 2011 *Guide Book*. MRB VF30.  
*Purchased from Richard Picker (8/11/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#113)*

**UTILE DULCI 1722 Rosa Americana Penny  
Extremely Rare Martin 3-D, W-1272, XF45**

- 3034 1722 Rosa Americana Penny, UTILE XF45 NGC. Martin 3-D, W-1272, R.7.** The extremely rare Obverse 3, which shows no stop after the word REX. Both sides show an intriguing combination of texture and smoothness, of deep browns and lighter peaches and apricots. Though lightly worn, this is an impressively appealing Choice XF coin. Listed on page 40 of the 2011 *Guide Book*. MRB XF40.  
*Purchased from Richard Picker (8/11/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#113)*

- 3035 1722 Rosa Americana Twopence XF45 NGC. Martin 4-C, W-1330, High R.6.** Obverse 4, unlike Obverse 3, shows a stop after the word REX. Rich cinnamon-brown luster characterizes this coin, and hints of blue and violet appear close to the rims. Listed on page 41 of the 2011 *Guide Book*. MRB XF40.  
*Purchased from Richard Picker (8/11/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#116)*

- 3036 1722 Rosa Americana Twopence—Environmental Damage—NGC Details. AU. Martin 3-C, W-1326, R.6.** Stop after REX. Well-defined with color that ranges from muted brass-yellow to reddish-orange and violet-brown. The dark hues and patterns at the obverse margins and through the reverse suggest that the coin may have been buried or encountered other environmental damage. Listed on page 41 of the 2011 *Guide Book*. MRB XF45.  
*Purchased from Richard Picker (10/25/1966).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#116)*

**1723 Rosa Americana Halfpenny, XF45  
Crowned Reverse, Martin 3-F, W-1236**

- 3037 1723 Rosa Americana Halfpenny, Crown XF45 NGC. Martin 3-F, W-1236, R.5.** Nothing after date, Crowned Rose reverse. All varieties of the 1723 Rosa Americana halfpenny are rare in an absolute sense, though the Martin 3-F is the most accessible. Considerable peach and rose overtones visit the brown surfaces of this still-glossy example, carefully preserved despite light wear. Listed on page 41 of the 2011 *Guide Book*. MRB XF40.  
*Purchased from Richard Picker (8/11/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#119)*

- 3038 1723 Rosa Americana Penny VF30 NGC. Martin 2-E, W-1278, R.2.** This 1723 Rosa Americana penny exhibits medium brown surfaces with a slightly granular texture, and moderate, even wear on the devices. This specimen features a period after REX, and no period after 1723, indicative of the W-1278 variety. This coin also features Breen's Large 3 in the date. Listed on page 41 of the 2011 *Guide Book*. MRB VF25.  
*Purchased from Richard Picker (8/11/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#125)*

- 3039 1723 Rosa Americana Penny XF40 NGC. Martin 2-F, W-1282, R.7.** The very rare W-1282 variety of the 1723 Rosa Americana penny is recognized by the presence of a period after REX and another period after 1723. This coin features lightly worn design elements on a well produced planchet, with just a few areas of granularity. Listed on page 41 of the 2011 *Guide Book*. MRB VF30.  
*Ex: 54th Auction Sale (New Netherlands, 4/1960), lot 15.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#125)*

- 3040 1723 Rosa Americana Penny—Burnished—NGC Details. AU. Martin 2-E, W-1278, R.2.** No stop after the date. While the violet-brown surfaces of this well-detailed example have been lightly burnished, it is a far better-looking coin than the designation might suggest. Both sides are minimally abraded. Listed on page 41 of the 2011 *Guide Book*. MRB XF40.  
*Ex: Neumoyer (Stack's, 5/5/1960), lot 785.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#125)*

- 3041 1723 Rosa Americana Penny AU50 NGC. Martin 2-E, W-1278, R.2.** Large 3. The top of the 3 in the date is compact, while the loop is large. Chocolate-brown patina drapes both sides of this well preserved example. Some weakness on the high points is consistent with the grade. An above-average representative. Listed on page 41 of the 2011 *Guide Book*. MRB XF45.  
*Purchased from Richard Picker (8/11/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#125)*

- 3042 1723 Rosa Americana Penny AU53 PCGS. Martin 2-E, W-1278, R.2.** No stop after date. A luminous and lightly circulated example that shifts between mahogany and brick-red hues. Struck from worn dies that show degradation at the upper reverse. Listed on page 41 of the 2011 *Guide Book*. MRB XF40. (#125)

- 3043 1723 Rosa Americana Penny AU55 NGC. Martin 2-E, W-1278, R.2.** This charming 1723 Rosa Americana penny displays sharply detailed devices and well preserved, medium brown fields. There is no period after the date (just a deceptive, tiny corrosion spot), identifying this piece as an example of the W-1278 variety. The date features a small numeral 3. Listed on page 41 of the 2011 *Guide Book*. MRB XF40.  
*Purchased from Richard Picker (9/5/1962).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#125)*

- 3044** No lot.

- 3045 1723 Rosa Americana Twopence—Environmental Damage—NGC Details. VF. Martin 4-E, W-1346, R.3.** The W-1346 variety is characterized by the absence of a stop after both REX and the date. The present coin exhibits some lightly corroded areas, with moderately worn devices and chocolate-brown surfaces. Listed on page 41 of the 2011 *Guide Book*. MRB Fine 15.  
*Purchased from Jim Kelly (4/3/1952).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

- 3046 1723 Rosa Americana Twopence XF45 NGC. Martin 4-F, W-1350, R.6.** While the Rosa Americana coinage did not circulate widely in the Colonial economy, there is some evidence that it did find a measure of acceptance in England. Most specimens known today come from British sources. The present coin is an example of the rare W-1350 variety, with a stop after the date and no stop after REX. This piece is a charming, lightly worn specimen, with a well produced planchet and chocolate-brown surfaces. Listed on page 41 of the 2011 *Guide Book*. MRB XF40.  
*Purchased from the Empire Coin Company (5/31/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#128)*

**3047 1723 Rosa Americana Twopence—Environmental Damage—NGC Details. AU. Martin 3-D, W-1334, R.2.** The W-1334 variety is distinguished by the stop after REX, coupled with the lack of a stop after the date. This specimen seems to have been buried at some point, as evidenced by the unnatural, “dirty” condition of the surfaces, but only slight traces of actual wear can be detected on the devices. Listed on page 41 of the 2011 *Guide Book*. MRB VF35. Purchased from the Empire Coin Company (5/31/1960). From the W. Philip Keller Collection of U.S. Colonials.

**3048 1723 Rosa Americana Twopence AU53 NGC. Martin 3-D, W-1334, R.2.** The surfaces of this unusually well preserved Rosa Americana twopence alternate between glossy, medium brown and lighter golden-brown color. The planchet was well produced, with a slightly granular texture. The period after REX, with no period after the date, identifies this piece as a representative of the W-1334 variety. Listed on page 41 of the 2011 *Guide Book*. MRB AU50. Purchased from Richard Picker (8/11/1961). From the W. Philip Keller Collection of U.S. Colonials. (#128)

**3049 1723 Rosa Americana Twopence AU55 PCGS. Martin 3-D, W-1334, R.2.** A boldly struck chocolate-brown Irish import copper that retains glimpses of the initial tan-brown color within the legends. Luster emerges throughout the borders and devices, and no abrasions are visible. Listed on page 41 of the 2011 *Guide Book*. Population: 17 in 55, 29 finer (9/10). MRB XF45. (#128)

**3050 1723 Rosa Americana Twopence AU55 NGC. Martin 3-D, W-1334, R.2.** William Wood intended the Rosa Americana coinage to be easily identified as an American coinage, much different from the British and foreign coins that circulated throughout the Colonies. The present coin is a well preserved specimen of the W-1334 variety, with a period after REX, but no period after the date. The surfaces are medium to golden-brown, on a slightly granular planchet. Listed on page 41 of the 2011 *Guide Book*. MRB AU55. Purchased from Richard Picker (10/25/1966). From the W. Philip Keller Collection of U.S. Colonials. (#128)

**3051 1723 Rosa Americana Twopence AU55 NGC. Martin 3-D, W-1334, R.2.** The contract to strike the Rosa Americana coinage was granted to William Wood of Wolverhampton, England by King George I. Wood intended to make the coinage immediately recognizable as an American medium of exchange, but the coins were perceived as underweight, and the issue never circulated readily in the Colonies. The present coin, identified as a W-1334 piece by the period after REX and no period after 1723, is a particularly well preserved specimen, with sharply detailed design elements and smooth surfaces. Listed on page 41 of the 2011 *Guide Book*. MRB AU55. Purchased from Richard Picker (10/25/1966). From the W. Philip Keller Collection of U.S. Colonials. (#128)

#### 1723 Rosa Americana Twopence, AU58 Popular W-1334 Variety

**3052 1723 Rosa Americana Twopence AU58 NGC. Martin 3-D, W-1334, R.2.** The Rosa Americana coinage was proposed by William Wood, an English metallurgist, to ease a shortage of coinage in the Colonies. The pieces were perceived as underweight, and their circulation was fiercely resisted by the Colonists. The coin offered here represents the W-1334 variety, with a stop after REX and No stop after the date. This example is a charming near-Mint specimen, with sharply detailed design elements and a well produced planchet. The surfaces are highlighted by many areas of original red. Listed on page 41 of the 2011 *Guide Book*. MRB AU55. Purchased from Richard Picker (8/11/1961). From the W. Philip Keller Collection of U.S. Colonials. (#128)

#### 1722 Hibernia Farthing, Martin 1.1-A.1 Elusive Early Pattern Issue, Choice XF

**3053 1722 Hibernia Farthing XF45 NGC. Nelson-2, Breen-168, Martin 1.1-A.1, W-12200, R.7.** Ten harp strings. GEORGIUS is at the left obverse rim, with (dot) D : G : REX (dot) to the right. On the reverse, the figure of Hibernia holds the 10-stringed harp before her, rather than behind as on many of the 1723 farthing types. The Garrett III (Bowers and Ruddy, 10/1981, lot 1257) catalog says, “Believed to be a pattern issue. ... Exceedingly rare issue. It is believed that only four to six specimens exist.” Breen posited that eight to 10 were known in his 1988 *Complete Encyclopedia*, calling it a prototype.

This appears to be only the second time we have handled an example, the first being the former Newcomer-Garrett specimen, an MS63 Brown PCGS piece. Glossy brownish-black, on a nice planchet with no distractions and struck in medal rather than coin turn. The total certified population at NGC and PCGS is a measly four coins. Census: 1 in 45, 0 finer (9/10). Listed on page 42 of the 2011 *Guide Book*. MRB XF40.

Ex: Robert A. Vlack (4/17/1961).

From the W. Philip Keller Collection of U.S. Colonials. (#161)

**3054 Large Assortment of 53 Hibernia Pieces Uncertified. 1722 Halfpenny, Harp Left, Eight Harpstrings:** VG, Pitted, Ex: W.E. Johnson (4/21/1959); **1722 Halfpenny, Harp Left, 11 Harpstrings, Martin 4-Bc:** VF, Corroded, Ex: Richard Picker (11/22/1958); **1722 Halfpenny, Harp Right:** VF Corroded, Ex: Robert A. Vlack (11/13/1976); **1724 Halfpenny:** Good, Porous, Ex: Van Horn (3/10/1960); AG, Ex: Kenneth W. Rendell (2/22/1959).  
From the W. Philip Keller Collection of U.S. Colonials. (Total: 53 coins)

**3055 1722 Hibernia Halfpenny, Type One, Harp Left—Burnished—NGC Details. VF. Martin 4.2-Bb.2, W-12690, R.6.** A rare variety of the Harp Left, 8 Strings type. Dark patination in the fields contrasts against the lighter design elements. There are no mentionable marks on either side. A thin die crack runs northwest to the rim from the figure's elbow on the reverse. Listed on page 42 of the 2011 *Guide Book*. MRB VF20.  
Purchased from D. Sonderman (7/3/1976).  
From the W. Philip Keller Collection of U.S. Colonials. (#167)

**3056 1722 Hibernia Halfpenny, Type One, Harp Left VF30 ANACS. Martin 3.2-Bb.3, R.4.** An early die state, this piece shows slight crumbling around the G of GRATIA. Struck on a slightly oval planchet, this halfpenny has smooth and highly attractive olive and dark brown surfaces, essentially problem-free. MRB VF30.  
Purchased from Hutter (10/8/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#167)

**3057 1722 Hibernia Halfpenny, Type One, Harp Left XF45 NGC. Martin 4.4-Bc.1, W-12790, R.5.** Occasional reddish accents intermingle with medium brown patina on both sides. The obverse exhibits several clash marks, most noticeably above the head of George from the reverse denticles. The effigy on the reverse shows the usual softness. Peppered abrasions are entirely inconsequential. Listed on page 42 of the 2011 *Guide Book*. MRB XF45.  
Purchased from Richard Picker (11/2/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#167)

## Double-Struck 1722 Hibernia Halfpenny Choice Extremely Fine, W-12690

**3058 1722 Hibernia Halfpenny, Type One, Harp Left XF45 NGC. Martin 4.1-Bb.1, W-12690, R.5.** An impressive double-struck example with prominent doubling on both sides. The reverse die approaches its terminal state with several significant die cracks and two retained cuds. Charming chocolate-brown patina enhances both sides. The reverse is softly defined, as one would expect. A small planchet crack is noted in the lower left of the obverse. An interesting representative of this elusive variety. Listed on page 42 of the 2011 *Guide Book*. MRB XF45.  
Ex: Virgil Brand; Richard Picker (11/2/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#167)

**3059 1722 Hibernia Halfpenny, Type One, Harp Left AU55 NGC. Martin 3.7-Ba.1, W-12670, R.6.** A die defect in the field to the right of George's eye is a good clue for this seldom-seen variety. Reddish-brown patina in the centers gives way to deeper coloration around the borders. The surfaces appear remarkably clean to the unaided eye. The details are crisply defined. Listed on page 42 of the 2011 *Guide Book*. MRB AU50.  
Ex: FUN Convention Auction (1/8/1959), lot 487; Richard Picker (2/7/1959)  
From the W. Philip Keller Collection of U.S. Colonials. (#167)

**3060 1722 Hibernia Halfpenny, Type One, Harp Left MS62 Brown NGC. Martin 4.3-Bc.1, W-12730, R.4.** A tiny raised die line above the leftmost stop on the reverse (an "eyebrow") serves as a useful diagnostic. Delightful burgundy patina drapes both sides of this well-preserved piece. The effigy's head on the reverse is weakly struck, but the obverse is bold. Listed on page 42 of the 2011 *Guide Book*. MRB MS60.  
Purchased from Richard Picker (8/29/1971).  
From the W. Philip Keller Collection of U.S. Colonials. (#167)

**3061 1722 Hibernia Halfpenny, Type Two, Harp Right VF25 NGC. Martin 4.20-C.4, W-12810, R.5.** Deep brown patina in the fields contrasts against lighter coloration across the devices. There are no marks worthy of mention. An appealing midrange example with nice design definition. Listed on page 42 of the 2011 *Guide Book*. MRB VF25.  
Purchased from Richard Picker (11/14/1960).  
From the W. Philip Keller Collection of U.S. Colonials. (#170)

**3062 1722 Hibernia Halfpenny, Type Two, Harp Right AU53 NGC. Martin 5.2-C.2, W-12810, R.5.** Bowers (2009) writes that this type (Harp Right) is "one of the more elusive in the Hibernia series." Better-grade examples are particularly difficult to locate. This medium brown specimen has minimal marks and a boldly struck obverse. The reverse shows soft design definition and significant die spalling (chipping), evidence that this piece was struck late in the life of the dies. Listed on page 42 of the 2011 *Guide Book*. MRB AU50.  
Purchased from Richard Picker (11/2/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#170)

**3063 1723 Hibernia Farthing, D:G:REX XF45 NGC. Martin 1.1-Bc.1, W-12240, R.5.** Eleven harp strings, dot after 1723. Misidentified by NGC as a DEI GRATIA type. Minor contact and a small planchet indent on the reverse, but still quite appealing with lustrous brown surfaces. Listed on page 42 of the 2011 *Guide Book*. MRB XF40.  
Purchased from B.M. Douglas (8/19/1959).  
From the W. Philip Keller Collection of U.S. Colonials. (#173)

- 3064 1723 Hibernia Farthing, DEI GRATIA VF35 NGC. Martin 2.1-Bc.4, R.4.** Eleven harp strings, dot after 1723. Struck from late-state dies on both sides, this piece shows a web of fine cracks on the reverse, but a heavy crack on the obverse has formed a retained cud atop GRAT. Smooth and attractive dark-brown, distraction-free surfaces with much collector interest. Listed on page 42 of the 2011 *Guide Book*. MRB VF30.  
Ex: Hollinbeck-Kagin (4/18/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (#176)
- 3065 1723 Hibernia Farthing, DEI GRATIA XF45 NGC. Martin 3.22-Ba.1, R.7.** Nine harp strings, dot after 1723. Another very rare die pairing, one of three Martin varieties for the nine strings subtype. Glossy brown surfaces show pleasing appeal, despite a weak strike on the obverse at DEI (dot) G. Listed on page 42 of the 2011 *Guide Book*. MRB XF40.  
Purchased from Hutter (10/19/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#176)
- 3066 1723 Hibernia Farthing, DEI GRATIA XF45 NGC. Martin 3.8-Bd.1, R.4.** Twelve harp strings, dot after 1723. A nice midgrade example to represent the 12 harp strings farthing subtype, with a typically glossy brown planchet that shows a couple of interesting die breaks/cuds and some minor die rust. Listed on page 42 of the 2011 *Guide Book*. MRB XF40.  
Ex: Richard Picker (11/2/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#176)
- 3067 1723 Hibernia Farthing, DEI GRATIA AU50 NGC. Martin 3-Bc, W-12350, R.3.** Eleven harp strings, dot after 1723. The smooth dark-brown surfaces boast ample luster remaining on a well-struck and well-centered planchet. Listed on page 42 of the 2011 *Guide Book*. MRB XF45.  
Purchased from Hutter on 10/19/1954.  
From the W. Philip Keller Collection of U.S. Colonials. (#176)
- 3068 1723 Hibernia Farthing, DEI GRATIA AU50 NGC. Martin 3.11-Bc.2, R.7.** Eleven harp strings, dot after 1723. Among the rarer varieties for the 11 harp strings, dot subtype, for which Sydney Martin lists 28 die pairings. The attractive brown surfaces are lustrous but show some small areas of corrosion, along with a moderately weak strike at the upper reverse. Appealing despite some minor drawbacks. Listed on page 42 of the 2011 *Guide Book*. MRB XF40.  
Purchased from B.M. Douglas (8/22/1959).  
From the W. Philip Keller Collection of U.S. Colonials. (#176)
- 3069 1723 Hibernia Farthing, DEI GRATIA AU53 NGC. Martin 3.1-Bc.2, R.4.** Eleven harp strings, dot after 1723. A glossy medium-brown, lightly circulated example of this pairing. Contact is minor, and a tiny patch of carbon before the nose is even less so. Listed on page 42 of the 2011 *Guide Book*. MRB XF45.  
Ex: Richard Picker (8/11/1962).  
From the W. Philip Keller Collection of U.S. Colonials. (#176)
- 3070 1723 Hibernia Farthing, DEI GRATIA AU53 NGC. Martin 3.14-Bc.6, R.6.** Eleven harp strings, dot after 1723. Smooth glossy-brown surfaces show minor circulation and no mentionable distractions other than a couple of thin scrapes on the reverse. A rarer Martin die pairing. Listed on page 42 of the 2011 *Guide Book*. MRB AU50.  
Ex: Richard Picker (12/29/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#176)
- 3071 1723 Hibernia Farthing, DEI GRATIA AU55 NGC. Martin 3.7-Bc.2, R.5.** Eleven harp strings, dot after 1723. This is an attractive, glossy brown Choice AU piece, with the obverse showing a near-terminal die state. Numerous cracks appear: through GRA, through IA to beneath the chin, a long one from A (dot) REX through the bust tip and to the rim before G. The surfaces are choice for the grade. Listed on page 42 of the 2011 *Guide Book*. MRB AU55.  
Ex: Richard Picker (3/6/1959).  
From the W. Philip Keller Collection of U.S. Colonials. (#176)
- 3072 1723 Hibernia Farthing, DEI GRATIA MS63 Brown NGC. Martin 3.18-Bc.5, R.4.** Eleven harp strings, dot after 1723. A well-struck and lustrous brownish-tan piece, strictly Mint State although some minor corrosion occurs on each side. Strong die crack through (GE)OR. Listed on page 42 of the 2011 *Guide Book*. MRB MS60.  
Purchased from Richard Picker (11/2/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#176)
- 3073 1723 Hibernia Halfpenny VF30 NGC. Martin 4.43-Gc.34, W-13120, R.7.** The obverse exhibits a later die state than described by Martin (2007) with significant die breaks and crumbling throughout. The reverse also shows numerous areas of spalling. Lighter coloration on the high points gives way to deep brown patina in the fields. A few marks on the bust are noted. This very rare variety would be an excellent addition to an advanced cabinet. Listed on page 43 of the 2011 *Guide Book*. MRB VF20.  
Purchased from Richard Picker (2/19/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (#180)
- 3074 1723 Hibernia Halfpenny—Improperly Cleaned—NGC Details. AU. Martin 4.29-Gd.1, W-13570, R.6.** A boldly defined example of this rare variety. Numerous die cracks on both sides indicate that this is a late die state example. The surfaces are relatively smooth and unabraded with charming mahogany patina. A nice example despite the “cleaned” designation from NGC. Listed on page 43 of the 2011 *Guide Book*. MRB AU50.  
Purchased from Richard Picker (8/29/1971).  
From the W. Philip Keller Collection of U.S. Colonials. (#180)
- 3075 1723 Hibernia Halfpenny—Improperly Cleaned—NGC Details. AU. Martin 4.46-Gd.3, W-13570, R.3.** The harp strings on the reverse appear to have extra connectors at the bottom, which is unique to this die. Deep brown coloration covers the surfaces of this lightly abraded and well defined representative. A nice example despite cleaning. Listed on page 43 of the 2011 *Guide Book*. MRB AU50.  
Purchased from Robert A. Vlack (12-10/1966).  
From the W. Philip Keller Collection of U.S. Colonials.
- 3076 1723 Hibernia Halfpenny—Environmental Damage—NGC Details. AU. Martin 4.5-Gc.25, W-13120, R.6.** The ribbons on the obverse are doubled and the 7 in the date leans to the right. The reverse shows only minor corrosion, while the rest of the surfaces have an attractive mahogany coloration. A well defined and minimally marked specimen. Listed on page 43 of the 2011 *Guide Book*. MRB AU50.  
Ex: Virgil Brand, Richard Picker (11/2/1958).  
From the W. Philip Keller Collection of U.S. Colonials.
- 3077 1723 Hibernia Halfpenny AU53 NGC. Martin 4.44-Fa.5, W-13470, R.4.** There are several die cracks around the obverse margins and a thin die crack bisects the reverse vertically. Lovely chestnut-brown patina covers the minimally marked surfaces. A well-defined example of the 11 harp strings, three dots on reverse type. Listed on page 43 of the 2011 *Guide Book*. MRB AU50.  
Purchased from Hutter (11/1/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#180)
- 3078 1723 Hibernia Halfpenny AU53 NGC. Martin 4.74-Gb.11, W-13120, R.4.** A small die break is seen at 6:30 on the obverse, and there are several planchet flaws on both sides, most noticeably at the bottom of the reverse. Traces of red visit the protected areas, while the rest of the surfaces display attractive medium brown patina. Listed on page 53 of the 2011 *Guide Book*. MRB AU50.  
Purchased from Richard Picker (12/29/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#180)
- 3079 1723 Hibernia Halfpenny AU53 NGC. Martin 4.52-Gb.8, W-13120, R.4.** Appealing mahogany-brown patina covers the surfaces of this lightly marked specimen. Some die deterioration is seen in the periphery of both sides. The details are somewhat softly struck, as often the case. Listed on page 43 of the 2011 *Guide Book*. MRB AU50.  
Purchased from Hutter (11/1/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#180)
- 3080 1723 Hibernia Halfpenny AU53 NGC. Martin 4.2-Gb.2, W-13120, R.5.** The A's in GRATIA are closed at the bottoms. The reverse design appears mushy due to the poor state of the die. Pleasing brown surfaces highlight the originality of this piece. There are no marks of any significance. Listed on page 43 of the 2011 *Guide Book*. MRB AU50.  
Ex: Empire Coin Auction (9/29/1958), lot 19.  
From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3081 1723 Hibernia Halfpenny AU53 NGC. Martin 4.50-Gc.9, W-13120, R.7.** A late die state example of this very rare variety. The deterioration of the dies has caused part of design to be weakly defined. The surfaces boast reddish-brown patina with no mentionable marks. A small planchet crack (as made) is noted at the bottom of the obverse. Listed on page 43 of the 2011 *Guide Book*. MRB AU50.

Ex: *Empire Coin* (10/15/1958), lot 21.

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**Remarkable Choice AU 1723 Hibernia  
Halfpenny, Martin 4.47-Gb.7**

**3082 1723 Hibernia Halfpenny AU55 NGC. Martin 4.47-Gb.7, W-13120, R.4.** The obverse die has nearly shattered and shows evidence of buckling. This interesting specimen exhibits a number of die cracks, and a sizeable cud has formed above the TI in GRATIA. This distinctive obverse die is paired with only one reverse. Chestnut-brown patina enhances the surfaces. No marks merit specific mention. Listed on page 43 of the 2011 *Guide Book*. MRB AU55.

Purchased from Richard Picker (8/29/1971).

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3083 1723 Hibernia Halfpenny AU55 NGC. Martin 4.33-Gb.2, W-13120, R.3.** Faint clash marks are seen at the top of the obverse. Occasional cherry accents enhance the mostly chocolate-brown surfaces. The strike is a bit soft, but the surfaces are remarkably smooth and unabraded with great eye appeal. Listed on page 43 of the 2011 *Guide Book*. MRB AU55.

Purchased from Stack's (12/13/1963).

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3084 1723 Hibernia Halfpenny AU55 NGC. Martin 4.19-Gc.19, W-13120, R.5.** Delightful mahogany-brown patina embraces each side. The obverse is powerfully impressed while the reverse is weakly struck on the effigy. A few faint pinscratches in the left reverse fields are barely visible without the aid of a loupe. Listed on page 43 of the 2011 *Guide Book*. MRB AU55.

Purchased from Richard Picker (12/1/1962).

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3085 1723 Hibernia Halfpenny AU55 NGC. Miller 4.59-Gc.4, W-13120, R.3.** Hints of deep red around the devices enhance the predominantly chocolate-brown surfaces. The strike is bold save for the often-seen softness on the high points. Peppered abrasions are entirely minor. Listed on page 43 of the 2011 *Guide Book*. MRB AU50.

Purchased from Richard Picker (7/1/1961).

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3086 1723 Hibernia Halfpenny AU55 NGC. Martin 4.100-Gc.31, W-13120, R.6.** A prominent die break above the figure's head on the reverse shows that this is a late die state specimen. Mottled dark brown and mahogany patina drapes the surfaces. A small mark below George's jawline is noted for future pedigree purposes. This is a relatively high-grade example of a very rare variety. Listed on page 53 of the 2011 *Guide Book*. MRB AU55.

Ex: Virgil Brand; Richard Picker (11/2/1958).

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3087 1723 Hibernia Halfpenny AU55 NGC. Martin 4.101-Gc.36, W-13120, R.5.** Cherry-red patina intermingles with russet on both sides. The surfaces exhibit some porosity, particularly on the obverse, but there are no significant abrasions. A collectible example of this scarce variety. Listed on page 43 of 2011 *Guide Book*. MRB AU55.

Purchased from Kenneth W. Rendell (9/29/1958).

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3088 1723 Hibernia Halfpenny AU58 NGC. Martin 4.37-Gb.5, W-13120, R.3.** The point of the bust shows evidence of recutting. Rich brown patina envelops both sides of this well defined near-Mint State example. A loupe locates only a couple of insignificant marks. Listed on page 43 of the 2011 *Guide Book*. MRB AU55.

Purchased from Richard Picker (11/22/1958).

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3089 1723 Hibernia Halfpenny AU58 NGC. Martin 4.75-Gb.10, R.5.** Traces of lavender grace the margins of this attractively patinated specimen. The details are sharply defined, save for some trivial, grade-defining softness on the high points. A carefully preserved and appealing representative of this scarce variety. Listed on page 43 of the 2011 *Guide Book*. MRB AU55.

Purchased from Richard Picker (11/2/1958).

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3090 1723 Hibernia Halfpenny AU58 NGC. Martin 4.16-Gc.3, W-13120, R.2.** The X in REX is prominently double punched. Faint clash marks are seen in the periphery of the reverse. Traces of red in the protected areas enhance the mostly medium brown surfaces. A few minuscule abrasions do not distract. Listed on page 43 of the 2011 *Guide Book*. MRB AU55.

Ex: James Kelly Auction (9/13/1958), lot 1606.

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3091 1723 Hibernia Halfpenny AU58 NGC. Martin 4.84-Gc.23, W-13120, R.5.** Light brown patina embraces the surfaces of this intriguing representative. The reverse exhibits significant die deterioration with a number of chips and die flaws throughout, which account for the weak design definition. There are, however, virtually no post-striking handling marks on either side. Listed on page 43 of the 2011 *Guide Book*. MRB AU55.

Ex: *Empire Coin Auction* (9/29/1958), lot 23.

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**3092 1723 Hibernia Halfpenny AU58 NGC. Martin 4.61-Gc.7, W-13120, R.5.** A depression in the point of the bust is diagnostic for the obverse. Martin (2007) writes that the weak foot on the reverse may be strike-dependent, which is affirmed by the impressive sharpness of the foot on the present example. Traces of reddish patina in the protected areas blend with the medium brown patina that covers the majority of the surfaces. An above-average representative. Listed on page 43 of the 2011 *Guide Book*. MRB AU55.

Ex: Virgil Brand; Richard Picker (11/2/1958).

From the W. Philip Keller Collection of U.S. Colonials. (#180)

**Well-Struck 1723 Hibernia Halfpenny**  
Martin 4.34-Gb.3, MS61 Brown

- 3093** 1723 Hibernia Halfpenny MS61 Brown NGC. Martin 4.34-Gb.3, W-13120, R.2. Subtle light orange accents enhance the mostly medium brown surfaces, with a few areas of darker coloration on either side. The centers are a touch soft, but the peripheral details show above-average sharpness. An intermediate die state example with some die spalling seen on the reverse. Listed on page 43 of the 2011 *Guide Book*. MRB MS60.  
*Ex: Empire Coin Auction (9/29/1958), lot 17.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#180)*

**Interesting 1723 Hibernia Halfpenny**  
Martin 4.57-Fa.4, W-13470, MS62 Brown

- 3094** 1723 Hibernia Halfpenny MS62 Brown NGC. Martin 4.57-Fa.4, W-13470, R.3. The repunched A in GRATIA is diagnostic for the obverse. The reverse shows significant clash marks from the denticles between 4 and 6 o'clock. While the obverse of this piece is mostly light brown, the reverse shows a significant amount of red-orange luster. A small planchet flaw on George's jaw is noted, but there are no significant post-striking marks. Listed on page 43 of the 2011 *Guide Book*. MRB MS62.  
*Purchased from Hutter (11/1/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#180)*

**Late Die State 1723 Hibernia Halfpenny**  
Martin 4.68-Gb.9, MS62 Brown

- 3095** 1723 Hibernia Halfpenny MS62 Brown NGC. Martin 4.68-Gb.9, W-13120, R.4. This is a late die state example as evidenced by the significant die crumbling and filled letters on both sides. Several areas of darker coloration mix with medium brown patina across both sides. A touch of softness on the high points keeps this piece from an even higher grade. Listed on page 43 of the 2011 *Guide Book*. MRB MS60.  
*Purchased from Richard Picker (11/2/1958).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#180)*

**Exquisite 1723 Hibernia Halfpenny**  
MS62 Brown, Martin 4.15-Gc.37a

- 3096** 1723 Hibernia Halfpenny MS62 Brown NGC. Martin 4.15-Gc.37a, W-13120, R.2. The stop after the date is doubled, which is diagnostic for reverse die Gc.37a. Eye-catching mint red fills the protected areas, while the remainder of the surfaces boast pleasing brown patination. The strike is sharp, save for some minor softness on some of George's hair and the reverse figure's head. A few small marks do not merit specific mention. Listed on page 43 of the 2011 *Guide Book*. MRB MS63.  
*Purchased from Hollinbeck-Kagin (4/7/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#180)*

**Eye-Catching 1723 Hibernia Halfpenny**  
Martin 4.76-Gd.2, MS63 Brown

- 3097** 1723 Hibernia Halfpenny MS63 Brown NGC. Martin 4.76-Gd.2, W-13570, R.5. Hints of red, lemon-yellow, and blue accent the lustrous surfaces of this attractive specimen. The strike is above-average with sharp definition throughout the design elements. A loupe locates only a couple of nearly imperceptible handling marks. An excellent example of this scarce variety. Listed on page 43 of the 2011 *Guide Book*. MRB MS60.  
*Purchased from Pukall (12/29/1958).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#180)*

**Appealing 1723 Hibernia Halfpenny**  
Martin 4.57-Gc.13, MS64 Red and Brown

- 3098** 1723 Hibernia Halfpenny MS64 Red and Brown NGC. Martin 4.57-Gc.13, R.3. The reverse of this Near-Gem specimen is particularly attractive with lots of red throughout the fields, but the obverse also has significant amounts of red around the lettering. The centers are softly defined, as typically seen. There are no individually mentionable marks. Listed on page 43 of the 2010 *Guide Book*. MRB MS63.  
*Purchased from Richard Picker (10/9/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#181)*

**Upper-End 1723 Hibernia Halfpenny  
Martin 4.64-Gc.30, MS64+ Red and Brown**

- 3099 1723 Hibernia Halfpenny MS64+ Red and Brown NGC. Martin 4.64-Gc.30, W-13120, R.4.** This stunning specimen displays significant amounts of red-orange luster mixed with cherry-brown patina on both sides. The surfaces are carefully preserved and have only a couple of minuscule imperfections. Both sides show prominent clash marks. An excellent choice for a Colonial coin connoisseur. Listed on page 43 of the 2011 *Guide Book*. MRB MS64.  
*Ex: Empire Coin Auction (10/15/1958), lot 15.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#181)*

**AU Details 1723/2 Hibernia Halfpenny  
Martin 4.6-Db.1, W-12850, R.7**

- 3100 1723/2 Hibernia Halfpenny—Obverse Scratched—NGC Details. AU. Martin 4.6-Db.1, W-12850, R.7.** Traces of the underdigit 2 are seen to the right of the 3 in the date. This very rare variety was first observed by Robert Vlack in Richard Picker's collection. The present coin was purchased from Picker in 1972 and may be the same coin that Vlack saw when he first identified this variety. Reddish-brown patina graces both sides of this boldly defined representative. A couple of pinscratches in the left obverse field account for the modifier from NGC. Listed on page 43 of the 2011 *Guide Book*. MRB XF45.  
*Purchased from Richard Picker (11/26/1972).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

**Attractive 1723/2 Hibernia Halfpenny, MS62  
Martin 3.4-Db.1**

- 3101 1723/2 Hibernia Halfpenny MS62 Brown NGC. Martin 3.4-Db.1, W-12850, R.3.** The 2 is prominent just east of the date. A late die state example with the usual softness on the center of the reverse. Charming chestnut-brown patina covers both sides. There are no marks of any significance. An appealing example of this popular overdate variety. Listed on page 43 of the 2011 *Guide Book*. MRB MS60.  
*Purchased from Hutter (11/1/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#183)*

- 3102 1724 Hibernia Farthing VF30 ANACS. Martin 3.22-E.2, R.4.** The reverse appears to have a faint die crack from the B to N, curving in the field below ER. No die cracks are recorded in the Hibernia reference. This dark chocolate example has smooth, problem-free surfaces with faint bluish overtones. Listed on page 43 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Richard Picker (2/12/1962).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#187)*
- 3103 1724 Hibernia Farthing—Corroded—ANACS. XF40 Details. Martin 3.9-D.1, R.4.** The existing details are actually sharper than ANACS suggests, fully AU in our opinion. Both sides have moderate to heavy corrosion with dark olive color. Listed on page 43 of the 2011 *Guide Book*. MRB VF30.  
*Ex: New Netherlands (10/1953), part of lot 375.*  
*From the W. Philip Keller Collection of U.S. Colonials.*
- 3104 1724 Hibernia Halfpenny XF40 ANACS. Martin 4.66-K.1, R.5.** The profile is doubled on this obverse and a straight-line clash mark is evident at the top on the same side. The reverse has a tiny die chip beside the lower right serif of the H. A delightful example with pleasing olive-brown surfaces and minor verdigris on each side. Listed on page 43 of the 2011 *Guide Book*. MRB VF30.  
*Purchased from Richard Picker (2/12/1962).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#190)*
- 3105 1724 Hibernia Halfpenny XF40 ANACS. Martin 4.51-K.4, R.2.** Struck from perfect dies. The outer right curve of the B is repunched on this reverse die. A plentiful 1724 Hibernia variety for the type collector or specialist. This piece has lovely olive, maroon, and dark brown surfaces. Listed on page 43 of the 2011 *Guide Book*. MRB VF30.  
*Purchased from Robert Vlack (7/18/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#190)*
- 3106 1724 Hibernia Halfpenny XF45 NGC. Martin 4.67-K.3, W-13690, R.2.** Traces of red patina in the protected areas blend nicely with the chocolate-brown color that covers the remainder of the surfaces. Peppered abrasions are consistent with the grade and none are of any significance. Listed on page 43 of the 2011 *Guide Book*. MRB XF45.  
*Ex: James Kelly Auction (9/18/1951), lot 2,000.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#190)*
- 3107 1724 Hibernia Halfpenny XF45 NGC. Martin 4.74-L.4, W-13730, R.6.** A rare Hibernia halfpenny variety with 11 harp strings and one dot on the reverse. Both sides show evidence of die spalling, which gives the surfaces a pimpled texture. Only a few minor marks are seen under magnification. Listed on page 43 of the 2011 *Guide Book*. MRB XF40.  
*Purchased from Richard Picker (5/31/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#190)*
- 3108 1724 Hibernia Halfpenny AU50 NGC. Martin 4.67-K.2, W-13690, R.5.** This late die state example shows a prominent die break through the 17 in the date to the rim. Medium-brown patina enhances the surfaces of this lightly abraded specimen. The details are well-defined with trivial softness on the reverse high points. Listed on page 43 of the 2011 *Guide Book*. MRB XF45.  
*Purchased from Richard Picker (9/18/1964).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#190)*

**Spectacular 1724 Hibernia Halfpenny**  
**Martin 4.67-K.3, MS65 Brown**

- 3109 1724 Hibernia Halfpenny MS65 Brown NGC. Martin 4.67-K.3, R.2.** Stop after date, 11 harpstrings. A chocolate-brown Gem with glimpses of faded red at the peripheries. Unabraded, sharply struck, and free from carbon, the fields are reflective. Tiny flan flaws (as made) near Hibernia's raised arm are all that prevent a finer grade. Listed on page 43 of the 2011 *Guide Book*. MRB MS64. (#190)

- 3110 French Colonial Dozen Uncertified. 1721-H Sou:** Good, Ex: Macy's (4/8/1954); Fine, Cleaned, Porous, Ex: Richard Picker (4/30/1961); VG, Corroded, Ex: Richard Picker (4/30/1961); Fine, Porous, Ex: Richard Picker (9/9/1961); VG, Cleaned, Ex: Richard Picker (7/1/1961); **1722-H Sou:** Good, Corroded, Ex: Richard Picker (7/1/1961); Fine, Off-Center, Ex: "Erie," at Pittsburgh (5/14/1961); Fine, Corroded, Ex: Richard Picker (4/30/1961); Good, Ex: W.E. Johnson (3/4/1959); Fine, Ex: Richard Picker (9/9/1961); **1767 Sou, Counterstamped RF:** VG, Corroded, Ex: W.E. Johnson (4/28/1961); AG, Corroded, Ex: Richard Picker (9/13/1962). From the W. Philip Keller Collection of U.S. Colonials. (Total: 12 coins)

- 3111 1721-H French Colonies Copper Sou VF25 NGC. W-11830, R.2.** Examples of the 1721 and 1722 copper coinage were often referred to as "Louisiana coppers" in auction catalogs of the 19th century, but only a fraction of the mintage actually circulated in Louisiana. The H mintmark indicates this piece was struck at the La Rochelle Mint. The present coin was struck on a slightly granular planchet, and the lettering is worn and flattened from 12 o'clock to 3 o'clock on the obverse. Listed on page 51 of the 2011 *Guide Book*. MRB VF20. Purchased from Richard Picker (6/13/1961). From the W. Philip Keller Collection of U.S. Colonials. (#158632)

- 3112 1721-H French Colonies Copper Sou XF45 NGC. W-11830, R.2.** King Louis XV issued an edict authorizing a copper coinage for use in his colonies of New France in June 1721. The planchet of this piece is defective at 3 o'clock, lightly corroded on the obverse and missing a slice of metal on the reverse (as struck). All devices are strongly impressed. Listed on page 51 of the 2011 *Guide Book*. MRB XF40. Purchased from Richard Picker (2/12/1962). From the W. Philip Keller Collection of U.S. Colonials. (#158632)

- 3113 1722/1-H French Colonies Copper Sou VF30 NGC. W-11835.** The planchets for the 1721 and 1722 French colonial copper coinage were imported from Sweden. The present coin was struck on a poorly produced planchet that shows areas of granularity and several planchet cracks on the reverse. Curiously, the die was repunched, with the last 2 in the date punched over a numeral 1. Listed on page 51 of the 2011 *Guide Book*. MRB VF20. Purchased from Richard Picker (4/30/1961). From the W. Philip Keller Collection of U.S. Colonials. (#158629)

- 3114 1722-H French Colonies Copper Sou VF25 NGC. W-11840, R.2.** Both sides of this interesting French colonial sou were struck off center, a little to the left. As a result, the first letters in the reverse inscription are partially missing (C in the first line, F in the second). The central details are strongly impressed on a slightly granular planchet. Listed on page 51 of the 2011 *Guide Book*. MRB VF20. Purchased from the Empire Coin Company (5/2/1959). From the W. Philip Keller Collection of U.S. Colonials. (#158629)

- 3115 1722-H French Colonies Copper Sou VF30 NGC. W-11840, R.2.** The 1722-H copper sous (9 deniers) were transported to the colonies in large numbers, but few were successfully placed into circulation, as the French colonists did not like copper coins. The present coin is struck on a slightly granular planchet, with strong central details. More wear is evident on the peripheries. Listed on page 51 of the 2011 *Guide Book*. MRB VF30. Purchased from Richard Picker (4/30/1961). From the W. Philip Keller Collection of U.S. Colonials. (#158629)

- 3116 1767-A French Colonies Copper Sou XF45 NGC. Vlack 2-B, Breen-700.** No counterstamp. The 1767-A coppersou or nine deniers was made for Western Hemisphere French colonies in general, and their use in Louisiana was unofficial. The glossy blue-tinged brown obverse is smooth and pleasing with little wear. An intricate web of crisscrossing marks on the reverse appears integral to the planchet, as lines are sometimes interrupted by devices and sometimes not. Listed on page 51 of the 2011 *Guide Book*. MRB XF40. Purchased from Picker (9/23/1961). From the W. Philip Keller Collection of U.S. Colonials. (#158651)

- 3117 1767-A French Colonies Copper Sou AU50 NGC. Vlack 16-F, Breen-700.** The 1767-A coppers were coined for use in the French possessions in general, not for a specific colony. The A mintmark indicates the coin was struck at the Paris Mint. The devices on this piece are well struck and the planchet shows only a few areas of granularity. Listed on page 51 of the 2011 *Guide Book*. MRB XF45. Census: 1 in 50 Brown, 2 finer (9/10). Purchased from Richard Picker (3/20/1962). From the W. Philip Keller Collection of U.S. Colonials. (#158651)

- 3118 1720-A French Colonies Livre d'argent fin, 1/6 ecu AU58 NGC. Gadoury-296, KM-453.** Designated as a 20 sols by NGC, which would be Gadoury-295. A well-struck dove-gray representative that has a few wispy field marks. Luster glimmers from the borders and outlines the devices. In 1720, John Law was in control of the French mints, which played a major role in his ill-fated Louisiana territory land scheme. Listed on page 50 of the 2011 *Guide Book*. MRB AU50. (#1001754)

**Popular 1766 Pitt Halfpenny, XF Sharpness**  
**Betts-519, Breen-251, W-8350**

- 3119 1766 Pitt Halfpenny—Corrosion—NGC Details. XF. Betts-519, Breen-251, W-8350, R.3.** The famous Pitt "token" or commemorative medalet, halfpenny size, created to honor the American Colonies' greatest English champion against unfair taxation. This example is well-defined with only light to moderate wear, though the deep reddish-brown surfaces show considerable corrosion as well. Listed on page 48 of the 2011 *Guide Book*. MRB VF30. Purchased from Robert A. Vlack (11/15/1963). From the W. Philip Keller Collection of U.S. Colonials.

- 3120 1773 Virginia Halfpenny, Period—Environmental Damage—NGC Details. Unc. Newman 20-X, W-1540, R.4.** Eight harp strings. One of only two eight harp strings varieties, along with the Newman 26-Y. This piece has lots of mint red in the fields on both sides, but there is a large area of carbon on the upper reverse that extends halfway down the rims on each side. Smaller carbon spots appear on the obverse. Listed on page 43 of the 2011 *Guide Book*. MRB MS60. Purchased from Empire Coin Company (8/15/1958). From the W. Philip Keller Collection of U.S. Colonials.

- 3121 1773 Virginia Halfpenny, Period—Environmental Damage—NGC Details. Unc. Newman 23-Q, W-1560, R.3.** Seven harp strings. The right side of R is about level with George's nose, while the period is the same height as the top leaf tip. On the reverse, the I and R in VIRGINIA are widely spaced at top. This piece has some faded red remaining on chocolate-brown surfaces, and there is some minor carbon on the obverse rim at EOR and the reverse rim at IA. Listed on page 43 of the 2011 *Guide Book*. MRB MS60. Purchased from Douglas (12/3/1954).  
From the W. Philip Keller Collection of U.S. Colonials.

**Attractive MS64 Brown 1773 Virginia Halfpenny  
Newman 24-K, Nice Type Example**

- 3122 1773 Virginia Halfpenny, Period MS64 Brown NGC. Newman 24-K, W-1570, R.1.** The most plentiful halfpenny pairing, and this is a thoroughly attractive specimen, with much mint red remaining in the protected areas. The dies are clashed, as usual, and there is minor contact and less carbon. Listed on page 43 of the 2011 *Guide Book*. MRB MS63.  
Purchased from Empire Coin Company (8/15/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#240)

- 3123 1773 Virginia Halfpenny, Period MS62 Red and Brown NGC. Newman 26-Y, W-1680, R.2.** Eight harp strings. Highly reflective red-orange surfaces show brown on the high points, but there is little carbon or other impairment visible on either side of this appealing coin. Listed on page 43 of the 2011 *Guide Book*. MRB MS63.  
Purchased from Empire Coin Company (8/15/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#241)

**Newman 22-S 1773 Virginia Halfpenny, Period  
MS63 Red and Brown, Ex: Picker**

- 3124 1773 Virginia Halfpenny, Period MS63 Red and Brown NGC. Newman 22-S, W-1550, R.5.** Seven harp strings. E high in GEORGIUS, O nearer E than R. More red on the obverse and more brown on the reverse, with a small straight die crack running below the bust truncation. A small carbon fleck appears below the E in GEORGIUS. Listed on page 43 of the 2011 *Guide Book*. MRB MS64.  
Ex: Richard Picker (7/16/1960).  
From the W. Philip Keller Collection of U.S. Colonials. (#241)

**Engaging 1773 Virginia Halfpenny, Newman 27-J  
Period, Seven Harp Strings, MS63 Red and Brown**

- 3125 1773 Virginia Halfpenny, Period MS63 Red and Brown NGC. Newman 27-J, W-1585, R.2.** Seven harp strings. More red remains on the reverse than on the obverse, where it is largely confined to the peripheral lettering, although luster prevails throughout both sides. There is no trace of carbon or other distractions on this engaging piece. Listed on page 43 of the 2011 *Guide Book*. MRB MS63.  
Ex: New Netherlands (9/20/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#241)

**Newman 25-M 1773 Virginia Halfpenny  
MS63 Red and Brown**

- 3126 1773 Virginia Halfpenny, Period MS63 Red and Brown NGC. Newman 25-M, W-1580, R.2.** Seven harp strings, period after S, wide date. Generous copper-orange surfaces are reflective and prooflike on this super piece, and a few dark flecks do not compromise the appeal. Listed on page 43 of the 2011 *Guide Book*. MRB MS64.  
Purchased from H.H. Cessna (9/29/1951).  
From the W. Philip Keller Collection of U.S. Colonials. (#241)

**1773 Virginia Halfpenny, MS65 Red and Brown  
Newman 25-M, Only One Red and Brown Finer**

- 3127 1773 Virginia Halfpenny, Period MS65 Red and Brown PCGS. Newman 25-M, W-1580, R.2.** The 1773 Virginia halfpennies were minted at the Royal Mint in London for use in the Virginia colony. They circulated extensively, and many worn examples are known to present-day numismatist. Most uncirculated examples come from a hoard of about 5,000 pieces that was held by famous 19th century collector Colonel Mendes I. Cohen. The Newman 25-M variety exhibits seven strings on the reverse harp, and has a dot after GEORGIUS, among other diagnostic features. This remarkable specimen is a splendid Gem, with sharply detailed devices. The surfaces retain much original red color and luster, and the planchet shows no trace of granularity. MRB MS63. Population: 7 in 65 Red and Brown, 1 finer (9/10). (#241)

---

Newman 20-N 1773 Virginia Halfpenny, MS62 Red

- 3128 1773 Virginia Halfpenny, Period MS62 Red NGC. Newman 20-N, W-1540, R.4. Seven harp strings. First I in III wide, period after III nearer I than R. V low, G large and curling up at top. Generous red mint luster throughout, with small amounts of brown only on portions of the high points. No visible carbon or singular contact. Listed on page 43 of the 2011 *Guide Book*. MRB MS65. Purchased from Kenneth W. Rendell (6/28/1958). From the W. Philip Keller Collection of U.S. Colonials. (#242)

---

1773 Newman 23-R Halfpenny, MS63 Red  
Ex: Virgil Brand, New Netherlands

- 3129 1773 Virginia Halfpenny, Period MS63 Red NGC. Newman 23-R, W-1565, R.4. Seven harp strings. The tops of the second and third I in III are distant, while the reverse has the V low and the second I touching the arms. A lovely example, much more red than brown and with few distractions, although somewhat softly struck in the center reverse. This piece's provenance includes a stay in the monumental collection of Chicago brewer-numismatist Virgil Brand, who amassed about 350,000 coins before his death in 1926. Listed on page 43 of the 2011 *Guide Book*. MRB MS64. Ex: Virgil Brand; later, New Netherlands (9/20/1954) From the W. Philip Keller Collection of U.S. Colonials. (#242)

---

Appealing 1773 Virginia Halfpenny  
Newman 23-R, MS64 Red

- 3130 1773 Virginia Halfpenny, Period MS64 Red PCGS. CAC. Newman 23-R, R.4. A lovely Virginia halfpenny that almost certainly remains from the Cohen hoard, as do nearly all Mint State pieces. That hoard was discovered in the 19th century by Col. Mendes I. Cohen, and is said to have contained 5,000 pieces. Although with slight mellowing on the high points, this lovely piece is fully brilliant with original orange mint luster and excellent eye appeal. Listed on page 43 of the 2011 *Guide Book*. MRB MS63. (#242)

---

Rare 1773 Virginia Halfpenny, Fine Details  
Newman 13-T Discovery Coin

- 3131 1773 Virginia Halfpenny, No Period—Reverse Scratched—NGC Details. Fine. Newman 13-T, W-1495, R.6. Seven harp strings. A very rare variety, discovered by Paul Weinstein and published in the *Colonial Newsletter* in December 1961, well after the 1956 publication of Eric Newman's *Coinage for Colonial Virginia* monograph. **Discovery piece for the variety.** A note in the envelope identifies the piece as "unique! Discovery Piece - discovered by Wienstein [sic] verified & cataloged by Eric Newman in new Va. book plate." (This refers to Newman's 1962 addendum, "Additions to *Coinage for Colonial Virginia*," *American Numismatic Society Museum Notes* 10, where the reverse of this piece is plated.) The obverse shows the X in REX thin and crudely executed, and the second I in III is closer to the first than the third. On the reverse, a leaf touches the inside left base of the A. This piece has porous dark surfaces, weakly struck at the right obverse rim—just sufficient for identification—and a large scratch through the upper reverse, which is better-struck. Listed on page 43 of the 2011 *Guide Book*. MRB VG8. Ex: Paul Weinstein; later, Ted Craig (10/6/1964). From the W. Philip Keller Collection of U.S. Colonials.

---

1773 Virginia Halfpenny, Newman 11-D, VF25  
Very Rare No Period Variety

- 3132 1773 Virginia Halfpenny, No Period VF25 NGC. Newman 11-D, W-Unlisted, R.6. Seven harp strings. The Newman 11 obverse shows a notch out of the left side of the top left leaf in the wreath, while the D reverse is one of the frequently seen Seven Harp Strings varieties. While this is the first example of this variety—unlisted in the Whitman *Colonial Encyclopedia*—that we have seen, we would conservatively estimate its rarity as at least R.6. In 1962 Eric Newman rated the 11-D as R.7. This is a glossy dark-brown piece with minor contact marks, well-centered, and with moderate wear. The No Periods type is listed on page 43 of the 2011 *Guide Book*. MRB VF20. Purchased from T.L. Craig (6/27/1966). From the W. Philip Keller Collection of U.S. Colonials. (#243)

**R.6 Newman 10-W 1773 Virginia Halfpenny**  
**XF Details, Discovery Coin for the Variety**  
**Ex: New Netherlands, Richard Picker**

**Newman 13-V 1773 Virginia Halfpenny, High R.7**  
**Eight Harp Strings, No Period, MS62 Brown**

- 3133 1773 Virginia Halfpenny, No Period—Environmental Damage—NGC Details. XF. Newman 10-W, W-1620, R.6.** This very rare die marriage pairs the Newman W Eight Harp Strings reverse with the Newman 10 No Periods obverse, a 1958 discovery of Walter Breen while he was working at New Netherlands Coin Company with John J. Ford Jr. This example has brownish-black surfaces with a small rim bump at 12 o'clock on the obverse and a light patch of corrosion at the truncation of the bust. Listed on page 43 of the 2011 *Guide Book*. MRB Fine 15.

*Ex: New Netherlands Sale 51 (6/1958), lot 59, plated; later, purchased from Richard Picker (5/18/1963).*

*From the W. Philip Keller Collection of U.S. Colonials.*

- 3137 1773 Virginia Halfpenny, No Period MS62 Brown NGC. Newman 13-V, W-1640, High R.7.** Eight harp strings. A rare variety discovered by Ted Craig, published in the April-June 1962 *Colonial Newsletter* and in Eric Newman's 1962 "Additions" article. This piece was also acquired from Craig in 1966, according to the consignor's envelope, indicating it was only the second known at that time. The X in REX is thin and crudely executed. On the reverse, a leaf is close to the right inside base of the A. This is a delightful Mint State specimen with about equal parts of red and brown, and a couple of small dark patches do not detract significantly. Listed on page 43 of the 2011 *Guide Book*. MRB MS60.

*Purchased from Ted L. Craig (12/10/1966).*

*From the W. Philip Keller Collection of U.S. Colonials. (#243)*

- 3134 1773 Virginia Halfpenny, No Period—Improperly Cleaned—NGC Details. AU. Newman 8-H, W-1490, R.4.** Seven harp strings. The surfaces are lightly hairlined from a past cleaning but retain considerable mint red with attractive glints of olive and purple. Minor contact is as expected for the grade. Listed on page 43 of the 2011 *Guide Book*. MRB XF45.

*Ex: Richard Picker (1/12/1960).*

*From the W. Philip Keller Collection of U.S. Colonials.*

- 3138 1773 Virginia Halfpenny, No Period MS63 Brown NGC. Newman 6-X, W-1610, R.3.** Eight harp strings. The most frequently seen of the No Period, Eight Harp Strings varieties. Glossy surfaces are mostly brown, although they display considerable muted red and good eye appeal. A few minor contact marks appear. Listed on page 43 of the 2011 *Guide Book*. MRB MS60.

*Ex: Richard Picker (3/20/1962).*

*From the W. Philip Keller Collection of U.S. Colonials. (#243)*

- 3135 1773 Virginia Halfpenny, No Period—Environmental Damage—NGC Details. AU. Newman 9-B, W-1420, R.4.** Six harp strings. The right edge of the R in REX is clearly above the tip of George's nose, immediately identifying this pairing as the Newman 9-B, one of the few six harp strings matings (along with Newman 5-B). This piece has some light pitting on the reverse, but overall the smooth, glossy dark-brown surfaces have much appeal and few distractions. Listed on page 43 of the 2011 *Guide Book*. MRB XF40.

*Purchased from J. Walsh (11/16/1963).*

*From the W. Philip Keller Collection of U.S. Colonials.*

- 3139 1773 Virginia Halfpenny, No Period MS64 Brown NGC. Newman 3-F, W-1455, R.4.** Seven Harp Strings, No Dot After GEORGIVS. This popular variety is often found with prooflike fields. On this piece slight reflectivity is seen on each side. The striking definition is strong throughout, one is tempted to call it full. The hair is sharp on the obverse and all the elements in the shield on the reverse are complete. While mostly brown, there is a slight accent of reddish patina around the devices on both obverse and reverse. Listed on page 43 of the 2011 *Guide Book*. MRB MS60.

*Purchased from Richard Picker (11/2/1958).*

*From the W. Philip Keller Collection of U.S. Colonials. (#243)*

- 3136 1773 Virginia Halfpenny, No Period AU58 NGC. Newman 5-Z, W-1600, R.4.** Eight harp strings. Glossy brown and virtually Uncirculated, with some minor contact and die rust visible on each side. The distinctive Newman Z reverse has many of the letters in VIRGINIA askew, particularly IR and IA. Listed on page 43 of the 2011 *Guide Book*. MRB AU50.

*Ex: Richard Picker (9/7/1960).*

*From the W. Philip Keller Collection of U.S. Colonials. (#243)*

- 3140 1773 Virginia Halfpenny, No Period MS64 Brown NGC. Newman 7-D, W-1480, R.2.** Seven harp strings. One of the No Periods varieties, scarcer overall than the With Periods halfpence. This lovely piece has glossy brown surfaces on the obverse that are fairly prooflike in appearance, with tinges of red remaining on the reverse. Well-struck and well-centered, and virtually contact-free. A super type example. Listed on page 43 of the 2011 *Guide Book*. MRB MS63.

*Purchased from Richard Picker (3/20/1962).*

*From the W. Philip Keller Collection of U.S. Colonials. (#243)*

---

**Error 1773 Virginia Halfpenny, Newman 5-B  
Gem Brown, Off-Center, 20% Clipped Planchet**

- 3141** 1773 Virginia Halfpenny, No Period—Mint Error—Struck Off-Center, 20% Clipped Planchet—MS65 Brown NGC. Newman 5-B, W-1390, R.6. Six harp strings. A curved clip of about 20% is on the obverse at 6 o'clock and correspondingly at 12 o'clock on the reverse, although the 1 and 3 remain in the date, just on either side of the clip. The piece was also struck off-center towards 2:30 on the obverse, so that broad dentilation appears opposite at 8:30, while most of the III is off the flan. A mostly brown and distraction-free planchet (aside from the obvious error), but generous glints of red remain in the protected areas. The first such Virginia halfpenny error we recall, a very rare variety, and a certified Gem, to boot, listed on page 43 of the 2011 *Guide Book*. MRB MS63. Ex: A. Kreisberg (11/17/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (#243)

---

**Newman 15-D 1773 Virginia Halfpenny  
No Period, MS62 Red and Brown**

- 3142** 1773 Virginia Halfpenny, No Period MS62 Red and Brown NGC. Newman 15-D, W-1500, High R.6. Seven harp strings. This very rare variety was discovered by Richard Picker, according to Eric Newman in his 1962 "Additions" article, and the present example derives from that source, but we do not believe this to be the discovery coin; we believe the consignor's envelope would refer to it, if that were the case. This coin is about equal parts red and brown, with a few minor signs of contact and good luster overall. Listed on page 43 of the 2011 *Guide Book*. MRB MS60. Ex: Richard Picker (2/9/1963).  
From the W. Philip Keller Collection of U.S. Colonials. (#244)

---

**No Period 1773 Virginia Halfpenny  
Newman 4-P, MS63 Red and Brown**

- 3143** 1773 Virginia Halfpenny, No Period MS63 Red and Brown NGC. Newman 4-P, W-1475, R.5. Seven harp strings. The Newman 4 No Period obverse shows the top of the second I nearer to the first I than to the third. On the reverse, the V is low and touches a leaf, while the G is too high and the second I shows recutting. This lustrous piece is more brown on the obverse and more red on the reverse, with two small dark patches on the obverse but good eye appeal overall. Listed on page 43 of the 2011 *Guide Book*. MRB MS64. Ex: Richard Picker (7/16/1960).  
From the W. Philip Keller Collection of U.S. Colonials. (#244)

---

**1773 Virginia Halfpenny, No Period  
Seven Harp Strings, Newman 4-O  
MS63 Red and Brown**

- 3144** 1773 Virginia Halfpenny, No Period MS63 Red and Brown NGC. Newman 4-O, W-1470, High R.4. Seven harp strings. The reflective surfaces are more red than brown, and there is no mentionable carbon on either side of this well-struck piece, save for a few tiny flecks visible only under a loupe. Listed on page 43 of the 2011 *Guide Book*. MRB MS64. Ex: Stack's (7/71/1962).  
From the W. Philip Keller Collection of U.S. Colonials. (#244)

**VF Details 1760 Hibernia-Voce Populi Farthing  
Very Scarce N.1, W-13800 Variety**

- 3145 1760 Hibernia-Voce Populi Farthing, Large Letters—Environmental Damage—NGC Details.** VF N.1, W-13800, R.5. Voce Populi means “the voice of the people,” a popular sentiment in the time period preceding American independence. The very scarce W-13800 variety of the 1760 Voce Populi farthing is easily identified by the large letters in the obverse legend. This specimen has a planchet clip at 7 o'clock on the obverse, and a few planchet cracks at the top of the obverse. Listed on page 47 of the 2011 *Guide Book*. MRB VF30.  
*Purchased from Kenneth Rendell (9/29/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

- 3146 Group of Six 1760 Voce Populi Halfpennies Uncertified.** Nelson-1, Fine, Corroded, Ex: W.E. Johnson (5/12/1959); Nelson-2, VG, Ex: B.A. Seaby (3/28/1960); Nelson-7, Good, Ex: Ted Craigie (11/3/1963); Nelson-9, VF, Corroded, Ex: B.A. Seaby (3/28/1960); Nelson-10, Good, Ex: B.A. Seaby (3/28/1960); Nelson-10, VG, Porous, Ex: W.E. Johnson (5/12/1959).  
*From the W. Philip Keller Collection of U.S. Colonials.* (Total: 6 coins)

- 3147 1760 Hibernia-Voce Populi Halfpenny VF30 NGC. Z. 3-A, N-15, R.4.** The 1760 Hibernia-Voce Populi halfpenny has been adopted by U.S. Colonial collectors, although they were minted in Ireland, and it is unlikely that they ever circulated on this side of the Atlantic. This glossy brown specimen is an example of the scarce Long Nose, No P variety, Z. 3-A. Listed on page 47 of the 2011 *Guide Book*. MRB VF25.  
*Purchased from the Empire Coin Company (5/2/1959).*  
*From the W. Philip Keller Collection of U.S. Colonials.* (#262)

**1760 Hibernia-Voce Populi Halfpenny, XF40  
Very Rare N-7 Variety**

- 3148 1760 Hibernia-Voce Populi Halfpenny XF40 NGC. Z. 8-F, N-7, R.7.** A well preserved specimen of this very rare variety, with no P on the obverse. This coin was struck from heavily clashed dies, with the letters VOCE plainly visible in the reverse field between the exergue and the letter H in HIBERNIA. The medium brown surfaces show only a few areas of slight granularity. Listed on page 47 of the 2011 *Guide Book*. MRB VF35.  
*Purchased from the Empire Coin Company (3/28/1964).*  
*From the W. Philip Keller Collection of U.S. Colonials.* (#262)

**1760 Hibernia-Voce Populi Halfpenny, XF45  
Rare N-8 Variety**

- 3149 1760 Hibernia-Voce Populi Halfpenny XF45 NGC. Z. 3-C, N-8, R.6.** The Voce Populi halfpennies were produced circa 1760 in Ireland. There are many varieties known for this issue, which should not be confused with the earlier Hibernia coinage of William Wood. This example represents the rare variety with a distinctive long nose and no P on the obverse. The golden-brown surfaces of this piece show some granularity, but the date and major design elements are well preserved. Listed on page 47 of the 2011 *Guide Book*. MRB XF40.  
*Purchased from Richard Picker (9/23/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials.* (#262)

- 3150 1760 Hibernia-Voce Populi Halfpenny XF45 NGC. Z. 13-K, N-10, R.5.** A very scarce variety of this popular Irish import, with the characteristic “Long Bust” and no P on the obverse. This coin features especially well detailed devices on a planchet that shows only a few scattered areas of granularity. Listed on page 47 of the 2011 *Guide Book*. MRB VF35.  
*Purchased from Richard Picker (6/13/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials.* (#262)

- 3151 1760 Hibernia-Voce Populi Halfpenny AU50 NGC. Z. 2-A, N-4, R.1.** A particularly well preserved example of this popular copper import, with sharply defined devices and slightly granular, mahogany surfaces. This specimen represents the popular “Older Head” variety, with no P on the obverse. Listed on page 47 of the 2011 *Guide Book*. MRB XF45.  
*Purchased from Robert Vlack on 11/15/1963.*  
*From the W. Philip Keller Collection of U.S. Colonials.* (#262)

- 3152 1760 Hibernia-Voce Populi Halfpenny AU55 NGC. Z. 6-C, N-9, R.1.** The Hibernia-Voce Populi coinage probably did not circulate in North America, but the series enjoys much popularity among Colonial collectors. The present coin is a representative of the popular “Stern Bust” variety, with no P in the obverse field. This example is a deep chocolate-brown copper with pristine fields and only light wear evident on the devices. Listed on page 47 of the 2011 *Guide Book*. MRB AU50.  
*Purchased from Kenneth W. Rendell (9/29/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials.* (#262)

- 3153 1760 Hibernia-Voce Populi Halfpenny, VOOE POPULI XF40 NGC. Z. 7-E, N-3, W-13930, R.3.** On this popular and distinctive variety, a die crack connects the top and bottom ends of the C in VOCE, making the letter resemble a second O. The surfaces of this coin are a glossy medium brown, with light hints of red underneath the patina. The devices are boldly defined. Listed on page 47 of the 2011 *Guide Book*. MRB VF35.  
*Purchased from Kenneth W. Rendell (9/29/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials.* (#265)

**3154** 1760 Hibernia-Voce Populi Halfpenny, P Below Bust Fine 12 NGC. Z. 14-M, N-13, W-13960, R.2. What appears to be a massive die break bisects the reverse of this interesting, moderately worn specimen. The chocolate-brown surfaces show a slightly granular texture. The characteristic P below the bust is flattened by wear, but perfectly distinguishable. Listed on page 47 of the 2011 *Guide Book*. MRB Fine 12.  
*Purchased from Robert Vlack (9/28/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#268)*

**3155** 1760 Hibernia-Voce Populi Halfpenny, P Below Bust—Planchet Flaw—NGC Details. VF. Z. 14-M, N-13, W-13960, R.2. The Hibernia-Voce Populi coinage is thought to be the work of a Mr. Roche, from Dublin, Ireland. The coins were probably made on a speculative basis and it is doubtful that they ever circulated in this country. The present coin is the variety with the P below the bust. The devices are strongly impressed, with only moderate wear, and the fields are a pleasing brown color, with subtle hints of red. A large planchet clip is noted at 9 o'clock on the obverse. Listed on page 47 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Greco (10/10/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

**1760 Hibernia-Voce Populi Halfpenny, VF Details  
Rare P Below Bust, N-14, W-13960 Variety**

**3156** 1760 Hibernia-Voce Populi Halfpenny, P Below Bust—Scratches—NGC Details. VF. Z. 16-O, N-14, W-13960, R.7. Walter Breen described the W-13960 die variety as “extremely rare.” Only three obverse dies are known with the P beneath the bust. The W-13960 variety can be distinguished by the position of the letter I, placed further from the bust than on the other varieties. NGC suggests this piece is “scratched,” and some light scratches are evident near the pole on the reverse. We consider the VF Details grade extremely conservative in this case. Listed on page 47 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Robert Vlack (8/28/1962).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

**3157** 1760 Hibernia-Voce Populi Halfpenny, P Below Bust XF40 NGC. Z. 14-L, N-11, W-13960, R.3. A scarce and distinctive subtype, with the mysterious letter P below the bust. The golden-brown surfaces are smooth and lightly abraded. This issue is often seen with granular surfaces, and coins in XF40 condition are rare. Listed on page 47 of the 2011 *Guide Book*. MRB VF30. Census: 1 in 40 Brown, 3 finer (9/10).  
*Purchased from Richard Picker (9/23/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#268)*

**3158** 1760 Hibernia-Voce Populi Halfpenny, P Before Face XF45 NGC. Z. 15-N, N-12, W-13950, R.2. A popular variety with the enigmatic letter P in front of the bust. Jerry Zelinka estimated a surviving population of 501-1,250 pieces, but the issue is rare in XF45 Brown. The present coin displays well detailed devices on a planchet that shows only a few areas of granular texture. Listed on page 47 of the 2011 *Guide Book*. MRB XF40.  
*Purchased from Robert Vlack (9/28/1962).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#271)*

**Affordable 1776 Continental Dollar  
CURRENCY, Newman 1-C, Sharpness of AU**

**3159** 1776 Continental Dollar, CURRENCY, Pewter—Damaged, Corroded—NGC Details. AU. Newman 1-C, W-8445, R.3. Here is an opportunity to acquire what should be an affordable 1776 Continental dollar. Both sides have pewter and dark gray surfaces with some evidence of corrosion, and a piece missing at 11 o'clock. Listed on page 81 of the 2011 *Guide Book*. MRB VG8.

**The Famous 1776 Continental Dollar  
CURRENCY, Newman 2-C, Fine 12**

- 3160 1776 Continental Dollar, CURRENCY, Pewter Fine 12 NGC.** Newman 2-C, Hodder 2-A.3, W-8455, R.4. It is quite interesting that there is virtually no contemporary documentation of the origin of the famous Continental dollars. While Continental Currency paper money was authorized by various Congressional resolutions, there was no mention of a dollar-sized coin. Numismatists speculate that since the July 22, 1776 authorization for paper money omitted the one dollar denomination, the Continental dollar coins were struck around that time. These coins were engraved by Elisha Gallaudet, a New York City silversmith, and some—if not all—were likely struck in that location. However, with the British capture of New York in late summer, there is some speculation that a second minting occurred somewhere in Pennsylvania after the Continental Congress relocated to Philadelphia.

These issues are scarce and highly prized by numismatists. This example has charming pale gray patina and no significant marks. The sundial motif in the center of the obverse is not fully defined, but the peripheral letters are boldly struck. The reverse is particularly nice and all of the colony names are fully readable. A very collectible example of the only coin authorized by the Continental Congress. Listed on page 81 of the 2011 *Guide Book*. MRB Fine 12. (#794)

**1787 Massachusetts Half Cent, AU58  
W-5910, Elusive Above XF**

- 3161 1787 Massachusetts Half Cent AU58 NGC.** Ryder 2-A, W-5910, R.3. The Massachusetts coinage was well produced, under the direction of Mr. Joshua Witherle, but the venture proved unprofitable for the state, and the mint was closed in January 1789. The W-5910 variety of the 1787 half cent is distinguished by the ray of the star pointing at the Indian's eyebrow on the obverse, and the high position of both 8s in the date. The W-5910 variety is quite difficult to locate in grades above XF. The present coin shows only slight traces of wear on the sharply defined design elements, while traces of original red color can be detected outlining some of the devices. Listed on page 57 of the 2011 *Guide Book*. MRB AU55. From the W. Philip Keller Collection of U.S. Colonials. (#296)

- 3162 1787 Massachusetts Cent, Horned Eagle XF45 PCGS.** Ryder 2b-A, W-6040, R.3. Although undesignated as such by PCGS, this is the "Horned Bust" variety, with a die break similar to a unicorn's horn emerging from the eagle's forehead. Smooth olive-brown fields accompany lilac-tinged devices. CENT is bold. Listed on page 57 of the 2011 *Guide Book*. MRB XF40. (#305)

**MS62 Brown 1788 Massachusetts Half Cent  
Popular W-6010 Variety**

- 3163 1788 Massachusetts Half Cent MS62 Brown NGC.** Ryder 1-B, W-6010, R.2. The Massachusetts coinage was popular with the public, but it proved uneconomical for the state, as it cost more to produce each coin than the face value of the piece minted. The W-6010 variety is characterized by the position of the top of the arrow shaft centered under W on the obverse, and the low first 8, high second 8 in the date. The variety is reasonably available in most grades, but Mint State examples are rare in the absolute sense. The present coin is a delightful MS62 example, with well preserved, sharply detailed devices and a smooth, well produced planchet. Listed on page 57 of the 2011 *Guide Book*. MRB AU55. Census: 1 in 62 Brown, 3 finer (9/10). From the W. Philip Keller Collection of U.S. Colonials. (#308)

**3164 1788 Massachusetts Cent, Period XF45 NGC. Ryder 2-B, W-6200, R.4.** The W-6200 variety of the popular 1788 Massachusetts cent is characterized by the widely spaced position of the two M's in COMMON on the obverse, and the slightly low numeral 1, slightly high second 8 in the date. This issue is rare in grades above XF. The present coin shows some traces of wear, but the design elements remain sharply detailed and the surfaces display no mentionable distractions. Listed on page 57 of the 2011 *Guide Book*. MRB XF40.

*From the W. Philip Keller Collection of U.S. Colonials. (#311)*

**3165 1788 Massachusetts Cent, Period—Improperly Cleaned—NGC Details. AU. Ryder 4-G, W-6230, High R.4.** The scarce W-6230 variety is identified by the position of the obverse star, with one ray pointing at the Indian's nose, and the arrowheads on the reverse with just one arrow pointing outside the eagle's wing. This example displays sharp devices, with little actual wear, and a few planchet cracks on the upper obverse. Listed on page 57 of the 2011 *Guide Book*. MRB XF40.

*From the W. Philip Keller Collection of U.S. Colonials.*

#### 1788 Massachusetts Cent, AU58 Scarce Period, W-6300

**3166 1788 Massachusetts Cent, Period AU58 NGC. Ryder 11-E, W-6300, Low R.4.** The Massachusetts coins of 1787 and 1788 were the first to use the word CENT in the denomination. The W-6300 variety is identifiable by the shape of the arrow head forming an equilateral triangle on the obverse, and the location of the final S opposite the wingtip on the reverse. This variety is rare in grades above XF, and John Ford's example was a nice AU piece. The present coin is a delightful example, with just the slightest traces of wear showing on the medium brown surfaces. The surfaces show no areas of granularity, and all design elements are sharply defined. Listed on page 57 of the 2011 *Guide Book*. MRB AU55.

*From the W. Philip Keller Collection of U.S. Colonials. (#311)*

#### Scarce No Period 1788 Massachusetts Cent XF45, W-6380

**3167 1788 Massachusetts Cent, No Period XF45 NGC. Ryder 13-N, W-6380, High R.4.** The Massachusetts coinage was well received by the public and circulated widely for a long period of time. The W-6380 variety is characterized by the position of the arrow tip located to the right of the tunic on the obverse, and the lack of a period after MASSACHUSETTS on the reverse. The variety is scarce in all grades, and rare above VF. This specimen is sharply detailed, with pleasing brown surfaces, and no trace of granularity. Listed on page 57 of the 2011 *Guide Book*. MRB XF40.

*From the W. Philip Keller Collection of U.S. Colonials. (#293)*

**3168 Large Group Lot of 65 Connecticut Coppers Uncertified. 1785:** Miller 1-E, VG, Porous, Ex: *New Netherlands* (9/26/1953); Miller 3.1-A.3, Fine, Planchet Flaws, Ex: *Stack's* (7/17/1962); Miller 3.1-L, Fine, Planchet Flaws, Ex: *Copley Coin Company* (11/2/1953); Miller 3.4-F.1, VG, Heavy Porosity, Ex: *R.C. *From the W. Philip Keller Collection of U.S. Colonials. (Total: 65 coins)*

**3169 1785 Connecticut Copper, Bust Right—Graffiti—NGC Details.** VG. M. 6.4-K, W-2425, High R.6. The “graffiti” consists of the painted-on attribution, placed on the portrait, and a numeral “5” below the bust. Deep chocolate and caramel colors enrich this well-worn example, infusing it with eye appeal. An important example of a very rare die pair. Listed on page 59 of the 2011 *Guide Book*. MRB VG8.

Ex: *New Netherlands* (12/3/1968), lot 326.

From the W. Philip Keller Collection of U.S. Colonials. (#316)

**3170 1785 Connecticut Copper, Bust Right—Environmental Damage—NGC Details.** VF. M. 1-E, W-2300, R.4. The very first variety in Miller’s now-iconic reference, offered here as a moderately worn example that is attractive despite the ebony-black color of the fields. Chocolate-brown on the devices with a straight clip at right (as seen from the obverse). Listed on page 59 of the 2011 *Guide Book*. MRB Fine 15.

Purchased from Kaplan (8/28/1951).

From the W. Philip Keller Collection of U.S. Colonials. (#316)

**3171 1785 Connecticut Copper, Bust Right VF20 NGC.** M. 6.3-G.1, W-2400, R.3. While scarce in an absolute sense, Miller’s 6.3-G.1 is among the more accessible 1785 Bust Left Connecticut coppers. This is a pleasing midrange example, softly struck as usually seen but with charming color that ranges from medium-brown to deep walnut. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.

Purchased from Foster (11/24/1953).

From the W. Philip Keller Collection of U.S. Colonials. (#316)

**3172 1785 Connecticut Copper, Bust Right—Environmental Damage—NGC Details.** VF. M. 6.3-G.2, W-2410, High R.5. This Bust Right piece is well struck overall, though the central obverse and left reverse show considerable softness. Considerable pitting in the fields points to the “environmental damage” described on the label, yet this Connecticut copper retains considerable eye appeal. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 15.

Ex: *New Netherlands* (10/1953), part of lot 379

From the W. Philip Keller Collection of U.S. Colonials.

**3173 1785 Connecticut Copper, Bust Right—Corrosion—NGC Details.** VF. M. 6.1-A.1, W-2390, High R.5. A luminous example with rich walnut-brown color. Both sides show the effects of light to moderate corrosion, yet the overall eye appeal of this moderately worn coin is solid. An important representative of this rare die pair. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.

Purchased from A.D. Hoch (5/26/1960).

From the W. Philip Keller Collection of U.S. Colonials. (#316)

**3174 1785 Connecticut Copper, Bust Right—Environmental Damage—NGC Details.** VF. M. 5-F.5, W-2385, R.4. Sole use of Miller’s Obverse 5 with 1785-dated reverse, distinguished by a die break from chin to drapery reminiscent of the “Bearded Goddess” in Overton’s work on Bust half dollars. Rich brown color with evidence of minor corrosion-as-environmental damage, possibly from burial. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.

Purchased from Eisenhart (10/19/1963).

From the W. Philip Keller Collection of U.S. Colonials. (#316)

**3175 1785 Connecticut Copper, Bust Right VF20 NGC.** Miller 4.4-C, W-2375, R.3. This scarce die pair is the sole appearance of 1785’s Reverse C. The present coin is moderately worn, cinnamon-brown and walnut with prominent planchet voids on both sides. The obverse is in a later state with die break at the E of CONNEC. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.

Purchased from W.E. Johnson (5/12/1959).

From the W. Philip Keller Collection of U.S. Colonials. (#316)

**3176 1785 Connecticut Copper, Bust Right VF30 NGC.** M. 3.4-F.1, W-2340, R.3. An attractive midrange example of a scarce die pair that is nonetheless one of the more accessible in the Bust Right 1785 Connecticut coppers series. Medium-brown surfaces are generally smooth, the devices well-centered. Listed on page 59 of the 2011 *Guide Book*. MRB VF25.

Purchased from W.E. Johnson (5/12/1959).

From the W. Philip Keller Collection of U.S. Colonials. (#316)

**Choice XF Bust Right 1785 Connecticut Copper**  
**Miller 3.1-A.3, W-2315**

**3177 1785 Connecticut Copper, Bust Right XF45 NGC.** M. 3.1-A.3, W-2315, R.4. An attractive Choice XF example of this very scarce die pair, which has its obverse defined by a “fat” T in AUCTORI. Well struck for the type, if more typically soft at the margins, with glossy medium-brown color and the usual planchet voids through the peripheral lettering. Listed on page 59 of the 2011 *Guide Book*. MRB XF40.

Ex: Richard Picker (8/17/1967).

From the W. Philip Keller Collection of U.S. Colonials. (#316)

**3178 1785 Connecticut Copper, African Head—Scratches—NGC Details.** VF. M. 4.1-F.4, W-2355, R.1. The classic “African Head,” the vastly more common of the two die pairs (see the rarer pair in this auction as well). Golden-brown surfaces have shallow planchet voids and scratches on the portrait and the field to its right. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.

Ex: Royal (11/10/52).

From the W. Philip Keller Collection of U.S. Colonials.

Extremely Rare Miller 4.2-F.6 1785  
African Head Connecticut Copper, VF30

**3179** 1785 Connecticut Copper, African Head VF30 NGC. M. 4.2-F.6, W-2360, R.8. There are two distinct die pairs of 1785 Connecticut copper described as the “African Head.” The first, Miller 4.1-F.4, is a common variety that offers considerable supply to meet the demand. The Miller 4.2-F.6, on the other hand, is extremely rare. The entry in the *Whitman Encyclopedia of Colonial and Early American Coins* states of the latter: “Discovered by Eric P. Newman (CNL, January 1972). Rarity: URS-2.”

The *Colonial Newsletter* reference is a citation of personal correspondence between Edward R. Barnsley and Eric P. Newman, which was dated April 21, 1966, tantalizingly close to the March 29, 1966 acquisition date of this piece. Newman’s discovery was that the reverse paired with the Miller 4.2 African Head obverse is not the F.4 reverse paired with the Miller 4.1 African Head, but a different type with the colon after CONNEC well-separated from the shield. Newman’s correspondence describes having reviewed the two known examples, and the “URS-2” rarity rating suggests that the population remains at two. Further research is needed to determine whether this was one of the two coins Newman reviewed or a previously unknown third specimen.

The present example is a glossy brown coin with reddish-gold overtones and a small planchet flaw to the left of the lips. Moderate wear has left all of the essential features intact. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 15.

Purchased from R.T. Hooper (3/29/1966). Handwritten note: “unlisted rev / unlisted combo”.

From the W. Philip Keller Collection of U.S. Colonials. (#319)

**3180 1785 Connecticut Copper, Bust Left Fine 15 NGC. M. 7.1-D, W-2440, High R.4.** This very scarce to rare die pair is the most accessible of the four 1785 Bust Left varieties, and as such it is of great importance to Colonial type and series collectors alike. Offered here is a glossy example with moderate to high wear through the centers as well as cinnamon and gold overtones. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 15.  
*Purchased from Royal (11/10/1952).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#322)*

**3181 1786 Connecticut Copper, Small Head Right, ETLIB INDE—Scratches—NGC Details. VF. M. 1-A, W-2460, High R.4.** The “Double Chin” obverse paired with the ETLIB INDE reverse. Moderately worn with light violet overtones against medium-brown surfaces, and well-preserved aside from scratches on the portrait’s face that account for the details grade. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 15.  
*Purchased from Royal (11/10/1952).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#325)*

**3182 1786 Connecticut Copper, Small Head Right, ETLIB INDE—Environmental Damage—NGC Details. VF. M. 2.1-A, W-2465, R.3.** The more accessible (though still scarce) of two die pairs which share the ETLIB INDE reverse. Medium-brown color through the centers, particularly on the worn high points, while the fields are deep brown. Environmental damage is visible on the reverse away from the devices. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 15.  
*Purchased from Empire Coin Co. (3/21/1959).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#325)*

**3183 1786 Connecticut Copper, Large Head Right—Environmental Damage—NGC Details. Fine. M. 3-D.1, W-2510, High R.5.** The young-looking “Scholar’s Head,” sure to appeal to students of the Connecticut copper series. Though the medium-brown surfaces show fine corrosion over each side and a rim bump at the lower left obverse, touches of cinnamon in the centers bring back the eye appeal. Listed on page 59 of the 2011 *Guide Book*. MRB Good 6.  
*Purchased from W.B. Johnson (6/17/1959).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#328)*

**3184 1786 Connecticut Copper, Mailed Bust Left—Reverse Scratched—NGC Details. VF. M. 5.7-H.1, W-2610, Low R.6.** Both confirmed die pairs involving the Miller 5.7 obverse are very rare. This is the slightly more accessible version, seen here with die crack down the left obverse. A trio of crisscrossing lines at the right reverse account for the “scratched” designation. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 15.  
*Purchased from Forest (9/2/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#331)*

---

**Singular 1786 Mailed Bust Left, M. 4.1-G, W-2525  
Connecticut Copper With Date 1787, VF30**

**3185 (1787-dated) 1786 Mailed Bust Left Connecticut Copper VF30 NGC. M. 4.1-G, W-2525, R.3.** One of the great curiosities of the collection; the obverse is Miller’s 4.1 from 1786, the reverse is a match for 1786’s Reverse G, so of course the date is ... 1787? A hand-cut date appears in the exergue, possibly carved in the late 19th or early 20th century to replace a date that was all but invisible. The year 1787 would have been a reasonable assumption in the days before Miller, though in this case, it was wrong.

The actual position of the date is a clue to the mystery that this piece provides. It is farther left than on any true 1787-dated reverse, with the base of the pole over the center of the 8. It is also curious that the original coin was struck off-center, and the hand-cut 1 in the date is positioned on the outer, unstruck margin of the original coin. The actual texture of the exergue area is different from the surrounding surface, but the olive color of the top surfaces of each digit is an exact match for the color on the rest of the coin, showing that the alteration took place long ago. Listed on page 59 of the 2011 *Guide Book*. MRB VF30.

*Purchased from Stack’s (10/9/1954).*

*From the W. Philip Keller Collection of U.S. Colonials. (#331)*

**3186 1786 Connecticut Copper, Mailed Bust Left—Environmental Damage—NGC Details. XF. M. 5.5-M, W-2595, R.3.** The more available of two die pairs made with reverse die M, notable for the simplicity of its outer devices. That side is smooth on this XF-sharpness coin, though the obverse has areas of pitting that are the by-product of environmental damage. Listed on page 59 of the 2011 *Guide Book*. MRB VF25.  
*Purchased from Kaplan (9/9/1952).*

*From the W. Philip Keller Collection of U.S. Colonials. (#331)*

**3187 1786 Connecticut Copper, Hercules Head Fine 15 NGC. M. 5.3-N, W-2575, R.2.** The “Hercules Head” is a square-jawed obverse variant that is also identified by the separation of the first C from the rest of CONNEC. The die pair with Reverse N, offered here, is the only one of three Hercules Head pairs that is not rare in an absolute sense. This piece has glossy golden-brown luster and a decent obverse strike, though the reverse is weak. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.

*Purchased from T.L. Craig (8/17/1967).*

*From the W. Philip Keller Collection of U.S. Colonials. (#334)*

**3188 1787 INDE ET LIB Small Bust Right Connecticut Copper—Scratches—NGC Details. Good. M. 1.1-VV, W-2710, R.7.** The extremely rare Small Head Right variant that comes with a reverse that has INDE left and ET LIB right. Well-worn with numerous light scratches on each side and a “ragged” area at the bottom left of the obverse. Listed on page 59 of the 2011 *Guide Book*. MRB Good 4.  
*Purchased from Bowers and Ruddy (1/28/1972).*

*From the W. Philip Keller Collection of U.S. Colonials. (#340)*

**3189 1787 INDE ET LIB Mailed Bust Right Connecticut Copper VG8 NGC. M. 1.3-L, W-2735, R.6.** A Very Good example of the very rare Mailed Bust Right type, softly struck on the obverse but with pleasing detail remaining in the protected areas of the reverse. A minor rim bump is noted at 2 o’clock on the obverse. Listed on page 59 of the 2011 *Guide Book*. MRB VG8.

*Purchased from J. Walsh (10/29/1966).*

*From the W. Philip Keller Collection of U.S. Colonials. (#340)*

- 3190 1787 Connecticut Copper, Muttonhead—Environmental Damage—NGC Details.** VF. M. 1.2-C, W-2720, R.3. This scarce and distinctive die pair is now believed to be a contemporary counterfeit. The present example is from a rare early die state with complete obverse legends. Golden-brown surfaces are granular from environmental damage, and two parallel scrapes appear at the back of the portrait's jawline. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 12.  
Purchased from T. Arnold (4/24/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (#343)

**Important 1787 Connecticut Copper  
'Muttonhead,' M. 1.2-C, W-2720  
XF Details, Possibly Finer**

- 3191 1787 Connecticut Copper, Muttonhead—Environmental Damage—NGC Details.** XF. M. 1.2-C, W-2720, R.3. Both sides of this Connecticut copper variety, today believed to be a contemporary counterfeit, are famous (or infamous) in their own right. The obverse has the stout "Muttonhead" portrait, while the reverse has provoked plenty of attention over the years; the collector's typed note on the coin envelope states "Breasts of liberty [sic] nude," while Q. David Bowers and his *Whitman Encyclopedia of Colonial and Early American Coins* opts for the blunter "Topless Liberty" moniker. This remarkably glossy example hails from a later die state with peripheral obverse lettering mostly lapped away. While NGC's details grade is XF, the luster suggests better. Patches of whitish-brown corrosion appear at the upper and lower obverse and at the upper reverse. Listed on page 59 of the 2011 *Guide Book*. MRB AU50.  
Ex: *New Netherlands* (10/1953), part of lot 381  
From the W. Philip Keller Collection of U.S. Colonials.

**Small Head Right 1787 Connecticut Copper  
ETLIB INDE, M. 1.1-A, W-2700, VF30**

- 3192 1787 ETLIB INDE Small Head Right Connecticut Copper VF30 NGC.** M. 1.1-A, W-2700, R.3. This scarce Small Head Right pairing is the more available of two options, as the variety with VV reverse is extremely rare. The present midrange coin has prominent peach overtones at the centers with a more blue-violet appearance at the margins. The center of the portrait and the seated figure show prominent planchet voids. Listed on page 59 of the 2011 *Guide Book*. MRB XF40.  
Purchased from T.L. Craige (8/17/1967).  
From the W. Philip Keller Collection of U.S. Colonials. (#346)

**Laughing Head 1787 Connecticut Copper  
M. 6.1-M, W-2820, XF40**

- 3193 1787 Connecticut Copper, Laughing Head XF40 NGC.** M. 6.1-M, W-2820, R.1. This popular variety has enough supply to meet demand in lower grades, though the equation changes at the XF level. A beautiful example is offered here, and the fine details of the mirthful portrait are on display, particularly at the hair. Smooth rosewood color defines the eye appeal. Listed on page 59 of the 2011 *Guide Book*. MRB XF45.  
Purchased from Stack's (10/9/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#358)

**Popular Horned Bust 1787 Connecticut Copper  
M. 4-L, W-2810, AU Details**

- 3194 1787 Connecticut Copper, Horned Bust—Reverse Planchet Flaw—NGC Details.** AU. M. 4-L, W-2810, R.1. Glossy and beautiful with the "horn" die break and the rest of the portrait rendered in deep ebony. This specimen displays beautifully, and the reverse is free of post-striking abrasions, though a narrow planchet flaw that runs from the crook of the woman's arm across the body and to the rim accounts for the details grade. Listed on page 59 of the 2011 *Guide Book*. MRB XF45.  
Purchased from A.D. Hoch (10/9/1962).  
From the W. Philip Keller Collection of U.S. Colonials. (#364)

- 3195 1787 Connecticut Copper, Mailed Bust Left, CONNECT—Corrosion—NGC Details. Fine. M. 15-S, W-2915, High R.5.** CONNECT obverse, reverse with the “fatal break” at right. A significantly corroded but compelling example of this rare die pair, toned mainly in medium and deep browns. Listed on page 59 of the 2011 *Guide Book*. MRB Good 5.  
*Purchased from J. Walsh (11/16/1963).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#367)*
- 3196 1787 Connecticut Copper, Draped Bust Left—Graffiti—NGC Details. Good. M. 37.12-TT, W-4180, R.6.** Very rare die pair, offered here extensively worn yet pleasing. Golden painted attribution letters against chocolate-brown surfaces are described by NGC as “graffiti.” Listed on page 60 of the 2011 *Guide Book*. MRB AG3.  
*Purchased from Richard Picker (9/14/1963).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3197 1787 Connecticut Copper, Draped Bust Left—Corrosion—NGC Details. Good. M. 33.36-SS, W-3910, High R.7.** Variety currently rated as “URS-3” in the Whitman *Colonial and Early American* reference. The SS reverse was used in two die pairs, both extremely rare. This is an extensively worn example with distinct corrosion on the deep brown to black surfaces, yet an important and attractive piece in its own way. Listed on page 60 of the 2011 *Guide Book*. MRB AG3.  
*Purchased from Bowers and Ruddy (8/5/1971).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3198 1787 Connecticut Copper, Draped Bust Left—Reverse Planchet Flaw—NGC Details. Good. Miller 33.19-q, W-3660, Low R.7.** This is a very rare variety and an example in any grade is highly desirable to specialists. The present specimen is actually quite nice for a coin that has seen such extensive circulation. Deep brown patina in the fields contrasts sharply against the lighter color on the devices. A planchet flaw (as made) in the lower left reverse accounts for the modifier from NGC, but it does not obscure any of the important parts of the design. Listed on page 60 of the 2011 *Guide Book*. MRB Good 5.  
*Purchased from Bowers and Ruddy (8/5/1971).*  
*From the W. Philip Keller Collection of U.S. Colonials.*
- 3199 1787 Connecticut Copper, Draped Bust Left—Damaged—NGC Details. VG. M. 37.10-RR, W-4165, R.6.** The only collectible example of the 1787 RR reverse of the Connecticut coppers of 1787, as the “37.4-RR” may not exist. Deep rosewood and caramel tones and an important example despite extensive wear and deep depressions on both the major figures. Listed on page 60 of the 2011 *Guide Book*. MRB Good 5.  
*Purchased from Greco (1/17/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3200 1787 Connecticut Copper, Draped Bust Left—Environmental Damage—NGC Details. VG. M. 16.5-p, W-3030, R.7.** This rare Connecticut is significant because the die was later reground and altered to become a Mailed Bust Left (Miller 8), the only such alteration in the series. The surfaces show the usual flan porosity, but we are not quite certain what it meant by Environmental Damage. The color is light brown with occasional darker patches in the fields and recesses. A well-circulated example of this rarity in the Connecticut series. Listed on page 60 of the 2011 *Guide Book*. MRB Good 6.  
*Ex: Bowers & Ruddy (1/28/1972).*  
*From the W. Philip Keller Collection of U.S. Colonials.*
- 3201 1787 Connecticut Copper, Draped Bust Left VG10 NGC. M. 33.30-EE, W-3815, Low R.6.** While very rare in an absolute sense, this is actually the more common of the two Miller 33.30-obverse die pairs, as the pair with SS reverse is extremely rare. For a Very Good coin, this chocolate-brown piece has bold outer obverse lettering, though the reverse has more typical weakness. A planchet flaw is noted at the seated figure's head. Listed on page 60 of the 2011 *Guide Book*. MRB Very Good 8.  
*Purchased from Empire Coin Company (5/2/1959).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3202 1787 Connecticut Copper, Draped Bust Left—Corrosion—NGC Details. Fine. M. 33.28-Z.16, W-3770, R.5.** The “Snipe Nose” obverse, a colorfully named die found in four pairs, all rare. This R.5 pair is actually the most accessible of them. The present piece has considerable rose overtones to the brown surfaces, though the effects of fine corrosion cover most of each side. Listed on page 60 of the 2011 *Guide Book*. MRB Good 6.  
*Purchased from Stack's (10/9/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials.*
- 3203 1787 Connecticut Copper, Draped Bust Left—Corrosion—NGC Details. Fine. M-24-FF, W-3080, R.7.** Paired with one other reverse, the lettering and punctuation differentiate this reverse. The g.3 reverse also has the numerals in the date punched in lower. The surfaces are rough, as one would expect, and there are several spots of active corrosion on the obverse. The coin was struck from misaligned dies with the left portion of each side strong for the grade and little or no definition on the right side. Variegated medium to darker brown color. Listed on page 60 of the 2011 *Guide Book*. MRB VG 8.  
*Purchased from W.D. Rudisill (9/16/1961) for \$16.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3204 1787 Connecticut Copper, Draped Bust Left—Obverse Graffiti—NGC Details. Fine. Miller 43.2-X.4, W-4255, R.6.** This is the rarer of the two “CONNFC” varieties, which are given their own listing in the *Guide Book*. What NGC calls “graffiti” is actually a collector's notation of the variety—a common (and readily accepted) practice among numismatists decades ago. This piece exhibits pleasing light brown patina and has no marks of any significance. A great specimen for both type collectors and series specialists. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.  
*Purchased from Hollinbeck (7/29/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3205 1787 Connecticut Copper, Draped Bust Left—Reverse Scratched—NGC Details. Fine. Miller 33.20-Z.11, W-3670, R.7.** A boldly detailed example of this very rare variety. Light to medium brown patina enhances the surfaces. Several shallow scratches and a couple of small planchet flaws add to the originality of this coin. Listed on page 60 of the 2011 *Guide Book*. MRB VG8.  
*Purchased from Bowers and Ruddy (1/28/1972).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3206 1787 Connecticut Copper, Draped Bust Left Fine 15 NGC. Miller 33.13-Z.7, W-3560, R.5.** The Liberty pole points to the right (facing) side of the 1 in the date, which is diagnostic for this reverse. The obverse die has deteriorated to the point where the A in AUCTORI is filled, a large break has formed above the O in the same word, and numerous cracks appear throughout. The upper left border of the reverse is poorly struck, but the rest of the details are well defined. A few small planchet flaws do not distract. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.  
*Ex: Stack's (10/9/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3207 1787 Connecticut Copper, Draped Bust Left VF20 NGC. M. 37.9-e, W-4160, High R.5.** Sole use of the 37.9 obverse and a rare die pair. Considerable glossy golden-brown luster counterbalances the striking softness seen on each side. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.  
*Purchased from New Netherlands (8/9/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3208 1787 Connecticut Copper, Draped Bust Left—Graffiti—NGC Details. VF. M. 33.25-Z.10, W-3720, R.6.** Struck slightly off-center, ebony in fields with chocolate-brown on moderately worn devices, appealing aside from a few rim dents. Dedicated colonial collectors are unlikely to be dissuaded by the painted-on attribution on either side of the portrait, despite NGC's whistle-and-flag label for “graffiti.” Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Hollinbeck (7/29/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*

- 3209 1787 Connecticut Copper, Draped Bust Left VF20 NGC. M. 31.2-r.3, W-3210, R.1.** Lovely medium brown surfaces exhibit lighter tan devices with hints of deep maroon on the reverse. The obverse is slightly off-center to 12 o'clock, the reverse normally centered. This pleasing problem free piece is an excellent candidate for the colonial type collector. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
*Ex: M.A. Holmes Sale (Stack's, 10/1960), lot 1263 where it realized \$7.50.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3210 1787 Connecticut Copper, Draped Bust Left—Graffiti—NGC Details. VF. Miller 32.2-X.2, W-3225, R.5.** The notation 322/X2 (the Miller variety) is written in "white ink" (actually red in this case) on the obverse field of this well detailed, medium brown Connecticut copper. The ink notation was a practice followed by several old-time collectors, such as Dr. Thomas Hall (NGC labels this as graffiti, which it is not). The scarce die marriage combines Miller's 32.2 obverse (small to medium dentils with irregular spacing), with his X.2 reverse (High 1 and 8 in the date, second 7 very low). Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Rudisill (12/5/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials.*
- 3211 1787 Connecticut Copper, Draped Bust Left VF20 NGC. Miller 37.2-k.5, W-4105, High R.5.** The large second leaf on the right of the branch identifies the reverse, and this diagnostic is quite prominent even on this midrange representative. The central design elements are softly struck, but the rest of the details are clear. A few small planchet flaws in the lower left of the obverse are barely worthy of mention. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.  
*Ex: Norweb; James Kelly Auction (2/8/1954), lot 61.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3212 1787 Connecticut Copper, Draped Bust Left—Scratches—NGC Details. VF. Miller 47-a.3, W-4310, R.6.** Light brown patina in the centers yields to deeper colors around the margins. A few letters are weakly struck, but the rest of the details are crisp. Numerous old pinscratches on either side account for the designation from NGC. A rare variety. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.  
*Purchased from "Hoch" (7/16/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials.*
- 3213 1787 Connecticut Copper, Draped Bust Left—Graffiti—NGC Details. VF. Miller 53-FF, W-4335, R.5.** The so-called "graffiti" is merely a collector's attribution of the coin in ink. Interestingly, it appears that the attribution was corrected from 45-EE to 53-FF, and both appear in the left obverse field. The medium brown surfaces of this piece show moderate granularity, but the details are hardly affected. A nice example of this scarce variety. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.  
*Purchased from Hollinbeck (7/29/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3214 1787 Connecticut Copper, Draped Bust Left VF20 NGC. Miller 33.38-Z.1, W-3925, High R.5.** This obverse type, with AUCTORI: CONNEC: and cinquefoils, is among the most difficult in the series to attribute with 50 slight variations. The reverse, however, has the diagnostic INDE over INDN, a correction that is easily seen on the present coin. This specimen has delightful medium brown patina with excellent striking definition. A small planchet flaw in the lower right quadrant of the obverse does not affect any of the design elements. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from T. L. Craig (8/17/1967).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3215 1787 Connecticut Copper, Draped Bust Left VF20 NGC. Miller 33.43-q, W-4005, High R.5.** This piece was struck from clashed dies and traces of the figure of Liberty can be seen in the obverse fields. The lower obverse and the corresponding area on the reverse are weakly defined, but the rest of the design is nicely detailed. A minimally marked and appealing example of this very scarce variety. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from New Netherlands (8/9/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3216 1787 Connecticut Copper, Draped Bust Left—Reverse Planchet Flaw—NGC Details. VF. Miller 33.13-hh.2, W-3575, R.7.** The obverse of this piece is particularly nice with attractive chestnut-brown patina, sharply defined details, and no distracting marks. The reverse has some minor striking softness, and a planchet flaw at 3 o'clock obscures the LI in LIB. Several spindly die cracks are seen on both sides. A very rare variety. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from D. Sonderman (6/19/1976).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3217 1787 Connecticut Copper, Draped Bust Left VF25 NGC. Miller 18-g.1, W-3045, R.6.** This variety is scarcer than previously thought and the present coin is a pleasing problem-free representative. The centers are softly defined, as always seen, and peppered abrasion are consistent with the grade. There is, however, significant peripheral detail. Listed on page 60 of the 2011 *Guide Book*. MRB VF30.  
*Purchased from T. L. Craig (8/17/1967).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3218 1787 Connecticut Copper, Draped Bust Left VF25 NGC. Miller 46-BB, W-4305, R.5.** A boldly detailed example of this scarce variety. All of the design elements are clear save for some of the dentilation at the borders. Chocolate-brown patina covers both sides with some lighter coloration on the high points. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Richard Picker (8/17/1967).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3219 1787 Connecticut Copper, Draped Bust Left VF30 NGC. M. 33.36-T.1, W-3875, R.6.** The evocatively named "Skeleton Hand" reverse, named for the bone-thin arm holding the staff on the reverse. Violet and orange overtones grace rich brown surfaces. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Stack's (10/9/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3220 1787 Connecticut Copper, Draped Bust Left VF30 NGC. M. 16.1-m, W-3000, R.5.** This scarcer Draped Bust Left variety is characterized by the first C in CONNEC embedded in the hair (although Miller states it is "partly on head"), and the lower curve of the same C is not visible. This obverse was only used with this single reverse. The surfaces are lighter brown and glossy with the only planchet roughness limited to the center of the obverse. The coin is just a bit off center, and the devices are well defined. Listed on page 60 of the 2011 *Guide Book*. MRB VF30.  
*Purchased from Ted L. Craig (8/17/1967).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3221 1787 Connecticut Copper, Draped Bust Left VF30 NGC. Miller 19-g.4, W-3050, R.3.** Oak-brown patina mixes with deeper brown accents across both sides. This piece was struck slightly off center so some of the peripheral detail is missing. Although this specimen was made from poor quality planchet stock, it does not have many post-strike imperfections. Listed on page 60 of the 2011 *Guide Book*. MRB VF30.  
*Purchased from Stack's (10/9/1954).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3222 1787 Connecticut Copper, Draped Bust Left VF30 NGC. Miller 29.1-n, W-3150, R.6.** One of the many rare varieties of 1787 Draped Bust Left Connecticut coppers, combining the Miller 29.1 obverse (A in AUCTORI close to bust), with the n reverse (unique lettering and punctuation). The present coin is struck a little off center (low), with moderately worn devices, and medium brown surfaces. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Walter Breen (5/2/1959).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*
- 3223 1787 Connecticut Copper, Draped Bust Left VF30 NGC. Miller 33.1-Z.13, W-3675, R.5.** A scarce variety of the 1787 Draped Bust Left Connecticut copper, with moderate, even wear on the design elements. The planchet is well made, with only a few areas of granular texture. The Miller 33.1 obverse is characterized by small, irregularly shaped dentils, with irregular spacing. The Z.13 reverse is diagnosed by the position of the pole pointing to the upper left of the first 7 in the date. Listed on page 60 of the 2011 *Guide book*. MRB VF20.  
*Purchased from Ted Craig (8/17/1967).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#370)*

**3224 1787 Connecticut Copper, Draped Bust Left VF30 NGC. Martin 33.39-s.1, W-3960, R.4.** This is a relatively available variety, but the present coin is better than the typical example. The fairly smooth surfaces have charming mahogany-brown patina with no marks of any significance. The devices are crisply detailed throughout. Listed on page 60 of the 2011 *Guide Book*. MRB VF25.  
Ex: *Stack's* (10/9/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#370)

**3225 1787 Connecticut Copper, Draped Bust Left VF30 NGC. Miller 33.15-r.1, W-3605, R.2.** A distinctive reverse die, created when the engraver punched the B in LIB over a cinquefoil. Lighter orange accents visit the mostly medium brown surfaces. A number of tiny marks are seen at the center of the obverse, but none merit specific mention. Several planchet flaws (as made) are noted on the reverse. A well defined representative of this interesting variety. Listed on page 60 of the 2011 *Guide Book*. MRB VF30.  
Purchased from T. L. Craige (8/17/1967).  
From the W. Philip Keller Collection of U.S. Colonials. (#370)

**Very Rare Choice VF 1787 Draped Bust Left  
Connecticut Copper, M. 33.26-W.3, W-3740**

**3226 1787 Connecticut Copper, Draped Bust Left VF35 NGC. M. 33.26-W.3, W-3740, High R.6.** The Miller 33.26 obverse was used only briefly in conjunction with two reverse dies, and the pair with W.3 reverse, while very rare, is actually more common than the pair with W.5 reverse (an R.8). This is a charming chocolate-brown Choice VF coin that prominently displays the die breaks at the lower obverse that shortened that side's lifespan. A small curved clip appears to the right of the portrait. Listed on page 60 of the 2011 *Guide Book*. MRB XF40.  
Ex: *Empire Coin Company* (5/2/1959).  
From the W. Philip Keller Collection of U.S. Colonials. (#370)

**3227 1787 Connecticut Copper, Draped Bust Left VF35 NGC. Miller 32.1-X.3, W-3215, R.3.** This 1787 Connecticut copper is a sharply detailed specimen, on a slightly granular planchet, with medium brown surfaces. The Miller 32.1 obverse is diagnosed by the medium length, widely spaced and erratically aligned dentils. The X.3 reverse is determined by the position of the digits in the date, 1 highest, 8 slightly high, both 7's low. Listed on page 60 of the 2010 *Guide Book*. MRB VF30.  
Purchased from *New Netherlands* (8/9/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#370)

**3228 1787 Connecticut Copper, Draped Bust Left VF35 NGC. Miller 33.10-Z.8, W-3510, R.5.** Sharp design definition adds to the eye appeal of this chocolate-brown specimen. The strike was just slightly off center, which obscures part of the date and dentils. There is a thin planchet flaw on the obverse, and a sizeable die break bisects the figure of Liberty on the reverse. Listed on page 60 of the 2011 *Guide Book*. MRB VF30.  
Ex: *Stack's* (10/9/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#370)

**3229 1787 Connecticut Copper, Draped Bust Left—Reverse Planchet Flaw—NGC Details. XF. Miller 37.13-HH, W-4185, R.5.** *Incorrectly described as an "ETLIR" coin on the holder*, but clearly not from reverse inspection. This die pair is the only 1787 usage of the 37.13 obverse. This olive-brown example has glossy and attractive surfaces, and even though a charcoal-gray planchet flaw appears at the lower-central reverse, this piece is sure to appeal to the Connecticut copper enthusiast. Listed on page 60 of the 2011 *Guide Book*. MRB VF25.  
Ex: *James Kelly* (2/1954).  
From the W. Philip Keller Collection of U.S. Colonials.

**3230 1787 Connecticut Copper, Draped Bust Left—Graffiti—NGC Details. XF. Miller 32.2-X.1, W-3220, R.3.** The Miller variety has been written in white on the left obverse field of this 1787 Connecticut copper, and the letter M is written on the right obverse field. Labeled as graffiti by NGC (which it is not), this white ink notation was used by several early collectors, such as Dr. Thomas Hall. The devices are sharply detailed and the planchet was well produced. The Miller 32.2 obverse is identified by the small-to-medium dentils, with irregular spacing. The X.1 reverse features the 1 in the date placed high, extending into the date line. Listed on page 60 of the 2011 *Guide Book*. MRB VF35.  
Purchased from A.D. Hoch (11/17/1960).  
From the W. Philip Keller Collection of U.S. Colonials.

**Impressive 1787 Draped Bust Left Connecticut  
Miller 45-CC, Choice Extremely Fine**

**3231 1787 Connecticut Copper, Draped Bust Left XF45 NGC. Miller 45-CC, W-4300, R.5.** Often called the "Hapsburg jaw variety" because of the extremely prominent chin and jawline. Pleasing chestnut-brown patina envelops the surfaces of this well defined representative. A few planchet flaws on each side are typical for the series. This scarce variety is seldom seen at the Extremely Fine grade level. Listed on page 60 of the 2011 *Guide Book*. MRB XF45.  
Purchased from A. D. Hoch (5/6/1960).  
From the W. Philip Keller Collection of U.S. Colonials. (#370)

**3232 1787 Connecticut Copper, AUCIORI VF20 NGC. M. 38-GG, W-4205, R.4.** Miller's 1787 Obverse 38 is the sole obverse to have AUCTORI spelled as AUCIORI, and both die pairs involving the obverse are very scarce. This pair has the GG reverse, with two fleurets after INDE: instead of a comet. Moderately worn with blue and violet overtones across medium-brown surfaces. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.  
Ex: *Stack's* (10/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#373)

**3233 1787 Connecticut Copper, AUCTOPI Good 6 NGC. M. 40-N, W-4240, R.6.** An AUCTOPI obverse, large letters, that even in its worn state shows the incused flaw between the A and U that distinguishes Miller's Obverse 40. The reverse is ET LIB and not ET IIB, and so the reverse is N and not kk. Deep brown surfaces are smooth save for planchet voids at the portrait. A die break is noted along the lower right obverse rim. Listed on page 60 of the 2011 *Guide Book*. MRB Good 4.  
Ex: *Empire Coin Company Auction* (3/31/1959), lot 153.  
From the W. Philip Keller Collection of U.S. Colonials. (#376)

- 3234 1787 Connecticut Copper, AUCTOPI—Scratches—NGC Details.** VG. M. 40-kk.1, W-4230, R.6. The Miller-40 AUCTOPI obverse paired with the kk.1 reverse with legend ET IIB for ET LIB. Both sides show two straight crossing lines over the central devices, but the deep brown and charcoal-gray surfaces show few natural abrasions. A rare opportunity to acquire this very rare die pair. Listed on page 60 of the 2011 *Guide Book*. MRB Good 4.  
Ex: Bowers and Ruddy (1/28/1972).  
From the W. Philip Keller Collection of U.S. Colonials.
- 3235 1787 Connecticut Copper, AUCTOPI—Obverse Graffiti, Environmental Damage—NGC Details.** VF. M. 41-ii, W-4235, R.4. Very scarce die pair, yet the most available of the AUCTOPI obverse varieties by a small margin. This deep brown example is moderately worn with a planchet flaw centered on the portrait and light to medium porosity overall. What NGC calls “graffiti” on the obverse is actually a museum-letter listing, with numerals “41” above and capital letter “I” below. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.  
Ex: Hollinbeck (9/20/1954).  
From the W. Philip Keller Collection of U.S. Colonials.
- 3236 1787 Connecticut Copper, AUCTOBI—Environmental Damage—NGC Details.** VF. M. 39.1-ff.2, W-4215, R.5. AUCTOBI on the 39.1 obverse, paired with the ff.2 reverse with ET-LIR for ET LIB. While both sides of this rare piece have porosity from environmental damage, considerable golden-brown and rose-violet tints linger on still-lustrous surfaces. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.  
Purchased from C.W. Foster (9/27/1952).  
From the W. Philip Keller Collection of U.S. Colonials.
- 3237 1787 Connecticut Copper, AUCTOBI VF25 NGC.** M. 39.2-ee, W-4220, R.5. One of two die pairs with AUCTOBI obverse and ET-LIR reverse. The collector’s notes indicate that this piece was bought as an M. 37.10-RR, though the RR reverse is not an ET-LIR. In fact, the ee reverse is this copper’s key diagnostic, since the second half of AUCTOBI is missing due to die weakness. This example is lightly abraded with caramel-and-chocolate color. The piece was purchased as “VG” according to the notes, but modern grading by surface puts the piece closer to the VF range. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
Ex: New Netherlands (10/23/1953).  
From the W. Philip Keller Collection of U.S. Colonials. (#379)
- 3238 1787 Connecticut Copper, CONNLC—Environmental Damage—NGC Details.** VF. Miller 50-F, W-4330, R.6. A rare variety of the 1787 Connecticut copper, with the Draped Bust Left motif, and CONNLC lettering. Walter Breen stated in 1975 that no example of this variety had been sold at auction in over 50 years. The present coin shows some evidence of corrosion on both surfaces, and shallow scratches on the bust. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.  
Purchased from Bowers and Ruddy Galleries (8/5/1971).  
From the W. Philip Keller Collection of U.S. Colonials.
- 3239 1787 Connecticut Copper, FNDE Fine 12 NGC.** M. 32.5-aa, W-3260, R.4. The more accessible of the two FNDE-reverse die pairs. Violet, rose, and caramel overtones over deep brown surfaces. Planchet flaw at the top of the portrait. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.  
Purchased from Richard Picker (8/17/1967).  
From the W. Philip Keller Collection of U.S. Colonials. (#388)
- 3240 1787 Connecticut Copper, FNDE—Scratches—NGC Details.** Fine. M. 32.8-aa, W-3275, R.6. The rarer of two aa-reverse die pairs, famous for the misspelling of INDE as FNDE. Black-and-tan with finely corroded surface texture and scratches at the upper part of the seated figure’s gown. Listed on page 60 of the 2011 *Guide Book*. MRB VG8.  
Purchased from Penn Coins (5/22/1964).  
From the W. Philip Keller Collection of U.S. Colonials. (#388)
- 3241 1787 Connecticut Copper, ETLIR—Corrosion—NGC Details.** VG. M. 37.14-cc.2, W-4190, R.6. Sole 1787 appearance of the cc.2 reverse and a very rare die pair. Black-and-tan toning with lighter color at the worn parts of the devices. Considerable corrosion patches appear in the left obverse field and on either side of the reverse figure. Listed on page 60 of the 2011 *Guide Book*. MRB Good 5.  
Purchased from French (10/10/53).  
From the W. Philip Keller Collection of U.S. Colonials. (#391)
- 3242 1787 Connecticut Copper, ETLIR VG8 NGC.** Miller 33.11-gg.1, W-3520, High R.6. This rare variety combines the Miller 33.11 obverse dies, characterized by thick, medium length, closely spaced dentils, with the gg.1 reverse that has the first 7 extended into the bottom date line. This coin shows a die cud at 9 o’clock on the obverse, and a light gouge near the juncture of the wreath and forehead. Listed on page 60 of the 2011 *Guide Book*. MRB VG8.  
Purchased from Kenneth W. Rendell (5/2/1959).  
From the W. Philip Keller Collection of U.S. Colonials. (#391)
- 3243 1787 Connecticut Copper, ETLIR Fine 15 NGC.** Miller 33.17-gg.2, W-3635, R.5. The scarce die marriage of Miller’s obverse 33.17, with medium-length, widely spaced dentil lines that do not extend all the way to the rims, and reverse gg.2, with the first 7 below the bottom date line. The present coin is from a late state of the reverse die, with a cud formed at the second 7 of the date. The planchet exhibits a on the obverse near the chin. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.  
Ex: NENA Auction Sale (Stack’s, 10/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#391)
- 3244 1787 Connecticut Copper, ETLIR VF20 NGC.** M. 33.29-gg.1, W-3810, R.5. The ETLIR reverse is not specified on the holder, but the gg.1 reverse is a clear indicator. Moderately worn with glossy golden-brown surfaces that show reddish tints and a degree of peripheral striking weakness. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.  
Purchased from M.L. Kaplan (7/30/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#391)
- 3245 1787 Connecticut Copper, ETLIR VF30 NGC.** Miller 31.1-gg.1, W-3205, R.3. A relatively available variety of the 1787 Draped Bust Left Connecticut copper, with the “ETLIR” notation on the reverse. The Miller 31.1 obverse die is identified by the position of the top dot of the final colon on the same level as the top of C. The gg.1 reverse is notable for having the first 7 in the date extend into the lower date line. The present coin is a well detailed example with chocolate-brown surfaces and a short scratch on the portrait’s cheek. Listed on page 60 of the 2011 *Guide Book*. MRB VF30.  
Purchased from David Sonderman (7/20/1976).  
From the W. Philip Keller Collection of U.S. Colonials. (#391)
- 3246 1787 Connecticut Copper, ETLIR—Environmental Damage—NGC Details.** XF. Miller 34-ff.1, W-4060, R.5. A few corrosion pits are noted on the surfaces of this scarce 1787 Connecticut copper. The devices are well detailed. The Miller 34 obverse is distinguished by its unique legend and punctuation, while the ff.1 reverse has the letter E in ETLIR touching the hand (somewhat obscured by corrosion on this piece). Listed on page 60 of the 2011 *Guide Book*. MRB XF40.  
Purchased from Ted Craigie (8/17/1967).  
From the W. Philip Keller Collection of U.S. Colonials.

**3247 1787 Connecticut Copper, ETIIB VF20 NGC. Miller 26-kk.1, W-3115, R.5.** The Miller 26 obverse die, characterized by the legend +AUCTORI:X/X CONNEC:X is combined with the kk.1 reverse, identified by the bottom of the colon on the shield, to form this scarce variety of the 1787 Draped Bust Left Connecticut copper. The present coin is moderately worn, with slightly granular, medium brown surfaces. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.

Ex: NENA Auction Sale (Stack's, 10/1954).

From the W. Philip Keller Collection of U.S. Colonials. (#394)

**3248 1787 Connecticut Copper, ETIIB VF30 NGC. M. 37.8-LL, W-4150, Low R.5.** Reverse LL is noteworthy for the wide gap between the two I's in IIB. A glossy rosewood-brown piece, struck slightly off-center toward 7 o'clock but with most of the relevant detail visible. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.

Purchased from T.L. Craig (8/17/1967).

From the W. Philip Keller Collection of U.S. Colonials. (#394)

**3249 1788 Connecticut Copper, Mailed Bust Right—Environmental Damage—NGC Details. VF. M. 4.2-R, W-4435, R.6.** The 4.2 obverse is distinguished by both fillets being solid and the tip of the wreath is far above the star to the right. All M. 4.2-R Connecticut coppers are believed to be struck over Nova Constellatio. However, on this example the only evidence we see are several partial letters on the lower portion of the obverse. The surfaces have good color with variegated dark and medium brown patina. However, each side is peppered with numerous small marks and there are several spots of active corrosion on the reverse. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.

Purchased from Johnson (4/11/1959) for \$25.

From the W. Philip Keller Collection of U.S. Colonials.

#### Double Struck M. 4.1-K 1788 Connecticut VF25, Scarce Mailed Bust Right Variety

**3250 1788 Connecticut Copper, Mailed Bust Right—Double Struck—VF25 NGC. M. 4.1-K, W-4430, R.5.** The obverse is attributable by the outline on both fillets, and the tip of the wreath is about even with the highest point of the star to the right. However, because of the double striking these diagnostics are not visible on the obverse, so the coin must be attributed by the reverse. The medium brown surfaces are only interrupted by a spot on the reverse rim between 2 and 3 o'clock. Listed on page 60 of the 2011 *Guide Book*. MRB VF25.

Ex: James Kelly (2/8/1954).

From the W. Philip Keller Collection of U.S. Colonials. (#397)

#### Double Struck 1788 M. 2-D Connecticut Copper VF35, Prominent Side-to-Side Flan Crack

**3251 1788 Connecticut Copper, Mailed Bust Right—Double Struck—VF35 NGC. M. 2-D, W-4405, R.1.** This is the only Mailed Bust Right variety with a period after AUCTORI. The reverse was struck from a die used on a counterfeit British halfpenny (Vlack 13-88CT). This is an earlier die state as it lacks the often-seen die cud at 7 o'clock on the obverse. Prominent double striking is evident on both sides. The flan cracked on the right side of the obverse and left side of the reverse. The surfaces are mildly porous with no mentionable abrasions. Listed on page 60 of the 2011 *Guide Book*. MRB XF40.

Purchased from French's (10/10/1953) for \$2.

From the W. Philip Keller Collection of U.S. Colonials. (#397)

**3252 1788 Connecticut Copper, Mailed Bust Right—Struck on a Nova Constellatio, Corroded—ANACS. XF40 Details. M. 3-B.2, W-4415, R.6.** Part of an E from the Nova undertype is visible at 3 o'clock on the obverse; otherwise, there is little evidence of the overstrike. The surfaces show the usual granularity and there are several spots of active corrosion. The color is olive-brown with bright accents over the high points from apparent rub. The striking details are generally good, but somewhat irregular at the same time with occasional areas of softness, for instance the peripheral legends and lower part of the date. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.

Purchased from Ted L. Craig (5/25/1966) for \$50.

From the W. Philip Keller Collection of U.S. Colonials. (#397)

#### 1788 Mailed Bust Right Connecticut Copper R.6, M. 3-B.2, Pleasing XF45 Example

**3253 1788 Connecticut Copper, Mailed Bust Right XF45 NGC. M. 3-B.2, W-4415, R.6.** The reverse is most easily attributed by the branch hand that is opposite E, the star opposite the center of E, and in the date the 1 is upright and distant from the 7. This variety is seldom offered and we do not have any comparables in the XF grade range. The Whitman reference lists a VF in a 2000 auction appearance that realized \$3,737.50. Another VF brought \$1,265 in 2006. There is a lot of blue sky between the price of those two VF coins. This is a well-defined example that has uniformly dark surfaces and micro-granularity from the planchet stock. There are no mentionable abrasions and the only flan cracks are in the area of the eye on the obverse. It should be interesting to see what this coin fetches at public auction. Listed on page 60 of the 2011 *Guide Book*. MRB XF40.

Purchased from Richard Picker (8/17/1967).

From the W. Philip Keller Collection of U.S. Colonials. (#397)

**AU 1788 Connecticut Copper, M. 3-B.2  
Struck Over a Nova Constellatio  
R.6, Showing Much of the Undertype**

- 3254 1788 Connecticut Copper, Mailed Bust Right—Struck Over a Nova Constellatio—AU50 NGC. M. 3-B.2, W-4415, R.6.** A fascinating piece that shows most of the undertype—the central eye on the obverse and several distinct partial glory of rays on the central figure and a star directly in front of the mouth. The reverse shows much less of the undertype with a few leaves of the wreath visible on the upper torso of Liberty. Both sides have even, dark brown patina. Two other examples are mentioned in the Whitman reference that are struck over Novas. One was in a Pine Tree Auction in 1975, the other was predictably from John Ford's collection and realized \$14,950. Listed on page 60 of the 2011 *Guide Book*. MRB XF45. Purchased from A.D. Hoch (11/17/1961) for \$70. From the W. Philip Keller Collection of U.S. Colonials. (#397)

**Small Head, Mailed Bust 1788 Connecticut Copper  
Rarely Encountered M. 1-I, W-4400, VG8 Details**

- 3255 1788 Connecticut Copper, Small Head—Corroded—ANACS. VG8 Details. M. 1-I, W-4400, R.5.** This Mailed Bust Right die pair used a reverse from a Vermont copper (Ryder-39, Bressett 25-U). The details on this piece are typically weak, created by buckled dies. Also typical is the low grade of this coin. The Ford example was a rough Fine and brought \$14,950. The surfaces on this piece are also rough and there are even a couple of spots of active corrosion present. A flan crack is seen to the top of Liberty's head on the reverse. In the same area there are several slightly curved depressions that at first appear to be pinscratches, but close examination does not show that any metal has been moved, so we conclude this was some planchet anomaly present at the time of striking. This is an important and highly sought-after Connecticut copper that has its own *Guide Book* listing and is missing from many collections. Listed on page 60 of the 2011 *Guide Book*. MRB VG 8. Purchased from Richard Picker (10/18/1964) for \$50. From the W. Philip Keller Collection of U.S. Colonials.

**Extremely Rare 1788 Mailed Bust Left  
Connecticut Copper, VG Details  
Miller 8-K, W-4495**

- 3256 1788 Connecticut Copper, Mailed Bust Left—Corrosion—NGC Details. VG. Miller 8-K, W-4495, Low R.7.** Miller's short-lived Obverse 8 for 1788, noted in his *State Coinage of Connecticut* as having "CONNEC weak, the die showing injury." This "injury" was also present during the obverse die's use with a 1787-dated reverse, which suggests why the Miller 8-K pairing was so short-lived. While this example's violet, chocolate, and teak-brown surfaces show considerable corrosion, the discerning collector of Connecticut coppers will appreciate the opportunity to own this extremely rare variety and bid decisively. Listed on page 60 of the 2011 *Guide Book*. MRB Good 6. Purchased from Bowers and Ruddy (8/5/1971). From the W. Philip Keller Collection of U.S. Colonials.
- 3257 1788 Connecticut Copper, Mailed Bust Left VF30 NGC. M. 11-G, W-4510, R.2.** The single most common Mailed Bust Left die pair and an ideal type issue, if for no other reason than every other Mailed Bust Left variety is rare or better. This is an attractive midrange piece, glossy cinnamon-brown with suggestions of gold. Struck slightly off-center, though this is a minor concern in context. Listed on page 60 of the 2011 *Guide Book*. MRB VF20. Purchased from Rudisill (12/5/1961). From the W. Philip Keller Collection of U.S. Colonials. (#403)
- 3258 1788 Connecticut Copper, Mailed Bust Left—Scratches—NGC Details. XF. M. 12.2-C, W-4525, R.5.** One of the many rare Mailed Bust Left varieties for the year. Deep brown-black coloration on semi-glossy surfaces with finely granular texture. Scratches at the portrait's cheek and hair account for the details grade. Listed on page 60 of the 2011 *Guide Book*. MRB VF20. Purchased from Rudisill (12/5/1961). From the W. Philip Keller Collection of U.S. Colonials. (#403)
- 3259 1788 Connecticut Copper, Draped Bust Left—Corrosion—NGC Details. Good. M. 16.7-P, W-4630, R.7.** Sole appearance of obverse 16.7, and extensive wear is one of the most consistent attributes of this die pair. The present coin has considerable corrosion across teak-brown surfaces and a cut at the upper portrait, but discerning specialists will appreciate the variety for what it is and bid accordingly. Listed on page 60 of the 2011 *Guide Book*. MRB AG3. Purchased from Bowers and Ruddy (1/28/1972). From the W. Philip Keller Collection of U.S. Colonials. (#409)
- 3260 1788 Connecticut Copper, Draped Bust Left Fine 12 NGC. M. 16.4-L.2, W-4620, High R.5.** The 16.4 obverse was used in conjunction with two separate reverses, and both varieties are rare to extremely rare. This is a Fine example, chocolate-brown with the reverse in a near-terminal state with a break across. Planchet voids are present on that side, and painted-on attribution letters appear along the edge just under the portrait. Listed on page 60 of the 2011 *Guide Book*. MRB VG8. Ex: James Kelly (2/1954). From the W. Philip Keller Collection of U.S. Colonials. (#409)

- 3261 1788 Connecticut Copper, Draped Bust Left—Graffiti—NGC Details. VF. M. 16.5-H, W-4625, Low R.5.** A midrange representative of this very scarce to rare die pair, strongly outlined with a degree of glossiness to the black-and-brown surfaces. A shallow curved clip affects the truncation of the bust. The painted-on attribution in the left obverse field is incorrect, claiming a 16.3 obverse and an N reverse. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.

*Purchased from Rudisill (12/5/1961).*

*From the W. Philip Keller Collection of U.S. Colonials. (#409)*

- 3262 1788 Connecticut Copper, Draped Bust Left VF30 NGC. M. 16.1-D, W-4595, R.3.** Miller's Reverse D of 1788, noted for a die crack through the I of LIB, in a late state with prominent "cuds" on the seated figure's foot and at the E of ET. Deep brown surfaces have a few small spots of darker color. The New Netherlands cataloger suggests this die pair as a Machin's Mills product, struck at Newburg(h) in New York instead of New Haven, Connecticut. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.

*Ex: F.C.C. Boyd; New Netherlands #60 (12/3/1968), lot 356, which realized \$24.*

*From the W. Philip Keller Collection of U.S. Colonials. (#409)*

- 3263 1788 Connecticut Copper, Draped Bust Left VF35 NGC. Miller 15.1-L.1, W-4585, R.4.** The reverse with large gap between the LI and B at right. Excellent surface quality for the VF grade range with glossy golden-brown luster. A single prominent depression is noted at the top of the I in LIB. Listed on page 60 of the 2011 *Guide Book*. MRB VF25.

*Purchased from Mitchell (3/13/1965).*

*From the W. Philip Keller Collection of U.S. Colonials. (#409)*

- 3264 1788 Connecticut Copper, Draped Bust Left XF40 NGC. M. 16.1-H, W-4600, R.4.** The 16.1 obverse, prominently clashed under the portrait's chin, paired with the reverse H which shows ET LIB effectively as one word. A glossy example with light and dark variations on smooth medium-brown surfaces. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.

*Purchased from G.W. Mullin (2/23/1974).*

*From the W. Philip Keller Collection of U.S. Colonials. (#409)*

- 3265 1788 Connecticut Copper, Draped Bust Left XF40 NGC. M. 16.3-N, W-4610, R.2.** The single most accessible 1788 Draped Bust Left die pair for the Connecticut, the obverse prominently clashed to the left of the portrait and under the chin. This is a smooth chocolate and teal-brown example, well struck and well centered, a simply delightful type coin. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.

*Purchased from T.L. Craig (8/17/1967).*

*From the W. Philip Keller Collection of U.S. Colonials. (#409)*

- 3266 1788 Connecticut Copper, INDL ET LIB VG10 NGC. M. 16.2-O, W-4605, R.5.** Reverse O is famous for the blunder INDL instead of INDE. The two varieties incorporating that reverse are rare regardless of grade. Though this example is well-worn with an off-center and uneven strike, the central details are clear, including a die crack running under the shield that is a useful attribution diagnostic. Listed on page 60 of the 2011 *Guide Book*. MRB VG8.

*Ex: James Kelly (2/18/1954).*

*From the W. Philip Keller Collection of U.S. Colonials. (#415)*

- 3267 1776 Machin's Mills Halfpenny—Environmental Damage—NGC Details. Fine. Vlack 6-76A, W-7790, R.4.** Very scarce, though at the same time more accessible than the other 1776-dated Machin's Mills die pair, which is very rare. Though well-worn, the present piece retains full outlines of the central details, though the deep blue-brown surfaces also have considerable texture that suggest environmental damage. Nonetheless, an important selection. Listed on page 64 of the 2011 *Guide Book*. MRB VG8.

*Purchased from R. Donaldson (2/25/1962).*

*From the W. Philip Keller Collection of U.S. Colonials. (#460)*

---

**Choice AU Vlack 11-78A, W-7820 Machin's Mills  
1778-Dated Halfpenny, Clipped Planchet**

- 3268 1778 Machin's Mills Halfpenny—Clipped Planchet—AU55 NGC. Vlack 11-78A, W-7820, R.3.** Uncommonly high-grade for any Machin's Mills variety, and given the generous remaining luster and considerable faded copper-orange color, one of the most delightful to look at as well. Strongly impressed with a few small digs in the portrait area and a curved clip at lower left. Listed on page 64 of the 2011 *Guide Book*. MRB AU55.

*Purchased from Stack's (8/11/1962).*

*From the W. Philip Keller Collection of U.S. Colonials. (#466)*

---

**Vlack 17-87A, W-7900 Machin's Mills  
1787 Halfpenny, XF40**

- 3269 1787 Machin's Mills Halfpenny XF40 NGC. Vlack 17-87A, W-7900, R.2.** One of the more common Machin's Mills varieties from the prolific counterfeiting operation, though seldom encountered this fine. Softly struck through the centers with a planchet void on the portrait's cheek and a die crack that trails down to the left of "Britannia's" head, though the glossy walnut-brown surfaces show little actual wear. Listed on page 64 of the 2011 *Guide Book*. MRB AU50.

*Purchased from Stack's (8/11/1962).*

*From the W. Philip Keller Collection of U.S. Colonials. (#469)*

---

**Large Head 1787 Nova Eborac Copper  
Breen-985, W-5750, VF20**

- 3270 1787 Nova Eborac Copper, Large Head VF20 NGC. Breen-985, W-5750, R.6.** A very rare variety distinguished not only by the size of the portrait but also the aquiline shape of his nose. Moderately worn but pleasing with cinnamon and gold overtones to the medium-brown surfaces. Listed on page 65 of the 2011 *Guide Book*. MRB VF20. For the variety, Census: 1 in 20, 2 finer (9/10). (#484)

- 3271 1787 Nova Eborac Copper, Seated Left VF25 NGC. Breen-986, W-5755, R.3.** The Nova Eborac coppers were possibly minted by Ephraim Brasher and John Bailey, as indicated by die evidence and a petition filed with the New York State Assembly. The present coin represents the W-5755 variety, with the Normal Head obverse, and the Seated Left figure on the reverse. This example is unusually well centered, as only 20 percent of pieces seen have the full date on the planchet. Listed on page 65 of the 2011 *Guide Book*. MRB VF20. Purchased from M.L. Kaplan (8/17/1952). From the W. Philip Keller Collection of U.S. Colonials. (#478)
- 3272 1787 Nova Eborac Copper, Seated Right—Obverse Damage—NGC Details. VF. Breen-987, W-5760, R.4.** The W-5760 variety of the 1787 Nova Eborac copper is a scarce issue, characterized by the figure of Liberty facing right on the reverse. The present coin exhibits a long crack in the obverse planchet, and the surfaces have a slightly granular texture. Listed on page 65 of the 2011 *Guide Book*. MRB VF20. Purchased from M.L. Kaplan (6/25/1952). From the W. Philip Keller Collection of U.S. Colonials.
- 3273 Group Lot of Eight New Jersey Coppers Uncertified. 1786 Narrow Shield: Maris 14-J, Good, Ex: F.P. Hinman (9/30/1958); Maris 14-J, Fair, Ex: J. Ward (7/24/1961); Maris 15-L, good, Ex: Stack's (4/10/1954); Maris 17-b, VG, Burnished, Ex: Germantown Coin (6/2/1962); 1787 Outlined Shield: Maris 29-L, Fine, Pitted, Ex: W.E. Johnson (6/3/1959); 1787 PLURIRUS: Maris 55-L, VF, Corroded, Ex: Foster (12/10/1952); 1787 PLURIBS: Maris 60-p, Good, Ex: Foster (12/10/1952); 1788 Head Left: Maris 49-f, AG, Ex: S.H. Printz (3/5/1966).** From the W. Philip Keller Collection of U.S. Colonials. (Total: 8 coins)
- 3274 1786 New Jersey Copper, No Coulter—Rim Damage—NGC Details. VG. Maris 12-I, W-4795, R.4.** One of 13 No Coulter varieties, the Maris 12-I is rarely seen in better grades. In fact, only three pieces are believed known in XF, and one of those is retooled. Most examples of this variety show weak details on the reverse shield. On this piece there are just the barest traces of lines visible (with magnification). The center of the obverse shows softness of details on the horse's neck. Listed on page 66 of the 2011 *Guide Book*. MRB Good 4. Purchased from Lou Werner (11/8/1958). From the W. Philip Keller Collection of U.S. Colonials.
- 3275 1786 New Jersey Copper, Narrow Shield, Straight Plow Beam—Environmental Damage—NGC Details. VG. Maris 15-U, W-4830, R.6.** The diagnostic of this rare New Jersey is the coulter that points to the rightmost ornament under the horse. Maris considered the 15-U to be unique, and an old envelope that accompanies this lot states that also. However, over the past 60 or more years its rarity has remained at the R.6 level. The surfaces are uniformly porous, accounting for the Environmental Damage on the insert. The fields are dark brown with lighter colored devices. Listed on page 66 of the 2011 *Guide Book*. MRB VG 8. Purchased from F.J. Schaefer (6/28/1953). From the W. Philip Keller Collection of U.S. Colonials.
- 3276 1786 New Jersey Copper, Narrow Shield, Straight Plow Beam—Scratches—NGC Details. VG. Maris 16-L, W-4840, R.1.** Early Die State. The "Protruding Tongue" die crack is only faintly visible on this example, and there is no edge break on the right side of the obverse. The devices are reasonably well detailed for the amount of wear, and two streaks of darker brown patina are seen on the obverse of this otherwise pleasing medium brown example. Several shallow scratches are seen over the devices on each side. Listed on page 66 of the 2011 *Guide Book*. MRB Good 6. Ex: Stack's (4/10/1954). From the W. Philip Keller Collection of U.S. Colonials.
- 3277 1786 New Jersey Copper, Narrow Shield, Straight Plow Beam VG10 NGC. Maris 16-L, W-4840, R.1.** Late Die State. Maris 16-L is commonly known as the "Protruding Tongue" variety, because of the short, horizontal die crack in front of the horse's mouth. The crack is prominent here, especially for such a low grade coin. The surfaces are glossy medium brown and weakly struck in the centers. Listed on page 66 of the 2011 *Guide Book*. MRB VG8. Purchased from E.D. Sherwood (11/1/1964). From the W. Philip Keller Collection of U.S. Colonials. (#496)
- 3278 1786 New Jersey Copper, Narrow Shield, Straight Plow Beam—Corrosion—NGC Details. Fine. Maris 17-K, W-4865, R.3.** These pieces are often found overstruck on Machin's Mills coppers. That indeed appears to be the case here. Surprisingly this was not noticed by Mr. Keller, who was a true student of his collection. On the obverse an O is plainly evident to the left of the second A in CAESAREA. Other areas of the undertype are not discernible now because of the extensive corrosion. The surfaces are almost charcoal in the fields and recesses with notably lighter brown high points. Listed on page 66 of the 2011 *Guide Book*. MRB VG8. Purchased from Behringer (12/19/1953). From the W. Philip Keller Collection of U.S. Colonials.
- 3279 1786 New Jersey Copper, Narrow Shield, Straight Plow Beam—Damaged—NGC Details. VF. Maris 14-J, W-4810, R.1.** This is one of the most available New Jersey coppers and can be found in a wide range of grades, including Uncirculated. The surfaces are not without their problems, and the damage listed on the insert refers to a partial puncture on the lower reverse and upper obverse. Each side is a bit bright with a slight reddish tinge, indicating an old cleaning. Now much darker brown color has covered both obverse and reverse. The granular surfaces only show a couple of flan cracks in the center of the obverse. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 12. Purchased from W.D. Rusisill (9/16/1961) for \$37. From the W. Philip Keller Collection of U.S. Colonials.
- 3280 1786 New Jersey Copper, Narrow Shield, Curved Beam VF25 NGC. Maris 23-P, W-4940, R.3.** The diagnostic for the Curved Beam, Narrow Shield variety is the top handle end that is farther from the N than on Maris-21 and slightly less than half as high as Reverse N. This obverse die was paired with one other reverse on the Maris 23-R. This is an attractive, problem-free example with medium brown-olive color. Each side shows the usual tiny flan cracks, and there is a die cud on the obverse close to 3 o'clock. Softly struck in the center of the reverse. Listed on page 66 of the 2011 *Guide Book*. MRB VF20. Purchased from Ted L. Craig (9/14/1968). From the W. Philip Keller Collection of U.S. Colonials. (#496)

**Attractive VF30 1786 New Jersey Copper  
Narrow Shield, Straight Plow Beam  
Maris 14-J, W-4810**

- 3281 1786 New Jersey Copper, Narrow Shield, Straight Plow Beam VF30 NGC. Maris 14-J, W-4810, R.1.** This Straight Plow Beam variety is distinctive as the coulter points to the second ornament from the front of the horse. There are no die breaks on this piece. This is a pleasing example that is well-defined for the grade and shows even reddish-brown color over each side. Listed on page 66 of the 2011 *Guide Book*. MRB VF30. Ex: Hollinbeck (11/1953). From the W. Philip Keller Collection of U.S. Colonials. (#496)
- 3282 1786 New Jersey Copper, Narrow Shield, Curved Beam VF30 NGC. Maris 24-P, W-4965, R.2.** The diagnostic for Obverse 24 is the location of the 8, which is about centered under the left edge of the plow. Of additional interest is the mane of the horse, which is braided in two rows. The tip of the plow beam is also close to the right foot of A. A number of shallow planchet streaks and cracks are seen on each side, as usual. The surfaces are glossy and medium brown with lighter tinges. The strike is well defined on the obverse for the grade, the reverse shows the usual softness on the shield. Listed on page 66 of the 2011 *Guide Book*. MRB VF20. Purchased from Douglas (8/21/1951) for \$3. From the W. Philip Keller Collection of U.S. Colonials. (#496)

**Attractive 1786 New Jersey Copper, XF40  
Maris 15-J, W-4815**

- 3283 1786 New Jersey Copper, Narrow Shield, Straight Beam XF40 NGC. Maris 15-J, W-4815, R.2.** The usually seen die crack through EA terminates on this piece just right of the A. In the same area there are several parallel lines that look like adjustment marks (but probably are not). Numerous die cracks and planchet flakes are seen, the only one of concern is located below the first U in UNUM and has green verdigris in the recesses. The obverse has variegated shadings of brown, while the reverse is evenly colored. Listed on page 66 of the 2011 *Guide Book*. MRB VF35. *Purchased from Rudisill (10/11/1964).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#496)*

- 3284 1786 New Jersey Copper, Wide Shield VF20 NGC. Maris 21-N, W-4910, R.2.** The Wide Shield varieties are easily recognized and several varieties are common and obtainable. This obverse was used with four reverses, two of which are Wide Shields. This is an attractive example that has medium brown patina overall with contrasting lighter, almost tan devices. Very few of the usual flan cracks are seen on this piece. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 15. *Purchased from Empire Coin Co. (5/15/1959).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#498)*

- 3285 1786 New Jersey Copper, Wide Shield—Environmental Damage—NGC Details. VF. Maris 18-M, W-4890, R.1.** Early Die State. One of the more available Wide Shield varieties, this piece has charcoal surfaces with only occasional hints of lighter brown around the devices. The surfaces are porous throughout, but the striking details are strong, especially for the grade. One small dig is noted on the obverse beneath the V in NOVA. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 12. *Purchased from French's (10/10/1953).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

**Distinctive 1786 New Jersey Copper, VF Details  
Maris 19-M, W-4900, Rarity-5**

- 3286 1786 New Jersey Copper, Wide Shield—Improperly Cleaned—NGC Details. VF. Maris 19-M, W-4900, R.5.** Both the horse's head and the 1 in the date are tilted sharply to the left, which is diagnostic for this variety. Only two Uncirculated coins are believed known of this scarce variety. The Cleaned designation seems a bit harsh on this piece. The surfaces are a bit bright perhaps, but certainly not hairlined. The design is perfectly centered and the striking details are strong for the grade. Listed on page 66 of the 2011 *Guide Book*. MRB VF20. *Purchased from Kenneth W. Rendell (11/8/1958).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

- 3287 1787 New Jersey Copper, Outlined Shield—Environmental Damage—NGC Details. VG. Maris 47-e, W-5255, High R.5.** A scarcer New Jersey copper, the variety is most easily distinguished by the filled upper loop of the 8 in the date. This is a later die state as seen by the bulged lower obverse. The surfaces are porous and there are numerous planchet streaks. On the reverse there is a diagonal, shallow planchet depression across the upper shield lines. Listed on page 66 of the 2011 *Guide Book*. MRB Good 6. *Purchased from Stack's (6/27/1975).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

- 3288 1787 New Jersey Copper, Outlined Shield—Corrosion—NGC Details. VG. Maris 41-c, W-5205, R.6.** Labeled on the NGC insert as a Small Planchet, Plain Shield, it is not. This Curved Plow Beam variety has the handle end under the lower left serif of the N, and the rightmost tuft is completely below the horse's chest. The surfaces are heavily corroded with dark red and occasional bits of green seen over each side. The reverse design elements are very weakly detailed. Listed on page 66 of the 2011 *Guide Book*. MRB VG 8. *Purchased from Ted Craige (1/9/1971).* This is one of Mr. Keller's later purchases, one of the coins he bought after the birth of his children. Most of his purchases seem to have stopped after 1963.  
*From the W. Philip Keller Collection of U.S. Colonials.*

- 3289 1787 New Jersey Copper, Outlined Shield Fine 12 NGC. Maris 37-f, W-5155, R.4.** This scarce Goiter variety was noted by Maris to have die cracks, as seen in the center of the reverse here, unlike the later-dated 1788 Maris 49-f and 50-f coins without the break. This, of course, brings up the question of the dating of coins and their actual striking sequence. The surfaces are glossy with slightly dark fields and sharply contrasting, almost-tan color over the devices. An attractive coin for the grade. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 12. *Purchased from Empire Coin Co. (8/8/1958).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

- 3290 1787 New Jersey Copper, Outlined Shield VF20 NGC. Maris 28-L, W-5065, R.3.** This obverse shows knobs on the end of the plow. On later die states these fade. On this example they are still present but faint. The surfaces show light, uniform porosity over each side and the fields are deep brown with noticeably contrasting, lighter devices. Listed on page 66 of the 2011 *Guide Book*. MRB VF20. *Purchased from Empire Coin Co. (8/8/1958).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

- 3291 1787 New Jersey Copper, Outlined Shield VF20 NGC. Maris 32-T, W-5100, R.1.** This is a common variety but this is an uncommonly fine coin, especially for the grade. The surfaces are remarkably tight for a New Jersey with none of the porosity or planchet laminations usually seen. There are no mentionable or even noticeable marks on either side. The fields are dark brown and the devices are sharply contrasted by light brown-olive patina. A lovely type coin. Listed on page 66 of the 2011 *Guide Book*. MRB VF20. *Purchased from Empire Coin Co. (8/8/1958).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

- 3292 1787 New Jersey Copper, Outlined Shield—Obverse Damage—NGC Details. VF. Maris 38-a, W-5180, R.5.** This obverse is married with five other reverses. It is distinctive by the tip of the singletree that is misaligned and close to the end of the beam. The even, medium brown surfaces show the usual planchet streakiness. The damage on the obverse are a couple of horizontal scrapes on the figure of the horse. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 15. *Purchased from Kenneth W. Rendell (11/8/1958) for \$1.50 with a book value of \$2.50 at the time.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

- 3293 1787 New Jersey Copper, Outlined Shield VF20 NGC. Maris 39-a, W-5195, R.2.** The diagnostic for Obverse 39 is the noticeably low second 7 in the date. This is a common variety that is known in a wide variety of grades including Uncirculated. This even brown example shows the usual planchet roughness. The strike is also irregular. Listed on page 66 of the 2011 *Guide Book*. MRB VF20. *Purchased from William Pukall (11/19/1958) for \$15.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

**3294 1787 New Jersey Copper, Outlined Shield—Damaged—NGC Details.** VF. Maris 63-q, W-5365, R.1. Attributed as a Large Planchet, Plain Shield, but it is not. The planchet is large at 30 mm, but the shield is outlined. This is a relatively plentiful variety and this example shows no die cracks. The dark brown surfaces show a few small handling marks on each side. The damage mentioned is at the end of the right wreath on the lower reverse. The centers are a bit softly struck. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 15.

*Purchased from Douglas (7/30/1951).*

*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

**3295 1787 New Jersey Copper, Outlined Shield—Environmental Damage—NGC Details.** VF. Maris 63-s, W-5375, R.1.

Labeled on the insert as a Large Planchet, Plain Shield, but it is not. It is a Large Planchet variety (29 mm), but is also an Outlined Shield. The Maris 63 obverse is characterized by the beam end that points just right of A2 in CAESAREA, and the left end of the line above the date that touches a dentil. The obverse shows roughness that goes beyond the usual planchet granularity seen on New Jerseys, accounting for the Environmental Damage disclaimer. The reverse is surprisingly smooth by comparison. The center of the reverse is softly defined, and there are a couple of old, shallow pinscratches. Medium brown patina. Listed on page 66 of the 2011 *Guide Book*. MRB VF20.

*Purchased from James Kelly (6/10/1952) for \$2.*

*From the W. Philip Keller Collection of U.S. Colonials.*

**3296 1787 New Jersey Copper, Outlined Shield—Obverse Graffiti—NGC Details.** VF. Maris 43-Y, W-5220, Low R.4. Labeled on the insert as a Small Planchet, Plain Shield, but it is not. The Whitman reference states that the finest known of this variety are XF. This piece is near that threshold. The surfaces are medium to deep brown and show light porosity. The Obverse Graffiti referred to is nothing more than the Maris number written on the coin in white ink. In the right field 43/Y is seen and the number 4 is in the lower left field. This was a common practice among collectors circa 1900. Listed on page 66 of the 2011 *Guide Book*. MRB VF20.

*Purchased from Ted Craige (11/3/1963).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**3297 1787 New Jersey Copper, Outlined Shield VF25 NGC.** Maris 64-t, W-5380, R.1. Labeled on the insert as a Large Planchet, Plain Shield, but it is not. It is, however, struck on an extraordinarily large planchet (31 mm). It would be interesting to know how much this piece weighs. While the centers are not rough, as usually seen on large planchet 64-t coins, the center of the shield is softly defined. The surfaces are a lovely medium brown and well-balanced from side to side. For a New Jersey the surfaces are remarkably smooth with minimal planchet granularity. Listed on page 66 of the 2011 *Guide Book*. MRB VF25.

*Purchased from Norm Pullen (3/4/1961) for \$14.*

*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

**3298 1787 New Jersey Copper, Outlined Shield—Improperly Cleaned—NGC Details.** XF. Maris 31-L, W-5095, R.2. This Curved Beam variety has the beam straight to the singletree, then it curves upward. This die pairing was only used on this single variety. This is an earlier die state that lacks the multiple die cracks usually seen. While described as Improperly Cleaned, the surfaces of this piece are very attractive with just the slightest brightness evident. Each side is medium brown with slightly lighter accents over the devices. The strike is soft in the center of the reverse, as usually seen. Slight roughness in the flan gives the coin the appearance of having numerous small abrasions. Listed on page 66 of the 2011 *Guide Book*. MRB VF30.

*Purchased from Kenneth W. Rendell (6/28/1960) for \$15.*

*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

**3299 1787 New Jersey Copper, Outlined Shield XF40 NGC.** Maris 6-D, W-5050, R.1. Labeled by NGC as a Large Planchet, Plain Shield, but it is not. This variety is characterized by the raised outlines on the plow handles and front of the horse's neck, and there is a period after the second A in CAESAREA. The deep brown surfaces show a number of small, but individually insignificant handling marks. A heavy die crack is located at the bottom of the reverse. Listed on page 66 of the 2011 *Guide Book*. MRB XF40.

*Purchased from M. Field (8/27/1953).*

*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

**3300 1787 New Jersey Copper, Outlined Shield—Planchet Flaw—NGC Details.** XF. Maris 37-J, W-5140, R.5. The NGC insert states this is a Small Planchet, Plain Shield, but it is not. This is one of the popular Goiter varieties, created by a large die crack under the horse's chin. This is a high grade example of this variety, the finest known is an AU. The surfaces are roughened, as usually seen, by numerous streaky planchet flaws. But the one referred to on the NGC insert is at the top of the reverse. It looks like a scratch at first, but no metal is displaced. Instead it is a fissure in the flan. Medium brown color over each side, the reverse is rotated approximately 30 degrees. Listed on page 66 of the 2011 *Guide Book*. MRB VF35.

*Purchased from A.D. Hoch (4/28/1961).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**Glossy XF40 1787 New Jersey Copper  
Maris 43-d, W-5225**

**3301 1787 New Jersey Copper, Outlined Shield XF40 NGC.** Maris 43-d, W-5225, R.1. The NGC insert labels this as a Small Planchet, Plain Shield, but it is not. The 43-d is one of the most frequently seen New Jersey coppers and at least a half dozen are known in mint condition. The surfaces are glossy brown and devoid of the often-seen problems, just the expected numerous small handling marks are on each side. A semi-circular line is noted on the reverse, possibly the remnants of an unknown undertype. Listed on page 66 of the 2011 *Guide Book*. MRB XF40.

*Purchased from Kenneth W. Rendell (11/8/1958) for \$12.50.*

*From the W. Philip Keller Collection of U.S. Colonials. (#503)*

**3302 1787 New Jersey Copper, Small Planchet, Plain Shield—Mint Error, Struck Over Connecticut, Corrosion—NGC Details.** Fine. Maris 73-aa, W-5430, R.5. We are not certain about the mint error designation. The coin is actually an overstrike on a Bust Left Connecticut cent. This variety has been found overstruck on various Colonials. According to the Whitman reference, "The annealing of these under-types prior to using them as planchets was done poorly, if at all." This made the under-types more prominent and the finished coins less so, as seen here. The diagnostic features for the Maris 73 obverse is a star after the first and final A, and the final star is closer to the A than the plow beam. The surfaces are corroded, as noted, but more so on the reverse and show variegated charcoal and medium brown patina. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 12.

*Ex: Dr. Hall; purchased from Ted L. Craige (12/5/1970).*

*From the W. Philip Keller Collection of U.S. Colonials. (#506)*

**3303 1787 New Jersey Copper, Small Planchet, Plain Shield VF35 NGC.** Maris 48-X, W-5265, R.1. This is one of the more commonly encountered New Jersey coppers, and one that easily attributable by the multiple die clashing seen on the obverse. This is an attractive example that has deep brown surfaces on each side, well-balanced and well struck, except on the lower part of the obverse. Listed on page 66 of the 2011 *Guide Book*. MRB VF30.

*Purchased from Schaefer (9/29/1951).*

*From the W. Philip Keller Collection of U.S. Colonials. (#506)*

**3304 1787 New Jersey Copper, PLURIBUS—Damaged—NGC Details.** VF. Maris 60-P, W-5340, Low R.4. The misspelled word on the reverse gives considerable popularity to this New Jersey copper. The reverse is also paired with Obverse 61. This piece was struck on an oversized planchet. Apparently unknown above AU, this is a well-detailed example that has dark, almost charcoal surfaces. The damage is in the form of a circular punch in the center of the obverse. The metal was moved on the reverse as a result, creating a bulge and uneven wear pattern. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 12.  
*Purchased from Johnson (6/3/1959).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

**3305 1787 New Jersey Copper, Camel Head—Environmental Damage—NGC Details.** VF. Maris 56-n, W-5310, R.1. Overstruck on a Connecticut copper. The Camel Head is among the most frequently encountered of all New Jersey coppers. It is also often located overstruck on other coins. Considerable remnants of the Connecticut undertype are visible on both sides. The surfaces are dark brown with devices that are slightly lighter. The expected number of small handling marks are present on each side, and in the area of the horse's head there are three unusual planchet fissures. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 12.  
*Ex: Lester Merkin #51 (3/16/1967).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

**Interesting 1787 Camel Head New Jersey  
Maris 56-n, W-5310, VF20  
Struck Over a Nova Eborac, Facing Right**

**3306 1787 New Jersey Copper, Camel Head VF20 NGC.** Maris 56-n, W-5310, R.1. Struck over a Nova Eborac (Figure Facing Right). Considerable portions of the undertype are seen on each side, but especially on the reverse where much of the central figure of Liberty can be made out. The surfaces are even, medium brown over each side and problem-free. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 15.  
*Purchased from Richard Picker (5/29/1967).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#515)*

**3307 1787 New Jersey Copper, Serpent Head VF30 NGC.** Maris 54-k, W-5295, R.3. While an Outlined Shield variety, the obverse is much better known as the horse's head resembles a serpent. Each side has numerous small, but individually insignificant handling marks. The design elements are well-defined for the grade with only slight weakness in the center of the shield. The surfaces are attractive medium brown overall with a slight reddish tinge in the fields. Listed on page 66 of the 2011 *Guide Book*. MRB VF25.  
*Purchased from Lou Werner (12/10/1952).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#518)*

**3308 1788 New Jersey Copper, Running Fox—Environmental Damage—NGC Details.** VF. Maris 75-bb, W-5520, R.4. The W-5520 is distinguished from the W-5515 by the presence of a die crack on the lower left of the obverse. Seen here it has progressed to a cud. The surfaces are dark brown overall and each side displays heavy granularity. The fox is barely discernible on the reverse because of the granular texture. The strike is generally well defined, the only exception is that it appears to have been struck from slightly misaligned dies that caused the left portion of each side to have softer details and the right sides are stronger. Listed on page 66 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Lou Werner (11/8/1958) for \$12.*  
*From the W. Philip Keller Collection of U.S. Colonials. (#524)*

**3309 1788 New Jersey Copper, Running Fox VF25 NGC.** Maris 77-dd, W-5535, R.2. Of the five Running Fox varieties, this is the most available. Each side shows even, dark color with only slightly contrasting lighter patina over the devices. The surfaces are moderately granular. The only marks of note are a few small ones in the center of the obverse and a rim bump on the reverse at 11 o'clock. Listed on page 66 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Foster (12/10/1952).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#524)*

**3310 1788 New Jersey Copper, Head Left—Damaged—NGC Details.** VG. Maris 49-f, W-5470, R.5. The Whitman reference states the reason for the three Head Left obverses "is not known today, but it must have been significant in its time. This orientation matches the state arms, as does the intricate design of the plow ..." This piece shows numerous planchet cracks, but the damage is limited to the obverse rim at 6 o'clock. Medium brown is intermingled with darker brown over each side. Listed on page 66 of the 2011 *Guide Book*. MRB Good 4.  
*Ex: Stack's (12/1963), lot 378.*  
*From the W. Philip Keller Collection of U.S. Colonials.*

**3311 1788 New Jersey Copper, Head Left—Environmental Damage—NGC Details.** Fine. Maris 50-f, W-5475, R.2. Only three varieties of Head Left New Jersey coppers are known. This one is differentiated by the plow beam located close to the upper left of N, the other two are widely spaced from the N. We do not see any actual environmental damage, just dark surfaces and numerous planchet streaks and small planchet flaws. Better defined on the obverse than the reverse, as usual. Listed on page 66 of the 2011 *Guide Book*. MRB VG8.  
*Purchased from Robert A. Vlack (1/1/1961).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

**1785 Vermont Copper, VF25  
Popular VERMONTS, W-2005 Variety**

**3312 1785 Vermont Copper, VERMONTS VF25 NGC.** RR-2, Bressett 1-A, W-2005, R.2. The 1785 Vermont coppers were produced in several varieties depicting landscape themes. The W-2005 variety features the word VERMONTS on the obverse, with a ray of the sun pointing to the period after RES. This variety is the most available of the Landscape types. The present coin exhibits relatively sharp devices on medium brown surfaces. While the planchet is slightly granular in texture, there are none of the planchet cracks often seen on this issue. Listed on page 68 of the 2011 *Guide Book*. MRB VF20.  
*Purchased from Richard Picker (1/12/1960).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#539)*

**1785 VERMONTS Copper, XF Details  
Elusive RR-3, W-2010 Landscape Variety**

- 3313** 1785 Vermont Copper, VERMONTS—Environmental Damage—NGC Details. XF. RR-3, Bressett 2-B, W-2010, R.5. Of the six Landscape varieties of the 1785 Vermont coppers, the W-2030 variety is the most elusive. The present coin exhibits areas of corrosion on both sides, but the major design elements remain distinguishable. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 15.  
Ex: ANA Convention Auction (Aubrey Bebee, 8/1955).  
From the W. Philip Keller Collection of U.S. Colonials.

- 3314** 1786 Vermont Copper, VERMONTENSIMUM—Damaged—NGC Details. VF. RR-6, Bressett 4-D, W-2020, R.2. On the reverse, a ray points to the left side of the U in QUARTA, while on the obverse the P in PUBLICA touches a tree. This piece has a somewhat porous dark-brown planchet with a gouge near the obverse rim at 3 o'clock and a couple of dart-shaped indents in the center reverse. The most common of the VERMONTENSIMUM types. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12.  
Purchased from "Foster" (10/3/1952).  
From the W. Philip Keller Collection of U.S. Colonials.

**1786 RR-8 Vermont Copper, VF25  
Scarcest VERMONTENSIMUM Variety**

- 3315** 1786 Vermont Copper, VERMONTENSIMUM VF25 NGC. RR-8, Bressett 6-E, W-2030, R.4. The surfaces are appealing overall, with milk-chocolate color and only minor pitting on the reverse, but no mentionable carbon or singular contact. Struck a bit off-center, strongest on the reverse at QUARTA and correspondingly weaker at STE. On the obverse, the 1786 date and VERM are boldest. The scarcest VERMONTENSIMUM variety, listed on page 68 of the 2011 *Guide Book*. MRB VF20.  
Ex: James Kelly (7/20/1953).  
From the W. Philip Keller Collection of U.S. Colonials. (#545)

**Double-Struck 1786 Vermont Copper  
VERMONTENSIMUM, RR-7, AU Sharpness**

- 3316** 1786 Vermont Copper, VERMONTENSIMUM—Graffiti—NGC Details. AU. RR-7, Bressett 5-E, W-2025, R.3. This piece is interesting and appealing, despite the graffiti XXVII (or XXVIII) scraped into the obverse field above the plow. The surfaces are broadly double-struck; doubling is visible on many of the peripheral letters and dentils on each side and the right sides of the landscape scene and plow handle. Many of the reverse stars also show doubling. Minor pitting appears at the top of the obverse, and the planchet is a bit irregularly shaped. Listed on page 68 of the 2011 *Guide Book*. MRB VF25.  
Ex: Numismatic Gallery (10/6/1952).  
From the W. Philip Keller Collection of U.S. Colonials.

**'Baby Head' 1786 Vermont Copper  
RR-9, Bressett 7-F, Sharpness of VF**

- 3317** 1786 Vermont Copper, Baby Head—Planchet Flaw—NGC Details. VF. RR-9, Bressett 7-F, W-2040, R.3. The planchet has relatively deep fissures, as made on both sides, the largest in the center obverse at the neck of the portrait, although others appear at the reverse rim and several other locations. Only RI is visible at the left obverse rim, while VERMON is clear and the reverse has considerable detail remaining, despite the flaws. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12.  
Purchased from W.E. Johnson (8/17/1959).  
From the W. Philip Keller Collection of U.S. Colonials.

- 3318** Group Lot of 11 Vermont Coppers Uncertified. 1786 Bust Left: Ryder-11, VF, Corroded, Ex: Kenneth W. Rendell (12/14/1959); Ryder-11, VG, Ex: Stack's (6/1958), lot 51; 1787 Bust Right: Ryder-12, Good, Ex: Kenneth W. Rendell (9/29/1960); Ryder-12, Fine, Corroded, Ex: Richard Picker (11/14/1960); Ryder-14, VG, Ex: Empire Coin Company (3/30/1959); Ryder-14, VG, Ex: Vic Breneman (5/6/1961); 1788 Bust Right: Ryder-16, VG, Ex: Kenneth W. Rendell (10/18/1958); Ryder-17, VG, Ex: Copley Coin Company (11/2/1953); Ryder-20, Good, Damaged, Ex: L.B. Chastain (3/5/1966); Ryder-22, Good, Ex: A.D. Hoch (1/30/1960); Ryder-25, VG, Corroded, Ex: Vic Breneman (5/6/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (Total: 11 coins)

- 3319** 1786 Vermont Copper, Bust Left—Damaged—NGC Details. Fine. RR-10, Bressett 8-G, W-2045, R.4. A few small planchet flaws appear on the obverse, which approaches VF Details, but the reverse has sustained several linear blows on the upper effigy, and there is a rim bump at the 1 in the date. A fair amount of detail remains. Listed on page 68 of the 2011 *Guide Book*. MRB VF20.  
Purchased from W.E. Johnson (8/17/1959).  
From the W. Philip Keller Collection of U.S. Colonials.

**3320 1786 Vermont Copper, Bust Left—Corrosion—NGC Details. Fine. RR-11, Bressett 9-H, W-2050, R.4.** Also known as Mailed Bust Left, one of two such varieties along with the RR-10, Bressett 8-G and rarer overall than the Baby Head (RR-9, Bressett 7-F), the three together comprising all of the 1786 non-Landscape types with the seated left effigy on the reverse. Extensive corrosion afflicts the obverse in the center and lower left field, while the reverse is relatively unscathed by corrosion but quite worn, with a planchet flaw near the seated figure's knee. Listed on page 68 of the 2011 *Guide Book*. MRB Good 4.

*Purchased from A.D. Hoch (11/17/1960).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**3321 1787 Vermont Copper, BRITANNIA—Environmental Damage—NGC Details. VF. RR-13, Bressett 17-V, W-2255, R.1.** Corrosion affects both sides, the reverse (which is always weaker) a bit more so. VERMON AUCTORI and the portrait are plain on the obverse, but only the central seated figure is distinguishable on the reverse, along with the last I in BRITANNIA. Dark brown planchet. Listed on page 68 of the 2011 *Guide Book*. MRB VG10. Ex: James Kelly (9/18/1951).

*From the W. Philip Keller Collection of U.S. Colonials.*

**3322 1787 Vermont Copper, Bust Right VG10 NGC. RR-12, Bressett 11-K, W-2110, R.3.** According to Tony Carlotto's *The Copper Coins of Vermont*, "most" of the Large Planchet Ryder-12s (the variety also comes in Small Planchet format) are struck over Nova Constellatio coppers, but the present piece shows no obvious signs of an overstrike. The K reverse is easily distinguished, as here, by the large die break at the rim above the head. The obverse is a middle die state, with the rim break heavy through E but still light to the hair bow. The medium-brown surfaces are attractive for the grade, although the strike is weak at the date on the reverse. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12.

*Ex: Abner Kreisberg (Coin Gallery, 11/19/1962).*

*From the W. Philip Keller Collection of U.S. Colonials. (#560)*

**3323 1787 Vermont Copper, Bust Right—Environmental Damage—NGC Details. VF. RR-14, Bressett 10-K, W-2105, R.3.** Moderate microgranules appear on both sides of this ebony-brown planchet, but there are no visible planchet flaws or singular contact, refreshingly for the series. All of the types are bold. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12.

*Purchased from A.D. Hoch (7/16/1960).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**3324 1788 Vermont Copper, Bust Right Good 6 NGC. RR-36, Bressett 10-P, W-2180, High R.6.** There are periods before and after VERMON AUCTORI, and ON is close. On the reverse, the hand points to the center of E, marking this very rare die pairing. This is a glossy dark-brown planchet that shows few distractions but much wear. All of the devices are, nonetheless, sufficiently distinguishable to make the attribution fairly easy. Listed on page 68 of the 2011 *Guide Book*. MRB Good 5.

*Purchased from J. Stipp (3/2/1975).*

*From the W. Philip Keller Collection of U.S. Colonials. (#563)*

**3325 1788 Vermont Copper, Bust Right—Reverse Scratched—NGC Details. VG. RR-22, Bressett 10-Q, W-2165, R.5.** The obverse has the periods flanking the legend and close ON. The reverse has a close double line separating the date in exergue, and the 7 is comically low. The branch hand, when visible, points slightly above the curve of the D in INDE, although a die bulge often obscures that area, as here. A few small linear scrapes in the reverse field, before the seated figure, are not overly distracting. Listed on page 68 of the 2011 *Guide Book*. MRB Good 6.

*Purchased from Kenneth W. Rendell (6/28/1960). Rendell, a dealer and expert in historical letters, manuscripts, and documents, is also founder of the private Museum of World War II in Natick, Massachusetts.*

*From the W. Philip Keller Collection of U.S. Colonials.*

**3326 1788 Vermont Copper, Bust Right—Scratches—NGC Details. VG. RR-28, Bressett 21-U, W-2215, R.6.** The stars after VERMON and before AUCTORI, along with large bisecting die break through the lower obverse, identify the obverse. The reverse has a cross after INDE, with an evenly spaced date separated from the balance of the design by a single line. A series of linear scrapes in the center reverse is the source of the NGC caveat, and there is little detail present in that area. The obverse die breaks are about in the same state as the Carlotto photo for the variety (*The Copper Coins of Vermont*), although this piece has greater wear on a dark brown planchet. Listed on page 68 of the 2011 *Guide Book*. MRB Good 6.

*Purchased from Richard Picker (4/11/1962).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**3327 1788 Vermont Copper, Bust Right VG10 NGC. RR-24, Bressett 16-S, W-2200, R.3.** There is a cross before and after VERMON AUCTORI, and on the reverse the hand points to the upright of the D in INDE. Aside from wear consistent with the grade there are few other distractions on this piece, save for a planchet flaw in the form of a small fissure on the obverse, below the O of AUCTORI. Listed on page 68 of the 2011 *Guide Book*. MRB VG10.

*Purchased from G. Creed (5/24/1960).*

*From the W. Philip Keller Collection of U.S. Colonials. (#563)*

**3328 1788 Vermont Copper, Bust Right Fine 12 NGC. RR-19, Bressett 13-L, W-2185, R.5.** A rare 1788 Bust Right pairing, with wide ON in VERMONT and the A in AUCTORI broken at the upper left. The reverse has the L higher than IB. A nice, smooth brown planchet with few flaws. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 15.

*Ex: Hollinbeck (11/20/1953).*

*From the W. Philip Keller Collection of U.S. Colonials. (#563)*

#### Distraction-Free 1788 Vermont Copper Bust Right, RR-23, Bressett 10-O, Fine 12

**3329 1788 Vermont Copper, Bust Right Fine 12 NGC. RR-23, Bressett 10-O, W-2175, R.4.** There are periods on either side of VERMON AUCTORI and ON is close. On the reverse the hand points slightly below the upright of the E in INDE. The die break behind the head is seen on most specimens. There is a double line above the date, spaced wider on the left than the right, the only use of the Bressett O reverse. This is a nice, smooth medium- to dark-brown planchet with few flaws and minimal signs of contact or other distractions. Listed on page 68 of the 2011 *Guide Book*. MRB VF25.

*Purchased from A.D. Hoch (5/26/1960).*

*From the W. Philip Keller Collection of U.S. Colonials. (#563)*

**3330 1788 Vermont Copper, Bust Right Fine 12 NGC. RR-29, Bressett 22-U, W-2220, R.5.** Stars appear before and after VERMON AUCTORI, while the INDE (head) ET LIB reverse has crosses after INDE and LIB. The large die break on the obverse is diagnostic, and Carlotto writes in *The Copper Coins of Vermont* that the die was cut so shallowly that "facial detail is non-existent on most pieces available today." Some granularity appears on each side of this dark-brown piece, with a small clip out of the rim that is most visible at 3 o'clock on the reverse. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12.

*Purchased from Richard Picker (1/12/1960).*

*From the W. Philip Keller Collection of U.S. Colonials. (#563)*

- 3331 1788 Vermont Copper, Bust Right—Environmental Damage—**NGC Details. VF. RR-17, Bressett 14-S, W-2125, R.5. There is no punctuation on the obverse, and the N is close to the bust. On the reverse the head separates INDE and ET LIB, and the line above the date curves downward. This is the only use of the Bressett 14 obverse. This piece displays ebony fields with brown high points. The fields are consistently granular on both sides, but there are no other mentionable distractions. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 15.

*Purchased from Richard Picker (1/12/1960).*

*From the W. Philip Keller Collection of U.S. Colonials.*

- 3332 1788 Vermont Copper, Bust Right—Reverse Scratched—**NGC Details. VF. RR-20, Bressett 10-L, W-2150, R.4. This long-lived obverse die was eventually paired with 10 different reverses. The Bressett L reverse shows the L higher than IB, a wide, evenly spaced date, and missing bottom serif on N. The noted scratches on the reverse, two of them, are long but shallow, not overly distracting. Smooth brown surface are appealing for the grade. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12.

*Ex: Numismatic Gallery (11/13/1951).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**Attractive 1788 Bust Right Vermont Copper  
RR-16, Bressett 15-S, VF30**

- 3333 1788 Vermont Copper, Bust Right VF30 NGC. RR-16, Bressett 15-S, W-2120, R.1.** The N further from the hair and lack of punctuation identifies the Bressett 15 obverse, along with the series of small dots covering the breastplate. The INDE (head) ET LIB reverse shows the 1 in the date backwards. This is a high-quality piece that is undergraded in our opinion, although the variety usually “comes nice.” Some mint luster remains on the glossy brown planchet, with minor pitting on each side. Listed on page 68 of the 2011 *Guide Book*. MRB XF45.

*Purchased from Richard Picker (1/12/1960).*

*From the W. Philip Keller Collection of U.S. Colonials. (#563)*

**1788 Vermont Copper, ‘Domed Head,’ RR-27  
VF30, Struck From Late-State Dies**

- 3334 1788 Vermont Copper, Bust Right VF30 NGC. RR-27, Bressett 18-W, W-2205, R.2.** The reverse—the only use—is distinguished by the INDE★ (head) ET LIB ★ motif, and the obverse also bears a distinctive bust quite unlike the other Bust Right pairings (except for RR-13 which is similar), one that Carlotto calls “domed head.” This piece shows very late die states on both sides, with the peripheral legends failing and numerous die cracks. This is an interesting phenomenon, because this variety, and this example of it, are quite well struck. Glossy medium brown planchet with a small void at the rim, just behind the head on the reverse. Listed on page 68 of the 2011 *Guide Book*. MRB VF25.

*Purchased from Richard Picker (1/12/1960).*

*From the W. Philip Keller Collection of U.S. Colonials. (#563)*

**Affordable ET LIB INDE Reverse 1788 Bust Right  
Vermont Copper, RR-18, VF Sharpness**

- 3335 1788 Vermont Copper, ET LIB INDE—Bent—**NGC Details. VF. RR-18, Bressett 19-X, W-2135, R.5. The obverse has a widely spaced legend and large bisecting die crack. The reverse has the diagnostic legend ★ET LIB★ ★INDE, with date below a single line and touching the line—one of only two ET LIB INDE reverses along with the prohibitively rare RR-35. This piece is bent at the upper right reverse, with some minor corrosion on the obverse. Note the overstrike, with REX appearing between MON and AUC on the obverse, and some other indistinguishable letters further around the rim to the left. An affordable example of the ET LIB INDE reverse type. Listed on page 68 of the 2011 *Guide Book*. MRB VG10.

*Purchased from Richard Picker (1/12/1960).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**1788 Vermont Copper With GEORGIUS III REX Obverse  
RR-31, Bressett 24-U, VG Sharpness**

- 3336 1788 Vermont Copper, GEORGIUS III REX—Reverse** Damage—NGC Details. VG. RR-31, Bressett 24-U, Miller 100-I, W-2260, High R.4. The Ryder-31, Bressett 24-U is considered a mule, with the Connecticut obverse reading GEORGIUS III REX, periods between each word. The Vermont reverse is the INDE+ET (dot) LIB type. Two large indents of unknown origin are in the center reverse, although they appear to be planchet flaws, as made, to us. This piece has moderate wear and is weakly struck in the center reverse, as usually seen. A good amount of detail remains on the crucial obverse, and the reverse legends are distinguishable except for LIB. Listed on page 69 of the 2011 *Guide Book*. MRB Fine 12.

*Purchased from Richard Picker (1/12/1960).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**Crosby 2-B 1783 Nova Constellatio Copper  
Pointed Rays, Small US, W-1865, AU58**

- 3337 1783 Nova Constellatio Copper, Pointed Rays, Small US AU58 NGC. Crosby 2-B, W-1865, R.2.** Pointed rays on the obverse and small letters US on the reverse define the variety. This is a glossy violet-brown and peach example, boldly impressed with only a trace of wear on each side. A tiny clip is noted at the lower left obverse. Listed on page 52 of the 2011 *Guide Book*. MRB AU50. Purchased from New Netherlands (12/4/1968). From the W. Philip Keller Collection of U.S. Colonials. (#801)

- 3338 1783 Nova Constellatio Copper, Pointed Rays, Large US XF40 NGC. Crosby 1-A, W-1860, R.4.** The large letters US on the reverse distinguish the very scarce Crosby 1-A, most elusive of the three 1783 Nova Constellatio types. This attractive example has deep brown color overall with mixtures of peach and gold at the interiors. Listed on page 52 of the 2011 *Guide Book*. MRB XF40. Purchased from New Netherlands (8/9/1954). From the W. Philip Keller Collection of U.S. Colonials. (#804)

- 3339 1783 Nova Constellatio Copper, Blunt Rays VF20 NGC. Crosby 3-C, W-1875, R.3.** As the sole Blunt Rays die pair for 1783, the scarce Crosby 3-C is easy to identify. This moderately worn golden-brown example has a few small digs and rim bumps but is generally attractive. Listed on page 52 of the 2011 *Guide Book*. MRB Fine 15. Purchased from Numismatic Gallery (9/27/1952). From the W. Philip Keller Collection of U.S. Colonials. (#807)

- 3340 1785 Nova Constellatio Copper, Pointed Rays, Large Date VF30 NGC. Crosby 4-D, W-1910, High R.4.** Distinguished by the ornate script US within a circle of 29 leaves. The surfaces are even, dark brown over each side and there is considerable porosity present. The striking details are strong throughout with a notably well-defined central eye. The strike is suggestive of a higher grade. Listed on page 52 of the 2011 *Guide Book*. MRB Fine 15. Ex: Green Collection; New Netherlands (6/23/1954). From the W. Philip Keller Collection of U.S. Colonials. (#813)

- 3341 1785 Nova Constellatio Copper, Pointed Rays, Large Date—Improperly Cleaned—NGC Details. XF. Crosby 5-E, W-1915, High R.4.** The obverse of Crosby 5-E shows one ray that points past the left foot of the N and another points toward the left foot of A in NOVA. The reverse has a wreath of 26 pairs of leaves. The strike is strong over each side with the only noticeable weakness over the 5 in the date. The color is deep brown throughout with just the faintest underlying brightness. The surfaces are lightly marked with the only mentionable defect a spot located near the obverse rim at 7 o'clock. Listed on page 52 of the 2011 *Guide Book*. MRB VF20. Purchased from C. W. Foster (9/27/1952). From the W. Philip Keller Collection of U.S. Colonials.

- 3342 1785 Nova Constellatio Copper, Pointed Rays, Large Date—Environmental Damage—NGC Details. AU. Crosby 4-C, W-1900, R.5.** This Pointed Rays variant has one ray that points past the left foot of the N, another points near the center of A in NOVA. This obverse was also used on Crosby 4-D. The reverse differs with US surrounded by 30 pairs of leaves. The Whitman reference notes that this variety is usually found in lower grades, which makes this AU Details example one of the finer pieces available. The Environmental Damage mentioned on the insert is slight and generally limited to the center of the reverse. Listed on page 52 of the 2011 *Guide Book*. MRB VF35. Ex: New Netherlands (8/9/1954). From the W. Philip Keller Collection of U.S. Colonials.

**Crosby 3-B 1785 Nova Constellatio Copper, AU55  
Pointed Rays, Large Date, W-1895**

- 3343 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU55 PCGS. Crosby 3-B, W-1895, R.2.** The Nova Constellatio coppers were probably struck by a private mint in Birmingham, England in 1785, although some varieties bear a 1783 date. The design is closely related to that of the earlier Nova Constellatio silver patterns. The coins were readily accepted and circulated widely in Colonial commerce. This attractive medium brown specimen is identified as an example of the W-1895 variety by the pointed ray pointing to the foot of N in NOVA on the obverse, and the large date on the reverse. The planchet is slightly granular on the obverse, and the obverse devices show less detail than the strongly impressed reverse, though little actual wear is apparent on either side. MRB XF40. Population: 17 in 55, 29 finer (9/10). (#813)

**Small Date 1785 Nova Constellatio Copper  
Crosby-2-A, W-1885, VF Details**

- 3344 1785 Nova Constellatio Copper, Pointed Rays, Small Date—Environmental Damage—NGC Details. VF. Crosby 2-A, W-1885, High R.4.** The distinctive Small Date reverse is the only such Nova from 1785. On the obverse one ray points slightly right of the bottom of the first O in CONSTELLATIO. The surfaces are deep brown and roughened. The central details on each side are noticeably weak. Listed on page 52 of the 2011 *Guide Book*. MRB Fine 12. Purchased from Kenneth W. Rendell (11/22/1958). From the W. Philip Keller Collection of U.S. Colonials.

- 3345 Group Lot of Eight 1787 Fugio Cents.** Newman 3-D, VG, Porous, Ex: Milt Stern (9/16/1961); Newman 7-T, VG, Corroded, Ex: Van Horn (3/10/1960); Newman 12-M, Good, Ex: Hollinbeck (5/29/1954); Newman 12-S, Fine, Pitted and Dented, Ex: Van Horn (3/17/1960); Newman 15-K, VG, Bent and Counterstamped, Ex: Kenneth W. Rendell (1/19/1960); Newman 17-S, VG, Scratched, Ex: B. Gimelson (9/22/1960); Newman 18-H, Good, Marred, Ex: Copley Coin Company (1/15/1959); Newman 19-Z, Fine, Damaged, Ex: Empire Coin Company (3/31/1959). From the W. Philip Keller Collection of U.S. Colonials. (Total: 8 coins)

**Rare 1787 STATES UNITED, No Cinquefoils  
1787 Fugio Cent, Newman 1-L, Fine Details**

- 3346** 1787 Fugio Cent, STATES UNITED, No Cinquefoils—Environmental Damage—NGC Details. Fine. Newman 1-L, W-6605, R.5. The important No Cinquefoils obverse, paired with a reverse that has STATES left and UNITED right. While both sides are finely granular from unspecified environmental damage, the overall eye appeal is surprisingly solid, and the gold-tinged brown surfaces have a light gloss. Listed on page 83 of the 2011 *Guide Book*. MRB VG10.  
*Purchased from T.L. Craige (4/24/1965).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#874)*

**Important No Cinquefoils, UNITED STATES  
1787 Fugio Cent, Newman 1-B, VF Details**

- 3347** 1787 Fugio Cent, UNITED STATES, No Cinquefoils—Obverse Damage—NGC Details. VF. Newman 1-B, W-6600, R.4. Newman's important Obverse 1 with Pointed Rays and crosslet after date (but no cinquefoils), paired with the UNITED STATES-oriented Reverse B. This moderately worn example, deep brown in the fields with caramel tones at the high points, was double-struck from clashed dies. A scrape above the letter O in FUGIO accounts for the details grade. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 15.  
*Purchased from Douglas (6/16/1952).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#880)*

- 3348** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Bent—NGC Details. Good. Newman 19-SS, W-6880, R.5. This rare STATES UNITED, Cinquefoils, Pointed Rays variety was absent from the historic John J. Ford, Jr. Collection offered by Stack's. The obverse shows the center ornament over the space between I and N in BUSINESS, and the left eye of the sun is more prominent. The reverse shows the left part of the W in WE short, and the small A in ARE leans to the right. This piece has been bent and straightened out, but otherwise there are no problems aside from the considerable wear. All types are distinguishable nonetheless, although merging with the rim around the margins of each side. Listed on page 83 of the 2011 *Guide Book*. MRB Good 6.  
*Purchased from George L. Feeser (11/13/1965).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

- 3349** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Corrosion—NGC Details. VG. Newman 15-V, W-6910, R.5. The center of the ornament between MIND and YOUR is over the right edge of the upright of the I in BUSINESS, and the lobes of the cinquefoil point above and below the O in FUGIO. There is a small dot above the G in FUGIO on most examples. On the reverse, the letters in ARE and ONE move progressively lower, with the last E large and low. This piece is nicer than the NGC Details grade might imply, despite the moderate microporosity over chocolate-brown surfaces. The die is somewhat sunken on the reverse at the top three links, resulting in greater wear just below that area. Listed on page 83 of the 2011 *Guide Book*. MRB VG8.  
*Purchased from Richard Picker (3/25/1963).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

- 3350** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VG10 NGC. Newman 19-M, W-6970, R.6. The center of the ornament is over the space between I and N in BUSINESS, with the left eye of the sun larger. The reverse displays the A directly over the O in ARE and ONE, respectively. The example in the fabulous Ford Collection, an XF, brought \$13,800. The present piece, interestingly, is in perfect medal turn rather than coin turn. This piece has few planchet problems and nice medium-brown color, but a weak strike has left much of BUSINESS indistinguishable. Listed on page 83 of the 2011 *Guide Book*. MRB VG8.  
*Purchased from Kenneth W. Rendell (3/6/1959).*  
*From the W. Philip Keller Collection of U.S. Colonials. (#883)*

- 3351** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Damaged—NGC Details. Fine. Newman 22-M, W-7020, R.5. This rare Fugio cent die pairing was missing from the John J. Ford, Jr. Collection, auctioned by Stack's in October 2003. The Newman 22 obverse is unique to this marriage, showing the center of the ornament a bit right of the center of the I in BUSINESS. The U in YOUR is centered over an S, and the R is distant from the sundial base. The reverse shows the A directly over O, with AR widely separated and R leaning slightly left. This piece shows some old contact marks that have effaced the last 7 in the date, and some other details are scarcely seen, particularly on the reverse, both due to contact and a weak strike. A die crack runs diagonally up through the sun's rays at the left upper obverse. Listed on page 83 of the 2011 *Guide Book*. MRB VG7.  
*Purchased from A.D. Hoch (10/9/1962).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

**1787 Newman 17-WW Fugio Cent, Fine Details, R.5  
Absent From the Ford Collection, Ex: Vlack**

- 3352** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Corrosion—NGC Details. Fine. Newman 17-WW, W-6945, R.5. Another variety that was lacking in the memorable Ford Collection (Stack's, 10/2003). The Newman 17 obverse has the center ornament over the right edge of the upright of the I in BUSINESS, with cinquefoil lobes pointing above and below the O in FUGIO. The reverse, found only on this die pairing, shows the W leaning right, the R high and leaning right, and the O heavy, with ON closer than NE. This dark-brown example is considerably corroded, with an arcing planchet indent from 12 o'clock on the obverse passing through the right rays of the sun that appears to minor damage that occurred during striking. The accompanying flip indicates that this piece was "extremely rare; 3 or 4 known" at the time of purchase. Listed on page 83 of the 2011 *Guide Book*. MRB Good 4.  
*Purchased from Robert A. Vlack (11/22/1967).*  
*From the W. Philip Keller Collection of U.S. Colonials.*

- 3353** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Damaged—NGC Details. Fine. Newman 9-Q, W-6760, R.5. Center of ornament over left edge of upright of I in BUSINESS, base of O(NE) slight low. The only obvious “damage” is a series of hair-thin scrapes on the upper reverse, but the coin is struck much off-center towards 1 o’clock on the obverse, showing broad dentilation and rims opposite at 7 o’clock. A rare pairing in any grade level; the Ford piece was Very Fine. Listed on page 83 of the 2011 *Guide Book*. MRB VG8.  
Purchased from “Dokus” (9/22/1962).  
From the W. Philip Keller Collection of U.S. Colonials.

**Attractive R.5 1787 Fugio Cent  
Newman 20-X, VF20**

- 3354** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF20 NGC. Newman 20-X, W-7000, R.5. On the obverse, cinquefoil 3 is above the base of the 1 in the date. The X reverse shows the WE touching each other and piercing the label. This is a nice, virtually problem-free, midgrade example of this rare variety, with medium chocolate-brown surfaces and an expected level of wear given the grade. A small planchet flaw interrupts the otherwise-smooth surfaces near 6 o’clock on the obverse rim. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 15.  
Purchased from D. Sonderman (11/19/1977).  
From the W. Philip Keller Collection of U.S. Colonials. (#883)

- 3355** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF20 NGC. Newman 18-U, W-6960, R.4. A scarce variety, the Newman 18-U pairs an obverse showing the third cinquefoil low and the right eye of the sun more prominent, with a reverse that shows prominent clashing from portions of the obverse. This piece shows a couple of minor rim bumps and planchet voids on the obverse. Another planchet indent affects the area near ARE ONE on the reverse. The surfaces are dark brown, with grade-consistent wear. Listed on page 83 of the 2011 *Guide Book*. MRB VF20.  
Purchased from Lou Werner (8/25/1958).  
From the W. Philip Keller Collection of U.S. Colonials. (#883)

- 3356** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Rim Damage—NGC Details. VF. Newman 13-R, W-6850, R.4. The “sleepy sun” obverse, with the center of the ornament over the center of the I in BUSINESS. The Newman R reverse shows the W in WE too far left, piercing the label, while the N in ONE leans a bit right. This mahogany and ebony piece has a couple of minor rim dings on the obverse rim, individually and collectively insignificant for the grade. A small planchet void appears between the III and IIII on the obverse. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 12.  
Purchased from Robert A. Vlack (11/21/1961).  
From the W. Philip Keller Collection of U.S. Colonials.

**R.7 1787 Fugio Cent, Newman 13-KK  
VF Sharpness, Discovery Coin for the Variety**

- 3357** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Environmental Damage—NGC Details. VF. Newman 13-KK, W-6860, R.7. A rare Fugio die variety in any grade—and absent from the Ford Collection—the Newman 13-KK displays a common Fugio obverse with the center of the ornament over the center of the I in BUSINESS, and the sun’s face appears “sleepy,” according to the Whitman *Colonial Encyclopedia*. The seldom-seen reverse, however, appears only on the Newman 12-KK and 13-KK combinations, both quite rare. The die displays the W slightly high, the R and E in ARE are widely separated, and a cinquefoil is on the label under the last E. A couple of minor areas of dark corrosion appear on the obverse at 87 in the date and SS of BUSINESS, but the planchet surfaces overall are attractive and free of major distractions. A few trivial contact marks appear to separate the piece from a finer grade. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 12.  
Purchased from Richard Picker (12/18/1963). From the accompanying envelope, this piece was apparently the discovery coin for the variety at that time.  
From the W. Philip Keller Collection of U.S. Colonials.

**R.6 1787 Fugio Cent, Newman 20-R, XF Details  
Missing From the John Ford Collection**

- 3358** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Corrosion—NGC Details. XF. Newman 20-R, W-6880, R.6. This is another very rare Fugio marriage that was absent in the famous John J. Ford, Jr. Collection auctioned by Stack’s. The obverse is attributed by the third cinquefoil higher than the base of the 1 and the ornament center over the space between the N and I, with prominent eyes of the sun. The reverse features the WE too far left, and the last E low and leaning right. This piece displays a few small areas of heavy corrosion on the obverse, including a canal-shaped area near the rim at 4 o’clock. A scrape appears at the rim, running through FU. More moderate corrosion and clashing from the obverse appears on the reverse. Milk-chocolate to grayish-brown surfaces overall. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 15.  
Purchased from Robert A. Vlack (3/19/1965).  
From the W. Philip Keller Collection of U.S. Colonials.

- 3359** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Damaged—NGC Details. XF. Newman 12-M, W-6800, R.3. The center ornament is over the top of I in BUSINESS, and the I tilts slightly leftward. The M reverse displays the A(RE) directly over the O(NE), with A and R wide. The cited “damage” is a patch of linear scrapes confined mostly to the right obverse field, between the sundial and the date. This piece has abundant detail remaining on ebony surfaces, despite some minor corrosion and smaller contact signs scattered elsewhere. A nice type example. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 12. Purchased from C. Fuhr (10/20/1962).  
From the W. Philip Keller Collection of U.S. Colonials.

**Rarity-6 Newman 12-KK 1787 Fugio Cent  
XF Details, None in the Ford Collection**

- 3360** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Obverse Scratched—NGC Details. XF. Newman 12-KK, W-6835, R.6. The Newman 12-KK variety is an extremely rare die pairing that was absent in the Stack's sales of the John J. Ford, Jr. Collection. The obverse shows the ornament centered over the center of the I in BUSINESS, which tilts slightly leftward. The reverse shows the W a bit high, with the RE widely spaced, and a cinquefoil appears on the label under the third E. A prominent die crack runs through the lower reverse at 6 o'clock, also frequently seen. This dark-brown piece shows some light corrosion on each side, along with numerous thin scrapes through the obverse center and right field. The reverse center is softly struck. Listed on page 83 of the 2011 *Guide Book*. MRB VF20. Purchased from Richard Picker (4/16/1966).  
From the W. Philip Keller Collection of U.S. Colonials.

**Appealing Chocolate-Brown 1787 Fugio Cent  
Newman 12-U, Choice XF**

- 3361** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 NGC. Newman 12-U, W-6810, R.4. The center upright of the R in YOUR is under a bead on the obverse. The reverse shows a cinquefoil in the label under the upright of the last E. Prominent die clashing appears on portions of the reverse. This is a nice, appealing Choice XF example of this very scarce variety, with chocolate-brown surfaces that show few distractions and some muted luster remaining. Listed on page 83 of the 2011 *Guide Book*. MRB XF40. Purchased from “Van Horn” (6/10/1960).  
From the W. Philip Keller Collection of U.S. Colonials. (#883)

**Choice XF 1787 Fugio Cent, STATES UNITED  
4 Cinquefoils, Pointed Rays, Newman 6-W**

- 3362** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 NGC. Newman 6-W, W-6730, R.4. The center of the ornament is over the space between S and I in BUSINESS. On the reverse, the characteristic die crack runs from the central ring through link 9 to the rim. Medium chocolate-brown surfaces display hints of luster remaining over smooth, problem-free surfaces. A small gap appears on the reverse rim at 6 o'clock. The *Whitman Encyclopedia of Colonial and Early American Coins* notes that this Fugio variety is scarce in all grades and rare in XF or better condition. Listed on page 83 of the 2011 *Guide Book*. MRB XF40. Purchased from J.J. Teaparty (12/2/1961).  
From the W. Philip Keller Collection of U.S. Colonials. (#883)

**Glossy AU53 1787 Fugio Cent, Newman 9-P**

- 3363** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU53 NGC. Newman 9-P, W-6755, R.4. The center of the ornament is over the left edge of the upright of I, and the sun's eye are horizontal pellets. On the reverse, the A touches the label and is far from the R, while the O is low and open at the bottom. This is a nice, lustrous grayish-brown piece with no singular surface distractions and good eye appeal. A minor dig is at the obverse rim at 9 o'clock. A die crack passes through the lower label, through ring 9 and to the rim at 8:30, where it forms a small retained cud. A few examples were found in the hoard from the Bank of New York. Listed on page 83 of the 2011 *Guide Book*. MRB XF40. Ex: French's (6/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#883)

**Impressive 1787 Fugio, Newman 13-X, Choice AU  
Pointed Rays, STATES UNITED, Cinquefoils**

- 3364** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU55 NGC. Newman 13-X, W-6855, R.2. The sun appears “sleepy” and the midpoint of the ornament (between MIND and YOUR) is centered over the I in BUSINESS. On the reverse WE touch each other and pierce the label. This piece shows some faded obverse clash marks and planchet roughness most prominent in the lower-left quadrant. The surfaces are medium chocolate-brown, with more luster on the obverse but some muted mint red remaining in the center reverse. The large quantity found in the Bank of New York hoard, 726 coins, makes this high-grade example of this variety a splendid acquisition for a type set, as most other Fugio pairings will cost much more in comparable condition. Listed on page 83 of the 2011 *Guide Book*. MRB AU50. Purchased from D. Dokus (3/3/1963). From the W. Philip Keller Collection of U.S. Colonials. (#883)

- 3365** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays AU58 NGC. Newman 8-X, W-6750, R.3. The center ornament is over the left edge of the upright of the I in BUSINESS. The WE touch each other and pierce the label, with the top of the first E slanting upward. This piece has little wear, although some planchet roughness and dark flecks in some of the device interstices appear scattered on both sides. The planchet is dark brown on this coin, another variety that may have come from the Bank of New York. The New Netherlands pedigree increases the appeal, as the era was one in which both John J. Ford, Jr. and Walter Breen were associated with the firm. Listed on page 83 of the 2011 *Guide Book*. MRB AU55. Purchased from New Netherlands (4/24/1954). From the W. Philip Keller Collection of U.S. Colonials. (#883)

**STATES UNITED, 4 Cinquefoils Fugio Cent  
Newman 12-X, MS62 Brown, Intense Luster**

- 3366** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown NGC. Newman 12-X, W-6820, R.3. On the obverse, the signature is a die crack running downward to the right of the sun. On the reverse, the W and E touch and also pierce the label. This is an appealing, glossy chocolate-brown example of this available variety, of which 264 were found in the Bank of New York hoard in 1948. The obverse is lightly clashed, there are some typical areas of light striking, and die rust appears on both sides. Nonetheless appealing and strictly Mint State, with intense luster over milk-chocolate surfaces. Listed on page 83 of the 2011 *Guide Book*. MRB MS60. Ex: French's (10/1953). From the W. Philip Keller Collection of U.S. Colonials. (#883)

**Pleasing Newman 11-X 1787 Fugio Cent, MS63 Brown  
Likely From Bank of New York Hoard**

- 3367** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS63 Brown NGC. Newman 11-X, W-6790, R.4. The Newman 11 obverse shows the sun's eyes as nearly horizontal pellets, the one on the left smaller and more nearly round. Prominent obverse clash marks, as seen here, are characteristic. On the X reverse, the WE touch and pierce the label, and the A is distance from RE. This Select specimen likely owes its existence to the hoard from the Bank of New York, where 132 survivors were uncovered in 1948. The strike is off-center towards 6 o'clock on the obverse, and some areas of light strike are typical, the central reverse a case in point. The lustrous surfaces show some scattered carbon as well as traces of mint red in some of the device interstices, a thoroughly attractive example. Listed on page 83 of the 2011 *Guide Book*. MRB MS60. Purchased at “Ephrata CC Show” (6/5/1971). From the W. Philip Keller Collection of U.S. Colonials. (#883)

- 3368** 1787 Fugio Cent, STATES UNITED, 1/Horizontal 1—Corrosion—NGC Details. Fine. Newman 10-T, W-6705, R.5. This Cinquefoils variety shows the 1 in the date lying over a horizontal 1, a rare pairing. On the T reverse, the W is too far to the left, piercing the inner ring, and the last E is quite low. Extensive corrosion affects the upper half of the obverse, particularly a small circular patch that has obliterated the first 7. But sufficient detail remains on the adjacent 1 to clearly make out the superfluous digit. Medium brownish-black surfaces overall. Listed on page 83 of the 2011 *Guide Book*. MRB Good 4. Purchased from Robert Vlack (6/1962). From the W. Philip Keller Collection of U.S. Colonials.

- 3369** 1787 Fugio Cent, UNITED STATES, Cinquefoils VG8 NGC. Newman 18-H, W-6950, R.5. The right eye of the sun is more prominent, and the third cinquefoil is low. On the UNITED STATES reverse, the WE ARE ONE is “crudely aligned.” This is a well-centered, problem-free dark-brown piece that merely shows extensive wear. Listed on page 83 of the 2011 *Guide Book*. MRB VG8. Purchased from Milt Stern (9/16/1961). From the W. Philip Keller Collection of U.S. Colonials. (#889)

- 3370** 1787 Fugio Cent, UNITED STATES, Cinquefoils VG10 NGC. Newman 16-H, W-6920, R.5. The center ornament is over the right edge of the upright of the I in MIND YOUR BUSINESS, and the top of the O in YOUR is broken. On the reverse, the top of the W is much higher than the top of E and both pierce the label. The R tilts left and barely touches the second E. On this piece, a heavy die crack between links 7 and 8 runs to the rim, where it forms a retained cud along the dentils. This is a problem-free chocolate-brown piece that merely shows considerable wear. Listed on page 83 of the 2011 *Guide Book*. MRB VG10. Purchased from J.J. Teaparty (6/18/1963). From the W. Philip Keller Collection of U.S. Colonials. (#889)

- 3371** 1787 Fugio Cent, UNITED STATES, Cinquefoils—Environmental Damage—NGC Details. Fine. Newman 21-I, W-7010, R.4. The N in BUSINESS is much too high and tilted left, and the sun's eyes are prominent, even on this well-worn piece. On the reverse ARE slopes downward from left to right and is much closer to WE than to ONE. This pairing sometimes shows dramatic clash marks on the reverse, as here. The brownish-black surfaces show limited corrosion, most prominent at 87 in the date and links 2 and 3 on the reverse. Listed on page 83 of the 2011 *Guide Book*. MRB VG8. Ex: New Netherlands (6/29/1959). From the W. Philip Keller Collection of U.S. Colonials.

- 3372** 1787 Fugio Cent, UNITED STATES, Cinquefoils VF25 PCGS. Newman 18-H, W-6950, R.5. A much better die variety of this popular Early American type. The obverse is olive-brown while the reverse features slightly deeper lilac-gray toning. Marks are limited to a pair of brief hair-thin obverse lines. Listed on page 83 of the 2011 *Guide Book*. MRB VF20. (#889)

**Scarce Newman 15-H 1787 Fugio Cent, XF Details**

- 3373** 1787 Fugio Cent, UNITED STATES, Cinquefoils—Environmental Damage—NGC Details. XF. Newman 15-H, W-6890, R.4. A scarce variety. The obverse shows prominent eyes of the sun, and the ornament center is over the right edge of the upright of I. There is a prominent straight die break, as usually seen, from the right (facing) sundial edge to the rim at 4:30. On the reverse the top of W is much lower than the top of the E, and the O is low. This piece has fairly uniform, moderate porosity more prevalent on the obverse, but a wealth of pleasing detail remains on each side. Listed on page 83 of the 2011 *Guide Book*. MRB VF25. Purchased from Metropolitan Coin Company (9/7/1961). From the W. Philip Keller Collection of U.S. Colonials.

**Lovely MS63 Brown 1787 Fugio Cent, Newman 8-B UNITED STATES, Cinquefoils**

- 3374** 1787 Fugio Cent, UNITED STATES, Cinquefoils MS63 Brown NGC. Newman 8-B, W-6740, R.3. The Newman 8 obverse shows the right upright of the N in MIND nearly to the center of the U in BUSINESS. It was paired only with the B and X reverse. Here, the B reverse shows the W tilting right, and the base of each E is low, with the first two tilting right. This is a lovely Select piece with clashing appearing over medium-brown, lustrous surfaces that show some residual mint red in protected areas. Listed on page 83 of the 2011 *Guide Book*. MRB MS60. Purchased from Kenneth W. Rendell (6/28/1960). From the W. Philip Keller Collection of U.S. Colonials. (#889)

**Fully Lustrous Near-Gem Brown 1787 Fugio UNITED STATES, Cinquefoils, Newman-11B Likely From Bank of New York Hoard**

- 3375** 1787 Fugio Cent, UNITED STATES, Cinquefoils MS64 Brown NGC. Newman-11B, W-6785, R.4. This is a lovely, glossy medium-brown near-Gem example of this coin, likely a hoard specimen from the Bank of New York, a treasure trove uncovered in 1948. The prominent die clash marks in the right obverse field are from the chain links on the reverse, but considerable clashing appears on the reverse as well. Struck a bit off-center toward 10:30 on the obverse. Loads of luster emanate from the surfaces, and there is not a hint of rub or friction. A super coin. Listed on page 83 of the 2011 *Guide Book*. MRB MS62. Purchased from M.L. Kaplan (8/1958). From the W. Philip Keller Collection of U.S. Colonials. (#889)

**Nice XF 1787 Fugio Cent, 1 Over Horizontal 1 Guide Book Variety, Newman 10-G**

- 3376** 1787 Fugio Cent, UNITED STATES, 1/Horizontal 1 XF40 NGC. Newman 10-G, W-6700, R.5. The popular blundered die variety, created with an obverse showing the 1 in the date over a previous horizontal 1, paired with a reverse where ARE is much closer to WE than to ONE and the O is open at the bottom. This is a nice, attractive example with much detail remaining on chocolate-brown surfaces. Localized minor pitting at GIO is undistracting. The obverse shows some old die clashing but both sides are comparatively contact-free. Listed on page 83 of the 2011 *Guide Book*. MRB VF30. Purchased from G. Creed (6/1/1960). From the W. Philip Keller Collection of U.S. Colonials. (#892)

- 3377** 1787 Fugio Cent, STATES UNITED, Raised Rim—Environmental Damage—NGC Details. Fine. Newman 19-Z, W-6975, R.5. This popular *Guide Book* variety is listed as STATES UNITED, Label With Raised Rims, Large Letters in WE ARE ONE in that reference, while the NGC label merely attributes it as Large Letters, Pointed Rays, STATES UNITED, which amounts to the same thing. The Newman 19 obverse shows the center ornament over a space between I and N in BUSINESS. The characteristic Z reverse shows the inside and outside edges of the label appearing raised, due to removal of the extra material outside of the letters of STATES UNITED. The WE ARE ONE is hand-cut and large, the only such reverse. This medium-brown piece has scattered porosity that is unfortunately heaviest on the lower half of the reverse, although some key diagnostics are still distinguishable. Listed on page 84 of the 2011 *Guide Book*. MRB VG8. Purchased from Kenneth W. Rendell (10/29/1960). From the W. Philip Keller Collection of U.S. Colonials.

- 3378 1787 Fugio Cent, STATES UNITED, Raised Rim—Planchet Flaw—NGC Details. Fine. Newman 12-Z, W-6975, R.5.** This is the popular Label With Raised Rims *Guide Book* variety, the Newman Z reverse which the Whitman *Colonial Encyclopedia* calls “one of the most curious and distinctive of the reverses.” The effect of raised label rims was actually created by the removal of extra material from between the letters of STATES UNITED. The reverse is here paired with the Newman 12 obverse, displaying two lobes of a cinquefoil pointing to the F of FUGIO and another pointing above and below the O of that same word. The mentioned planchet flaw is just above the O, running through the sun’s rays at left. Another smaller flaw is in the lower-right sundial area, and three flawed areas appear on the reverse. Medium chocolate-brown surfaces show moderate contact as well. Listed on page 84 of the 2011 *Guide Book*. MRB VG8. Purchased from Kenneth W. Rendell (11/8/1958).  
From the W. Philip Keller Collection of U.S. Colonials.

**1787 Fugio, STATES UNITED, Eight-Pointed Stars  
Newman 15-Y, Very Fine**

- 3379 1787 Fugio Cent, STATES UNITED, Eight-Pointed Star VF20 NGC. Newman 15-Y, W-6915, R.2.** The eyes are prominent on the sun, and the ornament center is over the right edge of the upright of the I in BUSINESS. The Newman Y reverse shows eight-pointed stars on the ring containing STATES UNITED. This is an attractive chocolate-brown specimen with few distractions other than the typically weak strike, so that the last two digits of the date are faint. Listed on page 83 of the 2011 *Guide Book*. MRB VF20. Purchased from R. Hooper (3/26/1973).  
From the W. Philip Keller Collection of U.S. Colonials. (#898)

**Club Rays, Rounded Ends 1787 Fugio Cent  
Newman 4-E, Sharpness of Very Fine**

- 3380 1787 Fugio Cent, Club Rays, Rounded Ends—Corrosion—NGC Details. VF. Newman 4-E, W-6685, R.3.** This Club Rays, Rounded Ends obverse has a ray close to but not touching the lower part of the cinquefoil before the 1. The Newman E reverse displays the W in WE apart from the D in UNITED (not distinguishable here) and a thin right side of the N in ONE (plain here). The dark-brown surfaces show moderate corrosion throughout both sides, but there are few distractions otherwise. Listed on page 84 of the 2011 *Guide Book*. MRB Fine 15. Purchased from W.E. Johnson (8/31/1959).  
From the W. Philip Keller Collection of U.S. Colonials.

**Newman 3-D 1787 Fugio Cent, Club Rays  
Rounded Ends, XF Sharpness**

- 3381 1787 Fugio Cent, Club Rays, Rounded Ends—Environmental Damage, Rim Damage—NGC Details. XF. Newman 3-D, W-6680, R.3.** This Club Rays, Rounded Ends obverse shows a ray touching the corner of the cinquefoil before 1 in the date, an obverse that is paired only with the D reverse. That die shows several of the letters in UNITED STATES “falling into” the central area, with no separation at the letter bottoms. WE ARE ONE in deeply incused into the die. This piece shows rim bumps at 3 o’clock and 9:15 on the obverse, and the planchet is somewhat dark and shows some minor corrosion. A small area of rim damage is noted on the reverse at 3 o’clock. Listed on page 84 of the 2011 *Guide Book*. MRB VG10. Purchased from “Foster” (10/3/1952).  
From the W. Philip Keller Collection of U.S. Colonials.

- 3382 1787 Fugio Cent, New Haven Restrike, Copper MS64 Brown NGC. Newman 104-FF, W-17560.** The mid-19th century New Haven restrikes of the Fugio cent are collectible in their own right and have been for decades, as seen here with this mushroom-brown near-Gem. Solidly struck with only minor variations in color. Listed on page 84 of the 2011 *Guide Book*. MRB MS62. Ex: Hollinbeck (11/30/1953), lot 550.  
From the W. Philip Keller Collection of U.S. Colonials. (#916)

**AU Details Rhode Island Ship Token in Copper  
Breen-1139, W-1730**

- 3383 1778-1779 Rhode Island Ship Token, No Wreath, Copper—Bent—NGC Details. AU. Breen-1139, W-1730, R.3.** An intermediate step in the progression of the Rhode Island Ship token (or medal), with the Dutch word VLUGTENDE (fleeing) scraped away from the bottom of the obverse die but no wreath laid down in its place. This peach-tinged brown piece shows only slight wear, and while it may be bent, the appearance of the bend is minimized within the plastic holder. Listed on page 48 of the 2011 *Guide Book*. MRB XF40. Ex: James Kelly (9/1951).  
From the W. Philip Keller Collection of U.S. Colonials.

1783 Chalmers Shilling, Fine Details  
Long Worm, Breen-1012, W-1790

- 3384** 1783 Chalmers Shilling, Long Worm—Damaged—NGC Details. Fine. Breen-1012, W-1790, R.4. *Incorrectly described as a “Short Worm” on the holder.* The silver coinage of John Chalmers, struck around the time of American independence by treaty, has long occupied a favored position in collections of early American silver. This example, while significantly worn, shows full outlines of both the birds and the clasped hands. Digs and scrapes clustered at the lower left obverse and upper left reverse account for the “Damaged” designation. Listed on page 49 of the 2011 *Guide Book*. MRB Fine 12.

Ex: James Kelly (9/1951).

From the W. Philip Keller Collection of U.S. Colonials.

- 3385** 1787 Auctori Plebis Token VF30 NGC. Breen-1147, W-8770, R.3. An English token that was part of the Conder series, the Auctori Plebis bears a strong resemblance to Connecticut and Vermont coppers and has also found a home among collectors of Colonials. Softly struck with cut-off letters and date but a still-glossy chocolate-brown coin with solid eye appeal for the VF30 grade. Listed on page 70 of the 2011 *Guide Book*. MRB VF30.

Ex: Will W. Neil (B. Max Mehl, 6/17/1947), lot 3187; Numismatic Gallery ANA Auction (8/22/1953), lot 3318.

From the W. Philip Keller Collection of U.S. Colonials. (#601)

Famous 1787 Immunis Columbia  
Eagle Reverse, W-5680, AU50

- 3386** 1787 Immunis Columbia, Eagle Reverse AU50 NGC. W-5680, High R.4. The 1787-dated Immunis Columbia with Eagle reverse is among the most iconic and famous of the Early American issues, but at the same time it is also among the most enigmatic. The *Guide Book* entry for this piece keys off Walter Breen, who suggested that the Immunis Columbia was originally a prototype for Confederation coinage. While it may not have served that purpose, the New York-related design was struck in sufficient quantities that today it is only very scarce (though not nearly so common as to meet collector demand). Aside from a measure of the usual central striking softness and a strike that was slightly off-center to the south (relative to the obverse), this lightly worn chocolate-brown example has few faults. Listed on page 53 of the 2011 *Guide Book*. MRB XF45.

Purchased from M.L. Kaplan (8/17/1952).

From the W. Philip Keller Collection of U.S. Colonials. (#841)

- 3387 1789 Mott Token, Thick Planchet, Engrailed Edge AU58 PCGS. CAC.** A late state of the dies with a large break at the upper left corner of the clock, a slight die bulge, and central design weakness. Both sides have attractive medium brown surfaces. Listed on page 70 of the 2011 *Guide Book*. MRB XF45. (#606)
- 3388 (1792-94) Kentucky Token, Plain Edge MS63 Brown NGC. Breen-1155, W-8800, R.1.** An accessible but popular type, struck in England somewhere between 1792 and 1794. While characterized as "Brown," this smooth Select coin has considerable peach overtones mixed in with the violet. Listed on page 71 of the 2011 *Guide Book*. MRB MS60.  
Ex: Numismatic Gallery ANA Auction (8/22/1953), lot 3303.  
From the W. Philip Keller Collection of U.S. Colonials. (#614)
- 3389 (1792-94) Kentucky Token, LANCASTER Edge MS61 Brown NGC. Breen-1156, W-8810, R.5.** The Lancaster edge is scarcer than the more frequently encountered plain edge variety. Mottled red and russet patina covers both sides of this boldly defined representative. There are no individually significant marks. Listed on page 71 of the 2011 *Guide Book*. MRB MS60.  
Ex: James Kelly Auction (2/8/1954), lot 68.  
From the W. Philip Keller Collection of U.S. Colonials. (#623)
- 3390 1794 Franklin Press Token—Improperly Cleaned—NGC Details. AU. Breen-1165, W-8850, R.1.** An early die state without prominent crack at the center-right obverse. The oranges and violets on each side give this piece an uncommon, though unfortunately artificial appearance. Listed on page 72 of the 2011 *Guide Book*. MRB AU50.  
Ex: New Netherlands ANA Sale (8/1952), lot 2418.  
From the W. Philip Keller Collection of U.S. Colonials.
- 3391 1794 Franklin Press Token MS62 Brown NGC. Breen-1165, W-8850, R.1.** Late state with die crack at center-right of the obverse, as usually seen. Attractive brown surfaces are smooth with only small flashes of reddish-orange. A lovely example of this popular English trade token, popular with collectors of early American pieces for its Franklin association. Listed on page 72 of the 2011 *Guide Book*. MRB AU55.  
Ex: New Netherlands ANA Sale (8/1952), lot 2419.  
From the W. Philip Keller Collection of U.S. Colonials. (#630)
- 3392 1794 Talbot, Allum & Lee Cent, NEW YORK—Improperly Cleaned—NGC Details. Unc. Fuld-2, W-8570, R.1.** Large ampersand on obverse, NEW YORK on reverse. This is a well-defined example of the type that shows no trace of wear, though the caramel-gold and walnut-brown color was induced by a past cleaning. Listed on page 72 of the 2011 *Guide Book*. MRB XF45.  
Purchased from Macy's (4/8/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#634)
- 3393 1795 Talbot Allum & Lee Cent MS62 Brown NGC. Fuld-1, W-8560, R.5.** The rare Fuld-1 type without NEW YORK over the ship. While both sides are unquestionably Brown in both color and grade, there is also a prominent reddish-violet tinge to the surfaces. A few small flecks and abrasions account for the grade. Listed on page 72 of the 2011 *Guide Book*. MRB MS60.  
Purchased from Douglas (7/30/1951).  
From the W. Philip Keller Collection of U.S. Colonials. (#640)
- 3394 1783 Georgivs Triumpho Token XF40 NGC. Baker-7, W-10100, R.3.** A possibly satirical token, the bust on the obverse strongly resembles George III as he appeared on many British coins. While the "Triumphant George" legend may mock his defeat in the American Revolution, it could also have been meant to commemorate the other George's victory. This is an attractive example of this desirable token. The figure of Liberty is softly defined, as always seen, and a thin planchet flaw bisects the reverse, but there are no distracting marks on the obverse. Listed on page 75 of the 2011 *Guide Book*. MRB XF40.  
Ex: New Netherlands ANA Sale (8/1952)  
From the W. Philip Keller Collection of U.S. Colonials. (#664)
- 3395 Six Washington Colonial Pieces Uncertified. Large Military Bust: VG, Ex: W.E. Johnson (7/3/1959); Good, dented, Ex: W.E. Johnson (7/3/1959); Draped Bust With Button: Fine, Ex: Robert A. Vlack (6/28/1965); Good, Ex: W. Eisenhart (4/7/1962); North Wales: Two Stars, plain edge, Fine, Ex: Empire Coin Company (5/15/1959); Liberty and Security "Irish Halfpenny" mule, lettered edge, VG, Ex: New Netherlands (6/23/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (Total: 6 coins)**
- 3396 1783 Washington & Independence Cent, Large Military Bust XF45 NGC. Baker-4, Vlack 3-C, W-10170, High R.4.** The 1783-dated Washington & Independence cents were probably struck much later, perhaps in the 1820s. The present piece is an example of the Baker-4 variety, with the Large Military Bust and the letter W close to the portrait. This specimen is sharply detailed, on a well produced, medium brown planchet. Listed on page 75 of the 2011 *Guide Book*. MRB XF45.  
Purchased from Behringer (1/16/1954).  
From the W. Philip Keller Collection of U.S. Colonials. (#667)
- 3397 1783 Washington & Independence Cent, Small Military Bust, Engrailed Edge—Scratches—NGC Details. VF. Baker-4B, W-10150, R.6.** A rare variety of the 1783 Washington & Independence cent, the Baker-4B variety is identified by its engrailed edge. These pieces probably circulated on both sides of the Atlantic and were most likely struck circa 1820, in spite of the early date. This example shows extensive die cracks through the lower obverse legend and date, and a few scratches in the reverse field. Listed on page 75 of the 2011 *Guide Book*. MRB VF20.  
Purchased from W.E. Johnson (7/3/1959).  
From the W. Philip Keller Collection of U.S. Colonials.
- 3398 1783 Washington & Independence Cent, Small Military Bust, Engrailed Edge—Improperly Cleaned—NGC Details. XF. Baker-4B, W-10150, R.6.** The bust on the Washington & Independence cent is adapted from a portrait by Edward Savage. The rare Baker-4B variety is the only Military Bust type with an engrailed edge. The present piece is a sharply detailed specimen, struck on a well produced, medium brown planchet. Listed on page 75 of the 2011 *Guide Book*. MRB XF40.  
Purchased from W.E. Johnson (7/3/1959).  
From the W. Philip Keller Collection of U.S. Colonials.
- 3399 1783 Washington & Independence Cent, Draped Bust, Button XF45 NGC. Baker-5, Vlack 20-P, W-10410, High R.6.** A pleasing medium brown representative of this rare variety. The surfaces show only minor abrasions with none worthy of individual mention. Some softness at the center of the reverse is consistent with the grade. Listed on page 76 of the 2011 *Guide Book*. MRB XF40.  
Purchased from Robert A. Vlack (11/15/1963)  
From the W. Philip Keller Collection of U.S. Colonials. (#679)
- 3400 1783 Washington & Independence Cent, Draped Bust, Button AU55 NGC. Baker-5, Vlack 22-R, W-10440, High R.6.** The rare W-10440 variety of the Washington & Independence Draped Bust cent is recognized by the button on the tunic, and the position of the 7 in the date slightly lower than the 1 and 8. This specimen is particularly well preserved, with a sharp strike and hints of red color near the rims. Listed on page 76 of the 2011 *Guide Book*. MRB AU50.  
Purchased from Jim Kelly (4/18/1952).  
From the W. Philip Keller Collection of U.S. Colonials. (#679)
- 3401 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Plain Edge PR63 Brown NGC. Baker-3C, W-10310, R.6.** The Taylor proof restrike, identified by the small 3 in the date and the drapery fold over the 7. The Soho Mint of Birmingham, England, closed in 1848, and W.J. Taylor used four pairs of dies from that facility to produce these restrike Washington coppers. Beautiful golden-brown toning blankets this fully struck and unabraded example. Two small obverse spots are all that determine the grade. MRB PR60.  
Purchased from Robert Vlack (4/26/1960).  
From the W. Philip Keller Collection of U.S. Colonials. (#682)

**3402 1783 Washington & Independence Cent, Draped Bust, No Button, Copper Restrike, Engrailed Edge—Improperly Cleaned—NGC Details. Proof. W-10370.** Subtle blue and red accents in the periphery contrast against lighter patination in the centers. Several pin-sized contact marks on either side are barely perceptible to the unaided eye. Although this piece may have been cleaned many years ago, it shows few signs of improper handling. Listed on page 76 of the 2011 *Guide Book*. MRB PR60.

*Ex: James Kelly (11/1954).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**3403 1783 Washington Unity States Cent XF40 NGC. Baker-1, W-10130, R.1.** This popular type exhibits a reverse design that mimics an early 19th Century large cent with "Unity" substituted for "United." Lighter reddish accents intermingle with deeper brown patina across both sides. An appealing midrange specimen. Listed on page 76 of the 2011 *Guide Book*. MRB XF40.

*Purchased from W. E. Johnson (7-3-1959).*

*From the W. Philip Keller Collection of U.S. Colonials. (#689)*

**3404 1791 Washington Large Eagle Cent—Obverse Damage—NGC Details. VF. Baker-15, W-10610, R.2.** Washington's bust on this early coinage proposal was modeled after a painting by Pierre Eugene Du Simitierre, but the president was adamantly opposed to using his portrait on the national coinage. The present coin represents the Baker-15 variety, with the Large Eagle reverse. A long scratch is noted in the obverse field, and some slight corrosion is evident on the bust, but otherwise this piece is free of serious distractions. Listed on page 77 of the 2011 *Guide Book*. MRB VF20.

*ANA Convention Auction (Jim Kelly, 8/1951), lot 1923.*

*From the W. Philip Keller Collection of U.S. Colonials.*

**3405 1791 Washington Small Eagle Cent—Improperly Cleaned—NGC Details. XF. Baker-16, W-10630, R.3.** The 1791 Washington cents were made in large numbers by English firms as examples of a proposed American coinage. The establishment of the United States Mint in 1792 and Washington's objection to using his portrait on the national coinage ended hopes of this proposal being accepted. The present coin is an example of the Baker-16 variety, with a small eagle reverse. Only slight traces of wear are evident on the design elements of this well produced piece, and the chocolate-brown surfaces show tiny glints of red color in the obverse field. Listed on page 77 of the 2011

*Guide Book. MRB XF45.*

*Purchased from James Kelly (4/18/1952).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**3406 1793/2 Washington Ship Halfpenny, Copper, Lettered Edge—Environmental Damage—NGC Details. AU. Baker-18, W-10855, R.4.** The 1793 Washington Ship halfpenny is actually part of the Conder token series, but many examples of the issue circulated in contemporary commerce. The reverse die is overdated from 1792, but no 1792 dated specimens are known. This piece was struck from clashed dies, with lettering clearly visible between the prow of the ship and the denomination on the reverse. Evidence of die bulging can be detected at the lower right border, as often seen on this issue. Much intricate detail remains on the devices, but the surfaces show some areas of light corrosion. Listed on page 79 of the 2011 *Guide Book*. MRB XF40.

*Purchased from Douglas (8/21/1951).*

*From the W. Philip Keller Collection of U.S. Colonials.*

**1795 Washington Grate Halfpenny  
MS64 Red and Brown  
Large Buttons, Reeded Edge, Baker 29-A**

**3407 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge MS64 Red and Brown NGC. Baker 29-A, W-10955, R.1.** The 1795 Washington Grate halfpenny tokens were produced in large quantities to advertise the firm of Clark & Harris, London. The Baker 29-A variety is distinguished by the large buttons on Washington's coat and the diagonal edge reading, which slopes down to the right on Baker 29-A. The present piece is a sharply detailed Choice example, with traces of original red color outlining the devices. This specimen is the single finest example certified in the Red and Brown category by NGC, while PCGS has graded a single piece finer (9/10). Listed on page 79 of the 2011 *Guide Book*. MRB MS64.

*Ex: ANA Convention Auction (New Netherlands, 8/1952), included in lot 2419 along with a 1794 Franklin Press cent, realized \$12.50.*

*From the W. Philip Keller Collection of U.S. Colonials. (#747)*

**3408 1795 Washington Grate Halfpenny, Small Buttons, Reeded Edge AU50 PCGS. Baker-29D, W-10950, R.4.** The significantly scarcer of the two button size varieties. This deep brown Washington copper has limited wear and a crisp strike. The fields display only minor abrasions. Listed on page 79 of the 2011 *Guide Book*. MRB XF45. (#749)

**3409 1795 Washington Liberty & Security Halfpenny, BIRMINGHAM Edge AU50 NGC. Baker-3113, W-11010, R.5.** The slightly more available Birmingham edge variant. This lightly abraded specimen boasts chocolate-brown patina across both sides. Washington's hair and the shield are a touch soft, as typical. There are no marks of any significance. Listed on page 80 of the 2011 *Guide Book*. MRB XF45.

*Purchased from Stack's (5/29/1952).*

*From the W. Philip Keller Collection of U.S. Colonials. (#758)*

**3410 1795 Liberty & Security/Irish XF45 NGC. Baker-31M, W-11020, R.6.** A mule of the Liberty and Security reverse (used on a British-made George Washington token) and a Conder token "Irish Halfpenny" design. Lilac and yellow accents enhance the chestnut-brown patina, especially on the obverse. The right (facing) side of the eagle is weakly defined, but the rest of the details are crisp. A few minor mint-made imperfections are noted on the reverse. MRB XF45.

*Purchased from R. T. Hooper (8/12/1970).*

*From the W. Philip Keller Collection of U.S. Colonials. (#985)*

**Popular Washington Liberty & Security Penny  
Plain Rims, Baker-30, W-11050, MS62 Brown**

- 3411 Undated Washington Liberty & Security Penny MS62 Brown NGC. Baker-30, W-11050, R.2.** The "Plain Rims" type, notable for having an unintentional decoration in the form of natural bumps along the upper left obverse. Rich golden-brown color dominates each side, and the surfaces show few serious abrasions. Listed on page 80 of the 2011 *Guide Book*. MRB MS60. Purchased before 1962, source not listed.  
From the W. Philip Keller Collection of U.S. Colonials. (#767)

**Undated Liberty & Security Penny, MS65 Brown**

- 3412 Undated Washington Liberty & Security Penny MS65 Brown NGC. Plain Rims, Baker-30, W-11050, R.2** The undated Liberty and Security penny was a British product of Middlesex county issued as a souvenir of American president George Washington. Although they were issued for use in England during the Conder token craze, they are highly collectible in America as well. True Mint State pieces are seldom seen and Gems are very rare. MRB MS63. Census: 2 in 65 Brown, 0 finer (9/10). (#767)

- 3413 (1795) Washington North Wales Halfpenny, Plain Edge, One Star at Each Side of Harp VF25 NGC. Baker-34, W-11150, R.3.** The undated Washington North Wales halfpenny tokens were struck in the early 1790s, traditionally around 1795. They were not intended as cabinet pieces, and served as unofficial circulating media. The issue was crudely struck, and no high grade, sharply detailed pieces are known today. This piece shows significant wear, but the incomplete detail is also a product of the poor strike. The present coin is an example of the Baker-34 variety, with a plain edge and a star on each side of the harp. Listed on page 80 of the 2011 *Guide Book*. MRB VF25. Purchased from H. Tobias (5/27/1953).  
From the W. Philip Keller Collection of U.S. Colonials. (#770)

- 3414 Undated Washington Success Medal, Large Size, Plain Edge—Reverse Scratched—NGC Details. XF. Baker-265A, W-10905, R.7.** The Washington Success medals were struck at an uncertain date, and their intended purpose is something of an enigma. Older authorities, like W. Elliot Woodward, W.S. Baker, and J. Doyle DeWitt believed the pieces were minted in celebration of Washington's second inauguration, while others have suggested they were intended as 19th century game counters. Whatever their origin, the medals have always been popular with numismatists. This piece is an example of the very rare Baker-265A variety, with a large planchet and a plain edge. Like almost all specimens seen, this piece exhibits a bisecting die break, from the obverse rim at 3 o'clock, across the bust, to the rim at 11 o'clock. A deep scratch is noted on the central reverse. Much original detail is retained on the golden-brown surfaces. Listed on page 80 of the 2011 *Guide Book*. MRB VF25.  
Ex: James Kelly (2/1954), lot 104.  
From the W. Philip Keller Collection of U.S. Colonials.

- 3415 Undated Washington Success Medal, Small Size, Plain Edge—Obverse Damage—NGC Details. AU. Baker-267A, W-10877, R.5.** The undated Washington Success medals are a puzzle as to their time of issue and their intended purpose. Prominent coin dealer W. Elliot Woodward expressed the opinion that the issue was "a medal struck on occasion of Washington's second inauguration" in lot 2630 of his McCoy Collection Sale (Woodward, 5/1864). The authors of the 2011 *Guide Book* disagree, stating on page 80 the pieces "are believed to have been made in the mid-19th century." All things considered, Woodward's explanation seems more likely, as he surely would have been aware of any issue like this that surfaced circa 1850. The present coin is sharply detailed, with light golden-brown and red surfaces. A few deep scratches are noted in the obverse field. MRB VF35.  
Purchased from the Copley Coin Company (11/2/1953).  
From the W. Philip Keller Collection of U.S. Colonials.

**Small Size Washington Success Medal, MS63  
Brass, Plain Edge, Baker-267A, W-10877**

- 3416 Undated Washington Success Medal, Small Size, Plain Edge MS63 PCGS. CAC. Baker-267A, W-10877, R.5.** A Plain Edge Success medal in brass, unworn and even prominently mirrored through the fields. Scattered greenish overtones visit the copper-yellow surfaces, which are minimally abraded. An uncommonly fine survivor. Listed on page 80 of the 2011 *Guide Book*. MRB MS62. Population: 2 in 63, 0 finer (9/10). (#782)

**Historic 1820 North West Company  
Token, VF Details, Breen-1083**

- 3417 1820 North West Brass—Environmental Damage—NGC Details. VF. Breen-1083.** Holed, as usual. Struck in Birmingham, these tokens were used in trade in present-day Oregon. Many have been dug up in the Columbia and Umpqua river valleys, thus accounting for the environmental damage. It is believed each token represented one beaver pelt. The surfaces are granular and each side displays even wear over the high points. Listed on page 74 of the 2011 *Guide Book*. MRB Fine 12.

- 3418 1861 Hartford Token, Alfred S. Robinson Copy, MS62 Brown NGC. Kenney-1, W-15000\*, R.5.** The 1861 Hartford token was minted as an advertisement by Connecticut businessman Alfred S. Robinson. The obverse was copied from the 1737 Higley copper, while the reverse advertised Robinson's business ventures. The reported mintage was 150 pieces, but the issue is rarer than this production figure would suggest. The present coin is a delightful MS62 specimen, with a razor-sharp strike, and well preserved brown surfaces. MRB MS60.

*Purchased from the Copley Coin Company (1/2/1954).*

*From the W. Philip Keller Collection of U.S. Colonials.*

- 3419 Pair of (ca. 1859) William Idler Copies of the 1792 Peter Getz Washington "Half Dollar."** Two scarce and highly collectible brass copies of Peter Getz's 1792 Washington half dollar design, struck by coin dealer William Idler circa 1859. **Washington President Obverse MS64 NGC. Baker-544B, M-PA-212, W-15930, R.6.** The bright yellow surfaces are lustrous and the details are sharply struck. A small spot is noted in the right (facing) obverse field. **Washington President Reverse MS64 NGC. Baker-544H, M-PA-215, W-15965, R.6.** This lustrous Choice Mint State specimen has a few small flecks but there are no mentionable handling marks.

*Purchased from Empire Coin (8/31/1959).*

*From the W. Philip Keller Collection of U.S. Colonials. (Total: 2 coins)*

- 3420 12-Piece Colonial Miscellany. Pine Tree Shilling Souvenirs:** Bourne (MA) Historical Society, 1930, Unc, Ex: J.L. Rogers (8/21/1962); Massachusetts Bay Tercentenary, Kenney-2, Unc, Ex: Radford Stearns Collection (Mayflower Coin Auctions, 12/3/1966), lot 876; Massachusetts Bay Tercentenary, Kenney-3, Unc, Ex: Radford Stearns Collection (Mayflower Coin Auctions, 12/3/1966), lot 873; Boston Common Tercentenary, Unc, Ex: Wilshire Coin-A-Rama (7/20/1961); Tatham Coin Company, Unc, Ex: Tatham Coin Company (1/15/1959); International Sterling, AU, Ex: Seitz (11/4/1954); Royal Coin Company, Unc, Ex: Hinman (1953); **1778 Rhode Island Ship Token:** Grant Copy, Unc, Ex: Copley Coin Company (11/2/1953); **1796 Castorland:** Copper Restrike, Unc, Ex: Seitz (9/10/1951); Silver Restrike, Unc, Ex: Seitz (9/10/1951); **Undated Washington Born Virginia:** Uniface Collis Restrike, Unc, two pieces both Ex: Albert Collis (8/31/1959). *From the W. Philip Keller Collection of U.S. Colonials. (Total: 12 pieces)*

**Famous Libertas Americana Medal, Betts-615  
Struck in Copper, MS64 Brown  
Symbol of American Liberty**

- 3421 (1781) Libertas Americana in Copper MS64 Brown PCGS. Betts-615.** A famous and historic Paris Mint medal issue that later inspired the Liberty Cap types of the half cent and cent. Struck in 1783, but dated 1776, 1777, and 1781, the final date representing the Battle of Yorktown. This satiny near-Gem has consistent light chocolate-brown toning, and the strike is unimprovable. A loupe reveals a few delicate hair-thin field marks, in addition to a faint patch of hairlines beneath the M in AMERICA. At 47.7 mm, the present medal is too large in diameter to fit within a standard PCGS holder. However, the PCGS grading insert is included in the lot, along with a photo certificate from PCGS. The medal and certificate are housed within a custom-designed white Capital-style holder.

## HALF CENTS

### Sharp 1793 C-3 Half Cent

**3422 1793 Genuine PCGS. C-3, B-3, R.3.** The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this piece has the details of an AU specimen that has been corroded. Rich mahogany-brown surfaces show little wear, but fine corrosion affects each side, particularly on and to the left of Liberty's portrait. MRB VF25.

**3423 1793 Poor 1 PCGS.** The obverse die is the same used to strike C-1 and C-2. The reverse is worn smooth without any design detail. C-1 and C-2 can usually be distinguished from the obverse alone by the presence or absence of a spur from the 9, but wear on the present coin makes this diagnostic unreliable. LIBERTY and the date are partially evident upon magnification, but the portrait is nearly fully outlined. Pinscratches are noted near the profile with a couple more on the cheekbone and forehead. MRB Poor 1.(#1000)

**3424 1793—Environmental Damage—NGC Details. AG. C-3, B-3, R.3.** The surfaces of this dark brown 1793 half cent are lightly and evenly corroded. The obverse has fully outlined details including a complete date and LIBERTY. The reverse has weak, partially visible detail. MRB Fair 2.(#1000)

### 1793 C-1 Half Cent, Fine Details

**3425 1793—Corroded—NCS Details. Fine. C-1, B-1, R.3.** Dark brown surfaces exhibited a combination of pastel tones, including tan, steel, and maroon, mostly the result of old corrosion. A few old scratches and several other hidden blemishes are evident on each side. MRB Good 6.  
*From The Diotte Collection. (#1000)*

### Popular 1793 C-2 Half Cent, VG8

**3426 1793 VG8 PCGS. C-2, B-2, R.3.** This first-year half cent has fully readable legends, and the types are clear. Moderately granular, and the obverse rim has hints of aqua and powder-blue toning. A mint-made obverse edge flaw appears at 3:30, and a thin mark on the reverse at 10 o'clock. A single-year type. MRB Good 5. (#1001)

**3427 1794 Genuine PCGS. C-1a, B-1a, R.3.** The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this piece has the details of a VF specimen that has been corroded. The holder does not permit edge inspection, but we presume the more available Large Letters Edge. Moderately worn with medium levels of corrosion across deep walnut-brown surfaces. MRB Fine 12.

### VF Sharpness 1794 Half Cent Rare C-8, B-8 Variant

**3428 1794—Corroded—ANACS. VF20 Details. C-8, B-8, R.5.** This rare die pair is most famous for the die crack through the second T in STATES, which starts out light and becomes much heavier toward the end of the production run. On this moderately worn piece, the crack is prominent and extends well into the wreath. Deep brown surfaces show the aftereffects of corrosion as well as digs on the portrait and a few rim bumps, but the reverse displays well, all things considered. MRB VG8. (#1003)

**3429 1795 Lettered Edge—Corroded—NCS. VF Details. C-1, B-1, R.2.** A moderately worn example with deep teal-brown surfaces and lighter gold-gray elements at the worn high points. Considerable eye appeal despite extensive corrosion in the fields. MRB VG8.  
*From The Diotte Collection. (#1009)*

**3430 1797 1 Above 1, Plain Edge Fine 15 NGC. C-1, B-1, R.2.** Manley Die State 4.0-5.0. with ICA absent due to die failure on the opposite portion of the obverse die. Most examples of Cohen-1 were struck on cut-down Talbot, Allum & Lee cent tokens. On the present piece, rigging from the undertype is visible on the obverse near 3 o'clock. Toned tan, rose, and aquamarine with a few moderate thin marks and a slightly wavy appearance at the top of the wreath. MRB Fine 12.(#1042)

**Lustrous 1806 C-4 Half Cent  
MS62+ Red and Brown**

- 3431 1806 Large 6, Stems MS62+ Red and Brown PCGS. CAC. C-4, B-4, R.1.** Both sides of this lovely half cent have olive-brown toning with faded orange luster and darker steel-brown on the high points. The reverse is rotated, as often, with the top of the wreath opposite the bust, and both elements weakly detailed. Minor spotting is evident, but the overall appearance is excellent. MRB MS60. (#1100)
- 3432 1828 12 Stars MS61 Brown NGC. C-2, B-3, R.2.** The sole 12 Stars die pair. This luminous example is deep violet-brown on the obverse with a window of light gold at the lower right rim, while the reverse has paler purple-olive hues. An intriguing coin that shows few distractions for the grade. MRB AU50. (#1150)
- 3433 1834 MS64 Red and Brown PCGS. CAC. C-1, B-1, R.1.** A lovely near-Gem with considerable reddish-orange mint luster, this piece presents blue-brown toning on both sides with about 40% of the original color remaining. Population: 22 in 64 Red and Brown, 4 finer (9/10). MRB MS63. (#1166)
- 3434 1854 MS65 Brown NGC. C-1, B-1, R.1.** Glimmers of faded red outline design elements, although this satiny Gem is mostly toned chocolate-brown. A thin mark beneath the E in CENT, but otherwise nearly void of abrasion. MRB MS63. (#1230)
- 3435 1855 MS65+ Brown PCGS. CAC. C-1, B-1, R.1.** This beautiful Gem has frosty mint luster with orange luster interrupting the bluish-brown surfaces on each side. This example is a wonderful exception to the rule that 1855 half cents have carbon spots. MRB MS64. (#1233)

**LARGE CENTS**

**1793 Chain AMERI Cent, S-1, Fine Details**

- 3436 1793 Chain AMERI.—Reverse Damage—NGC Details. Fine. S-1, B-1, R.4.** Several heavy scratches cross the reverse in different directions on this otherwise attractive medium brown Chain AMERI cent. The obverse also has a few minor scratches and additional small blemishes. MRB Good 4. (#1340)
- 3437 1793 Chain Periods—Environmental Damage—NGC Details. Fair. S-4, High R.3.** Chain cents are highly collectible in all grades, and even in Fair the chain is almost fully visible. The surfaces show significant porosity, hence the modifier from NGC, but there is enough detail to locate the periods after LIBERTY and the date to identify this variety. MRB Poor 1.

- 3438 1793 Chain Periods—Corroded—NCS. AG. S-4, B-5, R.4.** Actually nicer than the description sounds, with a blend of olive and steel-brown on both sides. Liberty is partly outlined with a partial date and legend on the obverse. The reverse has a complete chain. MRB Fair 2.  
*From The Diotte Collection. (#91341)*

**1793 Periods Chain Cent, S-4, AG Details**

- 3439 1793 Chain Periods—Scratches—NGC Details. AG. S-4, B-5, R.4.** Medium brown surfaces with hints of lilac and pale orange host a few old scratches that are blended with their surroundings. The obverse has a fully outlined profile with a full LIBERTY. The date is mostly indistinct. On the reverse the chain is full, with few other visible details. MRB Fair 2.
- 3440 1793 Wreath Cent, Vine and Bars—Graffiti—NGC Details. VG. S-9, B-12, R.2.** The graffiti appears in the right obverse field of this dark brown example, with minor green corrosion within the locks. The reverse has considerable weakness at the lower right. MRB AG3. (#1347)
- 3441 1793 Wreath Cent, Vine and Bars—Corrosion—NGC Details. VG. S-9, B-12, R.2.** Both sides of this dark brown example are covered with heavy corrosion; however, the details grade assigned to this piece is quite conservative. MRB Good 4. (#1347)
- 3442 1793 Wreath Cent, Vine and Bars—Planchet Flaw—NGC Details. VG. S-5, B-6, R.4.** The Large LIBERTY obverse is a distinct subtype of the Wreath design, and S-5 is the only variety from this obverse die. Heavy planchet flaws at the upper reverse retain some detail and also have red and green corrosion. The obverse also has minor planchet flaws with other small blemishes. MRB Good 4. (#1347)
- 3443 1793 Wreath Cent, Vine and Bars—Corrosion—NGC Details. Fine. S-9, B-12, R.2.** The sharpness is Fine or better, with heavy corrosion and evidence of attempted burnishing on both sides. The surfaces show a blend steel-brown and olive. MRB Good 5. (#1347)

**‘Sprung Die’ 1793 Wreath Cent, S-6, VF Details**

- 3444 1793 Wreath Cent, Vine and Bars—Corroded—NCS Details. VF. S-6, B-7, R.3.** The sharpness is fully VF with full and bold design features visible beneath heavy corrosion. The devices are tan and the surrounding fields deep steel. The corrosion has a crusty appearance in many areas. MRB VG8.  
*From The Diotte Collection. (#1347)*

---

1793 S-8 Wreath Cent, VF Details

- 3445** 1793 Wreath Cent, Vine and Bars—Damaged—NGC Details. VF S-8, B-13, R.3. While nicely detailed, this Wreath cent is corroded and bent, the reverse having a slightly dished appearance. The surfaces are medium brown with tinges of blue and tan. All of the design motifs and lettering are complete, except for a few letters of LIBERTY. MRB VG8. (#1347)

---

Sharp 1793 S-6 Wreath Cent, XF Details

- 3446** 1793 Wreath Cent, Vine and Bars—Corroded—NCS. XF Details. S-6, B-7, R.3. All legends are sharp, and the devices are bold. This medium brown example has a lightly granular reverse and a somewhat porous surface along the obverse border. Smoothing is evident near 8 o'clock on the obverse, and a few light pin scratches are noted in the upper right field near the profile. MRB VF20. (#1347)

---

Attractive 1794 S-57 Cent, VF35

- 3447** 1794 Head of 1794 VF35 NGC. S-57, B-55, R.1. A small die chip at the lower left corner of the Liberty Cap gives this die combination its "Button Variety" nickname. Both sides have pleasing chestnut and tan surfaces, the reverse somewhat darker. Minor handling marks are consistent with the grade. MRB VF20. (#901374)

---

1798 Draped Bust Cent, XF45  
Second Hair Style, S-184

- 3448** 1798 Second Hair Style XF45 PCGS. S-184, B-45, Low R.2. The S-184 variety is an available variety, identified by the die chips in the obverse field near 7 in the date, and by a die break that connects the second A in AMERICA to the right ribbon. The Second Hair style is denoted by the extra curl near the shoulder. The present coin is a pleasing medium brown example, with smooth fields and much original detail still evident on the devices. MRB VF30. Population: 14 in 45, 42 finer (9/10). (#1434)

- 3449** 1802 VF35 PCGS. S-237, B-10, R.2. The reverse is distinguished by the area around the T in CENT, which has "blunt" leaves and berry nearby. A smooth brick-red and brown Choice VF coin, well struck with attractive surface quality. MRB VF25. (#1470)

- 3450** 1803 Small Date, Large Fraction XF45 NGC. S-260, B-19, R.1. A sharply detailed and surprisingly unabraded Choice XF Draped Bust cent. Illumination beneath a light reveals olive and lavender undertones. Luster glimmers within the hair. The obverse die is prominently clashed. MRB VF35. *From The Diotte Collection.* (#1485)

- 3451** 1804—Environmental Damage—NGC Details. VG. S-266a, B-1, R.2. Light corrosion and minor scratches are evident on both sides of this mahogany-brown cent. It is an early die state with no rim breaks on either side, and has a fully visible date. A suitable example for the collector on a budget. MRB Good 5. (#1504)

- 3452** 1812 Small Date XF45 PCGS. S-291, B-1, R.2. The less available of the two Small Date die pairs, found here with encircling die crack. Deep violet-brown surfaces are uncommonly smooth with a touch of peach at the reverse interior. MRB VF35. *From The Classic Collection.* (#1561)

---

Scarce 1813 S-293 Cent, AU53

- 3453** 1813 AU53 PCGS. S-293, R.2. A later die state example. The devices are somewhat softly detailed, particularly at the top of the obverse and the base of the reverse. In addition to the striking quality, this coin possesses a smooth, attractively toned sheen in deep chestnut-brown shades with some brick-red accents. We can find no singularly mentionable abrasions. MRB XF40. (#1570)

- 3454 1816 MS63 Brown NGC. N-2, R.1.** Noyes Die State B with prominent obverse rim breaks. Medium brown overall with ample remnants of faded mint red about the legends and stars. A few tiny marks on the cheek, but otherwise exceptional. Housed in a prior generation holder, and struck from rotated dies. MRB MS60.(#1591)
- 3455 1819 Small Date MS64 Brown NGC. N-9, R.1.** Grellman Die State b, dies lapped. Smooth chocolate-brown surfaces have delicate blue and violet overtones as well as spots of deeper color. A well struck and pleasing near-Gem. MRB MS60.(#1606)
- 3456 1820 Large Date MS64 Brown PCGS. CAC. N-13, R.1.** The familiar Randall Hoard marriage, identified by bold peripheral die cracks and prominent repunching on the L in LIBERTY. Rich olive-brown toning with glimpses of faded crimson near the rims. Completely free from marks, although a few pale toning freckles and flecks are scattered. MRB MS62.(#1615)
- 3457 1820 Large Date MS66 Brown NGC. N-13, R.1.** The L in LIBERTY shows prominent triple (if not quadruple) punching. This popular Randall hoard variety is frequently seen in Mint State grades, but MS66 is at the high end of the spectrum. Intermingled chocolate-brown and orange patina covers the smooth, minimally marked surfaces. MRB MS63. NGC has certified only three examples finer (9/10).(#1615)
- 3458 1846 Tall Date MS63 Red and Brown PCGS. N-14, R.2.** Grellman Die State a. Among those 1846 cents that PCGS has certified as Tall Date, none have been graded full Red, and only two examples have received a Red and Brown designation. The present piece is one of those two coins, and it has a generous amount of orange-red on each side, although open areas are toned brown. Unabraded, although moderate distributed carbon limits the grade. MRB MS63.(#1872)
- 3459 1850 MS64 Red and Brown PCGS. CAC. N-6, R.1.** Mint red outlines the stars and legends, while the open fields and the portrait are toned. This is an attractive near-Gem without noticeable spots. A mint-made strike-through is left of the O in ONE, and the chin has an inconspicuous thin mark. MRB MS63.(#1890)
- 3460 1853 MS64 Red and Brown PCGS. N-25, R.1.** Grellman Die State a, which he considers scarce. The reverse is close to full Red, and the obverse has much remaining fire-red. Liberty's cheek and neck are Brown. A lustrous and unblemished near-Gem of the popular Mature Head type. MRB MS63.(#1902)
- 3461 1853 MS65 Red and Brown NGC. N-16, R.1.** Grellman Die State b. The lavender, blue, and violet overtones on this glittering coin lend it character, though at the same time they preclude a fully Red designation. Pleasing surface quality and eye appeal. MRB MS64.(#1902)
- 3462 1853 MS64 Red PCGS. N-13, R.1.** Grellman Die State b, the later state that is identified with a long-dispersed hoard. Bright copper-peach color overall with pockets of blue-violet at the upper and right obverse and the right reverse, as well as copper spots on and near the portrait. Housed in a first-generation PCGS holder. MRB MS63.(#1903)
- 3463 1855 Upright 5s MS65+ Red and Brown NGC. CAC. N-4, R.1.** Ample orange-red cedes to brown on the cheek and open fields. The major devices are well brought up, and the obverse is devoid of contact. A splendid Gem of this underappreciated type. MRB MS63.(#1908)

**3464 1856 Upright 5 MS65 Red and Brown PCGS. CAC. N-6, R.1.** Grellman Die State a, with the line off the final A in AMERICA faint but visible. This Gem offers an entrancing mix of bright copper-orange and violet-brown on the obverse, while the reverse has uniformly dusky pumpkin and crimson hues. Housed in a green label holder. MRB MS63.(#1920)

**3465 1856 Slanted 5 MS64 Red and Brown PCGS. CAC. N-14, R.1.** Both sides offer a substantial amount of the initial orange-red color. The portrait, however, has mellowed in lilac shades. No abrasions are evident, and only a few small spots are present. MRB MS63.(#1923)

## EARLY HALF DIMES

### 1792 Half Disme, Judd-7, VG Details

**3466 1792 Half Disme, Judd-7, Pollock-7, R.4—Plugged, Damaged—NGC Details. VG.** The 1792 half dimes, although technically struck outside the Philadelphia Mint, are considered by most to be the first official U.S. coins. Only three months after the Coinage Act of 1792 was passed, production of half dimes commenced in the basement of John Harper, a local sawmaker. Although classified as patterns by both Judd and Pollock, the half dimes appear to have been meant for circulation and not simply as presentation or experimental pieces. The low grade of the present coin and many of the other survivors indicates that many 1792 half dimes entered circulated and stayed there for many years.

A 1792 half dime is highly desirable in any grade. This piece has been plugged and shows some digs and scratches, but it still retains a significant portion of the design. Much of the obverse legends remain and a number of letters can still be read on the reverse. The NGC holder shows that the diagonal reeding on the edge is complete. A scarce and important issue.

**3467 1794—Improperly Cleaned—NCS. Fine Details. V-3, LM-3, R.4.** Lengthy die cracks on both sides provide ready attribution. This is a moderately granular gunmetal-gray first year Flowing Hair half dime with even wear and ample definition. One small dig is noted near star 5.  
*From The Diotte Collection. (#4250)*

**3468 1794—Bent—NGC Details. Fine. V-2, LM-2, R.5.** Light gray patina covers the surfaces of this first-year half dime. The bends partly obscure some of the details at the top of the reverse (i.e. at STATES), but the rest of the design is clear. Several pin scratches are seen on both sides. A scarce variety.

**Very Rare V-3, LM-4 1795 Half Dime, Fine 15**

**3469 1795 Fine 15 PCGS. V-3, LM-4, R.6.** The obverse's signature die break is not fully formed, but the die crack prelude down the right-side stars is easily visible. Rich rose, gold, and violet toning drapes both sides of this very rare half dime, significantly worn yet still luminous with just a handful of significant marks on each side. (#4251)

**Attractive 1796 V-1, LM-1 LIKERTY Half Dime, XF Details**

**3470 1796 LIKERTY PCGS Genuine. V-1, LM-1, R.3.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been repaired and tooled. The B in LIBERTY is incomplete at the top and bottom, giving this variety its name. This piece is attractive despite its description, exhibiting peripheral blue and iridescent toning around light silver centers.

**1796 Draped Bust Half Dime, AU Details  
'LIKERTY' Variety, V-1, LM-1**

**3471 1796 LIKERTY—Obverse Repaired—NGC Details. AU. V-1, LM-1, R.3.** The famous "LIKERTY" variety, with attractive gold and lavender patina and sharply defined design elements. A little tooling is evident in the obverse field at 10 o'clock., and a minor rim bruise shows at 6 o'clock. This die marriage is scarce, and most examples seen are well worn. (#94254)

**1797 Draped Bust Half Dime, VF Details  
Rare V-1, LM-4 Variety**

**3472 1797 13 Stars—Repaired—NGC Details. VF. V-1, LM-4, R.6.** The 1797 Draped Bust half dime claims a mintage of 44,527 pieces, with four die varieties known for the date. The present coin represents the rare LM-4 variety, identified by the 13 obverse stars and the location of a berry inside the wreath, below I in UNITED. The present coin shows considerable wear on the devices, and some tooling in the obverse field and the rim near T. The surfaces are bright, with colorful gold and blue toning.

**3473 1797 15 Stars—Improperly Cleaned—NGC Details. XF. V-2, LM-1, R.3.** From late dies with lengthy obverse cracks between the T in LIBERTY, the bust tip, and the 9 in the date. The silver-blue and almond-gold surfaces are slightly bright, and close evaluation with a loupe locates a few small but noticeable marks.  
*From The Diotte Collection. (#4258)*

**Satiny 1797 15 Stars Half Dime**  
V-2, LM-1, MS64

- 3474 1797 15 Stars MS64 PCGS. V-2, LM-1, R.3.** The three obverses and three reverses for the year were combined to make four die marriages, with only the 16 Stars obverse sharing two different reverses. Each of the three obverses—13 Stars, 15 Stars, 16 Stars—is a popular *Guide Book* type. On the reverse of this 15 Stars near-Gem, an outer berry appears beneath NI in UNITED. Bright, satiny mint luster covers both sides, each displaying a light, even layer of golden toning. The strike is typically soft in the centers, especially on the eagle's breast. The only marks of any note are in the center obverse. Certified in a green-label holder, this piece is among only four 15 Stars examples certified at PCGS, with one each in MS66 and MS67 finer (9/10). A super type coin. (#4258)

**Desirable 1797 16 Stars Half Dime**  
V-4, LM-2, VF25

- 3475 1797 16 Stars VF25 PCGS. V-4, LM-2, R.4.** Deep dove-gray and olive-gold embrace this scarce Small Eagle half dime. The centers display softness of strike, but Liberty nonetheless has substantial hair detail. A few tiny roundish marks are noted on the portrait and near the first two stars, and a slender mark resides on the junction of the right (facing) wing. (#4259)

- 3476 1800 LIBEKTY Fine 12 ANACS. V-2, LM-3, R.4.** A defective R punch led to the LIBEKTY variety, which is undesignated on the ANACS insert. The usual die state with sizeable mint-made die breaks at 7 o'clock on the obverse and beneath the eagle's beak. Richly toned in aquamarine and lilac shades. Slightly bright but nicely defined and minimally abraded for the grade. From *The Diotte Collection*. (#4265)

- 3477 1800 LIBEKTY—Damaged—NGC Details. XF V-2, LM-3, R.4.** A popular *Guide Book*-listed type, caused by a broken R punch. Cherry-red accents in the periphery intermingle with gunmetal-gray toning in the centers. This piece has a few small digs on the obverse and several shallow scratches on both sides. The details are crisp save for some softness at the upper reverse.

**V-3, LM-1 1803 Small 8 Half Dime**  
Clipped Planchet, XF40

- 3478 1803 Small 8—4% Clipped Planchet—XF40 PCGS. V-3, LM-1, R.5.** The 1803 Small 8 half dime is among the unheralded rarities in U.S. numismatics. It is significantly rarer than the Large 8. PCGS has certified just 11 pieces in all grades; the lowest as AG3, and the single finest as MS63. This is a richly defined example with dusky dove-gray toning. Evenly struck save for the IT in UNITED, where light mint-made adjustment marks are present. Unobtrusive thin marks are noted near obverse stars 1 and 11. A late die state with a die break beneath the bust tip. The small curved clip, noted on the insert, is just to the left of 6 o'clock. Population: 2 in 40, 3 finer (9/10). (#4270)

**BUST HALF DIMES**

**Gem 1832 Capped Bust Half Dime, V-8, LM-5**

- 3479 1832 MS65 NGC. V-8, LM-5, R.1.** The 1832 Capped Bust half dime enjoyed a large mintage of 965,000 pieces, with 14 die varieties known for the date. The present coin represents the most available LM-5 variety, identified by the position of star 6 and star 7 close together on the obverse, and R above I in AMERICA on the reverse. The coin offered here displays bright mint luster under light gold and gray patina, with a razor-sharp strike and no mentionable distractions. Census: 63 in 65, 88 finer (9/10). (#4279)

---

**Outstanding Superb Gem 1835 Half Dime**  
Small Date, Small 5C, V-7, LM-10

- 3480** 1835 Small Date, Small 5C MS67 PCGS. V-7, LM-10, R.1. A brilliant and beautiful Superb Gem that boasts dynamic luster, a razor-sharp strike, and essentially pristine preservation. Ideal for the finest quality early silver type set.

LM-10 is the more plentiful of the two Small Date, Small 5C die varieties. The Large and Small Date logotypes are each known with Small and Large 5C reverses, which results in four different *Guide Book* listings for the date. None of these combinations are rare except in the present grade, although one extremely rare die variety (LM-12) exists. Population: 4 in 67, 1 finer (9/10). (#4285)

---

**SEATED HALF DIMES**

- 3481** 1849 MS65 NGC. Peach-toned at the centers with enveloping blue-to-violet outer patina. A colorful Gem example of this intriguing type issue. Census: 8 in 65, 11 finer (9/10). (#4341)
- 3482** 1852 MS65 NGC. The 1852 Seated Liberty half dime enjoyed a mintage of more than 1 million pieces, but few examples were saved at the time of issue because coin collecting did not become widely popular in this country until later in the decade. Examples in Gem condition are rare today. The present coin displays sharply defined devices under dappled lavender, gray, and gold patina. Census: 27 in 65, 15 finer (9/10). (#4349)
- 3483** 1853 Arrows MS66 NGC. A highly prooflike Premium Gem with mark-free surfaces and a precise strike. Aquamarine borders encompass the cream-gray fields and devices. A high mintage issue, but rare in the present quality. Census: 50 in 66, 10 finer (9/10). (#4356)
- 3484** 1861 MS66 NGC. A hint of golden iridescence brightens the borders of this lustrous high grade half dime. Beautiful and unabraded. Struck from prominently clashed dies. Census: 35 in 66, 6 finer (9/10). (#4379)
- 3485** 1863 MS66 PCGS. Light gold-peach toning overall with blue elements at the borders. A touch of watery reflectivity lends additional eye appeal. A great Premium Gem from a low-mintage Civil War issue. Population: 13 in 66, 19 finer (9/10). (#4382)

---

**PROOF SEATED HALF DIMES**

**Colorful Gem Proof 1859 Half Dime**

- 3486** 1859 PR65 NGC. The first proof half dime issue for which a firm mintage figure is known, with 800 pieces struck, the same number as the other minor silver denominations. This Gem is both strongly mirrored and brightly toned with mixtures of light blue-green and elegant champagne-gold that wash over each side. Census: 45 in 65, 23 finer (9/10). (#4438)
- 3487** 1862 PR65 ★ Cameo NGC. Boldly contrasted through the silver interiors. Rich cerulean and amber-gold border toning offers complementary color and adds to the eye appeal. NGC has graded just 10 numerically finer Cameo coins (9/10). (#84445)

**1865 Half Dime, PR66  
Low Mintage Date**

- 3488 1865 PR66 PCGS. CAC.** The 1865 was a low total-mintage date for half dimes with only 13,000 circulation strikes produced plus a mere 500 proofs. This is an exceptional high-end proof striking that displays deeply reflective fields, evident even through the patchy blue, rose, and golden toning scattered over each side. A couple of almost imperceptible field marks are located on the right side of the obverse. (#4448)

**Toned 1869 Half Dime, PR66 Cameo**

- 3489 1869 PR66 Cameo NGC.** The 1869 proof Seated Liberty half dime boasts a low mintage of 600 pieces, and the issue is scarce-to-rare in all grades today. The present coin is an example of surpassing quality, with deeply mirrored, pristine fields shining beneath delightful green and cerulean-blue patina. The sharply detailed, frosty devices ensure profound cameo contrast. Census: 8 in 66 Cameo, 10 finer (9/10). (#84452)

**1869 Seated Liberty Half Dime, PR66 Cameo**

- 3490 1869 PR66 Cameo NGC.** From a mintage of just 600 pieces, proof 1869 Seated Liberty half dimes are quite elusive today. Examples in Premium Gem condition, with Cameo definition, are very rare. The present coin displays brilliant, mirrored fields with contrasting frosty devices and outstanding eye appeal. Census: 8 in 66 Cameo, 4 finer (9/10). (#84452)

**EARLY DIMES**

**Popular 1796 JR-1 Dime, Good 4**

- 3491 1796 Good 4 PCGS. JR-1, R.3.** A prominent cud partly consumes the first star and confirms the die pairing. Powder-blue and caramel-gold toning embraces this bright example. All letters and stars are clear, with wear greatest near the ribbon of the wreath. A dull curved mark is noted above the cleavage, and the field near the forehead exhibits a small area of smoothing. (#4461)

**Attractive 1796 JR-3 Dime, VG8**

- 3492 1796 VG8 NGC. JR-3, R.5.** This is the second rarest variety among those six that were originally listed in the JR dime book. The surfaces are deeply toned, slightly lighter on the devices. This attractive dime represents the debut of the denomination, a wonderful coin for a type set, or for a complete variety collection of early dimes. (#4461)

**1796 Dime, VF25  
JR-1 With Diagnostic Die Cud**

- 3493 1796 VF25 NGC. JR-1, R.3.** First year of issue for the denomination and the most commonly encountered variety of the year. The diagnostic die "cud" at star 1 is plainly visible and covers most of the bottom two points of that star. The deep gray surfaces are outlined with accents of crimson-rose color on the obverse. A number of small to medium sized handling marks are confined mostly to the obverse.  
*From The Diotte Collection.* (#4461)

**1796 Dime, AU50  
JR-1 With Distinctive Die Cud**

- 3494 1796 AU50 PCGS. CAC. JR-1, R.3.** Among the six varieties of 1796 dimes, the JR-1 and JR-6 are considered the most generally available. Specialists theorize that the JR-1 may have been the first delivery of 14,520 dimes dated January 18, 1796, making this pairing the first dime made for circulation in the United States. The obverse shows a rim cud near star 1, while the reverse has a leaf terminating below the O in OF—a pairing unique to this variety. This piece has light, grade-consistent wear, as expected, most apparent on the eagle's breast, legs, and head, but most of the detail remains in other areas. Light golden patina covers both sides. The die cud has enveloped the lowest two points of star 1. In this later die state, an arcing die crack shows plainly in the obverse field, before the face. (#4461)

- 3495 1800—Improperly Cleaned—NGC Details. VF. JR-2, R.5.** Stone-gray overall with light powder-blue and autumn-gold toning. No marks are consequential, and ample hair and feather detail remains. The rarer of only two die varieties for the date. *From The Diotte Collection.* (#4470)

**1800 Draped Bust Dime, JR-2, VF35**

- 3496 1800 VF35 PCGS. CAC. JR-2, R.5.** From a small mintage of 21,760 pieces, the 1800 Draped Bust dime is an elusive, underrated issue. Two varieties are known for the date. This coin is an example of the very scarce JR-2 variety, characterized by the Wide A's in the reverse lettering. Although wear shows on all the devices, much original detail remains intact. Steel-blue and silver-gray toning enhance the pleasing surfaces. Population: 2 in 35, 30 finer (9/10). (#4470)

**1805 Four Berries Dime, MS62, JR-2  
A Richly Toned Example**

- 3497 1805 4 Berries MS62 NGC. JR-2, R.2.** Autumn-brown, ocean-blue, and mauve shades adorn this boldly defined Draped Bust type coin. Generally well struck, with faint mint-made roller marks visible above Liberty's ear and near the upper right shield corner. A smooth and satiny piece, worthy of an advanced early silver type set. Census: 22 in 62, 71 finer (9/10). *From The Diotte Collection.* (#4477)

## BUST DIMES

### Splendid 1829 Large 10C Dime JR-2, Deeply Toned MS66

- 3498** 1829 Large 10C MS66 PCGS. JR-2, R.2. This available variety combines the JR Obverse 1—double denticles between stars 3 and 4, and over star 9, curved neck 2—with the JR Reverse B with large 10C (as opposed to extra-large 10C, Reverse A). Each side is covered in multiple layers of gray, rose, and emerald-green. Even though the piece is deeply toned, noticeable brightness emanates from the fields. Heavy mint frost coats the devices, especially on the obverse, giving the piece a near-cameo appearance. The strike is sharply defined throughout, and there are no mentionable abrasions. A splendid type coin to represent the modified 1828-1837 Capped Bust type. Population: 1 in 66, 1 finer (9/10). (#94511)

### Very Rare Curl Base 2 1829 Dime JR-10, Good 6

- 3499** 1829 Curl Base 2 Good 6 PCGS. CAC. JR-10, R.6. The very rare JR-10 with Curl Base 2 in date. Sole such 1829 variety, listed in the *Guide Book* and in far greater demand than the meager supply can satisfy. Though the present piece is well-worn, its violet and charcoal-gray surfaces are generally smooth, and the all-important date is fully outlined. Population: 4 in 6, 12 finer (9/10). (#4512)
- 3500** 1832 MS63 NGC. JR-2, R.2. An attractive Select example of this relatively accessible Bust dime die pair. Green-gold outer toning gives way to lustrous silver interiors. Across all varieties, Census: 31 in 63, 58 finer (9/10). (#4521)

## SEATED DIMES

### Gem No Stars Seated 1837 Dime Large Date, Fortin-101b

- 3501** 1837 No Stars, Large Date MS65 NGC. Fortin-101b. Bold obverse radial die cracks at 5 and 7 o'clock converge beneath Liberty's knee. In his website *SeatedDimeVarieties.com*, Gerry Fortin refers to these cracks as "pie shaped." This high grade No Stars type coin is lustrous and well struck. Golden-russet and lime shades frequent the borders. As expected for Fortin-101b, the dies are moderately rotated. (#4561)

### Lustrous MS62 1838-O No Stars Dime

- 3502** 1838-O No Stars MS62 PCGS. The austere elegance of the No Stars obverse, as struck in the first year of operation at the New Orleans Mint. Soft green-gold and blue overtones visit luminous dove-gray surfaces that are free of severe abrasions. A memorable early Seated dime. Population: 4 in 62, 33 finer (9/10). (#4564)

**3503 1843-O—Improperly Cleaned—NGC Details. XF.** Deep purple-gray patina in the fields contrasts sharply against the light gray color on the high points. The stars show full definition at the centrils and there are no individually significant marks. (#4584)

**3504 1853 Arrows MS64 PCGS.** A charming near-Gem example of this popular Arrows issue, satiny with a silver central obverse and gold-orange border hues. The reverse has a more even blend between the two colors. (#4603)

**3505 1853 Arrows MS64+ PCGS. CAC.** Medium sea-green and almond-gold embrace this splendidly toned near-Gem. The borders offer glimpses of rose-red. Lustrous and meticulously struck with a well preserved reverse and good eye appeal. (#4603)

**Premium Gem 1854 Seated Dime  
Short-Lived Arrows Type**

**3506 1854 Arrows MS66 NGC. CAC.** The 1854 With Arrows Seated Liberty dime was produced in large quantities, and the issue is extremely popular as a type coin (the Arrows design was only used from 1853 to 1855). Examples in Premium Gem condition are very rare. The present coin is a noteworthy specimen, with a sharp strike and vibrant mint luster. The surfaces show the slightest hints of ice-blue toning. Census: 8 in 66, 6 finer (9/10). (#4605)

**1869 Seated Liberty Dime, MS67 ★  
Finest Certified in the Star Category**

**3507 1869 MS67 ★ NGC.** A substantial mintage of 256,000 Seated Liberty dimes was coined in 1869, but high quality examples are elusive today. This specimen is the only Superb Gem certified with the star designation by NGC, with none finer (9/10). The design elements are sharply detailed, and the surfaces are graced by shades of golden-brown and violet toning. A memorable prize for the series enthusiast. (#4649)

**3508 1872-CC—Corroded, Cleaned—ANACS. XF Details.** The lower-mintage 1872-CC dime is elusive today regardless of condition. The present piece has strong XF details, though corroded areas are prominent in the obverse fields and the margins have just begun to retone gold and reddish-violet after a cleaning. (#4657)

**Superb Gem 1879 Seated Liberty Dime  
Rare Variety, Prooflike Fields**

**3509 1879 MS67 NGC.** From a business-strike mintage of just 14,000 pieces, the 1879 Seated Liberty dime is a scarce coin in all grades. The present coin shows a repunched 9 in the date, identifying this specimen as a representative of Brian Greer's rare variety No. 101. The fields of this magnificent Superb Gem are reflective and prooflike, and there are definite elements of contrast with the sharply defined, frosty devices. Census: 33 in 67, 3 finer (9/10). (#4687)

**Magnificent MS67 1884 Dime**

**3510 1884 MS67 PCGS.** Potent luster bathes this intricately impressed and immaculate Superb Gem. Close to brilliant, but a hint of olive-gold adorns each side. Essentially unimprovable, and worthy of the finest quality 19th century type set. Housed in a green label holder. Population: 19 in 67, 1 finer (9/10). (#4692)

**3511 1891 MS66 PCGS. CAC.** Lustrous and precisely struck with clean surfaces and a wisp of golden toning. A desirable high grade representative of the final date of the long-lived series. Population: 53 in 66, 6 finer (9/10).  
*From The Classic Collection.* (#4706)

**1891-O Dime, MS67  
Single Finest NGC-Certified**

**3512 1891-O MS67 NGC.** Immaculate and coruscating with light stone-gray toning. New Orleans struck dimes in only two years of the Legend Obverse type: the first, 1860, and the last, 1891. For the three decades in between, the Civil War, reconstruction, and heavy silver dollar coinages all kept the Southernmost branch mint from striking silver dimes. When production finally returned in 1891, the mintage of 4.54 million should have allowed a number to survive in Superb Gem, but nearly all went into commerce, and few were saved as souvenirs. The present piece is the sole MS67 at NGC. PCGS has also certified one as MS67 with none finer, and we sold that coin for \$8,912.50 in a 2003 internet auction. (#4707)

## PROOF SEATED DIMES

### Select Proof 1857 Seated Dime Rare Early Issue

- 3513 1857 PR63 ANACS.** Commercial offerings of proof sets did not begin until the following year, so mintages for 1857 proof coins are only estimates. Perhaps only 70 Seated Liberty dimes were struck in proof format, and examples are rare in all grades today. The present coin displays vivid violet and gold toning, over reflective fields and sharply detailed devices.

*From The ALG Collection. (#4746)*

### 1858 Seated Dime, PR65 Sharp Strike, Vivid Toning

- 3514 1858 PR65 NGC.** Proof coins were offered commercially for the first time in 1858, and the number minted is the subject of some debate. Brian Greer quotes Walter Breen's estimate of 80 pieces, while the 2011 *Guide Book* lists the mintage as 300+. Whatever the original mintage, Gem proof specimens are definitely rare today. This piece sports dappled green and violet patina on the obverse, while the reverse shows green fields and ice-blue devices. All devices are sharply detailed. Census: 17 in 65, 10 finer (9/10). (#4747)

### PR67 Cameo 1860 Dime Only Two Cameo Pieces Certified Finer

- 3515 1860 PR67 Cameo NGC.** The 1860 Seated Liberty dime is prized by type collectors as the first year of a new design, with UNITED STATES OF AMERICA on the obverse. A substantial proof mintage of 1,000 pieces was accomplished, but many examples went unsold. The present coin is a magnificent Superb Gem, with brilliant reflective fields and frosty, sharply detailed devices. Census: 3 in 67 Cameo, 2 finer (9/10). (#84753)

- 3516 1862 PR64 PCGS.** The obverse is lightly toned aside from a right-side arc of deep green-gray. The reverse has various dusky shades of golden-tan and apple-green. A mere 550 proofs were coined for this Civil War date. Encased in a first generation holder. Population: 31 in 64, 5 finer (9/10).

*Ex: ALG Collection of Proof Dimes (Heritage, 6/2010), lot 560, which realized \$2,070. (#4755)*

- 3517 1863 PR64 Cameo PCGS. CAC.** A low mintage of just 460 proof Seated Liberty dimes was achieved in 1863, at the height of the Civil War. The present coin is a Choice example, with Cameo contrast between the mirrored fields and the frosty, sharply detailed devices. Population: 11 in 64 Cameo, 11 finer (9/10). (#84756)

- 3518 1863 PR65 Cameo NGC.** A gold-kissed Cameo Gem specimen from an important low-mintage Civil War issue. Fantastic mirrors and frost, a wonderful proof. Census: 11 in 65 Cameo, 3 finer (9/10). (#84756)

### Stunning 1864 Seated Dime, PR66 Ultra Cameo

- 3519 1864 PR66 Ultra Cameo NGC.** The rarity of 1864 business strike dimes means that incredible proof examples are in high demand. This Premium Gem Ultra Cameo proof is fully brilliant with no evidence of toning on either side. The fields are deeply mirrored with highly lustrous and frosty devices. Census: 1 in 66 Ultra Cameo, 2 finer (9/10). (#94757)

- 3520 1869 PR65 Cameo NGC.** Lush rose-red, sea-green, and apricot-gold toning graces most of this imposing Gem, although a window of brilliance remains across the denomination. Of the 600 proofs issued, it is doubtful that more than a few can match the eye appeal of the present piece. Census: 4 in 65 Cameo, 11 finer (9/10). (#84762)

### 1871 Seated Liberty Dime, PR66 Cameo Among the Finest Certified Cameo Examples

- 3521 1871 PR66 Cameo NGC.** Only 960 proof Seated Liberty dimes were struck in 1871, and few survivors can match the quality of this magnificent Premium Gem example. The surfaces of this sharply detailed specimen display lovely, iridescent, violet and green patina. The fields are deeply reflective under the toning, and contrast boldly with the frosty devices. Only four coins have been certified in PR66 Cameo by NGC and PCGS combined, with none finer in the designation (9/10). (#84764)

- 3522 1877 PR65 Cameo NGC. CAC.** Only 490 proof Seated Liberty dimes were struck in 1877, and examples in Gem condition with Cameo contrast are extremely rare. The present coin features sharply detailed, frosty devices with deeply mirrored fields, under lovely green and lavender patina. Census: 1 in 65 Cameo, 5 finer (9/10).(#84774)

**1877 Seated Liberty Dime, PR64 Ultra Cameo  
Single Finest Certified in Ultra Cameo**

- 3523 1877 PR64 Ultra Cameo NGC.** Only 490 proof Seated Liberty dimes were struck in 1877, making the date scarce-to-rare in all grades today. The present example is a coin of surpassing quality, with deeply reflective fields and sharply defined, frosty devices. Examples in PR64 Ultra Cameo are extremely rare. Currently, NGC has certified only this coin in PR64 Ultra Cameo, with none finer, while PCGS has graded no coins in this exalted grade, also with none finer (9/10). (#94774)

- 3524 1879 PR66 NGC.** Considerable unnoted cameo contrast appears on each side of this silver-white Premium Gem. Whispers of gold appear at the rims, and surface imperfections are minor. An appealing example for those who prefer untuned coins. Census: 21 in 66, 14 finer (9/10).(#4776)

**Desirable 1880 Seated Dime, PR66 ★ Cameo**

- 3525 1880 PR66 ★ Cameo NGC.** A sparkling Premium Gem Cameo proof with exceptional contrast on both sides, this coin is partly brilliant with violet and blue toning along the right side, more vibrant on the obverse. This piece carried the highly desired Star designation from NGC. Census: 1 in 66 ★ Cameo, 3 finer ★ graded (9/10). (#84777)

- 3526 1881 PR64 Cameo PCGS. CAC.** Frosty motifs rise above the darkly mirrored fields of this nicely struck and essentially untuned Choice proof. The last of the low mintage dates following the advent of the Morgan dollar. Population: 15 in 64 Cameo, 16 finer (9/10).(#84778)

- 3527 1881 PR65 Cameo PCGS. CAC.** A stunning Gem Cameo proof, this piece is fully and highly brilliant with lustrous devices and fully mirrored fields. Population: 5 in 65 Cameo, 11 finer (9/10). (#84778)

- 3528 1881 PR66 Cameo NGC.** A brilliant and boldly struck high grade specimen whose white devices favorably compare with the glassy fields. The 1881 proof mintage was limited to 975 pieces. (#84778)

- 3529 1884 PR65 ★ Cameo NGC.** Plum-red, apple-green, straw-gold adorn the right margins of this flashy Gem, which features icy devices and darkly reflective fields. Nicely struck with imposing eye appeal. Just 875 proofs were issued. Census: 3 in 65 ★ Cameo, 1 finer with a Star designation (9/10).(#84781)

- 3530 1884 PR66 Cameo NGC.** Delicate gold-green rim accents give way to faintly toned silver in the moderately contrasted cores. A carefully preserved and charming Cameo Premium Gem specimen. Census: 11 in 66 Cameo, 15 finer (9/10).(#84781)

- 3531 1887 PR66 PCGS.** Subtle blue and milky toning drapes both sides of this Premium Gem. The strike is razor-sharp, and there are only a few pin-sized contact marks. Housed in a green-label PCGS holder. Population: 8 in 66, 1 finer (9/10).(#4784)

- 3532 1887 PR66 NGC.** Considerable unacknowledged cameo contrast is evident on either side. This splendid silver-white Premium Gem proof has only a hint of peripheral gold toning, and the eye appeal is pleasing. (#4784)

- 3533 1890 PR64 Cameo PCGS. CAC.** Violet and red-orange patina around the rims encircles the brilliant centers of this near-Gem. The powerfully reflective fields contrast sharply against the frosted devices. A few light hairlines are barely visible without magnification. One of only 590 proofs issued. Population: 10 in 64 Cameo, 16 finer (9/10).(#84787)

## BARBER DIMES

- 3534 1892-O MS65 NGC.** Dappled golden-brown, stone-gray, and rose-red patina invigorates this nicely struck Gem. Mark-free and satiny with exemplary eye appeal. Clashed near the profile, as made. Census: 12 in 65, 2 finer (9/10).(#4797)

- 3535 1893/2 AU58 PCGS. Breen-3479.** A prominent horizontal line within the lower loop of the 3 indicates the little-seen overdate. In his 1988 *Encyclopedia*, Walter Breen takes credit for discovering the variety in 1961. The variety is priced in the 2011 *Guide Book*. This is a lustrous, lightly toned, and smooth example that is kept from Mint State only by a whisper of rub on the cheek. Population: 6 in 58, 19 finer (9/10).(#4799)

- 3536 1895-O VF20 PCGS.** Light silver-gray on the devices with deeper slate shadings in the fields. An appealing Very Fine representative of this low-mintage Barber dime issue, the key date of the series aside from the essentially uncollectible 1894-S. Ex: *Long Beach Signature* (Heritage, 5/2009), lot 461, which realized \$1,762.95. (#4807)

- 3537 1895-O—Whizzed—NGC Details. AU.** Strongly struck with only minor wear. The surfaces are microporous with uniformly satin luster, a sure sign of whizzing. Retoned green-gray and cerulean over the obverse and in a crescent at the lower reverse. (#4807)

## Lustrous 1897-O Barber Dime, MS66

- 3538 1897-O MS66 PCGS.** The 1897-O is a low mintage New Orleans issue, and most survivors are in VG or lesser grade. However, the present lot is a thoroughly lustrous Premium Gem. Brilliant save for a blush of russet on the cheekbone. Certified in a green label holder. Population: 8 in 66, 4 finer (9/10). (#4813)

- 3539 1899 MS66 NGC.** This fully struck Premium Gem has dynamic luster and only a hint of golden toning. Several spindly radial die cracks provide further numismatic interest. Census: 6 in 66, 2 finer (9/10).(#4818)

- 3540 1904-S MS62 PCGS.** A full strike and exemplary luster combine with clean surfaces and delicate tan toning to proclaim the originality and quality. A better date due to a low emission of 800,000 pieces. Population: 11 in 62, 48 finer (9/10). (#4834)

**Premium Gem 1905-S Barber Dime  
Conditionally Rare Issue**

- 3541 1905-S MS66 PCGS.** The 1905-S Barber dime is an available date, extremely popular with mintmark type collectors. The present coin is an impressive Premium Gem, with a sharp strike, and attractive gold and blue patina. Strong mint luster shines through the toning. Housed in a green label holder. Population: 9 in 66, 3 finer (9/10). (#4837)

- 3542 1909-D MS64 NGC.** The 1909-D is a lesser-known low-mintage Barber issue, produced to the extent of 954,000 coins. The rich color comprises deep amber-gold and orange. Fully struck and essentially devoid of contact. Census: 23 in 64, 14 finer (9/10). (#4851)

**PROOF BARBER DIMES**

- 3543 1894 PR65 PCGS Secure. CAC.** Dusky chestnut-gold, sea-green, and lilac patina embraces this precisely struck and satiny Gem. A scant 972 proofs were issued, and most survivors are in lesser grade. (#4878)
- 3544 1894 PR65 NGC.** The aquamarine centers are encompassed by apricot borders. A fully struck and satiny Gem with only a single perceptible hair-thin mark beneath the M in DIME. (#4878)
- 3545 1894 PR65 Cameo NGC.** Sun-gold and cherry-red adorn the peripheries of this needle-sharp and undisturbed Gem. The devices exhibit moderate frost. One of only 972 proofs produced. Census: 6 in 65 Cameo, 27 finer (9/10). (#84878)
- 3546 1898 PR65 Cameo PCGS Secure. CAC.** Delicate caramel-gold and steel-gray visit this flashy and fully struck Gem. Icy devices contrast with glassy fields. The surfaces appear flawless aside from a solitary pinpoint speck on the jaw. Population: 11 in 65 Cameo, 25 finer (9/10). (#84882)
- 3547 1899 PR66 NGC.** Exquisite fire-red, sun-gold, and apple-green dominate this flashy and needle-sharp Premium Gem. Only 846 proofs were coined, and few survivors can match the colorful toning of the present lot. Census: 30 in 66, 28 finer (9/10). (#4883)
- 3548 1899 PR65 Cameo NGC. CAC.** Liquid gold and orange border toning gives way to gleaming silver at the centers. Boldly contrasted with impressive frost, particularly on the obverse. Census: 4 in 65 Cameo, 19 finer (9/10). (#84883)
- 3549 1904 PR65 PCGS.** The attractive surfaces reveal sea-green and gold colors when rotated under a light. The surfaces are pleasing, with a lengthy curved lintmark (as struck) through ED in UNITED. Just 670 proofs were struck. Housed in a green label holder. Population: 27 in 65, 28 finer (9/10). (#4888)

**1911 Barber Dime, PR67 Cameo  
Rare Low-Mintage Issue**

- 3550 1911 PR67 Cameo PCGS.** The deeply frosted portrait obviously exceeds the standards for a Cameo designation, although the contrast is somewhat concealed beneath a palette of original gold, plum, and ocean-blue colors. The reverse is essentially brilliant. A razor-sharp and gloriously preserved specimen. A scant 656 pieces were struck. Population: 3 in 67 Cameo, 1 finer (9/10). (#84895)  
*Ex: Baxi Collection, Part of the PCGS Registry's Award Winning 1911 Proof Set.*

**TWENTY CENT PIECES**

- 3551 1875-CC Genuine PCGS.** The sole collectible Carson City issue of the series. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. Evidence of actual circulation wear is elusive, but the luster is diminished by a past dip and the obverse displays faint hairlines. (#5297)
- 3552 1875-CC AU58 PCGS.** This momentarily circulated Carson City type coin has peripheral russet and cobalt-blue toning. Luster beckons from both sides, but the highpoints show a hint of rub. No marks are readily evident. Encapsulated in an old green label holder. (#5297)
- 3553 1875-S MS63 PCGS.** Deep blue, violet, and russet toning surrounds the golden centers. There are traces of weakness on the stars, head, and eagle, but the surfaces are remarkably clean with only a couple of insignificant marks. A charming type coin. (#5298)
- 3554 1875-S MS63 PCGS. MPD-002.** The most prominent misplaced date variety of the briefly issued series, with the arc of an 8 emerging from the dentils just past 6 o'clock. The variety is also interesting for its unusually heavy clashmark near the raised elbow. No marks are evident, but the luster is subdued by rich cream-gray toning. Certified in a first generation holder. (#5298)

**Lovely Gem 1875-S Twenty Cent**

- 3555 1875-S MS65 NGC.** The most popular type issue in the twenty cent series, unsurprising since the date's mintage of over 1.1 million pieces is well over five times that of the rest of the series combined. Still, there are not enough high-end Mint State examples to go around, particularly in Gem and better. This lustrous example, housed in a prior-generation holder, has patches of blue peripheral toning around ivory-cream centers. NGC has graded 62 numerically finer examples (9/10). (#5298)

---

### Notable Gem 1875-S Twenty Cent

- 3556 1875-S MS65 NGC.** An impressively lustrous Gem example of the signature twenty cent type issue. Strong blue, peach, and lavender border toning gives way to nearly pure silver color in the shining centers. Great eye appeal in every respect. NGC has certified 58 numerically finer examples (9/10). (#5298)

---

### 1875-S Twenty Cent Piece, MS66 A Lightly Toned, Problem-Free Type Coin

- 3557 1875-S MS66 PCGS.** Medium almond-gray toning adorns this lustrous and crisply struck type coin. The fields display only faint abrasions, and the eye appeal and originality are undeniable. The twenty cent piece was coined for circulation only in 1875 and 1876, since it was readily confused with the more familiar quarter dollar. Population: 51 in 66, 5 finer (9/10). (#5298)

---

## EARLY QUARTERS

---

### 1796 Draped Bust Quarter, Good Details, B-1

- 3558 1796—Obverse Improperly Cleaned—NGC Details. Good. B-1, R.4.** Only 6,146 Draped Bust quarters were struck in 1796, the first date the denomination was minted. Two die varieties are known for the date, with this example representing the scarcer B-1 variety, with a low 6 in the date. The present coin is a well worn specimen, especially on the reverse, but the date and all lettering remain legible. Most major design features are still discernible, but the wreath is worn nearly flat on the left side.

---

### Fine Details B-2 1796 Quarter

- 3559 1796—Reverse Scratched—NGC Details. Fine. B-2, R.3.** The 1796 is perhaps the most famous of all one-year types, with the 1907 High Relief double eagle and the 1909 VDB cents as its only serious rivals. The two die pairs of the 1796 quarter are each scarce in an absolute sense, and supply is far smaller than demand. Though assigned a details grade, this example displays well. Aside from a dig under Liberty's chin, the obverse is smooth, draped in gold, rose, and gray patina. Similar colors appear on the reverse, and while that side has two unfortunate rim-to-rim scratches that intersect on the eagle, this is a coin that should attract the attention of numerous collectors.  
*From The Diotte Collection. (#5310)*

**1796 Draped Bust Quarter, B-2, Fine Details  
First Year of Denomination**

- 3560 1796—Rim Filing, Cleaned—NGC Details. Fine. B-2, R.3.** The 1796 Draped Bust, Small Eagle quarter is a low-mintage date, with a production figure of just 6,146 pieces. The quarter denomination was not coined prior to 1796, and it would not be needed again until 1804, by which time the reverse design had been changed to the Heraldic Eagle motif. As a result, the 1796 quarter is a one-year type coin, prized by type collectors as well as series enthusiasts. The more available B-2 variety is characterized by the high 6 in the date.

The present coin shows significant, even wear over all surfaces, but the major design elements are clearly outlined, with some interior detail remaining, and all lettering is legible. The faults listed on the holder are unobtrusive, making this coin an appropriate choice for most collectors.

**1804 Quarter, B-1, VG Details  
Beautifully Toned**

- 3561 1804—Obverse Scratched—NGC Details. VG. B-1, High R.3.** The NGC caveat pertains to a number of long obverse scrapes that someone inflicted long ago: one between LI, one though I, one through the upper hair, and a long one from T in LIBERTY down through Liberty's nose and chin. Those ancient indignities now blend well with their surroundings, which include beautiful deep pinkish-gray and blue-green patina on both sides. Much of the deep detail remains with only the tops of MERICA faint; this one-year type may fit nicely into the set of many collectors on a budget.  
*Ex: Douglas Weaver Rare Coins.*

**1805 Draped Bust Quarter, B-3, XF40**

- 3562 1805 XF40 PCGS. B-3, R.1.** The quarter denomination saw its first large-scale production in 1805, with a mintage of 121,394 pieces. Five die varieties are known for the date, with the present coin representing the most available B-3 variety, identified by the 5 in the date not touching the bust and the branch stem connected to the C in the denomination. Only light wear shows on the design elements of this example, and significant mint luster is evident on the silver-gray surfaces. Housed in a green label holder. Population: 27 in 40, 80 finer (9/10).  
*From The Diotte Collection. (#5313)*

- 3563 1806 Fine 12 PCGS. B-6, R.5.** Unlike B-3 or B-9, B-6 is a rare Browning marriage. This dusky steel-gray and russet representative has a few faded thin marks near the olive branch but is otherwise surprisingly unabraded. The tail feathers and shoulder curls retain ample design detail.  
*From The Classic Collection. (#5314)*

- 3564 1806 Fine 15 PCGS. B-10, R.5.** Early state of this rare die pair without die crumbling or major cracks. Well-worn but fully outlined with green and gold accents against blue-gray surfaces.  
*From The Classic Collection. (#5314)*

- 3565 1807—Whizzed—NGC Details. XF. B-1, R.2.** The reverse exhibits pronounced clash marks, especially around the clouds. The surfaces have an unnatural pale gray complexion with some bright yellow and blue accents. The details are bold save for the dentils, which are always seen missing or softly defined. There are no mentionable marks on either side. (#5316)

## BUST QUARTERS

- 3566 1818 VF35 PCGS. B-2, R.1.** The most distinctive obverse diagnostic is repunching on star 13. Faint glimmers of luster visit the fields on this Choice VF coin, toned dove-gray and gold in the fields with pale pearl elements at the worn high points. (#5322)
- 3567 1818 XF45 NGC. B-10, R.3.** A spine from the inner point of star 2 and a vertical die crack through the 2 in 25 C combine to attribute this partly lustrous Choice XF half. The dusky gray toning deepens to mauve near the rims. No marks are consequential. (#5322)
- 3568 1818 AU53 NGC. B-8, R.3.** A small die scratch into the field from star 2 identifies the obverse, and on the reverse the 2 in 25 has a nearly flat base. Violet toning visits the margins, while the centers are light-to-medium gray. Traces of luster enhance the eye appeal. There are no marks of any significance. (#5322)

### Important MS63+ 1819 Quarter Small 9, Browning-3

- 3569 1819 Small 9 MS63+ PCGS. B-3, R.1.** Honey-gold toning fills the borders of this laudable and lustrous Capped Bust quarter. The strike is bold, even on the claws, curls, and star centers. Evaluation beneath a loupe cannot locate any noticeable marks, and the eye appeal is imposing. B-3 is the most familiar of the four 1819 varieties, but better Mint State pieces are highly elusive. (#5325)

- 3570 1819 Large 9—Improperly Cleaned—NGC Details. XF. B-2, R.3.** Tompkins Die State 4/2, the latest die state observed by the author. This is the more available of the two Large 9 varieties for the year. Traces of lighter toning accent the mostly battleship-gray patina that covers both sides. Peppered abrasions are consistent with the grade. *From The Diotte Collection.* (#5326)

- 3571 1819 Large 9—Whizzed—NGC Details. XF. B-1, Low R.5.** The 9 in the date is significantly larger than the other digits. This is a very scarce variety that is typically encountered in grades below XF. The present coin has deep red-yellow coloration with some darker purple areas on the reverse. A well defined specimen with no marks of any significance. (#5326)

- 3572 1819 Large 9 AU53 NGC. B-2, R.3.** A low D in UNITED aids attribution. A deeply toned golden-brown and gunmetal-blue example with few marks and only moderate highpoint wear. The obverse has slender peripheral die cracks. (#5326)

- 3573 1825/4/3—Improperly Cleaned—NGC Details. Unc. B-2, R.2.** A nearly fully struck example with lightly abraded but lackluster almond-gold and stone-gray surfaces. B-2 and B-3 share the same obverse die, and the underdigit has been variously described as 1825/3, 1825/4, and 1825/4/3 in recent years.

- 3574 1828 AU50 PCGS. B-1, R.1.** The available B-1 variety, with star 1 close to the bust and the scroll beginning under D in UNITED. The present coin shows only slight traces of circulation, and the pleasing surfaces display enchanting blue, green, and gold patina. (#5342)

- 3575 1831 Small Letters AU53 PCGS. B-3, R.5.** Dark dove-gray toning encompasses this well detailed and only lightly abraded Bust quarter. B-3 is the rarest of the four 1831 Small Letters Browning varieties, and most survivors are in well-worn grades. *From The Classic Collection.* (#5348)

- 3576 1837 VF35 PCGS. CAC. B-5, R.5.** This elusive Browning variety is identified by the widely spaced TAT in STATES and AME in AMERICA. Golden-brown and plum-mauve toning drapes the minimally abraded and slightly glossy surfaces. (#5356)

- 3577 1838 AU58 PCGS. CAC. B-1, R.1.** Sole Capped Bust die pair for the year. This near-Mint example is well struck in the centers, if less so at the margins, and softly lustrous under rich rose, gold, and gray toning. A lovely coin with eye appeal in spades. Population: 11 in 58, 45 finer (9/10). (#5357)

## SEATED QUARTERS

### 1847 Seated Quarter, MS64 Rich, Original Toning

- 3578 1847 MS64 NGC.** Both this date and the 1843 comprise the lion's share of Uncirculated quarters from the 1840s. On this deeply toned near-Gem, soft luster is complemented by a full strike. Semiprooflike flash illuminates mottled tones of blue, pink, auburn, and rose when the coin is tilted in the light. Devoid of any distracting abrasions or blemishes, this coin is a benchmark for what a toned, original 1847 quarter ought to look like. Census: 13 in 64, 3 finer (8/10). (#5410)

### 1852-O Quarter, VF35, Briggs 1-B With Original Surfaces

- 3579 1852-O VF35 PCGS. CAC. Briggs 1-B.** The mintage was only 96,000 pieces for the 1852-O quarter and it is exceptionally challenging to locate in any grade above VF. This piece shows better-than-average details, certainly in line with the stated grade. The large O mintmark, high and slightly left of the center of crotch, and horizontal shield lines extending to the second shield line on the left, identify the Briggs B reverse. The surfaces are original with deeper, almost charcoal-gray patina in the fields and recesses with lighter gray accents over the high points. Uncleaned, and notable as such, the surfaces are problem-free for the grade. Population: 3 in 35, 16 finer (9/10). (#5420)

- 3580 1853/4 Arrows and Rays AU55 NGC. FS-1301.** A Choice AU example of the "backwards overdate," lightly worn but with ample remaining luster beneath pale green-gold and gray toning. Minimally abraded and a real delight. Census: 4 in 55, 15 finer (9/10). (#5427)

**1854 Arrows Quarter, MS65  
Seldom Located in Gem Condition**

- 3581 1854 Arrows MS65 NGC.** The 1854 Arrows quarter can be located in most grade levels, as might be expected from its generous 12.3 million mintage. The NGC/PCGS population declines significantly from MS64 to MS65, the condition of the present offering. A subtle blend of low to medium intensity blue, gray, lavender, gold, and crimson toning covers lustrous surfaces that exhibit well struck design features. Some unobtrusive marks concealed within the toning are not worthy of individual mention. Spindly peripheral die cracks are visible on both sides. Census: 17 in 65, 6 finer (9/10). (#5432)

**Pleasing Gem 1854 Arrows Quarter**

- 3582 1854 Arrows MS65 PCGS.** Delicate almond-gold toning graces this decisively struck and beautifully preserved Gem. Moderately clashed within the eagle's shield, as often seen for the series. The No Motto, Arrows, No Rays design type was coined only in 1854 and 1855. Encased in a green label holder. Population: 10 in 65, 11 finer (9/10). (#5432)

**1854-O Huge O Quarter, FS-501  
XF40, Original Surfaces**

- 3583 1854-O Huge O XF40 NGC. FS-501.** The large, irregular mintmark was obviously hand cut into the die. We cannot think of another comparable issue in U.S. numismatics, thus accounting for the popularity of the Huge O. The surfaces are original with deep, almost charcoal color in the fields and recesses with brilliantish accents over the high points of the devices. *From The Diotte Collection.* (#5434)

**1857 Seated Liberty Quarter, MS65 Prooflike  
Sole Example Certified by NGC**

- 3584 1857 MS65 Prooflike NGC.** The 1857 Seated Liberty quarter was produced in large numbers, but high-quality examples in Gem condition are elusive today. The present piece is the first and only 1857 certified as Prooflike by NGC (9/10). Brilliant, fully struck, and flashy, the present coin might be mistaken for a proof. Nonetheless, this specimen is from business strike dies, since the date location differs from past Heritage auction appearances of the rare proof 1857. (#5442)

**Low-Availability 1860-S Quarter, Fine 15  
Problem-Free for the Grade**

- 3585 1860-S Fine 15 PCGS. CAC.** As an issue the 1860-S has two problems: finding one in any grade, and finding one that is problem-free for the grade. Even though 56,000 pieces were struck, hard-money Westerners heavily circulated this issue. Collectors and non-collectors who did manage to snag an example of the 1860-S all too often cleaned or otherwise abused their coins. This piece saw many years of circulation, but there no signs of cleaning. The surfaces display medium to dark gray patina. The striking details are remarkably even for the issue, notable because most examples show unevenly impressed devices (actually unevenly impressed devices into the die). (#5453)

- 3586 1861 MS63 PCGS.** Type Two Obverse and Reverse. A blush of tan-gold crosses the reverse of this otherwise untuned Select Seated quarter. A lustrous and pleasing representative of an eventful year in American history. (#5454)

- 3587 1861-S VF25 PCGS. CAC.** With a mintage of only 96,000 coins the 1861-S quarter is a scarce issue in the Seated series. This delightful example has pleasing surfaces with deep gray-brown toning on both sides. (#5455)

---

### Elusive 1867 Seated Quarter, MS63

- 3588 1867 MS63 PCGS.** The mintage of 20,000 business strike 1867 quarters was hardly sufficient to ensure a supply of Mint State coins today. In fact, the combined PCGS and NGC population of this date is six coins graded MS63, with only three finer pieces. The advanced Seated quarter specialist needs no introduction to the importance of this offering. This beauty is sharply detailed and fully brilliant with reflective fields and frosty devices. Faint cameo contrast is evident, with few blemishes on either side. Population: 4 in 63, 2 finer (9/10). (#5470)

- 3589 1868-S XF45 NGC.** Traces of purple and deep red visit the mostly light gray surfaces. The design elements are well defined and there are no significant abrasions. A nice "Motto Above Eagle" type coin from the San Francisco Mint. (#5473)

- 3590 1871-CC—Mount Removed—ANACS. AG3 Details.** Predominantly cream-gray with a few dark gray spots. The reverse is blurry and displays solder remnants at 6 o'clock. The date is bold and both C's in the mintmark are evident on this collectible early Carson City Mint rarity. The mintage of the 1871-CC quarter was 10,890 pieces, but aside from the Eliasberg, Norweb, and James Stack examples, all went into circulation where they received no numismatic consideration. (#5479)

- 3591 1877-CC MS64 PCGS.** Softly lustrous on the obverse with greater intensity on the reverse. Both sides display dappled toning, silver-gray at the base with rich golds, greens, and blues. (#5505)

---

### Appealing 1879 Seated Quarter, MS66

- 3592 1879 MS66 NGC.** Type Two Reverse. While NGC has not certified this piece Prooflike, it shows moderate cameo contrast between the decidedly prooflike fields and frosted devices. The strike is bold, with only slight weakness on several stars. Satiny luster is barely affected by a few light grazes. A tiny nick is noted between the O and D of GOD. This brilliant and appealing example is one of just 13,600 pieces minted. Census: 34 in 66, 31 finer (9/10). (#5511)

---

### Premium Gem 1890 Seated Quarter Scarce Date in MS66

- 3593 1890 MS66 NGC.** A relatively small mintage of 80,000 quarters was achieved at the Philadelphia Mint in 1890, making the date fairly scarce in today's market. At the Premium Gem level, the date is very scarce. The present coin is a delightful specimen, with light gray and lavender toning. As seen on almost all specimens of this date, there is a little softness evident on Liberty's head and the obverse stars. Census: 26 in 66, 27 finer (9/10). (#5523)

---

## PROOF SEATED QUARTERS

---

### Seldom-Seen PR64 Cameo 1857 Quarter

- 3594 1857 PR64 Cameo PCGS. CAC.** The 1857 quarter is rarely found in proof format with only 15-20 examples believed known. As a Cameo coin, it is even rarer with only two pieces graded by both services. Both examples are PR64 Cameo PCGS pieces. This is an exceptionally attractive, deeply mirrored striking that exhibits strong contrast between the fields and devices. Most of each side presents as brilliant, but there is just a hint of pale rose toning present when closely examined. A few light hairlines prevent an even higher designation. (#85553)

- 3595 1871 PR64 PCGS.** This Choice proof features light gray surfaces with splashes of iridescence, primarily near the borders. The devices are bold and light contrast is visible beneath the toning. Population: 30 in 64, 15 finer (9/10). (#5570)

### Lovely 1874 Arrows Quarter, PR66

**3596 1874 Arrows PR66 NGC.** A gorgeous Premium Gem representative of the two year With Arrows type struck in 1873 and 1874, this specimen exhibits deep gold, lilac, and blue toning on both sides. Deeply mirrored fields frame the sharp and lustrous design motifs on both sides. Census: 25 in 66, 7 finer (9/10). (#5575)

**3597 1875 PR64 PCGS.** Light skiffs of gold and cloud-white toning cross gleaming silver surfaces. Mildly contrasted on each side with scattered hairlines in the fields. Population: 34 in 64, 10 finer (9/10). (#5576)

**3598 1879 PR64 PCGS.** Type Two Reverse. This desirable Choice proof has moderate blue and lilac toning on the obverse with deep violet and steel-blue toning on the reverse. A splendid example for a 19th century type set. (#5580)

**3599 1881 PR65 NGC.** Gold, rose, and violet hues mingle with the prominent gray shadings on this Gem proof. Attractively detailed and carefully preserved under the toning with hints of past contrast. Census: 37 in 65, 51 finer (9/10). (#5582)

### 1881 Quarter, PR67 Vivid Toning, Tremendous Eye Appeal

**3600 1881 PR67 PCGS. CAC.** The 1881 proof Seated Liberty quarter enjoyed a substantial mintage of 975 pieces, but the date is not easily located in Superb Gem condition. The coin offered here is a spectacular Superb Gem, with lovely dark green and violet patina over deeply mirrored fields. The design elements are sharply detailed and eye appeal is tremendous. Population: 8 in 67, 0 finer (9/10). (#5582)

**3601 1882 PR65 NGC.** Faint gold-green and blue tinges appear mostly at the margins. This is a tantalizing Gem specimen with bold detail and considerable contrast for a coin not rated as Cameo. Census: 42 in 65, 53 finer (9/10). (#5583)

### Beautiful PR66 1882 Quarter

**3602 1882 PR66 PCGS.** Cherry-red, sun-gold, and aquamarine embrace this flashy and fully struck Premium Gem. The devices show moderate frost beneath the colorful toning. A low mintage date due to ongoing heavy Morgan dollar coinage. Certified in an old green label holder. Population: 15 in 66, 9 finer (9/10). (#5583)

**3603 1883 PR64 PCGS. CAC.** Faint lemon toning visits this precisely struck and undisturbed Choice proof. Cameo contrast is evident, although this feature is unmentioned on the PCGS insert. A popular low mintage date. (#5584)

**3604 1884 PR66 NGC.** The golden-brown obverse field is framed by emerald-green and cherry-red. The reverse border exhibits ocean-blue and plum-lilac. A high grade and needle-sharp specimen of this low mintage date. Census: 39 in 66, 18 finer (9/10). (#5585)

### 1884 Seated Quarter, PR66 Spectacular Toning

**3605 1884 PR66 PCGS.** Only 8,000 business-strike Seated Liberty quarters were minted in 1884, putting intense pressure on the small proof mintage of 875 pieces. The present coin is a spectacular Premium Gem, deeply toned in iridescent shades of green and violet. The strike is sharp, but the reverse die was incomplete in a few areas, resulting in a lack of detail in the eagle's feathers below the shield. Population: 18 in 66, 6 finer (9/10). (#5585)

### Superb Gem Proof 1891 Quarter Only One Certified Finer at PCGS

**3606 1891 PR67 PCGS.** The obverse surfaces of this magnificent Superb Gem Seated Liberty quarter are deeply toned in shades of blue and green, while the reverse displays a much lighter lavender and gold patina. The fields are brightly reflective, under the toning. The strike is sharper than usually seen on the 1891, which often lacks detail because the dies were excessively polished or too widely spaced. Only 600 proofs were minted, and PR67 survivors are very rare. Population: 5 in 67, 1 finer (9/10). (#5592)

---

**Rare Cameo PR66 1891 Quarter  
With Interesting Strike**

- 3607 1891 PR66 Cameo NGC.** Only 600 proof Seated Liberty quarters were struck in 1891, and survivors in Premium Gem condition, with the Cameo designation, are quite rare. The reverse die had been used to strike proofs in 1890, and the dies seem to have been improperly spaced in the press, resulting in incomplete detail in many areas. The present coin does exhibit profound field-device contrast, but the devices lack detail in many areas (star centers, motto, arrow fletchings, hair, etc.). The fields are brightly reflective and brilliant. An interesting example for students of the minting process, as well as series specialists. Census: 23 in 66 Cameo, 10 finer (9/10). (#85592)
- 

**BARBER QUARTERS**

- 3608 1892 MS65 PCGS.** Type One Reverse. Booming luster sweeps this intricately struck Gem. Faint golden-gray toning denies full brilliance. Exquisitely preserved, and an exemplary silver type coin. (#5601)
- 

**Beautiful Gem 1895-O Quarter**

- 3609 1895-O MS65 PCGS.** The crossbar of the 5 is repunched north. A lustrous and nearly brilliant Gem with exceptionally clean surfaces. Well struck for the New Orleans Mint, with the fletchings and right shield corner crisp. Struck from prominently clashed dies. Population: 6 in 65, 4 finer (9/10). (#5611)
- 

---

**1896-S Barber Quarter, MS62  
Key Low-Mintage Issue**

- 3610 1896-S MS62 PCGS.** The 1896-S Barber quarter is a low-mintage, key date, with a production total of just 188,039 pieces. The issue is scarce in grades above XF and Mint State coins are nothing short of rare. This date is much more difficult to locate in Mint State grades than the vaunted 1913-S.

The present coin is a delightful MS62 specimen, with a razor-sharp strike, and lustrous, brilliant surfaces. Eye appeal is outstanding, and we expect spirited competition from series enthusiasts when this lot is called. A few minor abrasions and luster grazes in the obverse field explain the grade. Population: 3 in 62, 27 finer (9/10). (#5615)

---

---

### Famous 1901-S Quarter, AG3

- 3611 1901-S AG3 ANACS.** Regardless of grade, the 1901-S quarter is avidly pursued, and the collector seeking a well-worn but pleasing specimen would do well to check out this About Good example. Pearl to green-gray toning covers most of each side, though patches of deep blue are present near the rims, and while several digs are noted on the obverse, the reverse is comparatively clean. (#5630)

---

### 1901-S Barber Quarter, Good 4 Key Date

- 3612 1901-S Good 4 NGC.** From a low mintage of 72,664 pieces, the 1901-S Barber quarter also has a low survival rate, making the date the most sought-after issue of the series. The present coin is a worn, but serviceable example, with the major design elements still recognizable in outline, and some interior detail still intact. (#5630)

---

### Lightly Toned 1901-S Quarter, Good 6

- 3613 1901-S Good 6 PCGS. CAC.** One-and-a-half letters, a Y and a partial T in LIBERTY, reinforce the Good 6 grade granted this key-date 1901-S quarter. Golden-tinged overall with grays that range from pale pearl to the deeper dove-gray around the eagle's body. Wispy slide marks are noted on Liberty's portrait. (#5630)

---

### Popular 1901-S Barber Quarter, Very Good

- 3614 1901-S VG8 PCGS. CAC.** The key 1901-S Barber quarter is a rarity even in the certified Very Good grade of the present coin. While the average mid-sized coin show may yield a certified example or two, they are apt to be either in the Fair 2 or AG3 grades, with Good 4 and Good 6 pieces seldom seen. This VG8 example shows a couple of letters of LIBERTY readable, and the rims are full around both sides. Some of the deep detail is visible in Liberty's wreath and the eagle's wings, and most of E PLURIBUS UNUM is clear. The silver-gray surfaces show no singular distractions, and the CAC kicker should prove to be an added draw for potential bidders. A popular quarter issue that should spur considerable collector interest. (#5630)

---

### Rarely Encountered XF40 1901-S Quarter

- 3615 1901-S XF40 PCGS.** Even though the 1901-S has a mintage that is second-lowest in the series, it is the undisputed king of Barber quarters in terms of rarity and price in all grades. We have commented in the past—and it is especially relevant now—that the 1901-S seems to be more available at opposite ends of the grading spectrum, rather than seeing a gradient of diminishing numbers of coins as one moves from lower to higher grades. It almost seems as if more Uncirculated coins are available than midgrade pieces such as this one. Undoubtedly this is because VF-XF and AU coins are held in collections and are rarely for sale unless a collection is broken up. This attractive XF specimen has light gray patina in the fields and recesses, golden accents at the margins, and pale gray over the devices. (#5630)
- 

---

### Gem 1903-O Barber Quarter Underrated Issue

- 3616 1903-O MS65 PCGS. CAC.** David Lawrence considers the 1903-O Barber quarter an underrated date in the series, with an R.6 rating in MS64 and higher grades. The present coin is a sharply struck Gem, with dappled gray and green toning. Vibrant mint luster radiates through the toning. Population: 11 in 65, 5 finer (9/10). (#5635)
- 3617 1905 MS65+ PCGS. CAC.** Delicate almond-gold patina visits this precisely struck and unabraded Gem. Exemplary luster further confirms the quality. Close to 5 million quarters were struck at Philadelphia in 1905, but few among those persist today in comparable condition. Population: 1 in 65+, 12 finer (9/10). (#5639)
- 

---

### 1907-S Barber Quarter, MS65 In-Demand Condition Rarity

- 3618 1907-S MS65 NGC.** The 1907-S Barber quarter claims a fairly small mintage of 1.3 million pieces, and the date enjoys strong collector demand. The present coin is a rare Gem specimen, with bright mint luster and a sharp strike. The surfaces are graced by attractive shades of green and violet toning, especially on the reverse. Census: 8 in 65, 6 finer (9/10). (#5648)
- 3619 1909-D MS65 PCGS.** Softly struck on the talons but otherwise well-defined for this earlier Denver quarter issue. Soft silver luster with dappled golden-tan elements that grace the fields. Population: 33 in 65, 18 finer (9/10). (#5654)
-

---

### Colorful 1909-O Quarter, MS64

**3620 1909-O MS64 PCGS.** Impressively detailed for this final O-mint quarter issue, and both sides have beautiful luster that makes the colors blossom. Orange, yellow, and salmon outer toning gives way to blues and violets at the interiors, deeper on the obverse. Population: 19 in 64, 7 finer (9/10). (#5655)

**3621 1913-S Good 6 NGC.** The mintage of 40,000 pieces is the lowest of any 20th century business strike quarter. Pearl-gray devices are accompanied by light charcoal-gray fields. About half of E PLURIBUS UNUM is readable. All stars and peripheral legends are distinct from the rim.  
*From The Diotte Collection.*(#5666)

**3622 1916-D MS65+ PCGS. CAC.** A coin of excellent quality, even by Gem standards. Both sides are well struck, though the eagle's claws show a bit of the usual softness, and the silver fields show only occasional touches of greenish toning. A small scrape at Liberty's temple precludes an even finer designation.(#5674)

### PROOF BARBER QUARTERS

**3623 1892 PR64 Cameo PCGS. CAC.** Type Two Reverse. Beautiful golden-brown, jade-green, and ruby-red freckles fill the borders of this fully struck first year proof. Perfect aside from a few nearly imperceptible slide marks on the cheek. Population: 34 in 64 Cameo, 24 finer (9/10).(#85678)

**3624 1894 PR64 Cameo PCGS. CAC.** Exactly struck with thickly frosted devices that give this coin an almost Deep Cameo appearance. Liberty's portrait shows die polish lines as well as a diagonal mark that contributes to the grade. Population: 12 in 64 Cameo, 34 finer (9/10).(#85680)

**3625 1899 PR65 Cameo NGC. CAC.** Lightly gold-toned overall with a dot of blue-to-violet toning planted on the upper left obverse rim. A gleaming Cameo Gem that offers eye appeal in spades. Census: 3 in 65 Cameo, 25 finer (9/10).(#85685)

**3626 1904 PR63 NGC.** Mottled russet-brown iridescence identifies this nicely struck and unabraded Select specimen. Die polishing (as made) removes the upper portion of Liberty's neck. A mere 670 proofs were minted.(#5690)

**3627 1904 PR64 NGC.** Faint sun-gold toning denies full brilliance, but this boldly struck specimen has glassy fields, and each side displays a modest amount of cameo contrast. Only 670 proofs were coined.(#5690)

**3628 1904 PR64+ PCGS. CAC.** This fully struck specimen is untoned and appears pristine save for a faint slide mark on the cheek. Modest cameo contrast emerges when viewed from select angles. As of 9/10, the sole proof 1904 quarter with a Plus designation from PCGS.(#5690)

---

### Superb Gem Proof 1906 Barber Quarter Outstanding Visual Appeal

**3629 1906 PR67 NGC.** The proof mintage of Barber quarters was a mere 675 pieces in 1906, and Superb Gem examples are rare in today's market. The present coin is a spectacular PR67 specimen, with a full strike, and dazzling reflective fields. The surfaces are virtually flawless and brilliant, with the slightest hints of gold toning. Census: 26 in 67, 6 finer (9/10). (#5692)

---

### 1911 Quarter, PR67 Cameo Brilliant and Sharply Contrasted

**3630 1911 PR67 Cameo PCGS. CAC.** The deep mirrors and black and white contrast of this piece are reminiscent of some of the well-produced proof quarters from the late 1890s. However, the mintage of the 1911 is substantially below the quantity produced in those earlier years. The immaculate surfaces are free from distractions and are a testament to decades of careful preservation. (#85697)  
*Ex: Baxi Collection, Part of the PCGS Registry's Award Winning 1911 Proof Set.*

---

### PR66 1915 Barber Quarter

**3631 1915 PR66 PCGS. CAC.** Slender bands of golden-brown and navy-blue enrich the margins of this precisely struck and prominently mirrored Premium Gem. White-on-black contrast is noticeable when viewed from certain angles, but the quarter is undesignated as Cameo by PCGS. At 450 pieces, the 1915 has the second lowest proof mintage of the series. Population: 12 in 66, 8 finer (9/10). (#5701)

---

**Premium Gem Proof 1915 Barber Quarter  
Second-Lowest Mintage of the Series**

- 3632 1915 PR66 NGC.** The 1915 proof Barber quarter boasts the second-lowest mintage of the series, at 450 pieces. Proof coinage continued to be unpopular with collectors, and the program would be discontinued after the following year. Examples in Premium Gem condition are quite rare today. The present coin is a spectacular specimen, with deeply reflective, virtually pristine surfaces, and a razor-sharp strike. Census: 24 in 66, 19 finer (9/10). (#5701)

---

**EARLY HALF DOLLARS**

**1794 O-101 Half Dollar, VF Details**

- 3633 1794—Harshly Cleaned—NGC Details. VF. O-101, R.3.** The most plentiful 1794 half dollar variety is the O-101 die combination, ideal for date and type collectors. This piece has a hint of light gray toning at the borders with subtle champagne toning on both sides. Obviously cleaned but still attractive and desirable. (#6051)

- 3634 1795 2 Leaves—Obverse Scratched—NGC Details. AG Details. O-116, R.6.** A few pin scratches bookend the portrait, and patches of hairlines emerge when this Flowing Hair half is rotated beneath a light. Stars 3 to 7 are faint, as is TES OF. An opportunity to acquire an affordable example of a rare Overton marriage. (#6052)

- 3635 1795 2 Leaves VG8 PCGS. O-107, R.5.** The die crack near the T in UNITED is in its early stages. Ice-blue and cream-gray blend throughout this Flowing Hair half dollar. Smooth aside from a couple of thin marks near the profile. A few of the reverse peripheral letters are worn. (#6052)

- 3636 1795 2 Leaves—Improperly Cleaned—NGC Details. VG. O-110, R.4.** The charcoal-gray and pearl-white surfaces are slightly glossy, and a light vertical pin scratch is beneath Liberty's ear, but many collectors would treasure this silver type coin from Washington's tenure as President. Moderate mint-made adjustment marks are noted near LIBERTY and the right-side stars. (#6052)

- 3637 1795 2 Leaves—Improperly Cleaned—NGC Details. VG. O-125, High R.4.** Slate-gray overall with a whisper of gold toning near the rims and on the portrait. Hairlined and minutely granular, but no marks are consequential aside from a faint thin horizontal line above the ear. (#6052)

- 3638 1795 2 Leaves VG10 NGC. O-117, R.4.** Well-worn but attractive with rich coffee and rose shadings over deep charcoal-gray surfaces. A scrape at the tip of the bust is the only flaw warranting individual mention. From an earlier (uncracked) die state. (#6052)

- 3639 1795 2 Leaves—Improperly Cleaned—NGC Details. Fine. O-108a, R.4.** Slightly glossy and luminous, although subsequent rich olive-gold toning helps restore the eye appeal. A nicely detailed example of this popular early silver type. Minor rim dings are noted on the reverse at 5:30 and 10 o'clock. From The Diotte Collection. (#6052)

---

1796 16 Stars Half Dollar, Fine 12  
Scarcer Later Die State of O-102

**3640 1796 16 Stars Fine 12 PCGS Secure. O-102, High R.5.** The Draped Bust half dollar with a Small Eagle reverse bears the dates 1796 or 1797, with each date consisting of two varieties. The first variety of the 1796 issue has 15 obverse stars (Overton-101), while the second variety has 16 stars (Overton-102). The 16 Stars variety apparently commemorated Tennessee's June 1, 1796 admission to the Union as the 16th state. While the dies may have been prepared prior to this date, Mint records indicate that the first Draped Bust Small Eagle half dollars were not delivered by the Chief Coiner until February 28, 1797.

The present 16 Stars example is nicely centered and has full Fine details, with nice residual definition showing in the middle and lower parts of Liberty's hair. The dentilation is fairly strong on each side, except along the upper obverse. Medium gray patina visits the borders, transitioning to a lighter stone-gray in the centers.

Moderate adjustment marks (as made) are present, but are relegated to the left reverse margin. The reverse has two tiny rim nicks at 4:30 and 10:30, and a few faint hairlines near the right (facing) wing. An old, faded mark between the LI in LIBERTY will serve as an identifier. Given the grade, these minor issues are all easily forgiven, especially considering the pleasing detail on the hair and wings, and the sharpness of all peripheral legends. The coin is from a later die state, as it displays a relatively heavy crack from the rim between star 1, and the date that extends through the first four stars then back to the rim. Research being conducted by Jon Amato indicates this to be a scarcer die state than without the crack.

Only 3,918 Draped Bust Small Eagle half dollars were reportedly minted, and less than 300 are estimated to have survived the ravages of time, making these pieces of Americana the most elusive and highly-valued of all U.S. type coins. Because a 1796 or 1797 half dollar is necessary for the completion of a type set, this lot is likely to see spirited bidder competition. (#6058)

---

## 1797 Half Dollar, Fine Details, O-102 Rarest Variety of the 1796-1797 Type

### 3641 1797—Scratched—NCS. Fine Details. O-102, Low R.6.

Draped Bust Small Eagle half dollars of 1796-1797 are one of the most significant, if not *the* most significant, coins desired by advanced type collectors. While not the lowest-mintage or the rarest type coin (those distinctions belong to the one-year design type 1796 No Stars and 1808 quarter eagles), the half dollars of 1796-1797 are the costliest of *all* type coins on a grade-for-grade basis. Even in the Fair 2 level of preservation they command a five-figure price. Moreover, perusal of auction catalogs from the earliest days of American numismatic sales to the present indicates that there is a readily available market even for impaired specimens.

The present example displays light grayish-tan patination with medium gray-rose toning over both sides and a slight tinge of lilac on the reverse. The disclaimer on the NCS insert refers to several shallow to medium-depth scratches on the lower reverse that are now toned over. Moderate adjustment marks trend from the upper left to lower right are visible in the middle of Liberty's hair.

Despite the NCS disclaimer, this coin possesses notable attributes that will draw serious attention among advanced numismatists. First, it exhibits relatively strong definition on the design elements, especially those on the obverse. Liberty's lower and middle hair details are sharp, as are the facial features, date, and LIBERTY. Only the right-border stars and dentilation show the typical strike weakness. Indeed, the obverse may lay claim to Very Fine Details. On the reverse, most of the dentils show, and the peripheral elements are strong save for softness on RICA of AMERICA and the lower part of the 2 in the fraction. The left half of the eagle is mostly smooth.

The second factor that contributes to this coin's desirability is that it is the rarest of the four 1796-1797 die marriages. Stephen Herrman, in the most recent "Pre-Turban Bust Half Dollar Census" (*John Reich Journal*, Volume 20/Issue 2, December 2009), assigns the 1797 O-102 half dollar variety a low R.6 rarity rating. This compares with an R.5 rating for the 1796 15 Stars (O-101) variety, high R.5 for the 1796 16 Stars (O-102), and high R.4 for the 1797 O-101 variety.

The reverse flaws aside, this is a respectable example of this rare and desirable date. As such, it will provide an important addition to an advanced collection of U.S. type coins.

*Ex:* New England Rare Coin Auctions (7/1976), lot 1009; Sterling Silliphant Collection (Heritage Auction Galleries, 7/1988), lot 679; Mid-American Rare Coin Auctions (1/1989), lot 462; The Yoder Family Collection (Heritage Auction Galleries, 5/2008), lot 495; Dick Osburn Rare Coins Fixed Price List (6/2008).  
*From The Diotte Collection. (#6060)*

**1802 Draped Bust Half Dollar, VF30  
O-101, Only Known Variety**

- 3642 1802 VF30 NGC. O-101, R.3.** A relatively small mintage of 29,890 Draped Bust half dollars was struck in 1802, with a single variety known for the date. Examples in VF30 condition are quite scarce on today's market. The present coin is lightly worn, displaying much original detail on the design elements. Only minor abrasions show on the light silver-gray surfaces, with no traces of adjustment marks. Census: 27 in 30, 39 finer (9/10).  
*From The Diotte Collection. (#6065)*

- 3643 1803 Large 3—Improperly Cleaned—NGC Details. XF. O-103, R.3.** Light hairlines are evident on both sides of this otherwise attractive half dollar. Considerable luster remains evident on both sides. A few minor blemishes include a small obverse rim bruise at 3 o'clock. (#6066)

**1803 Large 3 Half Dollar, XF45  
Mostly Brilliant, O-101**

- 3644 1803 Large 3 XF45 PCGS. O-101, R.3.** The Large 3 obverse is combined with a reverse that is distinctive from the other two reverses. Obverse 1 is combined with by the presence of only 12 arrows. For an XF coin there is a surprising amount of luster still present around the devices. The center of each side is a bit softly detailed, and there are small, numerous abrasions scattered about, none of which are individually distracting. The mostly gray-brilliant surfaces show a light accent of peripheral color on each side. (#6066)

- 3645 1805 XF40 PCGS. CAC. O-112, R.2.** A luminous XF example of this relatively accessible variant, toned blue-gray at the interiors with deeper green-gold elements at the margins. Well struck with few significant abrasions. (#6069)

- 3646 1806/5—Improperly Cleaned—NGC Details. XF. O-101, R.3.** Moderately hairlined with a slightly glossy obverse and a somewhat subdued reverse. Lightly toned pearl-gray with glimpses of sun-gold throughout. There are no distracting abrasions. (#6077)

- 3647 1806/5—Improperly Cleaned—NGC Details. AU. O-103, R.3.** An intermediate die state with a heavy obverse crack but no evidence of the State a reverse die crack. Both sides of this piece have bright silver luster with faint splashes of dark toning on the reverse. (#6077)

- 3648 1806 Knob 6, Small Stars XF40 PCGS. O-107a, High R.4.** The later state with die crack across the top of UNITED. Mixed blue-gray and gold toning graces fields which show faint glimmers of luster in the protected areas. (#6075)

- 3649 1806 Pointed 6, Stem—Improperly Cleaned—NGC Details. AU. O-120a, R.4.** An early state of O-102a with the shield cud beneath the horizontal lines limited to vertical stripe 4 and the first line of vertical stripe 5. In later die states, this cud extends across the shield until only the first vertical stripe is unaffected. The present piece is cloudy from dipping, but luster glimmers from the design and the stone-gray surfaces are unmarked. (#6071)

**Borderline Uncirculated 1806 Half  
Pointed 6, Stem, O-116**

- 3650 1806 Pointed 6, Stem AU58 NGC. O-116, R.3.** This partly lustrous Draped Bust half offers deeply blended olive-brown and dove-gray toning. Splendidly unabraded save for one hair-thin mark through the E in AMERICA. The usual die state with a crack atop UNITED and clashmarks above the date and near OF. (#6071)

**1806 Draped Bust Half Dollar, AU58  
Scarce O-120a Variety, Cud on Shield**

- 3651 1806 Pointed 6, Stem AU58 PCGS. O-120a, R.4.** A huge mintage of 839,576 Draped Bust half dollars was achieved in 1806, with 28 die varieties known for the date. The present coin is an example of the scarce O-120a variety, easily recognized by the cud in the shield stripes on the reverse. This specimen is a splendid near-Mint piece, with a sharp strike and bright mint luster. The surfaces display areas of gold and light lavender toning. Many diagnostic die cracks are evident, but this specimen lacks the crack across the tail feathers and the crack from the leaf to the base of RI. Population: 36 in 58, 53 finer (9/10). (#6071)

**O-108 1807 Draped Bust Half, AU50**

- 3652 1807 Draped Bust AU50 PCGS. CAC. O-108, R.3.** The letter Y and the nearest star are very close, with the high arm of the star pointing over the Y. A luminous example from the final year of the Draped Bust half dollar design, well struck with considerable luster remaining beneath rich gray, blue, and rose shadings. Minimally abraded and desirable. (#6079)

---

Choice AU 1807 O-109a Half Dollar

- 3653** 1807 Draped Bust AU55 NGC. O-109a, R.3. The obverse has peripheral die cracks and the reverse has light clash marks. A stunning Choice AU Draped Bust half dollar, this 1807 is an excellent candidate for the type collector. Both sides have frosty silver luster with wisps of lilac and steel toning, mostly in the peripheral areas. (#6079)

---

O-106 1807 Draped Bust Half  
A Remarkable Near-Gem

- 3654** 1807 Draped Bust MS64 NGC. CAC. O-106, R.3. A scarce die pair perhaps best distinguished by its die cracks, which are most prominent between star 1 and the left side of the date on the obverse and around all but the left side of the reverse. Scarcity of the variety aside, this is a simply jaw-dropping example of the Draped Bust half dollar type. Vibrant luster shines through silver-gray central toning and the rich gold and orange hues that prevail at the margins. The inner detail is solid, and the surfaces are refreshingly unabraded. NGC has certified only eight numerically finer 1807 Draped Bust halves regardless of variety (9/10). (#6079)

---

BUST HALF DOLLARS

---

1807 50/20 Half Dollar, O-112, AU55  
Deeply Toned and Lustrous

- 3655** 1807 Large Stars, 50 Over 20 AU55 NGC. O-112, R.1. This satiny Choice AU first-year Capped Bust half is evenly struck and glossy with rich caramel-gold and ocean-blue toning. Evidence of wear is minimal, and a pass beneath a loupe locates only a tiny obverse rim nick at 7 o'clock and scattered thin marks, the most prominent near the I in AMERICA. (#6086)

---

Scarce 1807 Capped Bust Half, O-113a, XF40  
Small Stars Obverse

- 3656** 1807 Capped Bust, Small Stars XF40 PCGS. CAC. O-113a, R.3. The reverse die crack does not quite reach the 50 in the denomination, but it does pass through the olive leaves and UNITED STATES. Lightly toned-over with pink and olive-gold shadings across luminous, lightly marked surfaces. Well struck and pleasing. Population: 11 in 40, 26 finer (9/10). (#6087)
- 3657** 1811/10 AU53 PCGS. CAC. O-101, R.1. A hint of golden-tan toning visits the margins, but this overdated Bust half is mostly white. Luster brightens the borders and eagle, and marks are minor aside from a trio of faded thin lines on the portrait. *From The Classic Collection.* (#6099)
- 3658** 1811 Large 8 AU58 NGC. CAC. O-104a, R.1. Prominently cracked throughout the obverse, including the late-state crack through stars 3-5 and Liberty's upper curl. Lustrous despite minor wear with dappled toning, mostly blue-green at the margins and more peach-gold at the interiors. (#6096)

---

MS63 1814 Half, O-102a, Late Die State

- 3659** 1814 MS63 NGC. O-102a, R.3. Myriad die lines near Liberty's drapery clasp identify the Overton marriage. The late die state is noted for a heavy clashmark of BERTY above the right (facing) claw. This lustrous Select half dollar features olive-gold, charcoal-gray, and lime-green toning. Both sides are splendidly unabraded, and most stars are crisply impressed. (#6105)

**1815/2 Half Dollar, O-101a, XF Details  
Significant One-Variety Year**

- 3660 1815/2—Improperly Cleaned—NGC Details. XF. O-101a, R.3.** Only one die pairing is available with the 1815 date, as the Mint burned the day after the 47,150 half dollars were delivered. This limits collectors to either the uncracked or cracked reverse. The underlying surfaces on this piece are a bit bright to be believable (thus the cleaning designation) and each side has taken on significant gray patina that gives it a more natural appearance. Evenly worn over the high points.  
*From The Diotte Collection.*

**Choice 1817 Capped Bust Half Dollar  
Late Die State, O-110a**

- 3661 1817 MS64 NGC. O-110a, R.2.** The 1817 Capped Bust half dollar was produced in large numbers, but few examples have survived in Choice Mint State condition. The present coin is a delightful specimen, with bright mint luster under gold and steel-blue patina. The devices are sharply rendered, and diagnostic die cracks appear from the cap through the stars on the right on the obverse, and through ERICA and 50 C on the reverse. Census: 14 in 64, 8 finer (9/10). (#6109)

**O-110 1817 Half Dollar, MS64**

- 3662 1817 MS64 PCGS. O-110, R.2.** The obverse is prominently cracked, but the reverse crack through (AM)ERICA has not appeared yet. A strongly lustrous and colorful near-Gem example, well-defined with gold-orange border colors and lighter lavender-gray and blue toning through the centers. For the Normal Date varieties, Population: 12 in 64, 8 finer (9/10). (#6109)

**Sparkling Gem 1818 Half Dollar, O-107  
Tied for Second in the Condition Census**

- 3663 1818 MS65 PCGS. CAC. O-107, R.1. Ex: Friend.** Two tiny spikes atop the eagle's beak promptly identify this variety, a diagnostic provided in Dr. Glenn Peterson's reference work. Per Overton, the 5 and 0 are close and tilt toward each other at the top, and the first T in STATES cants sharply to the left. Thick, sparkling mint luster radiates from beneath mostly gray toning with glints of rose and lilac. The strike is sharp, and mentionable abrasions are absent. This piece is at a minimum tied for second place in the Condition Census, according to Stephen Herrman, behind a single MS66 NGC example. For the date, Population: 6 in 65, 3 finer (9/10). (#6113)

- 3664 1820/19 Square Base 2 XF45 NGC. O-101, R.2.** This Choice XF overdated half dollar is light dove-gray with glimpses of lime and gold toward the rims. Traces of luster shimmer from design crevices. Smooth aside from a faded thin mark near the 1 in the date. (#6125)

- 3665 1821 AU58 NGC. CAC. O-106a, R.2.** The N in UNITED is filled at its right angle on this later die state piece. Both sides are deeply toned with gray-brown and iridescent patina. A splendid example of the date and type. (#6128)

- 3666 1822/1 MS61 PCGS. O-101, R.1.** A lustrous example of this popular variety, well struck with peach and gold overtones mixed with bright silver and suggestions of deeper red-violet that appear mostly at the margins. For the two 1822/1 varieties, Population: 3 in 61, 16 finer (9/10). (#6130)

**3667 1823 MS63 PCGS. O-106a, R.2.** The 3 is misshapen or as Overton termed it “tampered with or a chip has broken out of the die.” The surfaces are remarkably lustrous for the toning that is seen over each side. Deep golden-rose color is seen in the centers with ice-blue around the margins. This would be an excellent type coin in this grade range, a coin that shows no obvious or detracting features. (#6131)

**3668 1823 Ugly 3 XF45 NGC. O-110a, R.3.** According to Al Overton, this variety has long been known as the “Ugly 3,” as the 3 in the date has been crudely reworked, apparently to broaden the thin center of same from an earlier die state. This coin has light dove-gray surfaces with golden highlights near most of the devices. Lightly worn with faint obverse hairlines and a few scattered, trivial surface marks. Ex: Jules Reiver Collection (Heritage, 1/2006), lot 22885. (#6134)

**3669 1824/4 MS62 PCGS. O-110, R.2.** The die lump in the field beneath the UN in UNUM promptly attributes the Overton marriage. Attractive orange-gold and powder-blue toning. This Bust half has good luster, and the strike is crisp except for the stars. Marks are minimal except beneath the right (facing) wing. Population: 6 in 62, 18 finer (9/10). (#6140)

**3670 1825 MS62 PCGS. O-113, R.1.** A lustrous olive-green Bust half dollar that displays hints of rose-red and tan-gold near the rims. A few wispy marks on the jaw and on the field near the chin, but the eye appeal is excellent. (#6142)

#### 1826 Half Dollar, MS64, O-108a Attractive, Bright Surfaces

**3671 1826 MS64 PCGS. O-108a, R.1.** The tine in the drapery just above the low hair curl identifies this plentiful variety. Both sides of this Choice Mint State piece are brightly lustrous with excellent design definition. Faint champagne toning enhances its eye appeal. Several obverse cracks are evident on this late state piece. (#6143)

#### O-117 1826 Half Dollar, MS66

**3672 1826 MS66 NGC. O-117, R.2.** Distinguished by the reverse, which has a narrow guide line through the middle appendage of the right claw. An impressively preserved piece, richly toned gold-gray at the interiors with strong blue and rose elements around the margins. Well struck with a single dark dot at the back of the portrait. For the various varieties, Census: 19 in 66, 5 finer (9/10). (#6143)

#### 1827 Square Base 2 Half Dollar O-131, Gorgeous Near-Gem

**3673 1827 Square Base 2 MS64 PCGS. CAC. O-131, R.2.** The obverse with die line above the LI of LIBERTY, the reverse with “Leaning O” in the denomination. This is a gorgeous near-Gem that is ideal for the type collector seeking a high-end Bust half. The strike is solid, if a trifle incomplete on the highest design elements, and the luster is warm silver overall with gold and violet elements at the borders. (#6144)

**3674 1831 MS63+ PCGS. CAC. O-118, R.3.** Medium golden-brown and forest-green toning enriches this satiny and minimally abraded Capped Bust half. Well struck except for the centers of stars 5 and 6. Certainly within the Condition Census for the variety, since the only higher-graded example was the NGC MS65 offered as lot 5814 in our March 2004 Portland Signature. (#6159)

**3675 1833 MS62 NGC. O-106, R.2.** A patch of die rust is evident behind the eagle’s head, identifying this variety. Both sides have light pewter-gray surfaces with satin luster and faint champagne toning. (#6163)

#### Lovely Choice 1834 Bust Half, O-106 Large Date, Small Letters

**3676 1834 Large Date, Small Letters MS64 PCGS. O-106, R.1.** Medium honey-gold patina graces this lustrous and impressively unabraded near-Gem. The strike is precise on the major devices, and the borders are also crisp save for a few star centers. O-106 is called a Large 4 Over Small 4 variety by Bust half dollar expert Glenn Peterson. Population: 31 in 64, 11 finer (9/10). (#6165)

---

**Gem Large Date 1834 Half Dollar  
Small Letters, O-106**

- 3677** 1834 Large Date, Small Letters MS65 NGC. O-106, R.1. The repunched 4 in the date aids attribution of this lustrous and magnificently unabraded Gem. Light olive-gold and rose-red toning enriches the obverse, while the reverse is close to brilliant with only a hint of tan-gold on the left field. The strike is crisp save for the star centers, and the eye appeal is exemplary. (#6165)

---

**REEDED EDGE HALF DOLLARS**

- 3678** 1837 MS61 NGC. Strongly lustrous through thick patina, mainly gold-orange on the obverse with more blues and violets on the reverse. Well struck, though the fields show numerous wispy abrasions and Liberty's portrait has a handful of slide marks. (#6176)
- 3679** 1839-O—Improperly Cleaned—NGC Details. AU. A multitude of peripheral die cracks adds interest to this lightly circulated but retoned example. Rich sea-green, plum-red, and golden shades conceals moderately bright surfaces. The only collectible New Orleans issue of the Bust half design. *From The Diotte Collection.* (#6181)

---

**SEATED HALF DOLLARS**

- 3680** 1839 No Drapery XF40 ANACS. Rich emerald-green, stone-gray, and rose toning embraces this well defined and moderately abraded half dollar. The No Drapery From Elbow subtype was coined only in 1839, and was succeeded the same year by the Drapery From Elbow design. Housed in an ANA cache holder with the ANA and PNG logos on the reverse hologram. (#6230)

---

**Important 1852-O Half Dollar, MS62**

- 3681** 1852-O MS62 PCGS. CAC. The 1852-O Seated half dollar is a scarce issue in any grade, and seldom encountered in Mint State grades. The combined NGC and PCGS population for this issue includes only three coins graded MS62, with just six finer pieces. Both sides are champagne toned with satiny luster and peripheral iridescence. Population: 2 in 62, 2 finer (9/10). (#6269)

---

**1853 Arrows and Rays Half, MS64  
Satiny and Lightly Toned**

- 3682** 1853 Arrows and Rays MS64 NGC. This single-year type coin displays delicate almond-gold toning. The reverse is remarkably free from marks, and the obverse has only minor abrasions. The strike is strong overall with only minor softness on the high point of the figure of Liberty. A satiny example of a popular issue. (#6275)

---

**Choice Arrows 1854-O Seated Half**

- 3683** 1854-O Arrows MS64 PCGS. CAC. Peach-gold and olive-gray blend throughout this lustrous near-Gem, with the former color more prevalent on the reverse. The borders display hints of ice-blue and golden-brown. A carefully preserved and nicely struck Choice New Orleans type coin. Although produced by the millions to replace hoarded old tenor silver coinage, the issue is usually found in VF or lower grades, and quality Uncirculated examples are very scarce. (#6280)

- 3684** 1857 MS64 PCGS. The 1857 is scarce in mint condition but still obtainable with some determination. This satiny example is mostly brilliant with just a bit of color around the margins. The strike is strong except at the top of the obverse, especially the stars there, as often seen. A nice No Motto type coin. Population: 18 in 64, 6 finer (9/10). (#6290)

- 3685** 1858 MS64 PCGS. This is one flashy No Motto type coin. The fields are especially bright with noticeable semireflectivity. The devices are fully struck on each side, even the upper stars on the obverse and Liberty's head. Toned just a bit off of brilliant with deeper color around the margins. Population: 57 in 64, 16 finer (9/10). (#6293)

- 3686** 1858-O MS62 PCGS. Caramel-gold toning embraces this satiny New Orleans antebellum half dollar. The strike is bold save for star 8, and visible marks are limited to a few faint thin lines near the date and cap. (#6294)

---

### 1867 Partial Drapery Half Dollar, MS64

**3687 1867 MS64 PCGS.** Golden-rose and subtle blue colors adorn this intricately struck and shimmering near-Gem. Nearly a "No Drapery" variety, but Liberty has a fragment of drapery beneath the raised elbow. The reverse die is interesting for a series of faint vertical die scratches (as made) within the left horizontal shield lines. Desirable in such quality. Population: 9 in 64, 7 finer (9/10). (#6321)

**3688 1874-S Arrows AU55 NGC. WB-1.** A scarce date in the Seated half dollar series, this piece survives from a mintage of 394,000 coins. This Choice AU piece has a small, wide S mintmark, and it is the most plentiful of four known die varieties. Light gray surfaces exhibit nearly full luster. Census: 2 in 55, 27 finer (9/10). (#6348)

**3689 1876 MS64 PCGS.** Type One Reverse. A sharply struck example of this Centennial-year Seated issue. Unabraded save for faint grazes near the first two stars. Variegated tobacco-brown patina across both sides is a testament to the originality of this visually alluring specimen. Population: 50 in 64, 19 finer (9/10). (#6352)

---

### Colorful Gem 1877-CC Half, WB-104

**3690 1877-CC MS65 PCGS. WB-104.** Type Two Reverse. The bases of the 7s are lightly repunched. Dappled orange-gold and forest-green endow this lustrous and meticulously struck Gem. A wonderfully preserved Carson City type coin that would take a Herculean effort to improve upon. Population: 16 in 65, 3 finer (9/10). (#6356)

**3691 1877-S MS64 PCGS.** Type Two Reverse with a closed bud on the lower berry of the branch. This crisply struck Choice Seated half is satiny and minimally abraded. A wisp of sun-gold toning precludes full brilliance. (#6357)

**3692 1878-CC Good 6 PCGS.** This cream-gray rare date Carson City half has full peripheral legends, and all stars are free from encroachment by the rim. A majority of letters are readable within IN GOD WE TRUST. The advent of the Morgan dollar ended Carson City production of other silver denominations. (#6359)

**3693 1879 MS64 NGC.** Type Two Reverse. Semireflective fields lend this piece considerable eye appeal, and well struck devices are appreciably frosted. A lovely near-Gem from a Philadelphia-only issue of just 4,800 business strikes. (#6361)

---

### Gem 1879 Seated Liberty Half Dollar Deeply Toned, Low-Mintage Date

**3694 1879 MS65 PCGS.** Type Two Reverse. The large production of silver dollars mandated by the Bland-Allison Act resulted in a correspondingly low mintage of Seated Liberty half dollars in 1879. Only 4,800 business-strike examples were produced. The present coin is a sharply detailed Gem, with semiprooflike fields, under iridescent golden-brown, green, and purple toning. Population: 35 in 65, 61 finer (9/10).  
*From The Diotte Collection.* (#6361)

**3695 1882 MS64 PCGS.** Beneath the rich green-gold and violet patina, this near-Gem has flashy fields and even a measure of frost on the devices. The strike is sharp, and marks are generally limited to the right obverse field. Population: 19 in 64, 16 finer (9/10). (#6364)

**3696 1882 MS66 Prooflike NGC.** Precisely struck and satiny with a nearly untuned appearance. Essentially immaculate save for a few trivial hairlines on the right obverse field. Just 4,400 business strike halves were coined in 1882, due to the ongoing flood of legislatively-required silver dollar production. (#6364)

**3697 1884 MS64 PCGS.** This deeply toned near-Gem shows slight weakness at the upper obverse and lower reverse, but otherwise bold design definition. It has original gray-gold toning at the centers, with peripheral green iridescence. Population: 29 in 64, 35 finer (9/10). (#6366)

**3698 1890 MS62 PCGS.** Boldly impressed with considerable watery reflectivity through light patina, silver-gray over much of the obverse with streaks and patches of deeper smoke-gray at the rims. Attractive for the grade and housed in a first-generation holder. Population: 11 in 62, 75 finer (9/10). (#6372)

## PROOF SEATED LIBERTY HALF DOLLARS

### 1859 Seated Liberty Half Dollar, PR64 Scarce, Underrated Issue

- 3699 1859 PR64 PCGS.** Only 800 proof Seated Liberty half dollars were minted in 1859, making the issue scarce-to-rare in all grades. The present coin is an attractive Choice example, with a needle-sharp strike, and brightly reflective fields. Traces of light green and lavender toning are evident on the mostly brilliant surfaces. Housed in a green label holder. Population: 37 in 64, 11 finer (9/10). From *The Diotte Collection*. (#6413)

### Popular 1862 Half Dollar, PR64 Cameo

- 3700 1862 PR64 Cameo PCGS.** Frosty devices compare favorably to the darkly reflective fields. The contrast on the reverse is especially prominent. Wispy die polish lines are prominent, but hairlines are difficult to find. A meager 550 proofs were issued for this popular Civil War date. Population: 9 in 64 Cameo, 3 finer (9/10). (#86416)
- 3701 1867 PR63 NGC.** Dappled blue and gold toning overall with accents in violet and orange. Light hairlines under the patina but solid reflectivity and good all-around eye appeal. Census: 26 in 63, 73 finer (9/10). (#6425)

### 1867 Seated Liberty Half Dollar, PR65 Ultra Cameo Only One Coin Certified Finer in Ultra/Deep Cameo

- 3702 1867 PR65 Ultra Cameo NGC.** This magnificent Gem proof Ultra Cameo 1867 Seated Liberty half dollar is a survivor from the tiny mintage of 625 pieces. The 1867 half dollar is an underrated date in all grades, and Mint State business strikes are rare, making Gem proof examples even more desirable. Currently, NGC has certified only this coin in PR65 Ultra Cameo, with none finer, while PCGS has graded no coins at this level, with a single specimen finer (9/10).
- The present coin displays fully struck, frosty devices that contrast dramatically with the deeply reflective, mirrored fields. The design elements are exquisitely detailed, and they possess a three dimensional, statuesque quality. It would be nearly impossible to match the eye appeal of this spectacular coin. (#96425)

### Peripherally Toned PR66 1869 Seated Half

- 3703 1869 PR66 NGC.** Golden-brown and aquamarine patina deepens near the rims, while the devices are only lightly toned. On its own, the reverse merits a Cameo designation, since the eagle is frosty. Liberty also shows noticeable contrast with the glassy obverse field. A well struck and desirable Premium Gem. Census: 11 in 66, 3 finer (9/10). (#6427)

- 3704 1871 PR63 PCGS.** A boldly impressed Select proof with light hairlines under soft but rich patina. Green-to-gold outer shadings give way to deep blue-gray and violet in the centers. Population: 37 in 63, 43 finer (9/10).  
*From The Diotte Collection.*(#6429)

- 3705 1871 PR63 PCGS.** Sharply detailed and fully brilliant with only a few grade-limiting hairlines and contact marks, this proof has excellent contrast and nearly qualifies for a Cameo designation. Faint peripheral gold toning is mostly evident on the reverse. Population: 37 in 63, 43 finer (9/10).(#6429)

### Notable Near-Gem Proof 1874 Arrows Half

- 3706 1874 Arrows PR64 PCGS.** Distinctly contrasted on each side, though the green-label PCGS label does not acknowledge this. Silver-blue frosted devices give way to blue and gold interiors, which in turn yield to green and champagne at the borders. A line of milky color crosses the left (facing) wing. Population: 56 in 64, 19 finer (9/10). (#6435)

- 3707 1877 PR62 PCGS.** The obverse has a chromelike gleam on fields and devices alike. Light hairlines and contacts in the fields, which show golden-tan overtones and deeper blue border toning. (#6438)

### Outstanding 1877 Seated Half, PR66

- 3708 1877 PR66 PCGS. CAC.** An outstanding Premium Gem, this piece is housed in an older green-label PCGS holder. Both sides are fully brilliant with no toning. It is deserving of a Cameo designation, although certification came before PCGS gave such designations. Lustrous devices and fully mirrored fields are evident on each side. Population: 3 in 66, 0 finer (9/10). (#6438)

### Cameo Gem Proof 1880 Half

- 3709 1880 PR65 Cameo NGC.** Type Two Reverse. Icy motifs and legends contrast with reflective fields to confirm the Cameo designation. Golden-brown, jade-green, and lilac embrace this well preserved Gem. The borders are fully struck, while the careful eye detects slight incompleteness of impression at the centers. Census: 16 in 65 Cameo, 14 finer (9/10). (#86441)

- 3710 1883 PR64 Cameo PCGS.** Strong reflectivity and contrast. Toning is minimal, with a small spot of cloudy white toning at Liberty's head and faint golden overtones in the reverse fields. Population: 31 in 64 Cameo, 16 finer (9/10).(#86444)

### 1884 Seated Liberty Half, PR66 Rare Low-Mintage Date

- 3711 1884 PR66 PCGS.** Only 875 proof Seated Liberty half dollars were struck in 1884, and the business-strike mintage was a meager 5,275 pieces. Needless to say, examples in PR66 condition are quite rare today. Light shades of gold and lavender toning highlight the pristine, reflective fields of this Premium Gem proof, and the strike is razor-sharp throughout. Population: 8 in 66, 3 finer (9/10). (#6445)

- 3712 1885 PR64 PCGS.** A fully brilliant and lovely Choice proof with considerable cameo contrast, although without such a designation. This piece has delicate toning on the reverse and will appeal to a wide range of collectors. (#6446)

### Choice Cameo Proof 1887 Seated Half

**3713 1887 PR64 Cameo PCGS.** Dashes of tan toning deny full brilliance, but the frost throughout the motifs is undeniable. A sharply struck Choice proof that has prominent field reflectivity and an undisturbed appearance. A stingy 710 proofs were struck, along with just 5,000 business strikes. Population: 13 in 64 Cameo, 14 finer (9/10). (#86448)

**3714 1888 PR64 PCGS.** Strong reflectivity with light layers of gray and gold toning over bright silver surfaces. A well-defined near-Gem specimen that shows just a few too many scattered hairlines for a finer designation. Population: 46 in 64, 32 finer (9/10). (#6449)

**3715 1891 PR64 PCGS. CAC.** Icy motifs demonstrate contrast with the glassy fields, although no Cameo designation is forthcoming. Crisply struck and unmarked with delicate honey-gold toning. A mere 600 proofs were struck. Population: 50 in 64, 33 finer (9/10). (#6452)

### BARBER HALF DOLLARS

**3716 1897 MS64 PCGS. CAC.** An elusive issue in all Mint State grades, this Choice example is desirable with full design details, brilliant luster, and lovely gold and iridescent toning. Population: 55 in 64, 29 finer (9/10). (#6477)

### Sharp 1900-S Barber Half, MS64

**3717 1900-S MS64 PCGS.** Bright silver-gray with a hint of peripheral gold on the obverse and reverse. This coin is well struck and shows minimal signs of handling. There are a couple of ticks residing left of the mintmark for identification. Population: 19 in 64, 9 finer (9/10). (#6488)

**3718 1905-O MS64 PCGS.** Subtle yet strong luster enlivens the rich peach, orange, and silver toning across each side. An attractive O-mint near-Gem from an underrated issue. Population: 35 in 64, 18 finer (9/10). (#6502)

**3719 1907-O MS64 NGC. CAC.** Almost 4 million 1907-O halves were struck, but apparently most entered circulation and stayed there. The two major services have only seen 82 submission events at the MS64 level, and this O-mint becomes quite elusive in Gem and better grades (not to mention costly). This is a surprisingly lustrous O-mint that is mostly brilliant. The strike is a bit weak in the center of the reverse, as usual, and the obverse shows the "mumps" die lump on Liberty's neck. Census: 42 in 64, 27 finer (9/10). (#6510)

**3720 1909-S MS63+ PCGS. CAC.** Blended dove-gray and chestnut-gold toning fails to diminish the rich cartwheel luster. Neither side exhibits any remotely consequential marks. The strike is sharp except for the claws and fletchings. Population: 1 in 63+, 40 finer (9/10). (#6518)

**3721 1909-S MS63 PCGS. FS-501.** This Inverted Mintmark variety is undesignated on the insert of its first generation PCGS holder. Light tan-gold margins frame the pearl-gray fields and devices. Nicely struck and lustrous with a clean appearance. Regardless of mintmark orientation, the 1909-S is scarce in Uncirculated grades despite a plentiful mintage. *From The ALG Collection.* (#6518)

**3722 1911 MS63 PCGS.** Rich gold and iridescent toning resides on the satiny silver surfaces of this boldly defined Barber half dollar. Although plentiful at this grade, all Barber half dollars in MS63 or finer grades are highly desired. (#6521)

**3723 1911 MS64 NGC.** Boldly struck and intensely lustrous, with faint hints of coral-gold color in the fields and near the margins. Several tiny, superficial marks are noted on Liberty's cheek. A high-end example for the grade. Census: 57 in 64, 29 finer (9/10). (#6521)

### Dappled Gem 1911-D Barber Half

**3724 1911-D MS65 NGC.** Autumn-gold, jade-green, and stone-gray endow this impressively preserved and lustrous Gem. The right (facing) claw and fletchings show softness, but the strike is otherwise exacting. The first Denver Mint issue since 1908, and the second lowest mintage from that facility. Census: 14 in 65, 7 finer (9/10). (#6522)

**3725 1912 MS64 NGC. CAC.** The 1912 Barber half dollar is a scarce P-Mint issue, although it resides in the shadows of those issues minted during the following three years. This Choice Mint State piece has frosty luster with delicate reddish-gold toning. Census: 63 in 64, 11 finer (9/10). (#6524)

**3726 1913-D MS64 NGC. CAC.** A lustrous example, generally well struck with only slight softness noted on trouble-spots such as the eagle's talons. Gold-orange patina appears over much of each side but is richer on the obverse. Census: 46 in 64, 19 finer (9/10). (#6528)

**3727 1913-S MS64 NGC.** Dappled autumn-gold and gunmetal-gray encompass this satiny Choice Barber half dollar. A well executed strike brings out sharp definition on the design elements. Scarce in Mint State despite the relatively late date. Census: 34 in 64, 24 finer (9/10). *Ex: FUN Signature (Heritage, 1/2008), lot 1669, which realized \$2,530.* (#6529)

**3728 1914 MS63 PCGS.** A well struck and attractive Select example of this lowest-mintage Barber half dollar issue. Lustrous gray and gold-orange surfaces appear smooth, though close inspection reveals wispy abrasions on the devices and a few tiny digs. Population: 39 in 63, 53 finer (8/10). (#6530)

---

### Choice Low-Mintage 1914 Half

- 3729 1914 MS64 PCGS. CAC.** A lovely near-Gem whose vibrant luster and good strike ensure the eye appeal. Medium honey-gold overall, although a light blush of fire-red is noted near the arrowheads. The strike is full except for the right shield corner. Minor contact on the portrait limits the grade. The lowest-mintage business strike issue of the series. Population: 45 in 64, 9 finer (9/10). (#6530)

- 3730 1915-S MS64 NGC.** Faint whispers of golden toning drape the fields, though the luster remains strongly silver. Well-defined overall, though the eagle's talons show a touch of the usual softness. (#6534)

---

## PROOF BARBER HALF DOLLARS

---

### Toned PR66 1892 Barber Half

- 3731 1892 PR66 PCGS.** Magnificent cherry-red, apricot-gold, apple-green, and ivory-gray alternate across the obverse. The reverse is fully patinated in deep shades of plum-red, cobalt-blue, and jade-green. A sharply struck and immaculate specimen that is of significant interest to the collector of lavishly toned coinage. Minor die doubling is noted on the reverse peripheral legends. (#6539)

---

### Deep Cameo Gem Proof 1897 Half

- 3732 1897 PR65 Deep Cameo PCGS. CAC.** Ice-white devices and legends attest to the Deep Cameo status of the present brilliant and gorgeous Gem. The strike is virtually full, with any incompleteness limited to the area of the right shield corner. A superior example of the proof type. A meager 731 proofs were coined. (#96544)

---

### Deeply Toned PR66 1898 Half Dollar

- 3733 1898 PR66 NGC.** Rich emerald-green, plum-mauve, and rose-gold envelop this satiny Premium Gem. Unlike the strike for most Barber proof halves, the claws and fletchings boast complete detail. Of the 735 proofs struck, only a few can equal the quality of the present specimen. Census: 25 in 66, 26 finer (9/10). (#6545)

- 3734 1899 PR63 PCGS. CAC.** Strongly mirrored, though the pearl-gray surfaces show less contrast than usually seen. Scattered light hairlines and a slide mark on the cheek contribute to the grade. One of just 846 pieces struck. (#6546)

- 3735 1899 PR64 Cameo PCGS. CAC.** The fields are deeply reflective, and the devices display moderate mint frost yielding strong contrast (but a bit stronger on the reverse). The surfaces are mostly brilliant, with a ring of golden-rose around the margins. (#86546)

---

### Delightful PR67+ Cameo 1899 Half

- 3736 1899 PR67+ Cameo NGC. CAC.** The portrait and eagle are frosty, and the glassy fields seal the deal for the Cameo designation. The upper margins display light pumpkin-gold toning, and the reverse center shows wisps of forest-green, but most of this immaculate Barber half remains brilliant. Among the finest survivors from the proof production of 846 pieces. Census: 1 in 67+ Cameo, 1 finer (9/10). (#86546)

---

### Stunning PR67 1901 Barber Half

- 3737 1901 PR67 NGC.** This is a visually stunning coin. The obverse and reverse have different looks, but are equally impressive. The obverse is nearly brilliant with a pale ring of iridescence, while the reverse is mostly thalo blue with reddish accents around the margin. As expected, the surfaces are nearly perfect. There is an interesting surface anomaly we cannot quite figure out. In the field in front of Liberty's mouth, there is an area of what appears to be an unpolished part of the die, or perhaps porosity in the planchet, or surface roughness that was not struck out in the proofing process. Interesting. Census: 15 in 67, 5 finer (9/10). (#6548)

- 3738 1903 PR62 PCGS.** Light honey toning visits the obverse. The reverse remains brilliant. This proof Barber half exhibits a needle-sharp strike, and the reverse provides noticeable cameo contrast. A few delicate obverse hairlines limit the grade. (#6550)

#### Brilliant Cameo PR65 1907 Half

- 3739 1907 PR65 Cameo NGC.** Magnificently deeply mirrored fields combine with luminous motifs to merit the Cameo notation. The fields appear flawless, although the front of the NGC holder has faint scuffs that do not affect the coin itself. A brilliant Gem with stellar technical quality. Moderate softness of strike is noted near the right border of the shield. Census: 2 in 65 Cameo, 7 finer (9/10). (#86554)

#### Desirable 1910 Barber Half, PR67

- 3740 1910 PR67 NGC.** The demand for high-grade 1910 proof half dollars is high owing to the elusiveness of low-mintage circulation strikes (fewer than 500,000 pieces). Dappled cobalt-blue, orange, and lavender toning runs over both sides of this Superb Gem and a solid strike delivers strong definition to the design features. Impeccably preserved. Census: 16 in 67, 6 finer (9/10). (#6557)

#### Gem Cameo Proof 1911 Half Dollar

- 3741 1911 PR65 Cameo PCGS.** Uncommonly well-contrasted for this late-date Barber half dollar proof issue. Bold champagne-gold toning covers most of the obverse and virtually all of the reverse, though the frost on the portrait is generally silvery. A well-preserved and important coin. Population: 13 in 65 Cameo, 13 finer (9/10). (#86558)

#### Pleasing PR66 1912 Half Dollar

- 3742 1912 PR66 NGC.** Gold-toned overall with variations from pale champagne to nearly orange. The devices display considerable frost, such that the surfaces have nearly a Cameo appearance on the reverse, though the obverse falls short. Carefully preserved and delightful. Census: 14 in 66, 15 finer (9/10). (#6559)

### EARLY DOLLARS

- 3743 1795 Flowing Hair, Three Leaves—Scratches—NGC Details. Fine. B-5, BB-27, R.1.** A number of deep scratches mar the obverse surface of this otherwise presentable specimen at 8 o'clock, between the rim and the bust. The BB-27 variety is most easily distinguished by the "bar" in the field near the top curl.

#### Choice Fine 1795 Flowing Hair Dollar Three Leaves, B-5, BB-27

- 3744 1795 Flowing Hair, Three Leaves Fine 15 PCGS. B-5, BB-27, R.1.** Bowers-Borckardt Die State II. B-5 is familiar to Flowing Hair dollar specialists, and is promptly attributed by the slender "bar" or die line behind Liberty's highest neck curl. This is a charming representative with light to medium chestnut-gold and stone-gray toning. A couple of faint parallel adjustment marks, as made, pass through the eagle's neck, but no marks are remotely of interest save for a hair-thin intermittent line from 10 o'clock to the eagle's neck. (#6852)

**Popular B-5, BB-27 1795 Flowing Hair Dollar  
VF Details**

- 3745** 1795 Flowing Hair, Three Leaves—Improperly Cleaned—NCS. VF Details. B-5, BB-27, R.1. The most available 1795 variety, with an estimated surviving population of more than 2,000 pieces. The characteristic metal “bar” is seen on the obverse behind Liberty’s head, and on the reverse there are three leaves under each wing. A die crack from the left stem extends to the border, indicative of die state III. The present example shows the lack of detail on the central devices often seen on this variety, and the surfaces display wisps of blue and lavender toning. *From The Diotte Collection. (#6852)*

**1795 Flowing Hair Dollar, VF Details  
Interesting B-5, BB-27 Variety**

- 3746** 1795—Improperly Cleaned—NGC Details. VF. Flowing Hair, Three Leaves, B-5, BB-27, R.1. The 1795 Flowing Hair dollars were produced in large numbers, and the BB-27 variety (see the “bar” between the curl and star 5) is the die marriage most often seen. The bust was strongly impressed on this variety, creating a high relief effect that resulted in concentrated wear on the central devices of the coin. Examples in VF grades tend to show little detail on the central design elements. This coin is a good example of this phenomenon. A few light adjustment marks are noted on the bust, and the fields display an even, light gray patina. (#6852)

**Pleasing 1795 B-5, BB-27 Silver Dollar, XF45**

- 3747** 1795 Flowing Hair, Three Leaves XF45 PCGS. B-5, BB-27, R.1. The diagonal bar in the upper left obverse field immediately identifies this variety. It is distinctive and plentiful, representing about one-third of the entire surviving population of 1795 Flowing Hair silver dollars. Housed in a green-label PCGS holder, this piece has light blue-gray surfaces with traces of pale gold toning. (#6852)

**Near-Mint 1795 Flowing Hair Dollar  
Three Leaves, B-7, BB-18**

- 3748** 1795 Flowing Hair, Three Leaves AU58 NGC. B-7, BB-18, R.2. Die State I. The final star is fully below the bust truncation, and the reverse features seven berries on each branch. Apricot and battleship-gray patina embraces this momentarily circulated example, which has noticeable satiny luster throughout the legends and devices. The reverse has a faint handling mark near 2 o'clock, a minute rim ding at 5 o'clock, and a tiny sky-blue toning fleck below the left (facing) wing. Neither side has any other relevant abrasions, which is noteworthy for such a large silver coin. High grade Flowing Hair dollars are among the most challenging type issues among the early series, and this Three Leaves example offers a magnificent opportunity. (#6852)

**Blundered Date 1795 B-1, BB-21 Dollar, VG10**

- 3749** 1795 Flowing Hair, Two Leaves VG10 PCGS. B-1, BB-21, R.2. The blundered date obverse die has the 7 punched over an errant 1, suggesting the name “1795 over 1195.” Although well worn, this pleasing silver dollar has deep gold and iridescent toning on both sides with no marks of any consequence. (#6853)

**1795 Flowing Hair Dollar, Fine 12  
'Hidden Star' Variety, B-4, BB-14**

- 3750** 1795 Flowing Hair, Two Leaves Fine 12 NGC. B-4, BB-14, Low R.3. The 1795 dollar is the only realistic choice for most type collectors seeking a representative of the Flowing Hair design, because 1794 dollars are so rare and expensive. The present specimen is an example of the famous "Hidden Star" variety, with star 15 located entirely beneath the bust. This piece is an evenly-worn, no-problems coin, with gray and steel-blue surfaces. (#6853)

**1795 Flowing Hair Dollar, VF Details, B-1, BB-21**

- 3751** 1795—Improperly Cleaned—NGC Details. VF. Flowing Hair, Two Leaves, B-1, BB-21, R.2. The 1795 dollar is the only practical choice for most type collectors seeking an example of the Flowing Hair design because the 1794 is so rare and expensive. The BB-21 variety is an available die marriage identified by the five prominent curls on the obverse and the two berries inside the wreath under the eagle's tail on the reverse. While there is noticeable wear on the design elements of this piece, the major devices were deeply impressed and much original detail remains intact. The surfaces are unnaturally bright, probably from the cleaning noted on the holder. An obverse rim bruise is noted at 10 o'clock.

**Choice VF 1795 Silver Dollar, B-1, BB-21**

- 3752** 1795 Flowing Hair, Two Leaves VF35 NGC. B-1, BB-21, R.2. Gunmetal-blue and caramel-gold embrace this nicely detailed Choice VF Flowing Hair dollar. Both sides are surprisingly unblemished except for a thin mark that crosses Liberty's jaw and exits beneath the chin. The upper reverse has a few minor mint-made adjustment marks. (#6853)

**Popular 1795 Draped Bust Dollar, Liberty Set Left  
B-14, BB-51, XF Details**

- 3753** 1795 Draped Bust, Off Center—Improperly Cleaned—NGC Details. XF. B-14, BB-51, R.2. The bust of Liberty is set left, with the outmost curl of hair touching star 1. Only lightly worn, the coin displays glossy surfaces and bright, silvery color. Traces of golden-brown accent the peripheries. For most, the 1795 is the earliest date of United States silver dollar that is affordable, thereby making it a prime candidate for both type coin collections and world silver crown collections. (#96858)

**1795 Draped Bust Dollar, XF Details  
Guide Book Variety, B-14, BB-51**

- 3754** 1795—Improperly Cleaned—NGC Details. XF. Draped Bust, Off Center, B-14, BB-51, R.2. Always popular as the first date of the Draped Bust, Small Eagle design, with a reported mintage of 42,738 pieces and two die varieties known for the date and type. The present coin is an example of the BB-51 variety, easily recognized by the placement of the bust too far to the left of center. The surfaces of this specimen are toned in shades of gray and blue, with most of the original detail remaining intact on the devices. Listed on page 210 of the 2011 *Guide Book*. From *The Diotte Collection*.

**Attractive 1796 Silver Dollar, B-4, BB-61, VF30  
Small Date, Large Letters**

- 3755** 1796 Small Date, Large Letters VF30 ANACS. B-4, BB-61, R.3. The die chip over the 1 in the date identifies the variety. Faint adjustment marks are evident across the obverse, mostly at the center. Both sides have smooth and pleasing surfaces beneath lilac-blue and iridescent toning. (#6860)

**1796 Draped Bust Dollar, VF Details  
Scarce B-2, BB-63 Variety**

- 3756** 1796—Reverse Scratched—NGC Details. VF. Small Date, Small Letters, B-2, BB-63, R.4. The present coin represents the scarce BB-63 variety, with only the innermost point of star 1 touching the hair, while on the reverse there is a berry under the A of STATES. Both sides of this coin display mottled gunmetal-blue and battleship-gray patina. Much detail remains on the moderately worn devices, but a long, horizontal scratch is evident on the eagle's legs. *From The Diotte Collection.*

**1796 Draped Bust, Small Eagle Dollar, VF25  
Guide Book Variety, B-5, BB-65**

- 3757** 1796 Large Date, Small Letters VF25 NGC. B-5, BB-65, Low R.2. The 1796 Draped Bust dollar claims a small mintage of 79,920 pieces, with six die varieties known for the date. The present coin represents the Large Date, Small Letters *Guide Book* variety, easily recognized by the die break at I in AMERICA. The surfaces of this moderately worn, battleship gray specimen show a scattering of grade-consistent abrasions, mostly on the obverse. (#6861)

- 3758** 1797—Improperly Cleaned—NCS Details. Fine. 10x6 Stars, Large Letters, B-3, BB-71, R.2. The 1797 Draped Bust dollar is known in three die varieties, with the BB-71 marriage easily recognized by the obverse stars arranged in a 10x6 pattern. The present coin is well worn, but all major design elements are still recognizable, and the surfaces are a light gray, with subtle hints of lavender. A few adjustment marks are noted on the reverse at 2 o'clock.

*From The Diotte Collection.*(#6865)

**1797 Draped Bust Dollar, VF30  
B-3, BB-71, 10x6 Stars**

- 3759** 1797 10x6 Stars, Large Letters VF30 PCGS. B-3, BB-71, R.2. The reported mintage of 7,776 Draped Bust dollars seems too low, in light of the number that survive today. Probably some 1797 dated dollars were included in the totals for 1798. The present coin represents the BB-71 die variety, easily recognized by the obverse stars arranged in a 10x6 pattern. The surfaces of this pleasing specimen display shades of blue and gold toning, with light-to-moderate wear on the devices. A few light adjustment marks are evident in Liberty's hair. (#6865)

**Large Letters 1797 Dollar, XF45  
9x7 Stars, B-1, BB-73**

- 3760** 1797 9x7 Stars, Large Letters XF45 PCGS. B-1, BB-73, R.3. Bowers-Borckardt Die State III with criss-cross obverse die cracks from the rim through the ribbon. This Small Eagle dollar displays traces of luster within the legends and stars. The cream-gray surfaces exhibit glimmers of autumn-gold patina. No marks are evident aside from a hair thin line from the mouth to star 13. There are just three die marriages of 1797 dollars, each of which is separately listed in the 2011 *Guide Book*. (#6863)

- 3761** 1798 Large Eagle, Pointed 9 Good 6 NGC. B-14, BB-122, R.3. Both sides of this early dollar are well-worn, particularly the reverse, but the piece displays well. Deep charcoal-blue outer toning gives way to lighter grays and finally to pale pearl and gold on the high points. Minimally abraded and attractive for the Good range. (#6873)

- 3762** 1798—Improperly Cleaned—NGC Details. Fine. Large Eagle, Pointed 9, B-15, BB-112, R.3. The somewhat scarce BB-112 variety is identified by the wide date and the five small berries in the olive branch, with the reverse stars in an arc pattern. This specimen shows lightly abraded, dull gray surfaces, with evenly worn design elements. (#6873)

**Pleasing 1798 B-12, BB-120 Dollar, VF30**

- 3763** 1798 Large Eagle, Pointed 9 VF30 ANACS. B-12, BB-120, R.4. Both sides have minor die cracks. Imperfectly centered with a wide border at the right, and a narrow or absent border at the left. A few tiny rim nicks are the only distractions on this original pewter-gray piece. Splashes of iridescent toning are evident on each side. (#6873)

**Choice XF 1798 Large Eagle, Knob 9 Dollar  
Scarce B-3, BB-94 Variety**

- 3764** 1798 Knob 9 XF45 NGC. B-3, BB-94, R.4. Bowers-Borckardt Die State III, the top of the 1 is "lumpy" and there is a start to the State III crack from the obverse border, extending between stars 2 and 3. This Choice XF coin offers rich blue and gold-violet toning over luminous surfaces. Lightly rubbed but minimally abraded and entirely pleasing. A scarce coin for the series specialist to consider. (#6877)

- 3765** 1799/8 13 Stars Reverse—Damaged—NGC Details. VF. B-1, BB-142, R.4. The BB-142 overdate variety is easily identified by the extensive die crumbling at I in AMERICA. The central obverse of this coin exhibits a number of gouges and abrasions, but much original detail is still evident on the moderately worn devices.

- 3766** 1799 Irregular Date, 13 Stars Reverse—Obverse Damage—NGC Details. VF. B-15, BB-152, R.3. The Irregular date, 13 Stars Reverse die variety is characterized by the "line star" pattern on the reverse. Unfortunately, this example shows a number of deep scratches on the central obverse, and an unnaturally smooth appearance on the surfaces.

- 3767** 1799 7x6 Stars—Improperly Cleaned—NGC Details. Fine. B-19, BB-155, R.4. Bowers-Borckardt Die State IV, most advanced state with die crack from star 2 to Liberty's hair. Largely retoned gold-orange and violet after a cleaning, though the fields are still bright. (#6878)

- 3768** 1799 7x6 Stars—Mount Removed—NGC Details. VF. B-11, BB-161, R.3. Bowers-Borckardt Die State III, cracked through UNITED. A moderately worn ex-jewelry example with light blue and slate-gray retoning over glossy surfaces. The holder permits viewing of the edge, and the bottom of the obverse (top of the reverse) point shows clear evidence of a former mount. (#6878)

- 3769** 1799 7x6 Stars—Improperly Cleaned—NGC Details. VF. B-22, BB-168, R.5. This rare die pair is perhaps most famous for the bold die crack across the central reverse. Moderately worn and plainly cleaned in the past, though gold and pearl-gray outer colors suggest retoning.

- 3770** 17997x6 Stars—Damaged—NGC Details. VF. B-17, BB-164, R.2. The reverse die of the BB-164 variety, which was used only for this die marriage, is characterized by the five extremely large berries on the olive branch. The rims of this example have sustained a number of significant bruises, and the central obverse is peppered with short abrasions.

- 3771** 1799 7x6 Stars—Improperly Cleaned—NCS. VF Details. B-8, BB-165, R.3. The distinctive BB-165 variety, with the right base and upright of the N in UNITED clearly repunched. This specimen retains much original detail on the devices, but the surfaces are unnaturally bright and smooth. From The Diotte Collection. (#6878)

**Rare B-18, BB-154, 7x6 Stars  
XF 1799 Bust Dollar**

- 3772** 1799 7x6 Stars XF40 NGC. B-18, BB-154, R.5. Bowers-Borckardt Die State III with a heavy radial crack between the ED in UNITED. Rich lavender-gray, tan-brown, and powder-blue encompass this moderately circulated early dollar. The well detailed surfaces show just one mentionable mark, a brief pinscratch beneath the fletchings. In his 1993 Silver Dollar Encyclopedia, Q. David Bowers wrote that "BB-154 is the second rarest die variety of 1799." This is a significant statement, given that 22 marriages are known for the date. (#6878)

**XF Details 1799 Bust Dollar, B-5, BB-157**

- 3773** 1799 7x6 Stars—Improperly Cleaned—NGC Details. XF. B-5, BB-157, R.2. Clouds 7 and 8 on the reverse are touched by the stars below them, denoting this variety. Traces of shimmering luster still cling to the protected areas on the reverse. Save for a few circulation marks on Liberty's profile, there are few noticeable detractors that this piece encountered while in circulation. A few light hairlines across the obverse do not significantly distract the coin's overall appeal. (#6878)

- 3774** 1799 7x6 Stars—Tooled, Polished—NGC Details. XF. B-10, BB-163, R.2. The reverse of this BB-163 example displays an extensive die crack that almost encircles the central devices, starting at O in OF, through the bottom of AMERICA, across the tail feathers, left wing, and up to STA in STATES. The surfaces are unnaturally bright from cleaning.

**8x5 Stars 1799 Dollar, VF30  
B-23, BB-159**

- 3775** 1799 8x5 Stars VF30 PCGS. B-23, BB-159, R.4. Bowers-Borckardt Die State II. The deep cobalt-blue fields cede to rich olive and russet borders. This is an evenly circulated example that still displays hints of luster within design crevices. Inspection beneath a lens fails to find any consequential contact. B-23 is the sole 8x5 stars variety, and for that reason it receives separate *Guide Book* pricing. (#6881)

**1800 Bust Dollar, B-13, BB-193, XF Details**

- 3776** 1800—Improperly Cleaned—NGC Details. XF. B-13, BB-193, R.4. Die state III, with heavy die clashing evident on the reverse and a long die crack along AMERICA. The obverse displays only light shades of toning and it is surprising to flip this piece over and find the reverse covered with yellow and auburn patina. Lightly circulated, the only mark of note is a dislodged planchet inclusion on the bust of Liberty. (#6887)

- 3777** 1800 AMERICA Genuine PCGS. B-19, BB-192, R.2. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has graffiti. The letters I and M are lightly pinscratched in the obverse field, with the I near star 4 and the M near star 11. The cheek has a few faint hairlines, and a brief thin mark is noted at the base of Liberty's neck. Toned deep tan-brown with substantial design detail and occasional pockets of remaining luster. (#6892)

- 3778** 1800 AMERICA VG10 PCGS. B-19, BB-192, R.2. One of the famous AMERICA varieties, with star 13 close to the bust and the die defect after AMERICA on the reverse. The present coin is a deep gray and blue-steel specimen, with much original detail remaining on the major design elements. Population: 2 in 10, 85 finer (9/10). (#6892)

**1800 AMERICA Dollar, B-19, BB-192, AU Details**

- 3779** 1800 AMERICA—Improperly Cleaned—NGC Details. AU. B-19, BB-192, R.2. The well known AMERICA variety, where a die flaw resulted in a line of raised metal following the last A in AMERICA. A vertical line below star 1 separates this piece from the similar BB-191. Only faint traces of wear blur the details on the highest points, while all major details of the piece remain crisp. Soft luster still remains in the protected areas. The piece is generally well struck for the type, and possesses few notable hairlines, despite the designation by NGC. (#6892)

**Popular 12 Arrows 1800 Dollar  
B-17, BB-196, AU Details**

- 3780** 1800 12 Arrows—Improperly Cleaned—NGC Details. AU. B-17, BB-196, R.1. Bowers-Borckardt Die State IV, late state with all cracks, including from star 6 to hair ribbon. A well-defined example of this accessible but popular single-pair variety, only lightly worn but with oddly bright peach and silver surfaces from a past cleaning. Despite its impairment, a coin that offers a certain attractive majesty.

- 3781** 1802/1 Narrow Date—Improperly Cleaned—NCS. VF Details. B-4, BB-232, R.3. The Narrow Overdate, BB-232 variety, with the numeral 1 touching the hair and star 13 extremely close to the bust. This example displays light blue and green patina, with only moderate wear on the devices, and some horizontal marks on the bust from a harsh cleaning.  
*From The Diotte Collection.* (#6898)

- 3782** 1802—Improperly Cleaned—NGC Details. Fine. B-6, BB-241, R.1. A popular variety, easily identified by the broken right foot of the T in LIBERTY, BB-241 is the most available die marriage of the year. The smooth steel-blue and gray surfaces are pleasing and the devices retain much original detail. An obverse rim bruise is located at 1 o'clock.

**3783 1802 Narrow Date—Improperly Cleaned—NGC Details. VF. B-6, BB-241, R.1.** The 1802 Draped Bust dollar boasts a small reported mintage of 41,650 pieces, and seven die varieties are known for the date. The present coin is a representative of the BB-241 variety, with the diagnostic broken right foot of T in LIBERTY. This example shows moderate wear on the design elements, but much original detail remains on all devices. The surfaces are unnaturally toned in shades of dark gray and steel-blue.

**3784 1802 Narrow Date—Improperly Cleaned—NGC Details. VF. B-6, BB-241, R.1.** Light digs and scrapes on a moderately worn example of the accessible but popular BB-241 Narrow Date type. Partially retoned gold and blue after a past cleaning.

**Attractive VF30 1802 Dollar  
Narrow Date, B-6, BB-241**

**3785 1802 Narrow Date VF30 PCGS. CAC. B-6, BB-241, R.1.** A steel-gray representative of the coveted crown-sized Draped Bust dollar. Unblemished and nicely defined, with all letters in E PLURIBUS UNUM at least partly visible. Seven business strike varieties of 1802-dated dollars are known, with B-6 comprising a majority of survivors. (#6895)

**Scarce B-5, BB-252 1803 Small 3 Dollar  
Sharpness of XF**

**3786 1803 Small 3—Improperly Cleaned—NGC Details. XF. B-5, BB-252, R.3.** Scarce die pair with a Small 3 obverse, apparently retired before it could develop distinct states. Light but distinct wear on the high points leaves the rest of the detail on this well-defined coin intact. Deep blue-violet toning with orange-peach overtones covers luminous surfaces with hairlines from a past cleaning. (#6900)

## GOBRECHT DOLLAR

### 1836 Original Gobrecht Dollar, AU Details Die Alignment I

**3787 1836 Name on Base, Judd-60 Original, Pollock-65, R.1—Repaired—NGC Details. AU. Silver. Plain Edge. Die Alignment I** (center of Liberty's head is opposite the D in DOLLAR). The straight die clash line (indicating a later Original die state) is apparent under magnification, but it is necessary to know where to look as there are numerous small contact marks also in the area. The repair referred to on the insert is actually a hole that was plugged. The area to the right of Liberty's head shows signs of work having been done as does the area around DO in DOLLAR. The surfaces are deep blue-gray on the obverse and there is only slight reflectivity evident in the fields. The reverse is much brighter and the toning mostly encircles the devices. As mentioned, there are numerous small to medium-sized contact marks on each side, but the only detracting one is a scrape from the upper obverse field across the torso of Liberty.

## SEATED DOLLARS

### Patinated Mint State 1842 Silver Dollar

- 3788 1842 MS61 PCGS.** The cream-gray surfaces of this Mint State No Motto dollar reveal peach-gold and sea-green toning once rotated beneath a light. The fields are moderately prooflike, and the strike is good with minor softness noted on portions of the devices. Both sides are surprisingly mark-free for the MS61 level, despite a single short pinscratch above the eagle's right (facing) shoulder. (#6928)

### 1843 Seated Dollar, MS60 Scarce Issue in High Grade

- 3789 1843 MS60 PCGS.** This satiny Mint State No Motto dollar has light to medium chestnut-gold and pearl-gray toning. Crisply struck, and the fields display no more than the expected number of wispy abrasions. From a generous mintage of 165,100 pieces, And not popular as circulating coinage, the 1843 Seated Liberty dollar is unaccountably scarce in higher grades today. Population: 4 in 60, 36 finer (9/10). (#6929)
- 3790 1845 AU55 NGC.** Layers of rose-gold toning grace parts of this Choice AU coin, while the rest remains mildly reflective silver-white. Faintly abraded but only modestly worn. Census: 23 in 55, 44 finer (9/10). (#6931)

### Subtly Toned Near-Gem 1849 Seated Dollar Rare in Any Mint State Grade

- 3791 1849 MS64 NGC.** A very rare Seated dollar issue in any Mint State grade, the 1849 is far more so at the near-Gem level of the present specimen. The mintage was only 62,000 pieces, a small number in absolute terms even if nominal by the standards of the series. This near-Gem is one of 13 MS64 coins certified at NGC, with two finer (9/10). Only a few faint marks, mostly in the left obverse field, appear to preclude an even finer grade. The well-struck surfaces are subtle silver-pink, with some gold and lilac highlights appearing under a light. The wire rim seen around both sides is typical for the issue. (#6936)
- 3792 1859-O—Improperly Cleaned—NGC Details. Unc.** The 1859-O Seated Liberty dollar enjoyed a large mintage of 360,000 pieces, and the date can be located without too much difficulty today. This specimen has sharp details, but the surfaces are unnaturally bright. (#6947)

**3793 1859-O—Improperly Cleaned—NGC Details. Unc.** Although lightly cleaned, the surfaces of this silver-gray specimen boast impressive amounts of flashy luster. Several stars and Liberty's head lack full definition, but the central details are sharp. Scattered abrasions are entirely minor.  
*From The Diotte Collection. (#6947)*

**3794 1859-O MS60 ANACS.** From a generous mintage of 360,000 pieces, many 1859-O Seated Liberty dollars were used in the China trade. The present coin is a lustrous, sharply struck, Mint State example, with wisps of light gold toning.  
*From The ALG Collection. (#6947)*

**3795 1859-S—Improperly Cleaned—NGC Details. XF.** Only 20,000 dollars were struck in 1859 at the San Francisco mint. Allegedly the entire mintage was shipped to the Orient. Most examples that are known today are VF or XF; very few are known in Uncirculated condition. This piece was cleaned and shows the resultant underlying brightness, but it is covered with deep layers of blue and rose toning on each side. The fields are lightly abraded and the wear is even over the striking motifs. (#6948)

#### 1861 Seated Dollar, AU50 Low-Mintage, Civil War Issue

**3796 1861 AU50 NGC.** The Philadelphia Mint coined 27,500 business-strike Seated Liberty dollars in 1861, the first year of the Civil War. Examples are scarce-to-rare in all grades today. The present coin shows only light traces of wear, with much original detail still evident on the design elements. The surfaces display light pink and gray patina. Census: 3 in 50, 61 finer (9/10). (#6951)

#### Challenging MS62+ 1862 Silver Dollar

**3797 1862 MS62+ PCGS. CAC.** Although more than 1.3 million gold dollars were struck at Philadelphia in 1862, the facility only produced 11,540 business strike silver dollars that year. This proved to be the lowest mintage of the decade. Unsurprisingly, the 1862 is rare in Uncirculated grades, and is unknown above MS65. This is a mildly prooflike piece that has a bold strike, lightly abraded fields, and a hint of chestnut-gold toning. Population: 1 in 62+, 30 finer (9/10). (#6952)

**3798 1863 XF40 NGC.** Only light wear is evident on this low-mintage (27,200 pieces) Civil War issue. Nearly all original detail is still intact on the devices, and the fields are a pleasing silver-gray color. (#6953)

**3799 1871 AU55 PCGS.** From a large mintage of over 1 million pieces, the 1871 Seated Liberty dollar is an available date, and a favorite of type collectors. Only the slightest traces of wear are evident on this Choice AU specimen that displays sharply detailed devices and much original mint luster. (#6966)

**3800 1871 MS60 ANACS.** This deeply toned Mint State example has mostly purple and russet toning around the perimeter, while the centers are primarily gunmetal-gray. The figure of Liberty is a bit soft, but the rest of the details are sharp. A number of tiny abrasions are to be expected for the grade. (#6966)

#### 1872-CC Seated Dollar, XF Details Bright Surfaces and Evenly Worn

**3801 1872-CC—Improperly Cleaned—NGC Details. XF.** Carson City Seated dollars are undeniably scarce. The latter three dates of the four-coin subseries can present major challenges in the upper circulated grades. Although the 1872-CC is “easier” than the 1871-CC and 1873-CC, its scant mintage of 3,150 pieces affirms its absolute and conditional scarcity. The present piece shows only light wear and glossy, silvery surfaces. Likely minted from Comstock silver, a coin like such evokes many images of the Old West. (#6969)

---

**1872-CC Seated Liberty Dollar, Unc Details  
In-Demand, Low-Mintage Carson City Issue**

**3802 1872-CC—Improperly Cleaned—NGC Details. Unc.** Always in demand because of the charismatic CC mintmark, the 1872- CC Seated Liberty dollar also boasts one of the lowest business-strike mintages of the series, at 3,150 pieces. The issue is elusive in all grades today, with experts estimating a surviving population of 150-225 specimens. The present coin is sharply detailed in all areas. The surfaces exhibit a soft pink and green patina, and a shallow scratch on the reverse, near the arrow heads, is the only mark of note. The mint luster is a bit muted, probably a result of the cleaning noted on the holder.

**3803 1872-S Genuine PCGS.** The PCGS number ending in 94 suggests altered surfaces as the reason, or one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen, that has been lightly cleaned. The 1872-S Seated Liberty dollar is a low-mintage date, with only 9,000 pieces reportedly coined. (#6970)

---

**1873-CC Seated Liberty Dollar, XF40 Details  
Rarest Carson City Seated Dollar**

**3804 1873-CC—Fields Repaired—ANACS. XF40 Details.** The 1873-CC Seated Liberty dollar boasts a low reported mintage of 2,300 pieces, but many experts believe no more than a thousand examples were actually released into circulation. The reason for the small mintage was the allocation of resources to the new Trade dollar, of which 124,500 specimens were coined at the Carson City Mint that year. Today, the 1873-CC is the rarest Carson City Seated Liberty dollar, and the issue is elusive in any grade. The present coin retains much original detail on the lightly worn devices, and the fields are silver-gray, with a few dark color spots. Some light repair work is evident in the obverse field. (#6972)

## PROOF SEATED DOLLARS

### 1859 Seated Liberty Dollar, PR62 Scarce Early Proof Issue

- 3805 1859 PR62 PCGS.** A respectable proof mintage of 800 Seated Liberty dollars was reported in 1859, but Q. David Bowers doubts if more than 450 examples were actually distributed. The present coin is a scarce PR62 survivor, with reflective fields that show a little haziness and wisps of gold toning. The strike is razor-sharp, and a few hairlines and minor abrasions in the field explain the grade. Population: 44 in 62, 86 finer (9/10). (#7002)

### Scarce PR64+ 1859 Seated Dollar

- 3806 1859 PR64+ NGC. CAC.** The straw-gold fields and devices are framed by ruby-red and navy-blue iridescence. This fully struck near-Gem is well preserved despite a few delicate hairlines on the right obverse field. 1859 is the first year that proof mintages of silver dollars were recorded at the Philadelphia Mint. A mere 800 specimens were struck. (#7002)

### Select Proof 1862 Seated Dollar

- 3807 1862 PR63 PCGS.** Consistent apricot-gold toning blankets this nicely mirrored and lightly abraded Select proof. The strike is generally bold, with slight bluntness limited to Liberty's thighs and the upper portion of the left (facing) wing. A scant 550 proofs were issued for this Civil War date. Population: 52 in 63, 38 finer (9/10). (#7005)

### Seldom-Seen 1862 Seated Dollar, PR64

- 3808 1862 PR64 NGC.** This Civil War issue is difficult to locate in either business strike or proof format. Especially elusive in this respected grade, the present example shows deeply mirrored surfaces. The thin veil of milky patina hardly diminishes the ice-white appearance of both sides. Just a few scattered hairlines are reported in the fields, mostly on the reverse side. With detail that is as sharp as the blade of a sword, this important coin should elicit strong bids from silver dollar specialists. Census: 48 in 64, 22 finer (9/10). (#7005)

### Gem Proof 1862 Seated Liberty Dollar Spectacular Toning

- 3809 1862 PR65 NGC.** The government suspended specie payments in 1862, due to financial uncertainty occasioned by the Civil War, and proof coins were only available through a costly and time consuming ordering procedure. Vividly toned in iridescent shades of golden-brown and violet, this extraordinary Gem is one of the finest survivors of the tiny proof mintage of 550 pieces. Pinpoint definition is evident on all design elements, and only the tiniest imperfections can be detected in the reflective fields. Census: 13 in 65, 8 finer (9/10). (#7005)

---

### Gem Cameo Proof 1866 Motto Seated Dollar

- 3810 1866 Motto PR65 Cameo NGC.** This is a jaw-dropping beauty from the beginning of the With Motto Seated dollar proof series, stunningly toned with thick frost on the devices. Boldly mirrored fields offer contrast through rich patina, silver at the centers with a progression to gold-orange and eventually to blue and violet, which appears on the reverse rims but extends into the fields on the obverse. Out of the original mintage of 725 specimens, few can boast the combination of Cameo status, color, and careful preservation offered here. Census: 9 in 65 Cameo, 8 finer (9/10). (#87014)

---

### 1869 Seated Dollar, PR63 Low Proof Production

- 3811 1869 PR63 PCGS.** The 1869 Seated dollar had an exceptionally large mintage of business strikes with 423,700 struck. But only 600 proofs were produced. This is a deeply reflective proof that has slightly contrasted devices. The coin has obviously been cleaned at one time, thus accounting for the brightness and PR63 grade, but the strike is complete in all areas and there are no singularly detracting contact marks. (#7017)

---

### Gorgeous PR65 1870 Seated Dollar

- 3812 1870 PR65 PCGS.** With an official mintage of 1,000 proofs, the 1870 is tied for second among Seated dollars for proof production, tied with 1861 and topped only by 1860. In practice, many survivors are heavily hairlined or impaired, which makes this Gem specimen all the more remarkable. This coin is housed in a green label holder, and it raises an intriguing question as to whether PCGS would deem it Cameo today. Frost is readily evident over the devices on each side, and the mirrors are similarly strong. Dappled gold and blue patina covers the obverse, while the reverse has sharper separation of the colors, and considerable contrast persists despite the toning. For non-Cameo coins, Population: 16 in 65, 4 finer (9/10). (#7018)

---

1870 Seated Liberty Dollar, PR62 Cameo  
Reflective Fields, Attractive Patina

- 3813 1870 PR62 Cameo PCGS.** A generous mintage of 1,000 proof Seated Liberty dollars was accomplished in 1870, but the issue has a relatively low survival rate. Examples in PR62 condition, with the Cameo designation are quite rare today. The present coin is lightly patinated in iridescent shades of lavender and golden-brown. The fields are brightly reflective under the patina, contrasting boldly with the needle-sharp, frosty devices. Population: 7 in 62 Cameo, 31 finer (9/10). (#87018)

- 3814 1871—Improperly Cleaned—NCS. Proof.** One of 960 proof specimens struck for this later Seated dollar issue. Retoned in blues and greens after a cleaning that left reflective luster only at the margins.  
*From The Diotte Collection. (#7019)*

---

1872 Seated Liberty Dollar, PR63

- 3815 1872 PR63 PCGS.** From a reported mintage of 950 pieces, the 1872 proof Seated Liberty dollar is a scarce date in any grade. The present coin is a nice Select example, with iridescent gold, lavender and powder blue patina. The design elements are sharply detailed throughout, but the reflectivity of the fields is somewhat muted by the toning. Population: 46 in 63, 69 finer (9/10).  
*From The Diotte Collection. (#7020)*

- 3816 1873—Obverse Improperly Cleaned—NGC Details. Proof.** A token mintage of 600 proof Seated Liberty dollars was accomplished in 1873, but many pieces probably went unsold. With the advent of the Trade dollar that year, the Seated Liberty design was retired. The coin offered here is an attractive specimen, in spite of the listed cleaning, with spectacular rings of green, violet, and golden-brown toning. The devices are sharply detailed. (#7021)

---

TRADE DOLLARS

---

1873 Trade Dollar, MS63  
Good Luster and Evenly Toned

- 3817 1873 MS63 PCGS.** The 1873 Trade dollar is the first issue for the series, which was created as part of the "Crime of '73" that legislated a record number of changes into U.S. numismatic history. Although nearly 400,000 business strike 1873s were struck, the vast majority were exported to China, and many of the survivors have chopmarks.

Pinkish-gray toning combines with satiny luster to give this Select Mint State piece delightful eye appeal. There are relatively few abrasions for the grade, and those present do not affect the prime focal points. The strike is crisp save for the usual softness on several stars and Liberty's head. Population: 28 in 63, 53 finer (9/10). (#7031)

---

Choice AU 1873-CC Trade Dollar

- 3818 1873-CC AU55 PCGS.** Scarce in all grades, this is an unquestionably original coin. The coin was obviously circulated for a short time, then pulled out of circulation, and since has been allowed to tone naturally, achieving a medium gray patina with darker accents within the recesses. The only surface flaw of any note is a shallow scratch on the lower reverse. (#7032)

---

Scarce, Low-Mintage 1873-CC Trade Dollar, AU58

- 3819 1873-CC AU58 PCGS.** Only 124,500 pieces were struck of the 1873-CC Trade dollar, and survivors are seldom located finer than AU. This is a pleasing example that retains surprising amounts of mint luster in the fields. The strike is strong overall and the surfaces are light gray with occasional accents of golden. There are no notable marks on either side of this attractive CC dollar. (#7032)

- 3820 1875-S MS60 NGC.** Type One Reverse. The striking details are strong in all areas except the upper stars on the obverse and Liberty's hair, as usually seen. The surfaces are remarkably lustrous for the grade with gray-golden toning and minimal abrasions for the grade. (#7039)

### Popular 1875-S Trade Dollar, MS64

- 3821 1875-S MS64 NGC. CAC.** Type One Reverse. Large S. Gunmetal-gray and caramel-gold alternate across this dusky and lustrous Choice Trade dollar. A good strike overall, with moderate incompleteness on Liberty's hair and the right (facing) claw. The reverse is well preserved, while the minor obverse marks are consistent with the grade. (#7039)

### Lustrous 1875-S Trade Dollar, MS64

- 3822 1875-S MS64 NGC.** Type One Reverse. The Large S mintmark is shallow, with all other design elements boldly defined. This Choice Mint State example has frosty luster beneath gray-brown patina, with hints of gold and iridescent toning. Examples of this plentiful Trade dollar issue are rarely found finer. NGC has only certified 40 higher grade pieces (9/10). (#7039)

- 3823 1877-S MS60 PCGS.** Large S. The fields are bright and semireflective, flashing forcefully through the mostly brilliant surfaces. Just a hint of occasional golden-brown color is seen over each side. The striking details are strong throughout over each side. Certified in a first generation holder.  
*From The ALG Collection.* (#7046)

### Stunning Gem 1877-S Trade Dollar

- 3824 1877-S MS65 PCGS.** Large S. Because of the large mintage—highest of the series—approaching 10 million pieces, the 1877-S is the most common Trade dollar—in chopmarked circulated condition. At the Gem Mint State level, however, “common” is not an appropriate description. While a few dozen examples survive in this grade, making the 1877-S an excellent type coin choice, it is still a conditionally elusive (and much in-demand) issue. The lustrous surfaces on this stunning Gem are silver tinged with lilac-pink, and virtually mark-free on either side. A high-end piece for a fine collection. Population: 25 in 65, 7 finer (9/10). (#7046)

- 3825 1878-S MS62 NGC.** Type Two Obverse, Type Two Reverse. The devices are sharply struck throughout and light in color with occasional dabs of golden around the margins. The fields are lightly marked, the exception being a pinscratch below the G in GRAINS. (#7048)

---

## Important MS67 1878-S Trade Dollar, One of Four Superb Gem Business Strikes for the Type at NGC

**3826 1878-S MS67 NGC.** The 1878-S Trade dollar issue marks an important nexus in the history of U.S. silver dollar production. The Trade dollars were on their last legs. The 1878 Carson City and San Francisco Trade dollars would prove to be the last circulation issues; 1879-1883 were proof-only issues, and the famous 1884 and 1885 proofs were produced under suspicious circumstances not relevant here. In 1878 the Morgan dollars were seeing their initial year of production at those same mints.

The 1876-S through 1878-S Trade dollars were produced in quantities of 5.2 million, 9.5 million (a series record), and 4.2 million coins, respectively—enormous figures for any coin of the era. The 1878-S Morgan dollar took up the reins from the fading series, issued to the extent of 9.8 million pieces.

It is no coincidence that those enormous silver dollar production figures coincide with the peak years of Nevada's fabled Comstock Lode, which from 1876 through 1878 is estimated to have produced silver bullion worth about \$36 million *each year*. The mine's bullion production would slowly dwindle until about 1892, when the "bottom of the barrel" began to be scraped.

The present Superb Gem Mint State business strike is an equally important representative of this historic numismatic era. The rich mint luster is exceptional. Each side is beautifully toned with copper-rose center and irregular daubs of pale blue, interspersed with an occasional brilliant patch. The strike is full, even at the top of the obverse, an area usually incompletely struck. The only mark that will suffice for pedigree purposes is in the field below Liberty's extended arm.

While proof Trade dollars at the PR67 level are neither common nor extremely uncommon, a *business strike* Trade dollar at the MS67 grade level is a momentous rarity. NGC has certified only four business strikes, including all Trade dollar issues, at that grade level, and this piece is—unsurprisingly—the only 1878-S so certified at NGC (9/10). Opportunities such as this one are fleeting in the world of numismatic auctions; prepared bidders will act accordingly. (#7048)

## PROOF TRADE DOLLARS

### 1874 Trade Dollar, PR64 Ultra Cameo Second Finest Certified in Ultra Cameo at NGC

- 3827 1874 PR64 Ultra Cameo NGC.** The 1874 proof Trade dollar has a low reported mintage of 700 pieces. The issue also has a low survival rate, as many examples were spent for face value, and impaired proofs are often seen in today's market. As a result, the 1874 is one of the rarest, most underrated coins in the series. This lovely specimen features deeply mirrored fields, with mostly brilliant surfaces, accented by hints of gold at the rims. The devices exhibit razor-sharp definition, and the frosty texture contrasts dramatically with the brightly reflective fields. NGC has certified only this coin in PR64 Ultra Cameo, with a single example finer (9/10). (#97054)

### 1876 Trade Dollar, PR63 Deep Cameo Very Rare Deep Cameo Example

- 3828 1876 PR63 Deep Cameo PCGS.** Type One Obverse, Type Two Reverse. The 1876 proof Trade dollar enjoyed a substantial mintage of 1,150 pieces, but high quality examples are more difficult to locate than the mintage would suggest. This specimen exhibits deeply mirrored fields with boldly contrasting frosty devices. The surfaces are mostly brilliant, with subtle hints of gold toning at the peripheries. A few hairlines in the obverse field explains the grade. Select proof examples, with the Deep Cameo designation are extremely rare. Population: 2 in 63 Deep Cameo, 2 finer (9/10). (#97056)

- 3829 1880 PR62 PCGS.** From a proof-only mintage of 1,987 pieces. Although not awarded the Cameo designation, the present coin shows strong elements of field-device contrast. The fields are brilliant and reflective, with just a touch of haziness and a few dark color spots near the rims. The strike is outstanding, with full details on all devices. Housed in a green label holder. From *The Diotte Collection*. (#7060)

- 3830 1882—Damaged—NGC Details. Proof, AU.** This proof-only Trade dollar served a brief stint in commerce, where it picked up a moderate rim mark on the obverse at 2 o'clock. The obverse is almond-gold, and the reverse displays jade-green and plum-red near the rim. The fields are minutely granular, but hints of the initial luster remain within the devices and about the letters and stars. (#7062)

### Scarce 1883 Trade Dollar, PR63

- 3831 1883 PR63 PCGS.** The proof-only 1883 is the scarcest of the 1878-1883 proof Trade dollar issues. The essentially untuned surfaces of this Select example display a good deal of field-device contrast, especially when the coin is tilted slightly under a light source. Boldly impressed, and revealing no mentionable contact marks. Faint field hairlines are visible under magnification. (#7063)

*End of Session One*

## SESSION TWO

Floor, Telephone, Heritage Live!™, Internet, Fax, and Mail Signature® Auction # 1145

Friday, October 29, 2010, 1:00 PM ET, Lots 3832-4529

Stamford, Connecticut

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots

### EARLY PROOF SET

1887 Partial Minor-Silver Proof Set  
Featuring Morgan Dollar PR66 Cameo

- 3832 Six-Piece 1887 Proof Set NGC.** Six of the seven pieces that make up the complete set of 1887 minor-silver proofs; half dollar not present. Includes: **cent PR64 Brown**, deep rose and reddish-violet colors; **1887/6 three cent nickel PR66**, soft gold and blue accents on a pale pearl-gray base; **five cent nickel PR65**, light gold and rose overtones that lend themselves to a luster streak crossing the right arm of the V within the wreath; **dime PR66**, reddish-pink and blue-green colors over carefully preserved surfaces; **quarter PR66**, windows of peach against rich blue-violet and dusty-rose toning; and a **Morgan dollar PR66 Cameo**, star attraction of the lot, gold-toned across the fields with blue-violet edge toning and impressive frost on near-white devices. (Total: 6 coins) (#2348)

### FLYING EAGLE CENTS

1857 Flying Eagle Cent, MS65  
Sharply Struck, Great for Type

- 3833 1857 MS65 NGC.** This is a lovely Flying Eagle cent that would make an excellent type coin. The strike is strong on each side, with none of the often-seen weakness on the eagle's tailfeathers or reverse wreath. The underlying luster is bright and sparkling and both sides have taken on a significant overlay of rich red patina. (#2016)

Lovely Gem 1858 Large Letters Cent

- 3834 1858 Large Letters MS65 NGC.** Low Leaves Reverse, Closed E in CENT hubbed over Open E. An attractive Gem example of the large letters type, largely peach-gold with deeper blue overtones visible along parts of the reverse rims. A well-defined coin that shows doubling on the final A in AMERICA, though this doubling is shelflike and likely strike doubling. (#2019)
- 3835 1858 Small Letters MS64 PCGS.** Low Leaves Reverse, Closed E in ONE. Strong green and copper-orange colors with a handful of prominent flyspecks on the edge of the eagle device. (#2020)

**Choice 1858/7 Flying Eagle Cent  
Rare Early Die State Example**

**3836 1858/7 MS64 PCGS. Snow-1.** The 1858/7 Flying Eagle cent was produced when a left-over 1857 die was overdated and pressed into service in 1858. Experts estimate the original mintage at 100,000 pieces, and Richard Snow estimates a surviving population of around 2,000 examples in all grades. Most of the survivors are from late states of the die, when polishing had removed much of the evidence of the underlying 7. Specimens from the earlier die state, like the present coin, are much more desirable than these later pieces. Snow believes only 300 or so examples would qualify as early die state specimens, and knowledgeable collectors prize these coins highly.

The present coin is an attractive Choice specimen, with bright red and lavender surfaces. The strike is sharp in most areas, but all examples of this issue show a little softness on the eagle's tail feathers. The obverse also shows the characteristic "broken wing tip" that appears on many 1857 varieties. This piece is a remarkable Choice Mint State example of this rare and sought-after overdate. Population: 24 in 64, 5 finer (9/10). (#2022)

**INDIAN CENTS**

**3837 1859 MS64 PCGS. CAC.** An attractive Choice specimen of this one-year type coin, the surfaces display light green and ice-blue toning, and a razor-sharp strike. Eye appeal is outstanding. Housed in a green label holder. (#2052)

**1859 Indian Cent, MS65  
Much of the Original 'White' Color Remaining**

**3838 1859 MS65 PCGS. Eagle Eye Photo Seal.** This is a remarkably well-preserved example of this essential one-year type coin. The strike on the obverse is complete, and on the reverse there is just a bit of softness on several leaves on the wreath. The copper-nickel composition made these coins difficult to strike up properly and it also gave them a peculiar "whitish" appearance. Most copper-nickel cents have turned in the years since production, but this one retains much of its original white-gray surface with a slight accent of rose. (#2052)

**3839 1867/67 MS64 Red and Brown ANACS. Snow-1, FS-301.** The 67 is clearly repunched north. This numismatic prize has pleasing cartwheel sheen and rich chocolate-brown fields and devices. Orange-gold fills generous portions of the borders. Well struck save for the top of the shield. Struck from boldly clashed dies. Housed in an ANA cache holder. (#92089)

**3840 1870 MS64 Red and Brown PCGS.** Dusky copper-orange and peach hues mingle with mahogany and walnut-brown. A well struck Choice coin that is uncommonly appealing for this earlier bronze Indian cent issue. PCGS has graded 53 finer Red and Brown pieces (9/10).  
*From The Classic Collection.* (#2098)

**3841 1871 MS64 Red and Brown PCGS. CAC. Bold N.** The orange-gold color approaches full Red but glimpses of olive are present and pinpoint flecks are distributed across the peripheries and central reverse. Lustrous and fully struck with no evidence of abrasion. (#2101)

**3842 1871 MS64 Red and Brown PCGS. Bold N.** A dusky but delightfully lustrous near-Gem that has deep pumpkin-orange hues in addition to brick-red and mahogany. Well struck on the whole, though the diamonds on the ribbon are incomplete. (#2101)

### Lovely 1872 Indian Cent, MS65 Brown

- 3843 1872 MS65 Brown PCGS.** Bold N. A well-defined specimen of unusually fine surface quality for the time. Though this piece is classified as Brown, considerable reddish-peach elements remain visible, mainly at the margins. The interiors are more violet-brown with occasional suggestions of a woodgrain texture. Population: 7 in 65 Brown, 0 finer (9/10). (#2103)
- 3844 1872 MS63 Red and Brown PCGS.** Bold N. This low mintage cent is green-gold and rose-red with booming luster and an exemplary strike. A solitary faint curved mark on the obverse field is all that limits the grade. Encased in a first generation holder. (#2104)
- 3845 1873 Open 3 MS65 Red and Brown NGC.** More Red than Brown, although the left obverse field and the cheek have toned. A lustrous and meticulously struck Gem of this better date. Minimally abraded save for a solitary hair-thin line on the cheek. (#2107)
- 3846 1877 Good 6 NGC.** No letters of LIBERTY visible, but the surfaces are largely abrasion-free. Chocolate-brown with small glints of copper-orange that form a minor woodgrain effect. (#2127)
- 3847 1877—Improperly Cleaned—NGC Details.** VF. Ocean-blue highpoints contrast with tan-brown fields. One thin mark is noted within the upper reaches of the headdress. All letters in LIBERTY are evident, and the L and T are bold. The lowest mintage Philadelphia issue of the Indian type. (#2127)
- 3848 1877—Improperly Cleaned—NCS.** XF Details. This partly lustrous key date cent has unnatural lavender and forest-green toning. The fields display scattered tiny ticks, the portrait displays thin marks, and a moderate obverse rim ding is at 4:30. *From The Diotte Collection.* (#2127)
- 3849 1877—Improperly Cleaned—NGC Details.** AU. A lightly worn example of the famous key. Both sides sport surreal pink, rose-orange, and violet hues, the aftereffects of a past cleaning. (#2127)
- 3850 1877—Polished—NGC Details.** AU. Shallow N. This glossy key date cent is retoned in bright sun-gold, lime-green, and plum-mauve shades. Actual wear is marginal, and no marks are remotely consequential. (#2127)
- 3851 1878 MS65 Red and Brown PCGS.** A splendid Red and Brown Gem with satiny luster and sharp design details. This beauty is destined for a high grade collection of Indian cents. Both sides have considerable orange mint luster with blue-brown toning on the high points. (#2131)
- 3852 1891 MS65 Red PCGS.** CAC. This blazing Gem has bright orange luster with bold design details. Few Indian cents from this period surface with full mint luster, especially when free of carbon spots or other imperfections. Population: 66 in 65 Red, 7 finer (9/10). (#2180)
- 3853 1908-S MS65 Red NGC.** This beautiful honey-gold Gem has dynamic luster and impressive preservation. Boldly struck, and desirable due to a low mintage and its status as the first branch mint cent issue. Encased in a former generation holder. (#2234)

**3854 1909-S MS63 Brown NGC.** The 1909-S had a low mintage of just 309,000 pieces and is consequently one of the keys in the Indian Head cent series. The surfaces are mostly a mix of medium brown and khaki, with some purple accents and a few darker toning spots on the obverse. A loupe locates a few minor marks in the fields. (#2238)

**3855 1909-S MS64 Red NGC.** Straw-gold luster dazzles the obverse, while the equally lustrous reverse displays apricot color. Well struck save for the upper headdress tips. Faint contact on the jaw and distributed minute flyspecks deny an even finer grade. (#2240)

### PROOF INDIAN CENTS

#### 1861 Copper-Nickel Cent, PR64 Bright and Deeply Mirrored

- 3856 1861 PR64 PCGS.** CAC. This proof appears to have been double struck, unlike the appearance of some 1861s that show shallow mirroring and soft high point definition. Each side is bright and sparkling with just a trace of red over the original "whiteness" of the copper-nickel composition. A couple of carbon spots on the obverse explain the grade. Population: 55 in 64, 20 finer (9/10). (#2256)
- 3857 1862 PR64 Cameo PCGS.** CAC. This fully struck Choice copper-nickel cent lacks contact marks. Dazzling field reflectivity and consistent butter-gold color confirm the eye appeal. Cameo contrast is particularly evident on the reverse. Population: 20 in 64 Cameo, 37 finer (9/10). (#82259)
- 3858 1872 PR64 Red PCGS.** Bold N. A stunning near-Gem proof, this cent has bold design features on both sides with brilliant orange color that is slightly subdued on the reverse. Population: 39 in 64 Red, 19 finer (9/10). (#2305)
- 3859 1875 PR65 Red and Brown PCGS.** CAC. Snow-PR3 with repunching above the top of the 5. This boldly defined Gem proof has nearly full red color with only slight mellowing on each side. The strike is bold and the surfaces are blemish-free. (#2313)
- 3860 1888 PR65 Red and Brown PCGS.** CAC. Dusky honey-gold and ruby-red embrace this satiny and needle-sharp Gem. A lovely specimen that has clean surfaces with only a smidgen of carbon. (#2352)
- 3861 1899 PR63 Red and Brown NGC.** CAC. The color is the real story on this well struck Select example. Windows of pale copper-pink give way to lavender and blue in swirls on the obverse and as a pool within the wreath on the reverse. (#2385)
- 3862 1906 PR65 Red PCGS.** A wonderful Gem proof with brilliant orange color and splashes of violet toning on both sides. This piece is boldly defined and carries excellent eye appeal. Population: 20 in 65 Red, 15 finer (9/10). (#2407)

## LINCOLN CENTS

- 3863 1909 VDB MS67 Red NGC.** A gorgeous peach-red Superb Gem with minimal carbon and only a couple of inconsequential grazes on the upper left obverse field. Fully struck aside from the designer's initials, which are nonetheless clear. Housed in a former generation holder. (#2425)
- 3864 1909 VDB MS67 Red PCGS.** Potent luster dazzles the pristine surfaces of this pumpkin-orange Superb Gem. A fully struck representative of this single year design subtype. Encapsulated in a green label holder.  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 5368, which realized \$1,322.50. (#2425)*
- 3865 1909-S VDB VF25 NGC.** The all-important VDB initials are bold on this chocolate-brown key date cent. The lines in the wheat ears are complete. A loupe reveals the occasional field mark, with the most apparent on the obverse near 2 o'clock.  
*From The Diotte Collection. (#2426)*
- 3866 1909-S VDB VF25 NGC.** This tan-brown series key cent has the expected wear on the portrait, but the wheat ears and legends remain crisp. No abrasions are of any consequence, and a single small spot above the initials is of little import. (#2426)
- 3867 1909-S VDB VF30 PCGS.** A pleasing middle-grade example of this all-time collector classic. Nicely defined and problem-free with consistent golden-brown toning. The lowest mintage business strike issue of the series.  
*From The Diotte Collection. (#2426)*
- 3868 1909-S VDB VF30 PCGS.** An attractive, circulated example of one of the most sought-after issues in 20th century U.S. coinage, this piece shows moderate, even wear on the devices, with the important initials plainly legible. The surfaces are light brown, with occasional glints of red. (#2426)
- 3869 1909-S VDB—Improperly Cleaned—NGC Details. XF.** A moderately circulated but nonetheless richly detailed tan-brown example of this series key. Faint hairlines cross the obverse, but none are seen on the reverse. (#2426)
- 3870 1909-S VDB—Improperly Cleaned—NGC Details. AU.** This satiny key date cent is sharply struck and has minimal if any wear from circulation, but it is recolored bright sun-gold. No marks are remotely of interest, but a few pinpoint spots are present, along with a slender streak on the right obverse field. (#2426)
- 3871 1909-S VDB—Obverse Planchet Flaw—NGC Details. AU.** A lamination from 7 o'clock to Lincoln's jaw has partially peeled on the shoulder. The reverse has a slender retained lamination that extends diagonally from the C in CENT to the C in AMERICA. The jaw and cheekbone show slight wear, but satin luster shimmers across the unmarked tan-brown and sea-green surfaces. An interesting mint error on a popular key date. (#2426)
- 3872 1909-S VDB AU55 NGC.** A satiny chocolate-brown example of this famous key date. A well struck cent with a hint of friction on the cheekbone. Free from marks, and each side has only a single small spot.  
*From The Diotte Collection. (#2426)*
- 3873 1909-S VDB AU55 PCGS.** Glimpses of golden-brown visit the margins on this charming chocolate AU55 example. Lightly worn with few significant marks, a lovely key that would fit well in an otherwise Mint State set. (#2426)
- 3874 1909-S VDB—Altered Color—NGC Details. Unc.** A well-defined example of the famous key date with no trace of wear. The plum obverse and the pink-and-orange reverse are artificially toned, yet intriguing. (#2426)

**3875 1909-S VDB—Altered Color—NGC Details. Unc.** Lustrous and fully struck with mark-free surfaces, but deceptively recolored in rose-gold and aqua shades with blushes of steel-gray on the lower half of the reverse. (#2426)

**3876 1909-S VDB—Altered Color—NGC Details. Unc.** A well-defined example of the key date with no trace of wear. The fields have an unusual and unnatural mix of copper and blue-green colors, the latter appearing mostly at the reverse margins. (#2426)

---

### 1909-S VDB Lincoln Cent, MS64 Red and Brown Sought-After Key Date

**3877 1909-S VDB MS64 Red and Brown PCGS.** The 1909-S VDB is a coin whose fame and desirability extend far beyond the boundaries of the Lincoln cent series. Virtually every collector of U.S. coins has dreamed of owning an example of this exalted issue. The present coin is an attractive Choice Mint State specimen, with a sharp strike, pleasing red surfaces, with areas of light brown color, and good mint luster. The all-important initials are particularly sharp on this example. (#2427)

---

### Popular 1909-S VDB Cent, MS64 Red and Brown

**3878 1909-S VDB MS64 Red and Brown PCGS.** Housed in a first-generation PCGS holder is a lustrous example of the always-popular 1909-S VDB cent, the important key issue to a complete Lincoln cent collection. This piece has satiny red luster with intermingled deep bluish-lilac and light tan patina. (#2427)

---

---

#### Gem Red and Brown 1909-S VDB Cent

- 3879 1909-S VDB MS65 Red and Brown PCGS. CAC.** The famous first-year Lincoln key, offered here as a Red and Brown Gem. The well-defined obverse has lavender and olive overtones across the centers with only glimpses of peripheral orange, though the reverse offers a better balance between the colors. Housed in an early-generation green label holder. PCGS has graded just 30 finer Red and Brown representatives. (#2427)
- 

#### Brilliant 1909-S VDB Cent, MS64 Red

- 3880 1909-S VDB MS64 Red PCGS.** Just a few tiny spots prevent a higher grade on this near-Gem 1909-S VDB cent, with its fully brilliant light orange surfaces and frosty luster. This issue is arguably the single most popular 20th century American coin of any denomination or composition. (#2428)
- 

#### Desirable 1909-S VDB Cent, MS64 Red

- 3881 1909-S VDB MS64 Red PCGS.** A desirable example of this key date that retains vibrant Red coloration, although a trace wood grain streaks can be seen on the obverse and a minor stain near the T of CENT. Boldly struck throughout, and always in fervent demand. Now that the Lincoln cent has surpassed 100 years since they were introduced, it is remarkable that any from the first year look as good as the present coin. A paltry mintage of 484,000 pieces has always seen ample demand to keep collectors vying for those that do cross the auction block. (#2428)
- 

---

#### Fiery 1909-S VDB Cent, MS66 Red

- 3882 1909-S VDB MS66 Red PCGS.** This first-year issue is easily the most famous Lincoln cent, a coin whose reputation grew as generations of collectors struggled to fill out Whitman folders, some succeeding, many more leaving a lonely blue-and-black hole at the start. This Red Premium Gem, however, is no mere hole-filler; it is a coin for the highest-level collector. Both sides are rich pumpkin-orange with light olive overtones. A few color variations appear along the right obverse border, but the surfaces are well-preserved overall with a few tiny grazes. Housed in a green label holder. PCGS has graded only a handful of finer Red representatives, just nine in total (8/10). (#2428)
- 
- 3883 1913-S MS64 Red PCGS.** Dusky fire-orange and pumpkin-gold color with a faint fingerprint at the upper reverse. Well struck overall but with significant weakness at the top left part of the O in ONE. (#2467)
- 3884 1914-D XF40 PCGS.** A deep brown key date cent with subtle rose and olive undertones. The portrait displays moderate wear, but field marks are minor, and the lines of the wheat ears are distinct. (#2471)
- 3885 1914-D AU55 PCGS.** An appealing mahogany-brown example of this key date Lincoln cent. The details are sharply defined and there are just a few nearly microscopic abrasions. (#2471)

### Popular Near-Mint 1914-D Cent

- 3886 1914-D AU58 NGC.** Just a touch of friction crosses the high points on this well struck 1914-D cent, not nearly enough to dissuade a collector from adding it to an otherwise Mint State set. Richly toned surfaces are satiny with a touch of gloss, reddish-brown with rose and lavender color in parts of the fields. (#2471)

### Pleasing Gem Red 1914-D Lincoln Cent

- 3887 1914-D MS65 Red PCGS.** A key date within the Lincoln cent series, the 1914-D Lincoln cent, with a mintage of only 1.193 million pieces, is elusive in all grades, quite rare at the Gem Red level, and higher-grade Red pieces are virtually unobtainable. Although the mintage was considerably higher than the first series key, the 1909-S VDB, the 1914-D was saved in much smaller numbers than its first-year counterpart.

Copper-gold luster enlivens this pleasing Gem specimen. The design features are uniformly well-impressed, including Lincoln's hair and shoulder, areas that are often weak on the issue. A few light flecks scattered about the obverse are undistracting. Housed in a green label holder. Population: 55 in 65 Red, 3 finer (9/10).  
Ex: Los Angeles Signature (Heritage, 7/2009), lot 1037, which realized \$17,250. (#2473)

- 3888 1914-S MS64 Red PCGS.** Copper-gold luster envelops both sides of this near-Gem early branch mint cent. Sharply struck except for weakness on the left side of the left wheat stalk. Two small spots are near the stem of the right wheat stalk. (#2476)

### Elusive 1915-S Lincoln, MS64 Red

- 3889 1915-S MS64 Red PCGS.** An elusive, mintmarked date in the series, this specimen is very boldly struck with an even reddish-pink color. Scattered dark spots limit the grade. A noticeable green spot resides in the left obverse field. Population: 49 in 64 Red, 32 finer (9/10). (#2485)

- 3890 1916-S MS64 Red PCGS.** This appealing and lustrous branch mint near-Gem is sun-gold with obverse tints of lime and rose. The strike is generally crisp, although the right border of the right wheat ear shows selected softness. (#2494)

### Blazing Red 1919-D Cent, MS65 Fully Struck With No Evidence of Metal Flow

- 3891 1919-D MS65 Red PCGS. CAC.** The 1919-D is not a particularly scarce issue among early Lincolns, but it is seldom found with this degree of preservation. Both sides have even cherry-red color with almost no variation in hue. Many 1919-D cents were struck from moderate to heavily worn dies. This piece was not. There is no evidence of high point softness or metal flow. Rarely is this issue found with all these attributes combined on the same coin. Definitely high-end for an MS65 and suggestive of an even higher grade. Population: 57 in 65 Red, 12 finer (9/10). (#2518)

- 3892 1919-S MS64 Red PCGS.** Fire-red dominates this lustrous Choice early branch mint cent, although wisps of olive also emerge. All marks are minor, and the strike is good despite the usual softness on the top of the O in ONE. Housed in a green label holder. (#2521)

- 3893 1921-S MS63 Red PCGS.** Booming luster and a good strike combine with consistent peach-gold color to ensure the eye appeal. A few minute gray obverse spots near 3 o'clock, and the reverse has two minor retained laminations above the E in ONE and on the LU in PLURIBUS. (#2536)

**1922 No D Lincoln Cent, XF45  
Desirable Strong Reverse Variety**

- 3894 1922 No D Strong Reverse XF45 PCGS. CAC.** The 1922 No D Lincoln cent is a prized issue in the series, with three varieties known to present-day numismatists. The most desirable of these varieties is designated the Strong Reverse by PCGS, and was created when the D mintmark was effaced from an obverse die that was polished to remove clashmarks. The present coin shows light, even wear on the devices, with smooth, light brown surfaces, and no trace of the D mintmark. (#3285)

**1922 'Plain' Cent, XF45  
Strong Reverse, Die Pair Two**

- 3895 1922 No D Strong Reverse XF45 PCGS. CAC.** This is the desirable Strong Reverse variety, also known as Die Pair Two, with deep brown surfaces. The obverse has no trace of the mintmark, unlike those from Die Pair One or Three. Due to the nature of the strike, grading is always done by the reverse alone. A desirable representative.  
*From The Classic Collection.* (#3285)

- 3896 1923-S MS63 Red PCGS.** An orange-gold better date cent with smooth surfaces and good luster. A couple of small obverse spots correspond to the grade. A strike-through (as coined) is noted left of the O in ONE. (#2548)
- 3897 1924-D MS64 Red PCGS.** The obverse is unabraded and displays consistent straw-gold color. The reverse has faint marks and a variegated wood-grain appearance. The strike is good except for Lincoln's shoulder and the opposite O in ONE. (#2554)
- 3898 1924-S MS63 Red PCGS.** A well struck and unabraded example of this conditionally rare San Francisco issue. Primarily orange-red, although the portrait displays carbon and the central reverse has blushes of plum-red and cobalt-blue. (#2557)
- 3899 1925 MS67 Red PCGS.** Bold copper-gold luster with orange overtones through the central reverse. A gorgeous Superb Gem that is tied for numerically finest among Red examples graded by PCGS (9/10). (#2560)
- 3900 1926 MS67 Red PCGS.** Strong copper-orange luster on the obverse with occasional deviations into gold and apricot on the reverse. A great Red Superb Gem that shows a single small flyspeck above the 6 in the date. (#2569)

- 3901 1926-D MS64 Red PCGS.** Attractive copper-gold luster invigorates both sides of this near-Gem cent. A good strike, since only the O in ONE lacks precise definition. PCGS has certified fewer than 50 pieces finer (9/10).  
*Ex: Long Beach Signature (Heritage, 2/2010), lot 177, which realized \$1,725.* (#2572)

- 3902 1926-S MS64 Brown PCGS.** The 1926-S is scarce at this MS64 level and rare any finer. Glimpses of red in the protected areas enhance the mostly chocolate-brown surfaces. Careful inspection reveals only a couple of tiny flecks and handling marks. Population: 36 in 64 Brown, 4 finer (9/10). (#2573)

**1926-S Lincoln Cent, MS64 Red and Brown  
Key, Low-Mintage Issue**

- 3903 1926-S MS64 Red and Brown PCGS.** The 1926-S Lincoln cent boasts a low-mintage of 4.5 million pieces, and the date has always been prized as a series key. The present coin is sharply struck for a '26-S, which almost always shows a weak strike on coins with any red color. The surfaces of this piece show bright luster, and mostly red surfaces, with areas of light brown. Currently, only 12 coins have been certified in higher numeric grades with the Red and Brown designation at PCGS (9/10). (#2574)

- 3904 1927-S MS64 Red PCGS.** Slight striking softness at the portrait, though this Choice coin has many other redeeming features, chief among them well-preserved reddish-orange fields. The upper left obverse shows a faint fingerprint fragment. Housed in an old green label holder. (#2584)

- 3905 1931-D MS65 Red PCGS.** For an issue seldom seen with such bright, lustrous surfaces, this is an unusually attractive and important example. A few light flecks are noted on each side. PCGS has certified only 30 Red coins finer (9/10). (#2617)

- 3906 1941 Doubled Die Obverse MS64 Red PCGS. FS-101.** This doubled die has considerable doubling on most peripheral obverse features, though the most visible points are the B in LIBERTY and the 4 in the date. An attractive near-Gem, mostly bright copper-orange with a patch of dotted green at the reverse interior. (#92695)

- 3907 1943-D/D MS65 PCGS. FS-501.** This *Guide Book* repunched mintmark is among the most dramatic of the 20th century, with a bold undermintmark to the southwest that is so well-separated that the two letters D look almost like interlocking initials. Generally light steel-gray surfaces are well-preserved save for a few minor scrapes and spotting. For the variety, Population: 37 in 65, 30 finer (9/10). (#2715)

- 3908 1955 Doubled Die Obverse—Planchet Flaw—NGC Details. XF. FS-101.** Lines of planchet lamination on both sides appear as reddish-gold over deep steel surfaces. While light wear is visible, traces of satiny cartwheel luster are evident.

- 3909 1955 Doubled Die Obverse—Improperly Cleaned—NCS. AU. FS-101.** Bold doubling of the date and the peripheral obverse lettering has made this variety famous. While the present example is excessively glossy from a past cleaning, the green-accented blue-brown surfaces show little actual wear.  
*From The Diotte Collection.* (#2825)

- 3910 1955 Doubled Die Obverse—Whizzed—NCS. AU Details. FS-101.** A well-defined and modestly worn example of the classic doubled die. The surfaces are whizzed, and the blue-violet and pink-orange overtones give this piece a surreal appearance. *From The Diotte Collection. (#2825)*

**Doubled Die 1955 Cent, MS64 Brown  
Faint Traces of Red Around the Devices**

- 3911 1955 Doubled Die Obverse MS64 Brown PCGS. FS-101.** The ever-popular 1955/55 Doubled Die is a strong performer in all grades. This is an important Choice quality representative whose otherwise toned, gray-brown surfaces reveal blushes of crimson-red luster in the protected areas around the borders. The devices are well-defined. A pair of abrasions in the right obverse field, and a third one in the center of the reverse, explain the MS64 grade. (#2825)

**Famous Doubled Die Obverse 1955 Cent  
MS64 Red and Brown**

- 3912 1955 Doubled Die Obverse MS64 Red and Brown PCGS. CAC. FS-101.** A gorgeous example of the famous 1955 Doubled Die Obverse cent, an "instant classic" that sparked broader interest in coin collecting, as well as numismatists' interest in doubled dies. This lustrous near-Gem has mainly violet-brown surfaces, though areas of bright pinkish-orange appear at the margins and through the left side of ONE CENT. PCGS has graded only five finer Red and Brown representatives (9/10). (#2826)

**Always-Popular 1955 Doubled Die Cent  
MS64 Red and Brown**

- 3913 1955 Doubled Die Obverse MS64 Red and Brown PCGS. FS-101.** A lovely Red and Brown Choice Mint State piece with excellent eye appeal, this 1955 Doubled Die cent will certainly delight collectors with its deep orange mint luster and violet-brown toning. Discovered soon after it was produced, these cents have been popular with Lincoln cent collectors for over 50 years. (#2826)

**1964 Lincoln on Clad Dime Flan, MS65**

- 3914 1964 Lincoln Cent—Struck on a Clad Dime Planchet—MS65 PCGS. 2.3 grams.** An intriguing transitional error that proves the production of 1964 Lincoln cents in 1965 or later ... unless clad dime planchets existed on the production line in 1964. This Gem has hints of champagne toning over its lustrous light gray surfaces. The date is full although some other peripheral details are partially off the slightly smaller flan.

**1971 Doubled Die Cent, MS66 Red  
Bright, Original Surfaces**

- 3915 1971 Doubled Die MS66 Red NGC. FS-101.** There are four Doubled Die varieties of the 1971 cent, but only two are listed in the FS reference. Apparently a small hoard of these was found recently as seen by the increase in the number offered in recent auctions. The coin shows the characteristic "notched" effect is most prominent on the upper right corner of the 7, but the doubling appears prominently on many other areas: the loop of the 9, both tops of the Y, and LIBER. Also, the reverse is slightly rotated relative to the obverse. The surfaces are bright cherry-red with slight orange streaks interspersed. Myriad die polishing marks are seen over each side which obviously account for the brightness of the coin. (#92941)

## PROOF LINCOLN CENTS

### 1911 Matte Proof Lincoln Cent, PR65 Red A Lovely Example of This Low-Mintage Issue

- 3916** 1911 PR65 Red PCGS. CAC. An impressive and fully detailed Gem proof with matte surfaces. Both sides have rich orange mint color with a few insignificant spots and stains but no other defects. From a mintage of only 1,725 pieces, this is an exceptional and important Gem proof, exceeded by just 13 coins certified by PCGS in higher grades and with full red mint color (8/10).  
*Ex: Baxi Collection, Part of the PCGS Registry's Award Winning 1911 Proof Set. (#3311)*

### Fabulous PR66 Red 1912 Cent

- 3917** 1912 PR66 Red NGC. We cannot overstate the importance of this Gem full red proof Lincoln cent for specialists in this long-lived and popular series. Only two 1912 examples have received a PR66 Red grade from the major grading services: the present example and a specimen at PCGS. None are finer (9/10). As befits the issue, both sides display a coarse matte texture, undisturbed by even a single noteworthy handling mark, and each side has only two nearly microscopic carbon flecks. Needle-sharp striking definition characterizes all of the fully lustrous, straw-gold and orange features. From a middle to late state of the dies (see Lange's *Complete Guide to Lincoln Cents* for more information). (#3314)

### 1916 Lincoln Cent, PR65 Red and Brown Scarce, Low-Mintage Issue

- 3918** 1916 PR65 Red and Brown PCGS. Obverse 2, Reverse 2. This second die pairing is characterized by the faint die scratch at the top of the 9 in the date, and on the reverse a faint scratch from the S of PLURIBUS to the E in ONE, among other diagnostics. This semikey to the matte proof series has an official mintage of 600 pieces, but 99 were rejected according to the Medal and Proof Book in the National Archives. This piece retains generous portions of original mint red with additional emerald-green and slight browning. The matte surface is pronounced, and the striking details are completely defined, as only seen on a proof. Population: 47 in 65 Red and Brown, 13 finer (9/10). (#3325)

### 1971-S Doubled Die Obverse Lincoln Cent Blazing PR69 Red Cameo, FS-101

- 3919** 1971-S Doubled Die Obverse, Type Two, PR69 Red Cameo NGC. FS-101. Die doubling is most evident on IN GOD, TRUST, LIBERTY, and slightly on the date. One of two doubled dies for the 1971-S and the less dramatic of the two. The surfaces are essentially perfect and display deep mirroring in the fields with sharply contrasting mint frost over the devices. Census: 2 in 69 Cameo, 0 finer (9/10). (#83533)

### 1990 No S Cent, PR68 Red Deep Cameo A Highly Popular No S Proof Coin

- 3920** 1990 No S PR68 Red Deep Cameo PCGS. FS-101. As the lone No S proof variety to appear in the Lincoln Memorial series, the 1990 No S is highly popular with series enthusiasts. This Superb Gem has impressively mirrored copper-orange surfaces that offer delightful contrast with the sharp, richly frosted devices. Population: 67 in 68 Deep Cameo, 21 finer (9/10). (#93506)

**3921 1998-S Close AM PR69 Red Deep Cameo PCGS.** Outstanding contrast and eye appeal with pale copper-gold color that is simply marvelous, whether frosted or mirrored. Coined from a business-strike-design reverse that has the letters AM of AMERICA close to one another. Population: 61 in 69 Deep Cameo, 0 finer (9/10). (#93529)

**3922 1999-S Close AM PR69 Red Deep Cameo PCGS. FS-901.** The Close AM 1999-S proof cents were made with a reverse design type intended only for business strikes. This is a strongly reflective and boldly contrasted example, lightly milk-spotted but otherwise virtually flawless. Population: 92 in 69 Deep Cameo, 0 finer (9/10). (#38222)

## TWO CENT PIECES

**3923 1864 Large Motto MS65 Red PCGS.** Though a touch of spotting is noted at the right obverse, the reverse remains bright copper-orange. Well-defined and a solid Gem example of this popular type issue, housed in a green-label PCGS holder. (#3578)

**3924 1865 MS65 Red PCGS.** Plain 5. The 865 in the date is repunched, most noticeably within the lower loop of the 6. Well struck except for NIT in UNITED. A lustrous Gem that has bright gold color and immaculate surfaces. A small carbon fleck left of the prominent 2 is of little importance. Housed in a green label holder. (#3584)

**3925 1867 MS65 Red and Brown PCGS. CAC.** A lustrous Gem that mixes copper-peach, rose, and mahogany on each side. Well-defined and pleasing with few spots. Housed in a green label holder. Population: 51 in 65 Red and Brown, 2 finer (9/10). (#3592)

### 1872 Two Cent Piece, MS62 Brown Last Business-Strike Issue

**3926 1872 MS62 Brown NGC.** The year 1872 saw the last business-strike mintage of two cent coins, with a meager production total of 65,000 pieces. Examples in MS62 condition, with the Brown designation, are quite rare today. The present coin is a well struck specimen, with a touch of softness showing on the motto. The surfaces display an intermingled red and brown patina, with much original mint luster still evident. Census: 1 in 62 Brown, 7 finer (9/10). (#3612)

## PROOF TWO CENT PIECES

**3927 1866 PR65 Red and Brown PCGS.** The obverse has strong copper-orange luster, while the reverse is framed in the same color but has deep blue-violet at the core. An attractive Gem that is housed in a second-generation holder. Population: 54 in 65 Red and Brown, 10 finer (9/10). (#3631)

**3928 1868 PR64 Red PCGS.** Eye-catching mint luster radiates from the surfaces, which boast occasional light blue accents. The strike is razor-sharp, as one would expect from a proof. Several small flyspecks limit the grade. A proof mintage of just 600 pieces is estimated. (#3638)

**3929 1871 PR65 Red and Brown PCGS.** A delightful Gem with brilliant orange surfaces and hints of pale brown toning on both sides. Quite a few similar pieces have been graded, but few any finer. Population: 71 in 65 Red and Brown, 12 finer (9/10). (#3646)

## THREE CENT SILVER

**3930 1851-O MS64 NGC.** Soft golden toning over a luminous obverse and a brighter reverse. This well struck near-Gem hails from the only branch mint three cent issue, silver or nickel. (#3665)

**3931 1852 MS65 PCGS. CAC.** From a series-record mintage of more than 18 million pieces, the 1852 three cent silver piece is the favorite issue with type collectors. The present coin is a well struck Gem, with pink, gold, and amber toning. Significant amounts of original mint luster shine through the patina. (#3666)

**3932 1854 MS64 NGC.** Soft silver luster at the centers with bolder colors, mainly gold but also deep-blue green, at parts of the borders. A lovely near-Gem example of this earlier three cent silver issue. (#3670)

**3933 1857 MS64 NGC.** Gold and peach overtones grace swirling surfaces that are light silver underneath. A distinctly pleasing near-Gem that shows only minor overall striking softness. (#3673)

### Premium Gem 1858 Trime Last Year of Type Two Design

**3934 1858 MS66 NGC.** More than 1.6 million silver three cent coins were minted in 1858, the last year of the Type Two design, with a double set of lines around the star. High grade survivors are scarce today, and examples in Premium Gem condition are rare. The present coin is sharply detailed in most areas, but some weakness is evident in the outside line around the star. The mostly brilliant surfaces show light traces of gold and lavender toning. Census: 13 in 66, 12 finer (9/10). (#3674)

**3935 1859 MS64 PCGS.** Mottled green and blue patina graces the surfaces of this 1859 silver three cent piece, a well struck Choice Mint State example, with no mentionable distractions. Population: 80 in 64, 39 finer (9/10). (#3677)

**3936 1861 MS66 NGC.** Many issues from the early Civil War days are rarities due to hoarding, but the diminutive three cent silver piece may have escaped their attention. Premium Gem examples are scarce, though not rare. This lovely example has iridescent splashes over satiny silver surfaces with bold design definition. (#3679)

**3937 1862 MS65 PCGS.** A substantial mintage of 343,000 trimes was accomplished in 1862, but few examples circulated because of Civil War hoarding and specie restrictions. The present coin is a sharply detailed Gem, with mottled gray and lavender patina. Original mint luster shines through the toning. (#3680)

**3938 1867 MS64 NGC.** A lustrous near-Gem with swirls on the surfaces. Light golden tints grace the margins, while the centers of this post-Civil War coin have a silvery shine. Census: 9 in 64, 11 finer (9/10). (#3687)

**Gem 1870 Three Cent Silver  
Rare Issue So Fine**

- 3939 1870 MS65 PCGS. CAC.** The 1870 silver three cent piece enjoyed a large mintage of 1.3 million pieces, but its high grade survival rate is quite low. Examples in Gem condition are very rare in today's market. The present coin is a spectacular Gem, with iridescent lavender and gold toning and sharply defined devices. Population: 9 in 65, 5 finer (9/10). (#3691)

**PROOF THREE CENT SILVER**

**1858 Silver Trime, PR64+ ★  
Only One Coin Finer in the Category**

- 3940 1858 PR64+ ★ NGC.** The 1858 proof silver three cent piece boasts a low mintage of 300 pieces (or less by some estimates). The present coin is the only Choice specimen to be awarded both the plus and star designations by NGC, and only one specimen in higher numeric grade has received both accolades (9/10). Alternate bands of gold, green, and lavender toning enhance the reflective surfaces of this example, and all design elements are sharply rendered. (#3705)
- 3941 1859 PR64 Cameo PCGS. CAC.** From a mintage of just 800 pieces, the 1859 three cent silver piece is rare with the Cameo designation. The present coin is a brightly mirrored Choice specimen, with sharply detailed devices and wisps of gold and green toning. Clashmarks from the shield can be detected on the central reverse. Population: 5 in 64 Cameo, 1 finer (9/10). (#83708)
- 3942 1861 PR64 Cameo PCGS.** Icy devices and reflective fields combine for a visual delight. This sharply struck Choice proof is well preserved despite a small spot near the R in AMERICA and a few faint hairlines and the left reverse field. Population: 16 in 64 Cameo, 2 finer (9/10). (#83710)
- 3943 1862 PR64 PCGS.** Jade-green, straw-gold, and lavender alternate across this intricately impressed near-Gem. An undisturbed Civil War specimen. A stingy 550 proofs were produced. Population: 62 in 64, 25 finer (9/10). (#3711)

**Fantastic PR66 1863 Three Cent Silver**

- 3944 1863 PR66 NGC.** A tantalizingly toned Premium Gem representative of this Civil War-era three cent silver proof issue, one of just 460 pieces produced. Both sides are intensely reflective through mostly blue-green patina that takes on pink elements in the centers, particularly on the reverse. Census: 14 in 66, 7 finer (9/10). (#3712)

**1863 Three Cent Silver, PR66  
Finest Certified at PCGS**

- 3945 1863 PR66 PCGS Secure.** The 1863 proof trime boasts a mintage of only 460 pieces, produced under difficult circumstances at the height of the Civil War. The glittering surfaces of this impressive Premium Gem are enhanced by intermingled shades of green and lavender toning. The design elements are strongly impressed, and eye appeal is outstanding. Population: 8 in 66, 0 finer (9/10). (#3712)

**Gorgeous 1863 Three Cent Piece, PR67**

- 3946 1863 PR67 NGC. CAC.** Business strike coins of the Civil War era are generally rare, and the 1863 three cent silver is no exception. As a result, proof examples are in great demand. This Superb Gem proof has full cameo contrast, despite the lack of a Cameo designation. Both sides are mostly brilliant with peripheral gold and blue toning. Census: 6 in 67, 1 finer (9/10). (#3712)

**1863 Trime, PR67+ Ultra Cameo  
Single Finest Certified in Ultra Cameo**

**3947 1863 PR67+ Ultra Cameo NGC.** The 1863 proof trime boasts a minuscule mintage of 460 pieces. Business-strike mintage of the silver three cent piece was sharply curtailed that year, due to Civil War hoarding, putting even more pressure on the tiny proof mintage. Experts agree proof examples are rare in grades up to PR65, and very rare in any higher grade.

The fields of this spectacular Superb Gem are deeply mirrored, and all design elements are fully brought up in frosty relief. The profound field-device contrast of this piece is rarely seen on small silver coins. The present coin is the only silver three cent piece of any date to be certified in PR67+ Ultra Cameo, and no examples have been certified in higher numeric grade within the designation by either of the leading grading services (9/10). (#93712)

**3948 1864 PR66 PCGS Secure.** The rich orange-gold centers are bounded by electric-blue margins. Intricately struck and immaculate. Just 470 proofs were struck for this Civil War date. Population: 17 in 66, 5 finer (9/10).(#3714)

**3949 1864 PR64+ Cameo PCGS. CAC.** A hint of gold toning visits the glassy fields and radiant devices. Sharply struck, and limited in grade only by mint-made pinpoint strike-throughs that are mostly relegated to the reverse. A mere 470 proofs were issued for this penultimate Civil War date. Population: 1 in 64+ Cameo, 19 finer (9/10).(#83714)

**1865 Silver Three Cent Piece, PR66  
Prized Civil War Date**

**3950 1865 PR66 NGC.** Only 500 proof trimes were minted in 1865, making Premium Gem proof specimens quite rare today. The present coin is vividly toned in shades of violet and green, with brightly reflective fields under the toning. The devices are sharply detailed, and no mentionable distractions are noted. Census: 17 in 66, 8 finer (9/10). (#3715)

**1867 Three Cent Silver, PR67  
Richly Toned and Nearly Perfect**

**3951 1869 PR67 NGC.** This little jewel offers aqua and lavender patina on both sides with considerable luster present on the devices, despite the deep toning. This fully struck Superb Gem shows no singular distractions at all, even under a loupe. The proof mintage was 600 coins, although divided between the normal date and the 1869/8 overdate. Census: 8 in 67, 0 finer (9/10). (#3719)

**Fantastic PR67 ★ 1870 Three Cent Silver**

**3952 1870 PR67 ★ NGC.** An enchantingly toned and strongly mirrored specimen from late in the three cent silver series. Light frost graces the devices, though contrast is subdued. Gray centers with rings of green-gold and cerulean at the borders, wider on the reverse. NGC has graded just one numerically finer example (9/10). (#3721)

**3953 1871 PR65 ★ NGC.** Faintly contrasted on each side with narrow bands of gold-green close to the rims. Attractively mirrored and carefully preserved, a memorable specimen. NGC has graded just 28 numerically finer coins (9/10).(#3722)

**3954 1872 PR65 PCGS. CAC.** Iridescent cobalt-blue, apple-green, and sun-gold shadings encompass this undisturbed Gem. The strike is full aside from the upper shield border. One of only two examples certified by CAC as PR65. Population: 29 in 65, 16 finer (9/10).(#3723)

---

**1873 Three Cent Silver, PR65  
Closed 3 Type**

**3955 1873 Closed 3 PR65 NGC. CAC.** A nominal mintage of 1,100 proof trimes was struck in 1873, all with the closed 3 in the date. The present coin is a pleasing Gem specimen, with a sharp strike, and mottled green and violet toning over sparkling, reflective fields. Examples in Gem condition are quite scarce. Census: 63 in 65, 30 finer (9/10). (#3724)

---

**THREE CENT NICKEL**

**3956 1873 Open 3 MS64 PCGS. CAC.** A lustrous slate-gray near-Gem that appears devoid of contact, although the reverse border displays pinpoint flecks and the obverse has a pair of unobtrusive mint-made strike-throughs. The Open 3 1873 is the only three cent nickel issue unavailable in proof format. Population: 31 in 64, 15 finer (9/10).(#3740)

---

**PROOF THREE CENT NICKELS**

**1865 Three Cent Nickel, PR64 Cameo  
First Date of Design**

**3957 1865 PR64 Cameo PCGS. CAC.** Only 500 proof three cent nickel pieces were produced in 1865, the first year this denomination was minted in this composition. The present coin is a delightful Choice example, with dramatic field-device contrast, and wisps of light green toning. Population: 12 in 64 Cameo, 46 finer (9/10).(#83761)

**3958 1869 PR65 Cameo NGC.** Impressive frost on the portrait and wreath will delight the next owner of this sharply struck and carbon-free Gem. Minor mint-made strike-throughs are the sole imperfections. Early proof dates within the series have low mintages. For the 1869, only 600+ proofs were issued. Census: 40 in 65 Cameo, 22 finer (9/10).(#83765)

**3959 1871 PR65 PCGS. CAC.** A mintage of 960 proof three cent nickel pieces was achieved in 1871. The present coin is a sparkling Gem example, with sharply detailed devices and brightly reflective fields. A minor abrasion in the obverse field, near S in STATES, is the only mark of note.(#3767)

**3960 1871 PR65 Cameo PCGS.** The obverse is mostly brilliant with some faint toning, while the reverse has a more even mix of light brown and silver-gray. The deeply reflective fields and frosty devices combine to give this well preserved piece captivating Cameo contrast. Fewer than 1,000 proofs are believed to have been issued. Population: 12 in 65 Cameo, 5 finer (9/10).(#83767)

**3961 1872 PR66 Cameo PCGS.** Delicate honey-gold toning graces this unabraded and undisturbed Premium Gem. The design elements are boldly defined, and although the depth of mirrored reflectivity is modest, there is noticeable contrast on each side. Population: 7 in 66 Cameo, 0 finer (9/10).(#83768)

**3962 1873 Closed 3 PR66 Cameo NGC.** Light gold-olive patina drapes the gleaming surfaces of this Cameo Premium Gem. Well-defined central devices have attractive frost. Census: 17 in 66 Cameo, 1 finer (9/10).(#83769)

---

**Lovely PR66 Ultra Cameo  
1876 Three Cent Nickel**

**3963 1876 PR66 Ultra Cameo NGC.** Outstanding contrast by the standards of the three cent nickel proof series. Both sides show delicate tints, pale blue on the outside with subtle rose at the interiors. Carefully preserved with laudable detail, an all-around appealing coin. Census: 9 in 66 Ultra Cameo, 1 finer (9/10).(#93772)

**3964 1878 PR67 Cameo NGC.** Traces of almond-gold visit this predominantly brilliant Superb Gem. Imperfections are few and far between even when inspected beneath a loupe. A razor-sharp example of this proof-only issue. Census: 27 in 67 Cameo, 1 finer (9/10).(#83774)

**3965 1878 PR67 Cameo PCGS.** The 1878 three cent nickel is a proof-only issue, with a mintage of 2,350 coins. Survivors in PR67 Cameo are very rare. The present coin is a magnificent Superb Gem, with deeply mirrored fields that contrast boldly with the frosty devices. Only one coin has been certified in higher numeric grade with the Cameo designation at PCGS and NGC combined (9/10).(#83774)

**Glimmering 1878 Three Cent Nickel  
PR68 Cameo, Sole Finest Graded at NGC**

- 3966 1878 PR68 Cameo NGC.** One of three proof-only issues in the three cent nickel series, along with the 1877 and 1886 issues, the former with a much-lower mintage, the latter with a much-higher. Although NGC has certified several hundred examples of the 1878, this piece is the only PR68 certified at that service in any contrast level, with the Cameo designation a kicker. The finest of the issue at PCGS is one PR68 non-Cameo example (9/10). The untuned, gleaming, pristine surfaces present the coveted silver-on-black contrast between devices and fields, verging on Ultra Cameo. A splendid coin for the issue, perfect for a type or date representative. Census: 1 in 68 Cameo, 0 finer (9/10). (#83774)

**SHIELD NICKELS**

- 3967 1866 Rays MS65 NGC.** Pleasing luster resides on the soft golden-tan surfaces of this lovely Gem. Well struck except for the usual incompleteness in the horizontal shield lines. Both sides are free of significant marks or spots. This date is in high demand as the first-year-of-issue and as a type coin. (#3790)
- 3968 1867 No Rays MS65 PCGS.** Prized by type collectors as the first date of the No Rays design, the 1867 No Rays Shield nickel claims a huge mintage of nearly 29 million pieces. The present coin is a sharply struck Gem, with lustrous surfaces and light touches of gold patina. Population: 67 in 65, 11 finer (9/10). (#3794)

**PROOF SHIELD NICKELS**

- 3969 1867 No Rays PR65 Cameo PCGS.** A layer of delicate golden-brown and purple assumes slightly deeper hues on the reverse of this Gem Cameo. A squiggly lint mark is evident on the upper reverse. Exquisitely struck throughout and minimally marked. Population: 14 in 65 Cameo, 13 finer (9/10). (#83821)
- 3970 1871 PR66 NGC.** This highly reflective Premium Gem has just a hint of toning at the center of the reverse. The strike is full, as one would expect from a proof, and the surfaces appear virtually pristine. One of fewer than 1,000 proofs struck. Census: 24 in 66, 5 finer (9/10). (#3825)
- 3971 1877 PR58 PCGS.** The 2011 *Guide Book* lists the mintage of proof 1877 Shield nickels as 510+ pieces, and the denomination was only produced in proof format that year. The present coin is a lightly circulated example, with sharply detailed devices and light lavender patina. (#3831)
- 3972 1878 PR66 NGC.** This Premium Gem proof is a lovely representative of the proof-only 1878 Shield nickel. The design motifs are sharply impressed and the surfaces exhibit satiny luster with reflective fields. Most surviving examples of this issue have a similar appearance, reminiscent of business strikes despite their proof-only status. (#3832)

**1879 Shield Nickel, PR67 Cameo  
Among the Finest Cameos Certified**

- 3973 1879 PR67 Cameo NGC. CAC.** This is the overdate variety, although not attributed as such by NGC as they do not recognize the variety. The easiest way to identify these overdates is not by looking at the date, but rather by the tiny spike that projects from the top right of the ball directly above the date. An impressive Superb Gem, this lovely piece has brilliant nickel-gray surfaces with intense contrast between the mirrored fields and lustrous devices. Census: 8 in 67 Cameo, 0 finer (9/10). (#83833)
- 3974 1883 PR65 PCGS. CAC.** A proof mintage of 5,419 Shield nickels was struck in 1883, the last date of the design. The present coin is sharply struck, with mirrored fields that show a degree of haziness in some areas. (#3838)

## LIBERTY NICKELS

- 3975 1883 No Cents MS67 NGC.** Delicate lime, peach, and ice-blue toning adorns this lustrous and precisely struck Superb Gem. A hoarded variety, but infrequently seen in such exemplary quality. Certified in a prior generation holder. Census: 50 in 67, 0 finer (9/10). (#3841)

### Superb Gem 1883 Liberty Head Nickel Famous No CENTS Variety

- 3976 1883 No Cents MS67 PCGS.** A magnificent Superb Gem specimen of the famous 1883 No CENTS Liberty Head nickel. This delightful example displays razor-sharp details on all design elements, with vibrant mint luster, and hints of light golden toning. Examples in MS67 are rare today, and no coins have been certified in higher numeric grades by PCGS or NGC (9/10).  
*From The Classic Collection.* (#3841)
- 3977 1890 MS65 PCGS. CAC.** Uncommonly bright and frosty luster, largely nickel-white with touches of blue at the interiors and green-gold at parts of the margins. Well-defined on the obverse stars, though the lower wreath on the obverse shows more typical softness. Population: 43 in 65, 11 finer (9/10). (#3851)
- 3978 1895 MS65 PCGS. CAC.** Apple-green and autumn-brown encompass this shimmering and well preserved Gem. The strike is good despite incompleteness on the left ear of corn and a couple of stars. Population: 53 in 65, 10 finer (9/10). (#3856)
- 3979 1898 MS66 PCGS.** Faint almond-gold toning blankets this highly lustrous and fully struck Premium Gem. Impressively free from contact, and the eye appeal is exceptional. Population: 19 in 66, 1 finer (9/10).  
*From The Classic Collection.* (#3859)
- 3980 1907 MS66 PCGS. Ex: Larry Shapiro.** Dazzling luster emanates from the ice-blue and almond-gold surfaces. Though the stars show slight softness, the portrait is well-defined, and the overall visual appeal is exemplary. Population: 25 in 66, 0 finer (9/10). (#3868)
- 3981 1912-S MS63 PCGS.** The almost entirely pale gray obverse contrasts nicely against the reddish-gold patina that envelops the reverse. This well struck example has no distracting marks. A nice example of this low mintage (238,000 pieces) issue. (#3875)

## PROOF LIBERTY NICKELS

- 3982 1886 PR66 PCGS. CAC. Breen-2542.** The 86 in the date is lightly repunched. This satiny and crisply struck specimen offers pastel ice-blue, straw-gold, and lilac toning. A lovely yet affordable representative of this key date. Population: 78 in 66, 17 finer (9/10). (#3884)
- 3983 1886 PR66 Cameo NGC. CAC.** From a relatively large mintage of 4,290 pieces, the 1886 proof Liberty Head nickel is always in demand because business strikes of the date are elusive. The present coin displays dramatic contrast between the strongly impressed devices and the deeply mirrored fields. Census: 20 in 66 Cameo, 6 finer (9/10). (#83884)

### Amazing 1891 Liberty Nickel, PR66 Deep Cameo

- 3984 1891 PR66 Deep Cameo PCGS.** An amazing Premium Gem Deep Cameo proof, and the finest such coin that PCGS has certified. This piece has light champagne toning over the deeply mirrored fields and highly lustrous devices. No spots or other blemishes are evident on either side. Population: 3 in 66 Deep Cameo, 0 finer (9/10). (#93889)

### Thickly Frosted PR64 Deep Cameo 1898 Nickel

- 3985 1898 PR64 Deep Cameo PCGS.** Absolutely stunning contrast for a Liberty nickel proof. Thickly frosted devices are exquisitely detailed, and the mirrors are remarkably potent. Even dappled green-gold and gray toning over parts of the fields cannot dim the cameo effect. Population: 2 in 64 Deep Cameo, 1 finer (9/10). (#93896)
- 3986 1899 PR66 NGC. CAC.** Light pink, blue, and gold patina drapes the impressive mirrors on this Premium Gem specimen. Razor-sharp detail and eye appeal in spades. (#3897)
- 3987 1902 PR67 NGC.** An exactly struck and boldly mirrored Superb Gem specimen from the beginning of the brilliant proof era. Light golden overtones appear mainly to the right. Census: 14 in 67, 1 finer (9/10). (#3900)
- 3988 1902 PR67 NGC.** This dramatically toned Superb Gem has bands of fire-red, orange-gold, powder-blue, and lime patina on both sides. The strike is close to full, and there are no detractors. Census: 15 in 67, 2 finer (9/10). (#3900)
- 3989 1909 PR66 Cameo NGC.** Impressive cameo contrast is formed by the deeply mirrored fields and frosted devices. The strike is full, and there are only a couple of insignificant contact marks. Census: 47 in 66 Cameo, 35 finer (9/10). (#83907)
- 3990 1909 PR67 Cameo NGC.** Light gold toning visits this satiny and immaculate Superb Gem. The portrait and wreath provide evident contrast, and the strike is good aside from the left ear of corn. Census: 28 in 67 Cameo, 7 finer (9/10). (#83907)
- 3991 1911 PR66 Cameo PCGS.** Pale gold and mint-green hues drape the liquid mirrors of this moderately contrasted proof Liberty nickel. Great eye appeal for this later date. Population: 26 in 66 Cameo, 7 finer (9/10).  
*Ex: Baxi Collection, Part of the PCGS Registry's Award Winning 1911 Proof Set.* (#83909)
- 3992 1912 PR66 Cameo PCGS. CAC.** Medium golden-brown toning is consistent throughout this razor-sharp Premium Gem. Void of spots or hairlines, and seldom encountered in such exquisite condition. Population: 17 in 66 Cameo, 4 finer (9/10). (#83910)

## BUFFALO NICKELS

- 3993 1913-S Type One MS66+ NGC. CAC.** A boldly detailed and splendid example of the Type One issue from San Francisco, this piece is attractive and desirable. Hints of gold toning are evident on the reverse. Census: 1 in 66+, 14 finer (9/10). (#3917)
- 3994 1913-S Type Two MS63 PCGS. CAC.** A softly struck but unworn Select example of this low-mintage Type Two issue, a Mint State survivor that is one of just over 1.2 million pieces struck. Gold and blue overtones grace nickel-gray surfaces that have quicksilver luster. (#3923)
- 3995 1913-S Type Two MS64 NGC.** Rose-gold and sky-blue accents enhance the eye appeal of this lustrous near-Gem. The tops of the letters in LIBERTY are mushy, but the rest of the details are crisp. Several minuscule handling marks on both sides are consistent with the grade. (#3923)
- 3996 1914-S MS65 NGC.** Subtle gold and sky-blue patination enhances the satiny surfaces of this carefully preserved representative. The Indian's hair and the Buffalo's shoulder are just a trifle soft. NGC has certified a mere 25 examples finer (9/10). (#3926)
- 3997 1915-S MS63 PCGS.** Mixed blue and gold-gray shadings with scattered flyspecks on the portrait. This well struck Select piece is housed in a green label holder. One of just over 1.5 million pieces struck. (#3929)
- 3998 1915-S MS64 PCGS.** Light pink and gold overtones grace impressively lustrous surfaces. A charming San Francisco near-Gem, minimally abraded and housed in a first-generation holder. (#3929)
- 3999 1915-S MS64 PCGS.** Well-defined on the bison's head, though the rest of the coin shows more typical softness. Light gold-orange color overall with hints of mint-green and sage. Housed in a PCGS green label holder. (#3929)
- 4000 1916-S MS65 PCGS.** A hint of red-gold toning blends with medium gray over both sides of this Gem. Soft luster highlights the crisply struck design elements. Magnification reveals a number of tiny marks, but none merit specific mention. PCGS has certified only 33 examples finer (9/10). (#3933)
- 4001 1917-S MS63 PCGS.** Above-average definition on the obverse, though the reverse shows incompleteness on the bison's horn and shoulder. A lustrous Select piece tinged in gold and pale green. (#3936)
- 4002 1918-D MS64 PCGS.** Well-defined save for the bison's shoulder. Light peach and sage toning mingles across each side. A lustrous and appealing near-Gem that is housed in a green label holder. (#3938)

### 1918-S Buffalo Nickel, MS63

- 4003 1918-S MS63 PCGS.** The 1918-S Buffalo nickel is a low-mintage date, in the context of the series, with 4.8 million pieces struck. The present coin is a pleasing select example, with sharply detailed devices and strong mint luster. A shallow abrasion on the Indian's cheek, and a few stray marks on the bison's shoulder explain the grade. Housed in a green label holder. (#3940)
- 4004 1919-D MS63 PCGS.** Light gray over softly struck centers with more golden color at the quicksilver margins. An appealing Select example of this challenging issue, housed in a green label holder. (#3942)

- 4005 1919-S MS63 NGC.** Surprisingly sharp for the issue, especially on the obverse that has LIBERTY fully separated from the rim. Both sides have satin luster and delicate iridescent toning. (#3943)

### Choice 1919-S Buffalo Nickel Unusually Sharp Details

- 4006 1919-S MS64 NGC.** The razor-sharp strike exhibited by this charming Choice Mint State specimen is seldom equaled on coins of this date. Regarding the 1919-S Buffalo nickel, Q. David Bowers relates "nearly all will lack detail at the center, and the bison will be rather glossy and smooth, with little fur detail." These areas are strongly impressed on the present coin, and the surfaces are lightly patinated in shades of gold and lavender. (#3943)
- 4007 1920-D MS64 PCGS.** Peach elements appear in thin skeins through the centers, while the rest of this impressively lustrous near-Gem has light nickel-blue and green colors. A charming coin that is housed in a green label holder. PCGS has graded 52 finer pieces (9/10). (#3945)

### 1920-S Buffalo Nickel, MS64

- 4008 1920-S MS64 NGC.** The 1920-S Buffalo nickel is relatively scarce in Mint State grades, especially with a sharp strike. The present coin is a pleasing Choice Mint State example, with streaky lavender toning on the obverse and hints of light gold on the reverse. The strike is better-than-average for the issue, with just a little softness on the bison's fur. NGC has graded only 16 coins in higher numeric grades (9/10). (#3946)

### Select 1921-S Buffalo Nickel Boldly Struck Example

- 4009 1921-S MS63 PCGS.** A low-mintage issue, only 1.5 million Buffalo nickels were struck at the San Francisco Mint in 1921. The present coin is a high quality MS63 example, with a sharp strike and attractive light golden patina. Subtle mint luster shines through the toning. Housed in an old green label holder. (#3948)

**Superb Gem 1923 Buffalo Nickel  
Among the Finest Certified**

- 4010 1923 MS67 PCGS.** The 1923 Buffalo nickel is known as a well produced issue, and the present coin is one of the finest examples of this highly regarded date. The quality of this coin is virtually impossible to improve upon, as PCGS has certified only nine other pieces in MS67, with none finer, while NGC has also graded ten Superb Gem specimens, with none finer (9/10). The coin offered here displays full details on all design elements, with vibrant mint luster and light shades of ice-blue toning. (#3949)
- 4011 1924-D MS64 PCGS.** Light peach and nickel-blue hues mingle on this softly lustrous near-Gem. Well struck for the date with a fully outlined and even rounded horn on the bison. Housed in a first-generation holder. PCGS has graded 94 coins finer (9/10). (#3952)
- 4012 1924-S—Whizzed—NGC Details. AU.** The surfaces appear microgranular when viewed beneath magnification. Deceptively retoned golden-brown and sea-green. A few small marks are concealed on the Indian's feathers. A low mintage branch mint issue usually seen in worn condition with partial dates. (#3953)

**1924-S Buffalo Nickel, MS63  
Scarce, Low-Mintage Date**

- 4013 1924-S MS63 ANACS.** The 1924-S Buffalo nickel boasts a low mintage of 1.4 million pieces, and the issue is scarce in the context of the series. The present coin is well struck, with just a little softness evident on the central devices. The surfaces are toned in shades of reddish-gray, ice-blue, and gold. The mint luster is a little subdued, as often seen on this issue. (#3953)
- 4014 1926-D MS64 PCGS.** Deep blue-green and purple inner toning with lighter golden elements dominating the margins. A colorful and well struck near-Gem that is housed in a green label holder. (#3958)
- 4015 1926-S XF45+ PCGS. CAC.** If die varieties are excluded, the 1926-S becomes the rarest issue of the series in better circulated grades. This cream-gray representative has glimmers of golden luster and is nearly free from marks. The reverse border has a minor retained lamination at 8 o'clock. (#3959)

**1926-S Buffalo Nickel, MS64  
Attractive Toning and Eye Appeal**

- 4016 1926-S MS64 NGC.** From a small mintage of 970,000 pieces, the 1926-S Buffalo nickel is a scarce issue in Choice Mint State condition. The present coin is well struck, with just a touch of softness on the central devices. Actually, the strike is better than average for this issue, as Q. David Bowers reports, "The strike is usually light on this variety. No Full Details coin has been reported." This specimen also possesses pleasing surfaces, with attractive ice-blue and light golden patina. The mint luster is full and satiny, under the toning. Only nine coins have been certified in higher numeric grades at NGC. (#3959)
- 4017 1927-S MS63 PCGS.** Rich mustard-orange color through the margins with lighter blues and greens on the inside. A Select coin that is attractive for the grade and well struck. Housed in a green label holder. (#3962)
- 4018 1929 MS66 NGC. CAC.** Light canary-gold toning graces this pristine and lustrous Premium Gem. The strike is precise except at the centers, which show the inexactness customary for the type. Census: 40 in 66, just 4 finer as MS66 ★ (9/10). (#3966)
- 4019 1937-D Three-Legged XF45 PCGS. FS-901.** Deep iron-gray toning overall with occasional peach shadings in the fields. This is a pleasing Choice XF coin with relatively smooth surfaces and pleasing detail for the type. (#3982)
- 4020 1937-D Three-Legged XF45 NGC. FS-901.** A steel-gray representative of this perennial collector favorite. Glimpses of luster remain. Wear on the bison's hair and hipbone is apparent, but variety diagnostics (such as the granular back legs) remain clear. *From The Diotte Collection.* (#3982)

**4021 1937-D Three-Legged—Improperly Cleaned—NGC Details. AU. FS-901.** Well struck for the variety with a full worn and only minor wear on elements such as the bison's shoulder. Peach-tinged gray surfaces are oddly luminous from a past cleaning.

**4022 1937-D Three-Legged AU55 NGC. FS-901.** Luster glimmers across this golden-brown and emerald-green key date nickel. Highpoint wear is minor, and the features specific to the variety (especially the absent foreleg) are all readily evident. *From The Diotte Collection. (#3982)*

**4023 1937-D Three-Legged AU55 NGC. FS-901.** This Choice AU dove-gray key date nickel is satiny and problem-free. The devices display a wealth of detail. Along with the 1922 No D cent, one of two widely collected die abrasion errors in American numismatics. (#3982)

**4024 1937-D Three-Legged AU55 PCGS. FS-901.** Chestnut-gold and dove-gray toning blankets this unmarked and partly lustrous key date nickel. The trail of die dots beneath the bison's flank, as well as other attribution features, are plainly visible. Housed in an old green label holder. (#3982)

**4025 1937-D Three-Legged AU58 PCGS. FS-901.** Soft peach-gold and blue shadings drape luminous surfaces on this near-Mint Three-Legged 1937-D nickel. Well-defined with few significant abrasions and just a touch of rub. (#3982)

---

### 1937-D Buffalo Nickel, MS62 Popular Three-Legged Variety

**4026 1937-D Three-Legged MS62 PCGS. FS-901.** A sparkling MS62 example of one of the most sought-after error varieties in 20th century coinage. The obverse is sharply struck, but the reverse shows the customary softness on the bison's fur, and, of course, the infamous die polishing has removed the bison's foreleg. The surfaces are brilliant and lustrous on both sides. (#3982)

---

## PROOF BUFFALO NICKELS

---

### 1913 Buffalo Nickel, PR65 Type One, Matte Proof Issue

**4027 1913 Type One PR65 NGC.** Always in demand as the first date of the popular Buffalo design, the 1913 Type One Buffalo nickel is also a one-year type coin. The matte proof mintage of this issue was only 1,520 pieces, and many examples were not saved over the years. This delightful Gem specimen is deeply toned in shades of ice-blue and forest-green. As expected with the matte proof issues, this coin is fully struck. (#3988)

**4028 1913 Type Two PR64 PCGS.** Soft gold and lilac patina covers both sides of this desirable Matte proof issue. Careful inspection under a glass reveals no notable contact marks. One of only 1,514 proofs struck. (#3990)

---

### Premium Gem Proof 1913 Buffalo Nickel Matte Proof, Type Two Example, Ex: Eliasberg

**4029 1913 Type Two PR66 PCGS.** The matte proof 1913 Type Two Buffalo Nickel claims a mintage of 1,514 pieces. Collectors prize the matte proof issues today, but they were not popular with collectors of the early 20th century, and many examples were not saved. The present coin is a magnificent Premium Gem specimen with an illustrious pedigree. The coin is fully struck, with satiny matte luster, and light shades of gold and ice-blue toning. Housed in a green label holder. *Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 811. (#3990)*

---

### Superb Gem Proof 1914 Buffalo Nickel Ex: Eliasberg

**4030 1914 PR67 PCGS.** The matte proof mintage of Buffalo nickels was only 1,275 pieces in 1914, and few survivors can match the quality of this spectacular Superb Gem. This coin is fully struck, with vibrant mint luster, and pristine surfaces. Vivid shades of ice-blue and gold toning grace both sides of this magnificent piece. This coin traces its history back to the fabled Eliasberg Collection, where it was one of the highlights of the Buffalo nickel section. Housed in a green label holder. *Ex: Louis E. Eliasberg Collection (Bowers and Merena, 5/1996), lot 814. (#3991)*

**4031 1915 PR65 NGC.** Deep rose-violet, nickel-blue, and gold-orange patina over a medium-gray base. A pleasingly preserved example from the popular earlier series of proof Buffalo nickels. (#3992)

---

**1916 Buffalo Nickel, PR65  
Scarce Matte Proof Issue**

- 4032 1916 PR65 PCGS.** From a tiny mintage of just 600 pieces, the 1916 matte proof Buffalo nickel is a scarce issue in all grades. The present coin is fully struck and the surfaces are attractively toned in shades of ice-blue and gold color. The matte proof finish was unpopular with collectors, and 1916 was the last year proof sets were minted until 1936. Housed in a green label holder. (#3993)

- 
- 4033 1936 Type One—Satin Finish PR66 PCGS.** Bold gold-orange and peach colors dominate the margins, while the centers have cooler nickel-gray and blue hues. A Satin Finish charmer that is housed in a green label holder. (#3994)

- 4034 1936 Type One—Satin Finish PR67 NGC.** Sharply impressed with better-than-average reflectivity for the Satin type. This carefully preserved Superb Gem has a faint layer of golden toning over nickel-white surfaces. (#3994)

- 4035 1936 Type Two—Brilliant Finish PR64 PCGS.** Boldly impressed with a chromelike gleam. Intense reflectivity overwhelms minor hairlines in the balance of this coin's eye appeal. (#3995)

- 4036 1937 PR66 NGC. CAC.** Champagne-gold toning over gleaming fields. A boldly struck and gorgeous Premium Gem specimen of the last proof Buffalo nickel issue. (#3996)

- 4037 1937 PR66 PCGS. CAC.** Delicate caramel-gold toning visits this immaculate Premium Gem. The strike is virtually complete, lacking only minor hair detail above the Indian's braid. The final year of proof Buffalo nickel production, although the basic design would surface again decades later on silver dollars and gold bullion issues. From *The Diotte Collection*. (#3996)

---

**1937 Buffalo Nickel, PR67  
A Spectacular Example**

- 4038 1937 PR67 PCGS. CAC.** Brilliant Finish Buffalo nickels are a wondrous type coin. They are remarkably scarce also considering the length of the series (1913-1938). The Brilliant Finish was only employed for half of 1936 and all of 1937, the remainder of the proofs (1913-1916) were of the Matte Finish. This is a spectacular, brightly reflective example that has just the faintest hint of ice-blue patina over the otherwise brilliant surfaces. (#3996)
- 

**SMS JEFFERSON NICKEL**

- 4039 1967 SMS MS68 Ultra Cameo NGC.** Final year of the Special Mint Set non-proofs, this piece certainly has the look of a full proof striking. The fields are deeply reflective on each side, and the devices show thick, contrasting mint frost, the combination of which gives this piece its Ultra Cameo appearance. The coin is brilliant throughout and there are no obvious contact marks. Census: 6 in 68 Ultra Cameo, 0 finer (9/10). (#94199)

**PROOF JEFFERSON NICKEL**

- 4040 1971 No S PR67 Deep Cameo PCGS.** An important rarity among modern proof issues is the 1971 Jefferson that lacks a mintmark. Both sides are brilliant with deeply mirrored fields and bright, frosty devices. Population: 10 in 67 Deep Cameo, 7 finer (9/10). (#94204)

**MERCURY DIMES**

- 4041 1916-D Good 4 NGC.** Well-worn with distinctive patina. Liberty's portrait and most of the reverse are light pearl-gray, but swirls of gold and royal-blue populate the obverse fields and emerge on the reverse. (#4906)

- 4042 1916-D VG10 NGC.** The devices show even wear over both sides and there are no large or detracting surface marks. Both obverse and reverse are bright, almost brilliant in fact, with an outline of charcoal surrounding the devices. (#4906)

- 4043 1916-D VG10 NGC.** This cream-gray series key has more detail than the typical '16-D dime, which grades AG3 to Good 4. On the present piece, the fasces show partial definition, and Liberty's eye is bold. The left obverse field has a couple of inconsequential thin marks. (#4906)

---

**Key 1916-D Mercury Dime, VF20**

- 4044 1916-D VF20 ANACS.** The 1916-D is the key to the Mercury dime series, and one of the most sought-after 20th century coins. The high points of the design elements all show visible wear on this specimen, but the major details, including the all-important mintmark, remain clear. The surfaces are a pleasing silver-gray color, with no serious distractions, and some traces of mint luster. (#4906)
-

---

**1916-D Mercury Dime, VF35  
Series-Low Mintage**

- 4045 1916-D VF35 ANACS.** Among 20th century coins, few issues are as ardently collected as the 1916-D Mercury dime. This piece is an attractive circulated example, with moderate, even wear on all design elements. The surfaces exhibit much original luster, and show traces of light gray and green toning. (#4906)

---

**1916-D Mercury Dime, AU Details  
Sought-After Key Date**

- 4046 1916-D—Improperly Cleaned—NGC Details. AU.** The series-low mintage of the 1916-D Mercury dime (264,000 pieces), and its status as a first-year type coin, has made this date a celebrated issue with a wide range of collectors. This piece is lightly circulated and sharply detailed, with mottled green toning. In spite of the noted cleaning, this example is an appropriate choice for most collectors seeking a representative of this storied issue. (#4906)
- 4047 1920-S MS64 Full Bands PCGS.** Medium peach-gold toning graces lustrous and refreshingly mark-free surfaces. An intricate strike confirms the PCGS designation. A delightful example of this conditionally important San Francisco emission. (#4933)
- 4048 1921 MS63 Full Bands NGC.** A well-defined Select example of this popular lower-mintage Mercury dime issue. Light silver-gray surfaces are satiny overall with areas of more granular texture. *From The Classic Collection.* (#4935)
- 4049 1923-S MS64 Full Bands PCGS.** Russet, lilac, and navy-blue shades encompass the margins, but the fields and devices are only faintly toned. An evenly struck near-Gem of this conditionally challenging San Francisco issue. Population: 54 in 64 Full Bands, 37 finer (9/10). *From The Classic Collection.* (#4941)

- 4050 1924-D MS65 Full Bands PCGS.** Housed in a green-label PCGS holder is a remarkable Gem Mercury dime, representing an issue that is seldom seen with such a sharp strike. Both sides are frosty and lustrous with delicate gold toning. (#4945)

- 4051 1925 MS66 Full Bands PCGS.** David Lange, in his *The Complete Guide to Mercury Dimes*, notes nearly all coins of this date display an overall softness in striking details. This example is an exception. Aside from the designated fullness in the central reverse, the peripheral areas of both sides are sharply struck. Pastel olive toning is accented by a couple of slender golden-brown streaks. Population: 47 in 66 Full Bands, 26 finer (9/10). (#4949)

- 4052 1925-D MS63 Full Bands PCGS. CAC.** Gold and tan peripheral toning elements with more silver interiors. A lustrous Select coin with boldly impressed bands on the reverse. Wispy abrasions contribute to the grade. (#4951)

- 4053 1926-S MS62 PCGS.** With a low mintage of 1.5 million pieces, the 1926-S Mercury dime is a scarce date in high grade. This charming MS62 example is sharply struck, with light gold and blue patina, and vibrant mint luster under the toning. Population: 7 in 62, 95 finer (9/10). (#4958)

---

**Low Mintage 1926-S Dime, MS67**

- 4054 1926-S MS67 NGC.** Sharply struck save for a little bit of bluntness in the center of the reverse, this lustrous Superb Gem displays lightly freckled peach-gold and apple-green patina. The underlying fields are frosty and exceptionally smooth. A high grade example of this popular low mintage branch mint issue. Census: 3 in 67, 0 finer (9/10). (#4958)

- 4055 1931-S MS65 Full Bands PCGS. CAC.** This gorgeous Gem Mercury dime is fully brilliant with no evidence of toning on either side. Population: 51 in 65 Full Bands, 41 finer (9/10). (#4987)

---

**Stunning MS68 Full Bands 1935 Dime**

- 4056 1935 MS68 Full Bands PCGS.** Faint blue overtones across shining silver surfaces with pale green and deeper crimson-brown elements along the lower and right reverse border. Sharply impressed and carefully preserved. This is one of seven MS68 Full Bands examples of the issue tied for finest certified by PCGS (9/10), and thus a Registry collector essential. (#4993)

- 4057 1939-D MS68 Full Bands PCGS.** Splendid apple-green, orange, and ruby-red toning dominates the left borders of this lustrous and fully struck dime. Examination with a lens reveals only infrequent pinpoint contact. Population: 86 in 68 Full Bands, 14 finer (9/10). (#5019)
- 4058 1941-S MS68 ★ Full Bands NGC.** Small S. Brilliant and semi-prooflike, two attributes that undoubtedly led NGC to bestow the elusive Star designation. Essentially perfect except for the slightest indifference of strike on the letters near the rims. Census: 8 in 68 ★ Full Bands, none finer (9/10).  
*Ex: Central States Signature (Heritage, 5/2005), lot 6789, which realized \$1,840. (#5033)*
- 4059 1942-D MS68 Full Bands PCGS.** A pristine World War II silver type coin that boasts exemplary luster and unimprovable preservation. The strike is precise, and splashes of forest-green and russet-red toning grace the margins. Population: 20 in 68 Full Bands, 0 finer (9/10).  
*Ex: Palm Beach Signature (Heritage, 3/2006), lot 529, which realized \$1,725. (#5039)*

## PROOF MERCURY DIMES

- 4060 1936 PR65 PCGS.** The obverse has a chromelike gleam under gold-and-gray toning, while the reverse has a more subdued appearance under thicker patina. A lovely Gem example of this popular first-year proof Mercury dime issue. (#5071)

### Elusive 1938 Mercury Dime, PR68 ★

- 4061 1938 PR68 ★ NGC.** An absolutely amazing Superb Gem proof Mercury dime with traces of champagne toning over the bright silver surfaces. Both sides are fully mirrored and fully struck, with faint cameo contrast still evident. High grade examples of this date are major condition rarities as the census data reveals. Census: 4 in 68 ★, 1 finer (9/10). (#5073)
- 4062 1942 PR68 ★ NGC.** Carefully preserved with jaw-dropping eye appeal. The interiors are minimally toned, while bold gold and ruby colors dominate the margins. NGC has graded just one numerically finer proof (9/10).  
*From The Diotte Collection. (#5077)*

## PROOF ROOSEVELT DIMES

- 4063 1970 No S PR69 NGC.** The famous missing-mintmark variety out of 1970, essentially perfect to the unaided eye. Minimally toned with perceptible contrast on each side, though this does not reach Cameo levels. Census: 6 in 69, 0 finer (9/10). (#5248)
- 4064 1970 No S PR67+ Cameo PCGS.** A mint worker at Philadelphia forgot to punch an S mintmark into one obverse die of proof 1970-S dimes. Upon arrival at San Francisco, the die passed inspection despite the error and was installed and used. Only a few hundred pieces have been certified, although undoubtedly additional examples lurk undiscovered in various attics and closets. Lightly toned and pristine with noticeable frost on the devices. Population: 1 in 67+ Cameo, 31 finer (9/10). (#85248)

## STANDING LIBERTY QUARTERS

### Key 1916 Standing Liberty, VG Details

- 4065 1916—Improperly Cleaned—NGC Details. VG.** A collectible representative of the famous 1916 Standing Liberty quarter. Delays in producing satisfactory hubs meant that the issue was not struck before mid-December 1916, which limited the mintage to only 52,000 pieces. Those were quietly released into circulation a month later, where they blended in with millions of 1917-dated quarters. This guaranteed the key date status of the 1916. This stone-gray example has sharp legends aside from the upper half of the date. Wispy hairlines are evident beneath TRVST.  
*From The Diotte Collection.*

### 1916 Standing Liberty Quarter, VF25 Sharply Detailed Date

- 4066 1916 VF25 NGC.** The limited production run of 1916 quarters makes this date a collector favorite in all grades. This is an especially pleasing coin for the grade. The surfaces are medium gray overall with faint traces of underlying blue and rose (magnification is required to discern these colors, though). The date is clear with the only weakness at the top of the digits. A loupe reveals a couple of shallow pinscratches on Liberty's drapery. (#5704)

**1916 Standing Liberty Quarter, Unc Details  
A Deeply Toned Example of This First-Year Issue**

**4067 1916—Artificial Toning—NGC Details. Unc.** There is a long list of various first-year issues that are popular with collectors, going back to the beginnings of the U.S. Mint. Many are one-year types. This is a long list that we will not complete here, but it includes the 1796 No Stars quarter eagle, the 1878 8 Tailfeathers Morgan dollar, the 1796 quarter, and the 1913 Type One Buffalo nickels. All of those are examples of “first-year types that are also one-year types.”

Then, among first-year types, there is a surprisingly large number of first-year types that are among two-year types, coin types that ran for two years only. Among this second group are the 1794 and 1795 Flowing Hair silver dollars, the 1873 and 1874 Arrows silver coins, and the 1916 and 1917 Type One Standing Liberty quarters.

The surfaces of this piece are well-preserved and show no trace of friction. For some reason, someone saw the need to artificially tone each side, giving the coin an unnatural dark blue and golden-red coloration. The striking details are sharp throughout, and there are no obvious or detracting abrasions.

**1916 Standing Liberty Quarter, MS62 Full Head  
Remarkably Lustrous and Attractive**

**4068 1916 MS62 Full Head NGC.** Produced late in the year, only 52,000 quarters of the new design by Hermon MacNeil were struck before the end of the calendar year. The 1916 and 1927-D are the keys to the regular-issue series. In the expanded series, the 1918 overdate is the preeminent rarity. But the 1916 has a reputation established over many decades as the “must-have” issue in this series, a reputation that predates the relatively new phenomenon of collecting full strikes and the absolute and condition rarity of the overdate. This piece combines both the classic appeal of the 1916 as a low-mintage key with the relatively new awareness of the rarity of this series with Full Head definition. The coin is remarkably lustrous for the grade with the usual matte-like granularity. Each side is brilliant with a faint accent of golden color around the margins. Excellent value in this highly sought after first-year issue. (#5705)

**4069 1917 Type One MS66 Full Head PCGS. CAC.** A sharply struck Premium Gem example of this popular type coin, with Full Head definition, and vibrant mint luster. Attractive gold, lavender, and ice-blue toning accent the pristine surfaces. (#5707)

**1917 Type One Quarter, MS67 Full Head  
A Spectacular Type Coin**

- 4070 1917 Type One MS67 Full Head NGC.** For type purposes the 1917 Philadelphia issue is hard to beat. This and the following lot are at the pinnacle of preservation for this two-year issue. This is a beautiful example that displays bright mint frost. The centers are brilliant and pinkish-golden while surrounded by deep russet at the peripheries. The strike could not be stronger on the obverse with complete definition on Liberty's head and full rivets on the shield. A couple of shallow abrasions are located below the motto on the reverse. (#5707)

**Outstanding MS67 Full Head 1917 Type One Quarter**

- 4071 1917 Type One MS67 Full Head NGC.** The surfaces on this piece display the granular, matte-like texture expected of a Type One, and both sides are overlaid with sparkling mint frost. Both obverse and reverse show light, even toning with slight reddish-golden toning. We see no mentionable or detracting abrasions on either side of this impressive coin. Census: 55 in 67 Full Head, 0 finer (9/10). (#5707)
- 4072 1917-D Type One MS65 Full Head PCGS. CAC.** A sharply struck Gem example of this two-year design, with Full Head details and just a little softness on the eagle's feathers. The lustrous surfaces are highlighted by shades of green and gray toning. (#5709)

**Brilliant 1917-D Type One Quarter  
MS66+ Full Head**

- 4073 1917-D Type One MS66+ Full Head NGC.** This highly lustrous Premium Gem has frosty and brilliant silver mint luster with no evidence of toning on either side. In addition to crisp head details, all other aspects of the obverse and reverse design motifs are full and complete. Just two Full Head examples of this date have received the additional + designation, both MS66+ specimens. Census: 2 in 66+ Full Head, 21 finer (9/10). (#5709)

**Radiant 1917-D Type One Quarter, MS67 Full Head**

- 4074 1917-D Type One MS67 Full Head NGC.** Radiantly lustrous surfaces display a melange of orange-red, forest-green, and gray-mauve patination. The sharp strike transcends the Full Head to incorporate strong definition on the shield and eagle's feathers. Impeccably cared-for surfaces are devoid of any significant abrasions. A nice mintmarked example of the Type One issue for type or date collectors. Census: 19 in 67 Full Head, 2 finer (9/10). (#5709)

- 4075 1917 Type Two MS66 Full Head PCGS.** Uncommonly well-defined for this first-year Type Two Standing Liberty quarter issue. Satiny silver surfaces have light gold and rose overtones. Population: 61 in 66 Full Head, 7 finer (9/10). (#5715)

**1917-S Type Two Quarter, MS65 Full Head  
Thickly Frosted Surfaces**

- 4076 1917-S Type Two MS65 Full Head NGC.** The bright mint frost should be sufficient to identify this coin as a San Francisco product, rather than the soft frosted or satin finish seen on P and D-mint quarters. The S-mint is far scarcer than the other two issues and a reasonable case can be made for its being overlooked as the Type Two 1917 issues are not collected to the same extent as the Type Ones. While an arm's length glance at first gives one the impression this is a brilliant coin, closer examination reveals a slight overlay of pale golden patina. Pleasing overall quality. Census: 22 in 65 Full Head, 14 finer (9/10). (#5719)

**Bold 1917-S Type Two Quarter, MS66+ Full Head**

- 4077 1917-S Type Two MS66+ Full Head NGC.** A fully brilliant Premium Gem, this Type Two quarter has a bold strike, as sharp as any we have handled. Both sides have soft, frosty silver luster with faint champagne toning to enhance the eye appeal. A wonderful specimen for an advanced collection. Census: 10 in 66 Full Head, 4 finer (9/10). (#5719)

- 4078 1918-D MS64+ PCGS. CAC.** Strong silver luster with excellent surface quality for the near-Gem tier. Well struck overall, though the shield shows its usual softness and the head is flat. (#5722)
- 4079 1918-D MS64 Full Head NGC.** A stone-white Choice Standing Liberty quarter that offers shimmering luster and mark-free surfaces. The shield rivets and date are surprisingly well struck. A small strike-through is noted beneath the M in UNUM. (#5723)
- 4080 1918-S MS66 NGC.** This highly lustrous specimen is untuned and essentially pristine. Only a couple of pin-sized handling marks can be seen under magnification. The high points, specifically Liberty's head, the shield rivets, the date, and the eagle's body, lack complete definition. NGC and PCGS combined have certified just seven examples finer (9/10). (#5724)

#### VF Sharpness Key 1918/7-S Quarter

- 4081 1918/7-S—Improperly Cleaned—NGC Details. VF. FS-101.** The broad crossbar and downstroke of the underdigit 7 is blatant within the final digit of the date. Predominantly slate-gray, although the upper obverse margin displays sun-gold, fire-red, and jade-green. Cloudy and subdued from cleaning. Traces of glue or lacquer residue are noted in crevices of the standing Liberty. From The Diotte Collection.

#### Important 1918/7-S Quarter, VF25

- 4082 1918/7-S VF25 PCGS. FS-101.** The 1918/7-S is the rarest issue in the Standing Liberty quarter series, and in high grades its value eclipses that of the popular 1916. Lovely pale gray patina covers the majority of the surfaces, with a few darker patches near the rims. The overdate is apparent without a loupe. A clearly defined and minimally marked representative. (#5726)
- 4083 1919 MS66 NGC.** We are unsure why this beautiful Premium Gem lacks a Full Head designation, as the strike is sharper on this piece than on most other examples we have seen. The surfaces are highly lustrous with brilliant mint frost. Census: 55 in 66, 16 finer (9/10). (#5728)
- 4084 1919-D AU58 NGC.** Although minutely worn, this near-Mint piece has a bold strike and still retains at least half of its original head detail. Both sides have original iridescent toning over nearly full frosty mint luster. (#5730)

#### Lustrous 1919-D Standing Liberty Quarter, MS64

- 4085 1919-D MS64 PCGS.** While this near-Gem lacks the Full Head designation, it is quite sharply struck, and the head details are nearly full, certainly well in excess of 50% complete. Both sides are attractive with brilliant luster beneath a blend of rose, violet, blue, and gold toning. (#5730)
- 4086 1920-S MS64 PCGS.** Coruscating satiny luster shimmers throughout the well-preserved surfaces. Peppered lilac and russet accents in the periphery add color to the mostly untuned surfaces. The 1920-S is elusive in higher grades. Housed in a green-label PCGS holder. (#5738)
- 4087 1920-S MS64 NGC.** A distinctive Choice Mint State example with satiny luster beneath deep iridescent toning. The upper part of the obverse is lime-green, with the balance toned in various hues. (#5738)
- 4088 1920-S MS64 NGC. CAC.** This lustrous near-Gem is nicely struck despite localized softness on Liberty's head and shield. Lightly toned with dappled orange iridescence along the left obverse periphery. Ex: *Baltimore Signature* (Heritage, 7/2003), lot 7111. (#5738)
- 4089 1921 AU55 NGC.** Steel-gray and caramel-gold enrich this partly lustrous Choice AU quarter. A few wispy marks are barely apparent beneath the left (facing) wing. Except for the introductory 1916, the 1921 is the lowest mintage Philadelphia issue of the series. (#5740)
- 4090 1923 MS67 NGC.** Although available in almost all grades, the 1923 is seldom seen at the MS67 level, as one might expect. Neither NGC nor PCGS has certified any examples finer (9/10). The present coin is mostly brilliant with traces of violet and rose-gold toning on the rims. The strike is bold save for the usual softness on several shield rivets and the date. (#5742)
- 4091 1923-S VF20 NGC.** A "semi-key" in the series, meaning that the date is scarce but not rare. This piece has light gray surfaces that are essentially problem-free. (#5744)
- 4092 1923-S VF30 NGC.** Glimmers of gold appear at the margins, as well as small dots of deep blue. Pearl-gray surfaces are luminous elsewhere. A pleasing midrange example of this lower-mintage issue. (#5744)
- 4093 1923-S AU55 PCGS.** This is an unusual opportunity for the collector to acquire an attractive AU example of the date. Great silver luster with just a touch of rub on the chainmail and knee. (#5744)
- 4094 1923-S AU55 PCGS.** The 1923-S and 1929-D have nearly identical mintages, but the former is much rarer in better grades. Presumably, rolls of the '29-D were saved, but there were comparatively few West Coast collectors in 1923. The present cream-gray Choice AU example has smooth surfaces and substantial luster. (#5744)

---

**1923-S Standing Liberty Quarter, AU58 Full Head**  
**Key Date With Full Head Definition**

- 4095 1923-S AU58 Full Head NGC.** The 1923-S Standing Liberty quarter is a key date in the series, with a small mintage of 1.3 million pieces. J.H. Cline believes only about 5 percent of surviving examples have Full Head definition. The present coin is a lightly circulated near-Mint specimen, with Full Head details and bright mint luster. The surfaces are graced by areas of light green toning. *From The Diotte Collection. (#5745)*

---

**Stunning 1924 Standing Quarter, MS66+ Full Head**

- 4096 1924 MS66+ Full Head NGC.** Here is an incredible Premium Gem with full design definition on both sides, not just on the head. The surfaces are brilliant and highly lustrous with a full quota of mint frost. Two NGC certified MS66+ FH coins are the only two examples of the date that have received the + designation. Census: 2 in 66+ Full Head, 14 finer (9/10). (#5747)
- 4097 1927-S XF45 PCGS.** Honey-tinged luster fills the design crevices of this moderately circulated rare date quarter. An attractive Choice XF example of a low-mintage issue typically encountered in well worn grades. (#5764)
- 4098 1928 MS67 NGC.** A remarkable specimen with nearly flawless surfaces. The obverse is entirely brilliant, while the reverse has some hints of golden-brown toning. Liberty's toes and a couple of the rivets on the shield are soft, as typically seen. NGC and PCGS combined have certified just 14 examples at the MS67 level, with none finer (9/10). (#5766)
- 4099 1928 MS65 Full Head PCGS.** Above-average detail on the head with only slight softness at the shield. Satiny luster filters through light rose, gold, and gray hues that brighten at the peripheral reverse. PCGS has graded 33 finer Full Head pieces (9/10). (#5767)

---

**Beautiful 1928 Quarter, MS66 Full Head**

- 4100 1928 MS66 Full Head NGC.** This frosty and highly lustrous Premium Gem is fully defined in all aspects with brilliant silver surfaces and light champagne toning. Few examples of the date have been certified as fine or finer, with a combined NGC and PCGS Full Head population of just 43 similar coins, and just 16 better. Among that small population, few possess the excellent aesthetic appeal of this beauty. (#5767)
- 4101 1928-S MS66 Full Head NGC.** Glimpses of yellow and orange hover at the rims, but silver is the dominant hue on this Full Head example. Softly frosted on the devices and a carefully preserved beauty. NGC has graded 27 finer Full Head pieces (9/10). (#5771)
- 4102 1929 MS66 Full Head NGC.** A beautiful Premium Gem with brilliant and frosty silver surfaces, this piece exhibits full design definition at the head and elsewhere, included completely visible shield rivets. Census: 52 in 66 Full Head, 8 finer (9/10). (#5773)
- 4103 1929-S MS67 PCGS. CAC.** Wonderful silver-blue color through the centers with arcs of bold reddish-orange at parts of the margins. Though softly struck on head and shield, this is a pleasingly preserved coin that deserves its Superb Gem designation. Population: 9 in 67, 0 finer (9/10). (#5776)
- 4104 1929-S MS65 Full Head NGC. CAC.** Strongly lustrous through dappled waves of gold, magenta, and violet patina. Well struck on the head with only slight softness on the shield. Housed in a prior-generation holder. (#5777)
- 4105 1929-S MS66 Full Head NGC.** An incredible Premium Gem, this piece has a bold strike with brilliant, satiny mint luster. There is no evidence of toning on either side. NGC has only certified 20 finer pieces, and few of those could match the overall quality of this piece. (#5777)

---

**Fantastic MS67 Full Head 1930 Quarter**

- 4106 1930 MS67 Full Head NGC.** Gold and gray shadings wash over this attentively struck Superb Gem, fantastically lustrous through the toning and untouched save for a few tiny ticks in the drapery at Liberty's legs. A great example of what would prove to be the final year of Standing Liberty quarter production. Census: 29 in 67 Full Head, 0 finer (9/10). (#5779)

## WASHINGTON QUARTERS

- 4107 1932 MS66 PCGS. CAC.** The 1932 Washington quarter is a popular first-year type coin. This spectacular Premium Gem specimen is patinated in shades of green and ice-blue. All design elements are sharply rendered. (#5790)
- 4108 1932-D MS62 NGC.** Whispers of lemon-gold patina drape softly lustrous surfaces. An attractive coin for the grade, though the abrasions and scrapes on Washington's portrait confirm the accuracy of the MS62 grade.  
*From The Diotte Collection.* (#5791)
- 4109 1932-D MS63 PCGS.** A satiny Select example of this important first-year Washington key. The light honey-gold and ivory-gray surfaces are undisturbed aside from a solitary graze on the left obverse field. Housed in a first generation holder. (#5791)
- 4110 1932-D MS63 PCGS.** Dappled caramel-gold and stone-gray toning visit this lustrous Select key date quarter. Sharply impressed and only minimally abraded. For each of the three mints, 1932 is the lowest mintage date of the series. (#5791)

### Prized Near-Gem 1932-D Quarter

- 4111 1932-D MS64 PCGS. CAC.** Brightly lustrous with only the faintest suggestion of ivory-cream patina. This is a well-defined near-Gem from the low-mintage 1932-D inaugural issue, minimally abraded with just a few shallow scrapes visible in the fields. PCGS has graded only 64 numerically finer examples (9/10). (#5791)

### Splendid 1932-D Washington Quarter, MS64

- 4112 1932-D MS64 PCGS.** This splendid near-Gem example of the famous key 1932-D Washington quarter should find no shortage of willing bidders when it appears at auction. The frosty silver surfaces display a remarkable overlay of patina, with saffron and gold high points merging to deep amber and copper hues near the obverse rim. Similar hues appear on the reverse in lesser quantity, and the few marks are consistent with the grade. A super example. PCGS has only certified 64 finer pieces (9/10). (#5791)
- 4113 1932-S MS64 PCGS.** A highly lustrous near-Gem with wispy pearl-white and lilac accents. There are only a couple of insignificant grazes. This always-popular key-date issue is infrequently encountered in Gem. (#5792)
- 4114 1932-S MS64 NGC.** Bright silver through the left and center with more opaque green-gray toning that forms a sort of web across the right sides. Attractively detailed and an appealing near-Gem example of this first-year Washington quarter key. (#5792)

- 4115 1936-D MS66 NGC.** Strongly detailed for the date, though the fine elements within Washington's wig show softness. Light gray toning overall with golden echoes near the rims. NGC has graded just six examples of the date as finer Superb Gems (9/10). (#5801)
- 4116 1941-S MS67 PCGS. CAC.** Vibrant mint luster is the outstanding characteristic of this magnificent Superb Gem Washington quarter. The devices are sharply detailed, and the brilliant central surfaces are surrounded by rings of green and purple toning. (#5816)

### Colorful Superb Gem 1956-D Quarter

- 4117 1956-D MS67 PCGS.** Ruby-red, apple-green, lemon-gold, and gunmetal-gray embrace this lustrous and precisely struck Superb Gem. A prize for the collector of gorgeously toned silver type coins, as well as an important acquisition for the competitive Registry holding. Population: 12 in 67, 0 finer (9/10).  
*From The Classic Collection.* (#5861)

## WALKING LIBERTY HALF DOLLARS

- 4118 1916 MS64+ NGC.** Autumn-gold toning illuminates the peripheries of this lustrous and low mintage Walking Liberty half. The strike is exemplary, even on the fingers of Liberty's branch hand. (#6566)
- 4119 1917 MS65 PCGS.** Wafts of faint lilac and hazel toning grace both sides of this highly lustrous Gem. The lines on Liberty's dress are softly defined at her waist, as nearly always seen. A few pin-sized handling marks define the grade. The 1917 half is scarce any finer. (#6569)
- 4120 1917 MS65 PCGS.** Bright, satiny mint luster, and traces of ice-blue and gold toning enhance the eye appeal of this spectacular Gem. The strike is particularly sharp for an early Walker, with clear separation of Liberty's thumb from the rest of her hand. (#6569)
- 4121 1917 MS66 PCGS.** Medium olive-gray toning graces this lustrous and decisively struck Premium Gem. Encased in a green label holder. Contact is trivial and limited to the right obverse field. Population: 73 in 66, 2 finer (9/10). (#6569)
- 4122 1917-D Obverse MS64 NGC.** Softly struck through the centers, as usually seen, but with pleasing quicksilver luster under silver-gray toning that has gold-orange peripheral overtones and suggestions of violet on the inside. From the prized Obverse Mintmark variety. (#6570)
- 4123 1917-D Reverse AU58 PCGS. CAC.** One of the most challenging grades for any collection is AU58 and a complete set of Walking Liberty half dollars in that grade would be a major accomplishment. This piece is lustrous and brilliant with white surfaces and subliminal toning. (#6571)
- 4124 1917-S Reverse MS63 PCGS. CAC.** A fully lustrous Select Mint State example with ivory surfaces and faint splashes of darker toning. This is an attractive, original, and desirable early Walking Liberty half dollar. (#6573)

---

#### Near-Gem 1917-S Reverse Mintmark Half

- 4125 1917-S Reverse MS64 NGC.** Better-defined than usually seen, though Liberty's branch hand is only half-detailed. The fields are pale silver with sharp radiance. Wispy marks but few significant abrasions aside from the rim nick at 12 o'clock on the obverse. NGC has graded just 23 numerically finer pieces (9/10). (#6573)

- 4126 1919-D XF45 PCGS. CAC.** Although certain other dates in the Walking Liberty series get more press, the 1919-D is one of the key rarities in the series. Choice XF examples are seldom seen. This piece has original light gray surfaces with splashes of gold toning and traces of luster. For a real challenge, match a complete set to this piece. (#6578)

---

#### Lustrous 1919-D Walking Liberty Half Uncirculated Details

- 4127 1919-D—Improperly Cleaned—NGC Details. Unc.** The 1919-D is the rarest issue of the series at the MS65 level, and is a key date in XF or better grades. This example features rich and unbroken cartwheel luster and has faint straw-gold toning. The strike is soft across the highpoints of Liberty, which are slightly bright from a wipe. The dies are moderately rotated. (#6578)

---

#### Elusive 1919-D Half, Uncirculated Details

- 4128 1919-D—Stained—NGC Details. Unc.** Coruscating luster encompasses this key date half dollar. The strike is incomplete on Liberty's head, branch hand, and skirt lines, but other details are sharp. Freckles of dark cobalt-blue patina dominate the margins, while the fields and devices are cream-gray and tan-brown. (#6578)

---

#### Attractive MS62 1919-D Half Dollar

- 4129 1919-D MS62 NGC.** Bold luster is the greatest attribute of this Mint State 1919-D half dollar. While the strike is typically soft—Liberty's branch hand is completely missing, for example—the piece is absolutely unworn. Orange and peach peripheral toning gives way to silver at the centers. Elusive so fine. (#6578)

---

#### Key MS63+ 1919-D Half Dollar

- 4130 1919-D MS63+ PCGS. CAC.** The 1919-D and 1919-S Walking Liberty half dollar issues offer an interesting comparison. Both are dates with million-plus mintages that are nonetheless elusive in most grades and downright rare in high enough tiers of Mint State. Through the XF to AU50 levels, the two dates are comparable in rarity and price, but the 1919-D takes off rapidly, and by the MS63 level, the D-mint issue takes its place as one of the series keys. This attractive coin is a notch above "merely" Select, though not quite of near-Gem quality, owing to a characteristically flat strike on the devices and a small cut on Liberty's forward leg. Nonetheless, the warm luster of the rose-accented silver surfaces is immensely rewarding, the greatest contributor to the overall eye appeal. PCGS has graded just 75 coins in MS64 and finer (9/10). (#6578)

- 4131 1921-D VF30 ANACS.** The 1921-D had the lowest mintage in the Walking Liberty half dollar series with just 208,000 coins struck. Deep purple accents in the margins yield to pale gray at the center. There are no mentionable marks on either side. (#6584)
- 4132 1921-D VF30 PCGS.** A few faint hairlines are evident, limiting the grade of this example, despite the presence of faint mint luster on each side. Here is an important opportunity for the collector of circulated Walkers. (#6584)

---

**Choice VF 1921-S Half Dollar**

- 4133 1921-S VF35 PCGS.** Traces of luster cling to the margins on this attractive Choice VF example. Medium-gray is the dominant color, though peach and gold elements are present near the obverse borders and blue hues float close to the reverse rims. An excellent example of this series key for the midgrade date collector. (#6585)

---

**Appealing AU50 1921-S Half Dollar**

- 4134 1921-S AU50 PCGS.** In grades above VF, the 1921-S is far and away the most elusive of the Walking Liberty half dollar issues. This lightly worn but still-lustrous AU example has plenty to offer for the interested bidder. Light green-gold elements appear in the fields, mainly close to the rims, while a few dots of deep color appear at the back of the trailing skirt. Wispy abrasions populate the fields, but there are few serious marks. (#6585)

---

**Lightly Abraded Choice AU 1921-S Half Dollar**

- 4135 1921-S AU55 PCGS. CAC.** The 1921-S Walking Liberty half dollar is the rarest issue of the series in Mint State, even though several other dates—the 1916-S, 1921-P and D, and 1938-D—have smaller production figures. It appears that the issue was not saved in any significant numbers. Today, even when Mint State specimens are found, they will be the subject of intense collector demand and will command a hefty premium. This Choice AU example may provide collectors with many of the same pleasures at a more-affordable price. As demanded of the grade, much of the mint luster remains, with light contact marks and subtle tinges of pinkish-amber near the rims, while the remainder of the surfaces are untuned and extremely appealing. The CAC population is three pieces in AU55, with seven finer (9/10). (#6585)

---

Choice 1921-S Walking Liberty Half Dollar  
Rarest Walker in Mint State Grades  
Excellent Balance of Quality and Value

**4136 1921-S MS64 PCGS.** The 1921-S Walking Liberty half dollar boasts a low mintage of just 548,000 pieces. In addition, few examples were saved for numismatic purposes at the time of issue. As a result, the 1921-S is the rarest Walking Liberty half dollar in Mint State grades. Experts estimate a surviving population of 150-210 specimens in all Uncirculated grades, with 75-100 examples extant in Choice Mint State condition. The population data from the leading grading services coincides well with these estimates. Currently, PCGS has certified 45 coins in MS64, with only 17 pieces finer, while NGC has graded 49 Choice specimens, with 19 examples in higher numeric grades (9/10).

The 1921-S is known for its soft strike and subdued luster, even on coins that technically grade MS65. Since Gem specimens are very rare and expensive, many series enthusiasts consider examples in Choice Mint State condition the best combination of quality and value. To quote Jeff Ambio:

“A Choice Mint State example with suitable luster quality and at least some separation between the thumb and index finger will not look that different from an MS-65 as long as there are no sizeable and/or individually distracting abrasions.”

The present coin meets these criteria admirably. The strike is actually quite sharp for an early Walker, and Liberty's thumb is plainly separated from the rest of her hand. There is also more detail on the head than is seen on the typical example, and the reverse strike is sharper than the obverse. The mint luster is full and satiny, under light gold and lavender patina. It would be quite difficult to improve upon the eye appeal of this Choice example. (#6585)

---

#### Scarce 1923-S Walker, MS62

- 4137 1923-S MS62 PCGS.** This issue is scarcer than most early Walkers, especially in Mint State grades. Both sides of the present specimen, a Select Mint State piece, exhibit brilliant and satiny silver luster with hints of champagne toning. An excellent opportunity to fill this hole in a collection of Walking Liberty half dollars. (#6586)

---

#### Important Gem 1923-S Half Dollar

- 4138 1923-S MS65 PCGS.** None of the three Mints struck half dollars in 1922, and in 1923, only San Francisco produced the denomination. Those coins, under 2.2 million in total, would be the only non-commemorative halves struck until 1927, when San Francisco reprised the denomination. The 1923-S issue is a transition-point for the series as a whole, after which it moves away from the pattern of Mint State rarity, save at the Premium or Superb Gem levels. This is a charming (and conditionally rare) Gem, bright silver in luster with occasional peripheral patches of cream. Prominent die polish lines appear in the space to the left of the eagle's beak. Population: 39 in 65, 8 finer (9/10). (#6586)

---

#### 1927-S Walker, MS64 Exceptional Luster and Color

- 4139 1927-S MS64 PCGS. CAC.** Following a three-year hiatus of half dollar production, the 1927-S was minted in modest numbers. Most were released for circulation and relatively few have survived in Choice BU or higher grades. The present near-Gem offers pleasing pearly luster, and fewer abrasions than would be expected for the assigned grade. Gentle lavender toning blankets both the obverse and reverse. (#6587)

- 4140 1929-D MS64 PCGS.** Aside from the usual central striking softness, this is a well-appointed near-Gem example from a mintage of just over a million pieces. Pale gold and orange overtones visit bright silver surfaces. (#6589)

---

#### Gem 1929-S Half Dollar Vibrant Mint Luster

- 4141 1929-S MS65 NGC.** The 1929-S Walking Liberty half dollar enjoyed an average-size mintage of 1.9 million pieces, and the date is popular with mintmark type collectors. The present coin is a charming Gem specimen, with excellent mint luster and brilliant surfaces. The strike is sharp in most areas, but a little softness shows on Liberty's hand and head. Only 31 coins have been certified in higher numeric grades at NGC (9/10). (#6590)

---

#### Sharply Struck 1933-S Walker, MS66

- 4142 1933-S MS66 PCGS.** From a mintage of nearly 1.8 million pieces, the 1933-S Walking Liberty half dollar is not too difficult to locate in lower Mint State grades, but it is very scarce in Premium Gem condition. The present coin is an impressive specimen, with a razor-sharp strike and vibrant mint luster. The surfaces are brilliant and eye appeal is outstanding. Population: 73 in 66, 7 finer (9/10). (#6591)

- 4143 1934 MS67 NGC. CAC.** Soft gray patina at the centers takes on increasingly intense gold to orange overtones as the rims approach. Well-defined and boldly lustrous, a lovely Superb Gem. NGC has graded eight numerically finer pieces (9/10). (#6592)

- 4144 1934 MS67 PCGS.** Golden-brown margins surround untuned fields and devices. Crisply struck and highly lustrous with a remarkably unabraded obverse. A plentiful issue except in such outstanding preservation. Encased in a prior generation holder. Census: 92 in 67, 8 finer (9/10).(#6592)
- 4145 1934-D MS65 PCGS.** Small D. A sharply impressed Denver half dollar whose dynamic luster and delicate gold toning provide attractive eye appeal. A few ticks on the central reverse, but otherwise well preserved.(#6593)
- 4146 1934-D MS65 NGC.** Small D. Delicate apricot toning graces portions of this lustrous and beautiful Gem. The skirt lines are fully struck, and the thumb of the branch hand is bold. Liberty's head shows minor incompleteness. All three mints struck this type in 1934, the first such occurrence since 1921.(#6593)
- 4147 1934-D MS66 PCGS.** Small D. Lemon-gold tints invigorate the rims of this thoroughly lustrous Great Depression half dollar. A good strike for the issue, especially on the branch hand, although the head and date show incompleteness.(#6593)
- 4148 1934-S MS63 PCGS.** Brightly lustrous with above-average eye appeal for this little-saved issue. While the strike is a trifle soft overall, as usually seen, only Liberty's branch hand lacks definition. *From The Classic Collection.*(#6594)
- 4149 1937 MS67 NGC. CAC.** The 1937 Walking Liberty half dollar is a well produced issue and a popular type coin, with a mintage of 9.5 million pieces. This delightful Superb Gem is notable for its sharp strike and bright, satiny mint luster. Wisps of light golden toning are evident on both sides.(#6601)
- 4150 1938-D MS66+ PCGS Secure. CAC.** A bold strike, brilliant untuned surfaces, and frosty silver luster characterize this Premium Gem Walker. The 1938-D is the elusive date among the late date issues and it is always in demand. Population: 1 in 66+, 24 finer of all designations (9/10).(#6605)

---

**1939 Walking Liberty Half Dollar, MS68  
Vivid Toning, High Technical Grade**

- 4151 1939 MS68 PCGS. CAC.** This magnificent Walking Liberty half dollar is a coin of surpassing quality. While high grade examples of the 1939 are not difficult to locate, few specimens are known with attractive, vivid toning. This piece displays a delightful play of ice-blue and lime-green colors, to complement its sharp strike and vibrant mint luster. No coins have been certified in higher numeric grades by either of the leading grading services (9/10). (#6606)
- 
- 4152 1939-S MS67 PCGS. CAC.** Strong cartwheel luster with occasional frosted elements to the well struck devices. Virtually colorless and tied for numerically finest in the combined certified population (9/10).(#6608)
- 4153 1941-S MS65 NGC. CAC.** A stunning Gem Walker, this 1941-S has a high degree of frosty and brilliant silver luster with no evidence of toning. The strike is above average and the surfaces are free of marks.(#6613)
- 4154 1941-S MS65+ PCGS.** This short-set beauty has softly defined central features, but Liberty's head shows a better-than-average impression. Minimally toned with considerable frosty luster and nearly Premium Gem surface quality.(#6613)
- 4155 1941-S MS66 PCGS.** Vibrant, frosty mint luster radiates from the pristine, brilliant surfaces of this spectacular Premium Gem, creating fantastic eye appeal. The strike is better than usually seen on this issue, with just a little softness on the central obverse and the eagle's leg.(#6613)
- 4156 1941-S MS66 NGC.** Light honey-gold toning embraces this lustrous and pristine better date Walking Liberty half. The strike is typical for a San Francisco issue from the 1940s.(#6613)
- 4157 1941-S MS66 PCGS.** The 1941-S is traditionally regarded as the key to the short set of the series, which spans from 1941 to 1947. Light straw-gold shadings visit this lustrous and suitably struck Premium Gem. Nearly perfect save for a single thin mark on the eagle's front leg. PCGS has certified a scant six pieces in higher grade (9/10).(#6613)
- 4158 1942-S MS66 PCGS.** Trumpet tail S, one of three mintmark styles for the wartime issue, of which the Large S is most elusive. A lustrous and gorgeously preserved Premium Gem. Lightly toned and much better struck than the typical Uncirculated example. (#6617)
- 4159 1943 MS67 PCGS.** A satiny Superb Gem with russet and gold patina at the periphery. The strike is solid, and Liberty's branch hand displays strong definition. An attractive representative of this short-set issue, one that has just a handful of numerically superior survivors.(#6618)
- 4160 1944-D MS67 PCGS.** The 1944-D Walking Liberty half dollar is scarce in Superb Gem condition, and virtually unobtainable in any finer grade. The present coin displays vibrant mint luster, with wisps of light golden toning, and a sharp strike.(#6622)
- 4161 1944-S MS66 PCGS. CAC.** Large S. The 1944-S Walking Liberty half dollar is a condition rarity in the series, mostly because the typical strike is not sharp enough to meet the high-grade standards of the grading services. This lustrous Premium Gem example is sharply detailed in most areas, with just a little softness on Liberty's right hand. Only five coins have been certified in higher numeric grades at PCGS (9/10).(#6623)
- 4162 1944-S MS66 NGC. CAC.** Large S. Blazing mint luster and virtually pristine fields enhance the dynamic eye appeal of this Premium Gem Walking Liberty half dollar. A touch of softness shows on the central obverse and the eagle's leg, as is seen on almost all examples of this date.(#6623)
- 4163 1945 MS67 PCGS Secure.** This lovely Superb Gem is draped in delicate honey-gold shades. The strike is pleasing, and the absence of consequential contact corresponds to the lofty third party grade. Population: 70 in 67, 1 finer (9/10).(#6624)
- 4164 1945-D MS67 PCGS.** A magnificent Superb Gem specimen, with impossibly vibrant mint luster and sharply detailed devices. No coins have been certified in higher numeric grades at PCGS, while NGC has graded only a single example finer (9/10). (#6625)
- 4165 1947 MS66 PCGS. CAC.** Enchanting patina is this Premium Gem's greatest asset. Thick blankets of amber-orange, pumpkin, brick-red, and magenta-violet show occasional windows into the silver-gray beneath, most notably on the texture of the eagle. The 1947 is the last Philadelphia issue in the Walking Liberty half dollar series, and the date is definitely underrated by most collectors. To underscore the difficulty of improving on this spectacular Premium Gem, we note that PCGS has graded only 22 numerically finer pieces (9/10).(#6630)

---

**1947 Walking Liberty Half, MS67  
Seldom Seen So Fine**

- 4166 1947 MS67 PCGS. CAC.** This magnificent Superb Gem is gorgeously patinated in bands of forest-green, fire-red, lemon-gold, and powder-blue. Although typically incomplete on Liberty's head and thumb, the striking details are excellent overall. This lustrous example is nearly perfect aside from a pair of minor lines on the right obverse field. The 1947 is an underrated issue, and the surpassing quality of this coin is virtually impossible to match, much less exceed. This coin occupies the third spot in Jeff Ambio's list of Significant Examples. Population: 22 in 67, 0 finer (8/10).  
*Ex: ANA Charlotte National Money Show Auction (Heritage, 3/2007), lot 1151, realized \$6,900. (#6630)*

---

**PROOF WALKING LIBERTY  
HALF DOLLARS**

**1936 Half Dollar, PR65  
First Proof Walking Liberty Half**

- 4167 1936 PR65 PCGS.** From a tiny mintage of 3,901 pieces, the 1936 proof Walking Liberty half dollar is the first and rarest proof issue of the series. The present coin is an attractive Gem, with brilliant reflective fields and a razor-sharp strike. A few minor hairlines can be detected in the obverse field, but they do not seriously detract from the outstanding eye appeal. Housed in a green label holder. (#6636)
- 4168 1937 PR67 PCGS.** A splendid Superb Gem proof, this Walking Liberty half dollar has delicate peripheral iridescence with bright silver central areas. PCGS has only certified nine finer examples (9/10), meaning few collectors can acquire an example that surpasses this piece. (#6637)
- 4169 1938 PR66 NGC. CAC.** Light to medium golden patina graces this fully defined and undisturbed Premium Gem. An exemplary specimen of the seven-year proof type. (#6638)
- 4170 1938 PR67 PCGS.** This Superb Gem proof is a borderline cameo representative with noticeable contrast on both sides, although insufficient for the Cameo designation from PCGS. Both sides are mostly brilliant with delicate iridescent toning. (#6638)

- 4171 1938 PR67 PCGS.** A trace of steel toning is barely evident on this brilliant silver-gray Superb Gem proof. Fully mirrored fields reside around satiny devices. PCGS has only certified 10 finer pieces (9/10). (#6638)
- 4172 1942 PR67+ ★ NGC.** Many proof 1942 have been certified by NGC, but the present piece (as of 9/10) is currently the only specimen to have both a Star *and* a Plus designation. The splendid arc of plum-red, powder-blue, and honey-gold along the left obverse border is undoubtedly the reason why NGC awarded this coin a Star. The reverse left border is also attractively toned, although in less dramatic shades. (#6642)

---

**1942 Walking Liberty Half Dollar, PR68  
Last Proof Walker**

- 4173 1942 PR68 NGC.** The 1942 proof Walking Liberty half dollar enjoyed a mintage of 21,120 pieces and was the last proof issue of the series. The present coin is a spectacular PR68 specimen, with deeply reflective surfaces under wisps of light green and silver-gray toning. The design elements are fully struck, and eye appeal is outstanding. Only five coins have been certified in higher numeric grades by NGC and PCGS combined (9/10). (#6642)

---

**FRANKLIN HALF DOLLAR**

- 4174 1954-S MS66 Full Bell Lines PCGS. CAC.** Wispy gold toning is barely visible over the brilliant and frosty silver surfaces of this sharp Premium Gem. Both sides have full mint luster, creating exceptional eye appeal. Population: 75 in 66 Full Bell Lines, 1 finer (9/10). (#86669)

---

**PROOF FRANKLIN HALF DOLLAR**

**1950 Cameo PR67 Half Dollar  
A Rare, First-Year Issue With Contrast**

- 4175 1950 PR67 Cameo NGC.** The 1950 and 1959 are the keys to the series of Cameo proof Franklins and have been recognized as such for the past 25 years. The existence of 1950 halves with frosted devices is a matter of chance rather than design as the dies were not worked on to produce this effect. Rather, a new pair of dies would produce a Cameo coin until the frost diminished with repeated strikings. This is a lovely, all-brilliant example that is essentially perfect with sharp field-device contrast on each side. (#86691)

## MORGAN DOLLARS

- 4176 1878 8TF MS65 ANACS. VAM-18, R.4.** The date, LIBERTY, and STATES OF are prominently die doubled on this collectible 8TF VAM. Dazzling luster combines with light peripheral golden-brown toning to provide exceptional eye appeal. Sharply struck, and the fields are well preserved. The cheek exhibits faint marks. (#7072)
- 4177 1878 7/8TF Strong MS65 PCGS. VAM-39A, R.5.** A Hit List 40 Variety. Per VAMworld.com, all VAM-39s are clashed, and are the subvariety VAM-39A. That said, no clashed letters are evident near Liberty on the present lustrous Gem. Light sun-gold and slate toning only confirms the originality. A charming high grade example of the popular doubled tailfeathers subset. (#7078)
- 4178 1878 7/8TF Strong MS65 NGC. VAM-37, R.4.** Dusky peach-gold and cream-gray overall, with blushes of ocean-blue and lilac-red throughout the obverse periphery. Boldly struck and lustrous with an essentially mark-free reverse field. (#7078)

### VAM-41A 7/4 Tailfeathers 1878 Morgan Dollar MS64 Deep Prooflike

- 4179 1878 7/8TF Strong MS64 Deep Prooflike NGC. VAM-41A.** The 7/4 Tailfeathers VAM-41A is a “polished-down” version of the VAM-41, a 7/7 Tailfeathers variety. This Deep Prooflike representative must have been one of the earliest VAM-41A examples struck, frosty on sharply struck devices with considerable mirrors in gold-tinged fields. Lightly abraded with a thin layer of patina across each side. (#97079)
- 4180 1878 7TF Reverse of 1878 MS65 PCGS.** A few small areas of purple patina add color to the otherwise silver-gray surfaces. The strike is nearly full, and there are only minor marks on either side. A number of thin die cracks are seen on the reverse. (#7074)
- 4181 1878 7TF Reverse of 1879 MS65 PCGS.** Slanted top feather on the arrows. Well-defined with a touch of frostiness to the pale silver luster. Highly elusive any finer, with just six such coins known to PCGS (9/10). (#7076)
- 4182 1878-CC MS65 PCGS. CAC.** Brightly lustrous with excellent central definition. A beautiful and minimally toned Gem from the beginning of the Carson City Morgan dollar series. Splendidly preserved, although the chin has faint roller marks (as coined). Housed in a first-generation holder. (#7080)
- 4183 1878-CC MS65 NGC.** This fully lustrous Gem has natural ivory surfaces with hints of peripheral gold toning. Both sides have frosty devices and satiny fields, imparting a slight cameo appearance. (#7080)

- 4184 1878-CC MS65+ PCGS. CAC.** A spectacular Gem with the PCGS + designation, this piece is fully lustrous with brilliant silver surfaces and no evidence of toning on either side. (#7080)
- 4185 1878-CC MS63 Deep Mirror Prooflike NGC.** Impressively frosted on the central devices with bold silver mirrors. The only trace of color is a thin ring of gold that hovers near the obverse rims. (#97081)
- 4186 1878-CC MS63 Deep Mirror Prooflike PCGS. CAC.** This amazing Carson City Morgan dollar is fully and entirely brilliant with white silver surfaces, fully and deeply mirrored fields, frosty devices, and remarkable cameo contrast. Only the presence of a few bagmarks prevent a higher grade. (#97081)
- 4187 1879-CC—Improperly Cleaned—NGC Details. Unc.** Well-defined on lightly frosted devices that show no trace of wear. The silver fields were originally prooflike, though cleaning has dulled their mirrors. (#7086)

### Uncirculated 1879-CC Dollar

- 4188 1879-CC MS61 ANACS. Ex: GSA.** Normal mintmark. A lightly toned and lustrous example of this much better Carson City issue. The fields are surprisingly unabraded, but Liberty's cheek and the eagle's breast are scuffy from contact with fellow silver dollars. It takes little time for the novice Morgan collector to learn that the '79-CC, '89-CC, and '93-CC are the key trio of the CC-mint subset. (#7086)

### Appealing 1879-CC Morgan Dollar, MS63+

- 4189 1879-CC MS63+ PCGS. CAC.** The second rarest date in the Carson City subset of Morgan silver dollars, this 1879-CC will appeal to a wide range of collectors. Both sides are brilliant and lustrous with only a few scattered marks. There is no evidence of toning on either side. (#7086)

### Splendid 1879-CC Morgan Dollar, MS64

- 4190 1879-CC MS64 PCGS.** Only 756,000 pieces were struck of the 1879-CC dollar. The reason for this remarkably low mintage (according to Bowers) is that confiscatory tariffs by the railroads made it cheaper to send Comstock silver hundreds of miles to the San Francisco Mint to be turned into coins rather than send it 15 miles to the Carson City Mint. The 1879-CC was very scarce for several decades after issuance—Augustus Heaton said of the 1879-CC: "It is not very common." It was only after the early 1940s that several bags of '79-CC dollars became available to collectors. This is a splendid, upper-end MS64 example that is brilliant throughout and displays semi-reflective surfaces with the strong luster characteristics this issue is known for. Strongly impressed with minimal abrasions for a '79-CC. (#7086)

- 4191 1879-CC Capped Die AU50 ANACS. VAM-3.** A Top 100 Variety. An untuned and moderately abraded representative of this elusive Carson City issue. Luster is particularly prominent across the reverse margin. Although the other '78-CC to '85-CC issues are relatively plentiful in GSA holders, only a single '79-CC GSA dollar is known. (#7088)

### MS63+ Capped Die 1879-CC Morgan

- 4192 1879-CC Capped Die MS63+ PCGS. CAC. VAM-3.** A Top 100 Variety. In the 1970s, the Capped Die variety was shunned. Today, it is known that the myriad minute die chips about the Medium CC mintmark were deliberately made by a mint worker to disguise an initially (and erroneously) entered Small CC mintmark. Scarcer than its normal mintmark counterpart, and considered necessary to the series since its entry into the *Guide Book*. This example is sharply struck and faintly toned. Minor contact on the face is all that limits the grade. (#7088)

- 4193 1879-S MS65 Deep Mirror Prooflike NGC.** A sensational Gem with deep mirrors and amazing cameo contrast. The surfaces are fully brilliant and untuned. This beauty would be a nice addition to a Morgan dollar collection or a 19th century type set. (#97093)

- 4194 1880-CC MS65 PCGS.** Lightly gray-toned overall with a pale appearance and considerable frost over the devices. This is a charming Carson City Gem that should appeal to Old West and Morgan dollar collectors. (#7100)

- 4195 1880-CC 8 Over High 7 MS65 PCGS. CAC. VAM-5.** A Top 100 Variety. The overdate and VAM are unlisted on the insert of the old green label holder. Magnificent cartwheel reflectivity complements the powerfully struck design elements. Traces of lilac and yellow toning visit the margins of this mostly untuned specimen. There are no marks worthy of specific mention. (#7102)

- 4196 1880-CC 8 Over High 7 MS65 NGC. VAM-5.** A Top 100 Variety. The overdate is unlisted on the NGC insert. A nearly brilliant Gem with booming luster and a crisp strike. The reverse is well preserved, and the obverse has only faint contact on the portrait. (#7102)

### Flashy, Fully Struck Superb Gem 1880-CC Silver Dollar

- 4197 1880-CC 8 Over Low 7 MS67 NGC. VAM-6.** A Top 100 Variety. The VAM and overdate are omitted on the NGC insert. Although the published mintage is 591,000 coins, the net production figure for the 1880-CC silver dollar is actually 495,000 pieces; a total of 96,000 coins were melted when the Assay Commission determined them to be of insufficient fineness. The issue is nonetheless available in Gem condition, primarily due to the large number of GSA examples of the issue that came onto the market during the 1970s. The number of better-than-Gem coins, however, drops sharply. This sparkling, brilliant example is relatively abrasion-free and fully struck throughout, a super coin for a fine collection. Ex: *Long Beach Signature (Heritage, 2/2005)*, lot 9972, which brought \$12,075. (#7104)

- 4198 1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4.** A Top 100 Variety. While the gold, rose, and blue-violet border toning on the obverse obscures the overdate's appearance, the discerning collector can pick out the underdigits. Impressively lustrous with a champagne overtone on the frosty obverse but no such color on the reverse, which shows a touch of yellow border toning instead. (#7108)

- 4199 1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4.** A Top 100 Variety. This lightly toned Carson City dollar has a beautifully preserved reverse. The obverse field is also clean, and the grade is limited solely by faint grazes on the portrait. (#7108)

**Elusive 1880-CC Morgan, MS64 Deep Mirror Prooflike Reverse of 1878**

**4200 1880/79-CC Reverse of 1878 MS64 Deep Mirror Prooflike NGC. VAM-4.** A Top 100 Variety. The usual 1880-CC Morgan dollar has frosty luster, with prooflike examples seldom encountered, and deeply mirrored pieces of great rarity. This Choice Mint State piece has those seldom seen deep mirrors around lustrous devices, creating aesthetically desirable cameo contrast. Census: 2 in 64 Deep Mirror Prooflike, 2 finer (9/10). (#97109)

**4201 1880-CC 8/7 Reverse of 1878 MS65 PCGS. VAM-7.** The minor overdate Second Reverse variety with the underlying 7 appearing as just a dash below the second 8 in the date. This brightly lustrous Gem has frosted central devices and a thin layer of silver-gray patina. (#7110)

**4202 1880-O MS64 NGC. VAM-6A, R.5.** A Top 100 Variety. Micro O. The variety is undesignated on the NGC insert. One of the three "Ear" 8 Over 7 VAMs for the 1880-O. The "ear" is the left border of the crossbar of a mostly effaced underdigit 7, found atop the upper left of the second 8 in the date. Also noteworthy is the clashed partial ST in TRUST in Liberty's right hair vee. Lustrous and untuned with a good strike and a few wispy marks on the cheek. (#7114)

**4203 1880-O MS64 PCGS. Micro O.** The date displays tan toning, but the remainder of this lustrous near-Gem remains brilliant. The fields are splendidly unabraded, and the strike is exemplary for New Orleans. Only minor contact on the cheekbone denies an even finer grade. (#7114)

**4204 1880-O MS64 NGC. CAC. Micro O.** Minimally toned and thoroughly lustrous with a bold strike and attractive preservation. Despite a plentiful mintage, the 1880-O is a rarity at the Gem level, and most advanced collectors settle for an MS64 example. (#7114)

**Richly Toned 1880-S Dollar, MS66**

**4205 1880-S MS66 PCGS. CAC. Ex: Sonnier, Cowle. Large S.** A Premium Gem so outlandishly toned, we just *had* to include a picture! Yellow, red, plum, blue, a little green-gold...the obverse has it all. Impressively lustrous with a contrasting color palette on the reverse, a ring of yellow-green around a lustrous but plain silver interior. (#7118)

**4206 1880-S MS67+ PCGS. CAC. Large S.** A stunning Superb Gem with electric obverse patina, aqua, blue, violet, and gold-orange in an arc at the upper and left obverse. The reverse borders have elements of the last color, while the rest of the piece is minimally patinated. (#7118)

**Marvelous MS68 1880-S Morgan Dollar**

**4207 1880-S MS68 PCGS. Medium S.** The 1880-S is one of the two pre-eminent type issues in the Morgan dollar series, and the example offered here is a notch above the "mere" Superb Gems that are more commonly seen. Bright silver luster with frosted devices and surface quality that is nothing short of remarkable. PCGS has graded just five coins finer (9/10). (#7118)

**Fantastic MS68 1880-S Morgan Dollar**

**4208 1880-S MS68 NGC.** Essentially untuned with dramatic cartwheel luster in silver-white fields that is centered around well-defined and thickly frosted devices. A fantastic type coin that is just a few tiny marks and luster grazes away from absolute perfection. NGC has certified only four numerically finer examples (9/10). (#7118)

**4209 1880/9-S MS67 PCGS. CAC. VAM-11.** A Hot 50 Variety. Medium S. Die fill suggests an underdigit within the upper portion of the loop of the 0 in the date. Sharply struck and highly lustrous with only a wisp of gold patina. The fields are virtually pristine, while the cheek displays delicate grazes. Population: 28 in 67, 1 finer (9/10). (#7122)

**Colorful MS66 1881 Morgan Dollar**

**4210 1881 MS66 NGC.** A boldly lustrous and bewitchingly toned Premium Gem example of this popular Philadelphia, very scarce at the MS66 level and flat-out rare any finer. Windows of silver color appear at the left obverse and right reverse, while the rest of the coin is covered in bold gold, orange, and blue-violet patina with rose accents. Census: 47 in 66, 4 finer (9/10). (#7124)

**4211 1881-CC MS65 PCGS Secure. Ex: Simpson.** A vibrant array of green, blue, purple, and rose-gold colors envelops the obverse, while the reverse has reddish-gold peripheral toning and silver-gray centers. This sharply struck and well preserved Gem has outstanding eye appeal. (#7126)

- 4212 1881-CC MS66 NGC. CAC.** Faint peach-gold tints visit the immensely lustrous and lightly toned-over surfaces of this charming Premium Gem. Carefully preserved with a single small mark along Liberty's jawline. (#7126)
- 4213 1881-CC MS66 NGC.** This splendid Premium Gem is a highly attractive example of the popular 1881-CC dollar, represented in relatively small quantities when the GSA released the Carson City hoard in the 1970s. Both sides are frosty and fully brilliant with untuned surfaces. (#7126)
- 4214 1881-CC MS66 PCGS.** Golden-brown toning visits the peripheries of this well preserved and precisely struck Premium Gem. The reverse is nearly pristine. Among Carson City Morgans, only the 1885-CC has a lower mintage. (#7126)

**Superb Gem 1881-CC Morgan Dollar  
High Technical Grade, Exceptional Eye Appeal**

- 4215 1881-CC MS67 NGC.** The 1881-CC Morgan dollar is a prized issue in the series, because of its low mintage of 296,000 pieces, and its charismatic CC mintmark. While examples in lower Mint State grades are not difficult to locate, MS67 specimens are scarce, and only five coins have been certified in higher numeric grades by NGC and PCGS combined (9/10). The present coin is a spectacular Superb Gem, with vibrant, cartwheel mint luster, brilliant surfaces, and an exemplary strike. (#7126)
- 4216 1881-CC MS64 Deep Mirror Prooflike PCGS.** The deeply mirrored fields show nearly black-and-white cameo contrast with the icy-white devices. The obverse has scattered grade-defining abrasions, but the reverse nearly devoid of distracting marks. A sharply struck specimen with great eye appeal. (#7127)
- 4217 1881-O MS65 NGC.** Golden-brown and navy-blue patina decorates the peripheries, and is more prominent on the reverse. Lustrous fields and devices exhibit delicate chestnut toning. Intricately struck despite its New Orleans origins, and housed in a former generation holder. (#7128)

**Wildly Toned 1881-S Dollar, MS66**

- 4218 1881-S MS66 PCGS. CAC. Ex: Sonnier, Cowle.** The obverse has toning to drive Morgan dollar collectors wild, cloth-patterned magenta-violet, gold, and green on Liberty's cheek with patches of the same distributed on the rest of that side. The reverse is as intensely lustrous as the obverse, though toning on that side is limited to touches of champagne and yellow at the margins. (#7130)

**Eye-Catching 1881-S Dollar, MS66 ★**

- 4219 1881-S MS66 ★ NGC. CAC. Ex: Sonnier, Cowle.** The obverse of this Star-designated silver dollar boasts eye-popping color, most notably peach, rose, lime, and blue. A well struck example with strong Premium Gem luster. The reverse is mostly silver in appearance, though gold and reddish-brown rim toning is present at the bottom and right. (#7130)

**Fantastic MS66 ★ 1881-S Dollar**

- 4220 1881-S MS66 ★ NGC. Ex: Cowle.** The obverse of this Morgan dollar has crazy-quilt toning in outlandish hues, with light lime-green dominant but also ample cobalt-blue, magenta, and peach colors. The reverse has a silver center with a subdued version of the obverse patina at the borders. Both sides are impressively lustrous. (#7130)
- 4221 1881-S MS67+ PCGS. CAC.** A remarkable specimen with fully struck details and eye-catching cartwheel luster. This coin is entirely brilliant silver-gray. A couple of wispy handling marks keep this piece from an even higher grade. PCGS has graded only seven examples in MS67+ (9/10). (#7130)
- 4222 1881-S MS67+ ★ NGC. CAC.** Arcs of navy-blue and canary-gold compete for territory across the obverse. The reverse is essentially brilliant. As usual for the '81-S, the strike is intricate. A lustrous and carefully preserved example of this classic silver type. (#7130)
- 4223 1881-S MS67+ PCGS.** Splendid peach-gold, navy-blue, lime-green, and magenta toning enriches the obverse. The reverse patina is less extensive but offers attractive autumn-gold, lilac, and ice-blue shades. Needle-sharp and virtually immaculate. Population: 7 in 67+, 92 finer (9/10). (#7130)

---

### Marvelous MS67 1882-CC Dollar

- 4224 1882-CC MS67 NGC.** A Superb Gem Carson City masterpiece that was almost assuredly GSA-sourced. Faint golden tints lend color to the creamy luster on this pale silver piece. The central devices are carefully preserved and boldly detailed with just a hint of twinkling frost on the hair over Liberty's ear. (#7134)
- 4225 1882-CC MS66 Prooflike PCGS.** An attractive Premium Gem with fully mirrored fields around satiny and lustrous devices, creating excellent contrast. Both sides are brilliant with just a hint of peripheral gold toning. Population: 61 in 66 Prooflike, 1 finer (9/10). (#7135)
- 4226 1882-O MS65 PCGS.** The obverse of this Gem is deeply toned with a mix of purple, green, magenta, and yellow, while the reverse is toned only around the perimeter. A powerfully struck specimen with no distracting marks. PCGS has certified only 26 examples finer (9/10). (#7136)
- 4227 1882-O MS65 PCGS. CAC.** The obverse displays attractive "end roll" toning, with peripheral areas of aquamarine and autumn-gold patina from the folded ends of a paper roll. The reverse is brilliant save for a hint of honey near the rims. The obverse has moderate carbon, but actual marks are minimal. (#7136)
- 4228 1882-S MS65 PCGS. CAC.** Outlandishly toned on the obverse with metallic plum, blue, cobalt, green, gold, and aqua hues. The reverse is mostly silver with only a faint echo-arc of color at the bottom and right. Housed in a first-generation holder. (#7140)

---

### Shining MS67 1883-CC Dollar

- 4229 1883-CC MS67 PCGS.** A gorgeous Superb Gem representative of this popular Carson City issue, saved in quantity in Treasury holdings but seldom offered this fine. Both sides have bold cartwheel luster that is largely silver, though touches of opaque gray-to-brown toning appear at the upper reverse rim. PCGS has graded three numerically finer examples (9/10). (#7144)

---

### Lovely MS67+ 1883-CC Silver Dollar

- 4230 1883-CC MS67+ NGC. VAM-5A, R.5.** This scarce Carson City VAM displays a clashed N (from IN) near Liberty's neck. A mere hint of almond-gold toning adorns this thoroughly lustrous and alertly struck high grade example. Nearly pristine save for a concealed thin mark on the left (facing) wing. Census: 3 in 67 Plus, none finer (9/10). (#7144)
- 4231 1883-CC MS65 Deep Mirror Prooflike PCGS. CAC.** Profound white-on-black contrast is seen on each side of this all-brilliant Gem. The 1883-CC dollar is one of the most popular Carson City issues, and is primarily available because of the GSA hoards released in the 1970s. (#97145)
- 4232 1883-CC MS66 Deep Mirror Prooflike PCGS. CAC.** This brilliant high grade Carson City dollar has the eye appeal of a cameo proof, since the fields are glassy and the devices offer consistent frost. The centers display minor incompleteness of strike, and the right obverse field displays faint marks. (#97145)
- 4233 1883-S MS63 PCGS. CAC.** A wonderful Select Mint State example, this 1883-S Morgan is fully brilliant with frosty silver luster. The strike is sharp, even at the central areas. (#7148)
- 4234 1884-CC MS66+ NGC.** Bold cartwheels with excellent inner detail. The obverse has rich waves of gold and orange patina with blue borders, while the reverse shows faint echoes of the warm colors at the margins. (#7152)
- 4235 1884-CC MS66+ NGC. CAC.** Thickly frosted devices give way to gorgeous silver-white fields that have bold cartwheels and only a faint whiff of patina. A great coin that comes mighty close to the Superb Gem level. (#7152)
- 4236 1884-CC MS66+ NGC. CAC.** This high grade Carson City Morgan features sweeping cartwheel luster and an exemplary strike. Practically untoned, and exceptionally free from abrasions. (#7152)

---

### Magnificent MS67 1884-CC Dollar

- 4237 1884-CC MS67 PCGS.** Carefully preserved with magnificent patina, a remarkable Superb Gem survivor from the popular 1884-CC Morgan dollar issue. Gold-orange toning runs diagonally from the upper right to the lower left, shading off into blues and greens. The reverse is minimally toned save for echoes of color near the rims. Population: 57 in 67, 3 finer (9/10). (#7152)

**4238 1884-O MS67 NGC.** The highly lustrous fields appear watery and show moderate contrast against the frosty design elements, although not enough to merit a Cameo designation. This impressive survivor has only a couple of nearly imperceptible handling marks. The surfaces are nearly brilliant. NGC has certified only one example in a higher grade (9/10). (#7154)

**4239 1884-S AU58 PCGS. CAC.** Silver-gray surfaces exhibit well struck design elements, including the hair at Liberty's ear and the eagle's breast feathers. The fields are semiprooflike, offering modest contrast with the motifs. Both sides are devoid of significant marks. (#7156)

**4240 1884-S AU58 NGC.** The '84-S is famous for its rarity in Mint State, but the present sharply struck example nearly reaches that important grade. Highpoint wear is marginal, and luster threatens to overtake the open fields. The obverse is minimally abraded, and the reverse has only moderate field contact and a solitary small bagmark on the eagle's belly. (#7156)

**4241 1885 MS67 NGC.** Bright lemon-gold and ocean-blue toning graces the reverse border, and ensures the eye appeal. The obverse margin displays faint mauve patina. This well preserved and lustrous high grade dollar is nicely struck with only minor inexactness at the centers. Encased in a prior generation holder. (#7158)

**4242 1885-CC MS65+ PCGS. CAC.** The obverse of this Gem has deep blue-green and iridescent toning while the reverse has a frame of gold at the border. We note a slender mark on Liberty's jaw. A lovely representative. (#7160)

**4243 1885-CC MS66 PCGS. CAC.** An arc of magenta, red, yellow, green, and hazel toning enhances the left side of the obverse, while the rest of the surfaces are ivory toned. This sharply struck Premium Gem has only a couple of tiny marks on either side. A scarcer Carson City issue with a mintage of 228,000 pieces. (#7160)

**4244 1885-CC MS66 PCGS.** This frosty Premium Gem represents the scarce 1885-CC Morgan, seen in small quantities compared to the issues of 1882 through 1884 when the GSA released millions of Carson City dollars in the late 1970s. Today it is hard to believe that those sales were more than 30 years ago. (#7160)

**4245 1885-CC MS66 PCGS. CAC.** An impressive Premium Gem, this 1885-CC represents the best that is readily available with only 40 finer PCGS coins certified in nearly 25 years (9/10). This frosty piece has brilliant silver luster with untuned surfaces. (#7160)

**4246 1885-CC MS66+ PCGS.** A notch above the "typical" Premium Gem and an undeniably appealing Carson City Morgan dollar. Ample frosted devices yield to cartwheel fields that offer thin layers of silver-gray toning. (#7160)

#### Stunning MS67 ★ 1885-CC Dollar

**4247 1885-CC MS67 ★ NGC.** Exquisitely preserved with instantly memorable patina. The obverse starts at the top with an oval of yellow, fading through orange, rose, and a broad zone of violet-magenta. The reverse is mostly silver with an area of canary patina to the right. An ideal selection from this low-mintage GSA issue. NGC has graded just five numerically finer pieces (9/10). (#7160)

#### Flashy MS67 ★ 1885-CC Morgan

**4248 1885-CC MS67 ★ NGC.** This brilliant Superb Gem is fully struck and semi-prooflike. Both fields are remarkably devoid of contact, and even the portrait is beautifully unabraded. An exceptional representative of this low mintage Carson City collector favorite. Census: 4 in 67 ★, none finer with a Star designation (9/10). (#7160)

**4249 1885-CC MS65 Deep Prooflike NGC.** Outstanding mirrors on both obverse and reverse, with the former side showing thin but delightful toning in dappled gold-orange and pale metallic-green. An intriguing Deep Prooflike Gem from this popular and low-mintage Carson City issue. Census: 65 in 65 Deep Prooflike, 19 finer (9/10). (#7161)

#### Select 1886-O Morgan Dollar Conditionally Scarce in Higher Grades

**4250 1886-O MS63 ANACS.** The 1886-O Morgan dollar was produced in large quantities, but few examples were saved by collectors. As a result, the date is scarce in grades above the Select level. Q. David Bowers considers MS63 or MS64 the Optimal Collecting Grades for this issue. The present coin displays sharply detailed design elements, with bright mint luster and traces of gold and lavender toning. The surfaces show a number of grade-consistent abrasions on both sides. (#7168)

#### Well Struck MS63 1886-O Dollar

**4251 1886-O MS63 PCGS.** Well struck with typically soft luster that is nonetheless pleasing. Wispy abrasions appear on each side, though these are mostly inoffensive. Touches of golden toning appear at the margins, while the interiors are pale gray. This is a higher-mintage New Orleans issue that nonetheless presents a challenge in Select Mint State and better. (#7168)

---

### Elusive 1886-O Morgan, MS63

- 4252 1886-O MS63 PCGS.** Autumn-gold toning hugs the design elements of this otherwise gunmetal-gray Morgan dollar. Sharply struck and satiny with the expected faint luster grazes. The 1886-O is a notorious conditional rarity, common in grades through XF but among the rarest issues of the series in Gem. (#7168)

---

### Brilliant 1886-O Morgan Dollar, MS63

- 4253 1886-O MS63 PCGS.** The 1886-O is one of the condition rarities in the Morgan dollar series, almost always found in circulated grades. Two of every three 1886-O Morgan dollars sent to PCGS is graded below this example. This piece is a lovely Select Mint State Morgan dollar with frosty silver surfaces (#7168)
- 4254 1886-S MS65 PCGS.** A well struck Gem whose sweeping luster and minimally toned appearance confirm the eye appeal. Nicely preserved, and a low mintage issue that rarely exceeds the MS65 level. (#7170)
- 4255 1887 MS67 NGC.** An impressive Superb Gem, and rarely found any finer, this 1887 Morgan dollar is a wonderful survivor from a mintage of more than 20 million coins. According to the NGC Census Report, only one coin out of every 500 receives an MS67 or finer grade. (#7172)
- 4256 1887 MS67 PCGS.** This issue ranks among the most plentiful of the entire series, with a mintage of more than 20 million coins. However, nearly every survivor is in a lower grade than the present piece. NGC and PCGS have combined to grade just four finer examples. This Superb Gem is highly lustrous with frosty silver surfaces and no toning on either side. The surfaces are flashy and nearly perfect. Population: 66 in 67, 1 finer (9/10). (#7172)
- 4257 1887/6 MS65 PCGS. VAM-2.** A Top 100 Variety. Delicate gold toning graces portions of this primarily brilliant Gem. Remarkably unabraded and lustrous with minor indifference of strike at the centers and on the claws. The underdigit is faint to the unaided eye, but is readily perceptible with magnification. PCGS has graded a mere seven finer examples (9/10). (#7174)

---

### 1887-O Morgan Dollar, MS65 Clean Surfaces, Strong Luster

- 4258 1887-O MS65 PCGS. CAC.** Although the 1887-O was produced in large numbers, the issue is not a common date today, especially in high grade. The present coin is a lustrous Gem, with a sharp strike and remarkably clean fields. Currently, only nine coins have been certified in higher numeric grades at PCGS (9/10). (#7176)

- 
- 4259 1887-O MS64 Deep Mirror Prooflike PCGS.** Minimally toned. The devices are heavily frosted and set against deep, almost “black” fields. Lightly abraded for the grade with just a couple of marks on the cheek and neck. Population: 91 in 64 Deep Mirror Prooflike, 7 finer (9/10). (#97177)

- 4260 1888-O MS66 PCGS.** An outstanding Premium Gem, this example has a better than usual strike with nearly full hair detail over Liberty’s ear. Both sides are frosty and lustrous with a hint of lemon toning along the left reverse border. (#7184)

---

### Desirable 1888-S Morgan Dollar, MS65 ★

- 4261 1888-S MS65 ★ NGC.** The 1888-S with a mintage of only 657,000 coins, is one of those dates that seems to fly under the radar of all but the most avid Morgan dollar specialists. This issue deserves a great deal of respect, especially in Gem or finer grades. This lovely specimen is brilliant and lustrous with reflective, nearly prooflike fields. Census: 3 in 65 ★, 1 finer ★ (9/10). (#7186)
- 4262 1889 MS66+ PCGS. CAC. VAM-19B, R.5.** This scarce VAM has a partial clashed letter n in front of the neck and minor die doubling on IN GOD WE TRUST. Untoned and lustrous with an exemplary strike and remarkable preservation. Population: 1 in 66+, 4 finer (9/10). (#7188)
- 4263 1889-CC XF40 PCGS.** Glimmers of luster remain in the protected areas on this final-year Carson City dollar. Lightly worn with mostly silver or gold-green surfaces, though patches of deep blue-violet appear along the obverse borders. Housed in a green label holder. *From The Diotte Collection.* (#7190)
- 4264 1889-CC—Rim Filing—NGC Details. XF.** The rim is in intermittently filed on each side, most prominently near 6 o’clock on the reverse. Many collectors will pay greater attention to the remaining luster about individual letters and stars. A key date dollar with medium straw-gold toning and no distracting marks. (#7190)

**4265 1889-CC AU58 PCGS.** A lightly toned Borderline Uncirculated representative of this coveted Carson City key. Sharply struck and partly lustrous with a mere hint of wear on the eagle's breast and the hair above Liberty's ear. Delicate field marks are present, none of which are of any individual significance. Traces of gold patina are chiefly confined to the peripheries. The 1889-CC has a higher mintage than the 1881-CC and 1885-CC, but those two issues appeared in vast quantity in Mint State within the GSA hoard, while the typical 1889-CC is circulated, with VF to XF grades predominant. (#7190)

### In-Demand 1889-CC Morgan Dollar MS61 Prooflike

**4266 1889-CC MS61 Prooflike PCGS. CAC.** The 1889-CC Morgan—in case an introduction is needed—is far and away the most elusive and most in-demand of the Carson City Mint silver dollars, with the 1879-CC and 1893-CC flanking it in distant second and third. While any Mint State 1889-CC dollar is a rarity, it is fortunate that a fair percentage of them are found with prooflike surfaces, as in the case of the present coin. The surfaces are all silver-white, with no trace of color. The strike is full throughout, another prized characteristic. There are only light abrasions for the grade: The only noticeable flaws are a couple of milling marks at the top of the cap, and a scratch from the top of the cap that goes past the U in UNUM. Population: 12 in 61 Prooflike, 49 finer (9/10). (#7191)

### Pleasing MS65 1889-O Dollar

**4267 1889-O MS65 PCGS. CAC.** A lustrous Gem that is well struck save for the hair over Liberty's ear, which is pillowy. Light gold-orange elements appear at parts of the margins, while the centers are pale silver-blue. While this New Orleans issue is merely scarce in MS65, it is a rarity any finer; PCGS has certified just nine such pieces (9/10). (#7192)

**4268 1889-S MS65 PCGS. CAC.** The 1889-S is best classified as a semi-key date Morgan dollar, although MS65 is the top grade that is reasonably easy to locate. PCGS has only certified 63 finer examples (9/10). This Gem has brilliant surfaces with frosty silver luster. The obverse exhibits delicate peripheral gold toning. (#7194)

**4269 1889-S MS65 PCGS. VAM-12, R.5.** The mintmark and the 9 in the date are repunched. Lovely peach-gold patina brightens the borders of this lustrous and sharply struck better date dollar. The reverse is splendidly preserved, as is the obverse field. The portrait displays faint marks. (#7194)

**4270 1890 MS65 PCGS.** An enchantingly toned Gem with swirling luster beneath gold, peach, blue, and violet patina. Slight central striking softness is typical for the date. PCGS has graded just one numerically finer examples (8/10). (#7196)

### Popular 1890-CC Tail Bar Morgan Dollar, MS64

**4271 1890-CC Tail Bar MS64 NGC. VAM-4.** A Top 100 Variety. The classic "Tail Bar" variety has a die gouge (the "bar") connecting the eagle's left tailfeathers with the wreath below. This is an attractive near-Gem example, powerfully lustrous and well-defined on frosted devices. Silver interiors give way to splashes of gold, orange, and violet-brown near the rims. A shallow luster scrape to the right of the arrowheads contributes to the grade. (#87198)

**4272 1890-CC MS64 NGC.** An outstanding near-Gem representative, this 1890-CC dollar is fully brilliant with satiny luster. The central design definition is above average for this issue, or for nearly any Morgan dollar. (#7198)

---

### Deep Mirror MS64+ 1890-CC Morgan

**4273 1890-CC MS64+ Deep Mirror Prooflike PCGS. CAC. VAM-3, R.4.** The base of the 90 is clearly repunched, and Liberty's profile is lightly die doubled. Glassy fields and frosty motifs provide white-on-black contrast for this virtually untuned near-Gem. The strike is crisp, and the reverse is splendidly preserved. Moderate contact on the cheekbone and right obverse field correspond to the grade. (#97199)

**4274 1890-S MS65 Prooflike PCGS.** A wisp of gold patina graces the portrait, but this flashy Gem is otherwise brilliant. The strike is exemplary, and marks are limited to minor contact on the upper left obverse field. Population: 13 in 65 Prooflike, 3 finer (9/10). (#7203)

**4275 1891 MS63 Prooflike PCGS.** This sharply detailed and fully brilliant piece has mirrored fields that frame its satiny white devices. Just a few small marks on each side include a graze on Liberty's cheek that limits the grade. Population: 29 in 63 Prooflike, 17 finer (9/10). (#7205)

**4276 1891-CC MS64 PCGS. CAC. VAM-3.** A Top 100 Variety. Light chestnut toning enriches this lustrous and crisply struck Carson City Morgan. The reverse is well preserved, and the obverse displays only a few faint marks on the portrait. (#7206)

**4277 1891-CC MS64 PCGS. VAM-6, R.5.** The reverse is lightly die doubled, most prominently on AMERICA. Coruscating luster readily penetrates the dusky tan-brown and silver-gray toning. Sharply struck and original with a well preserved reverse. (#7206)

**4278 1891-CC MS63 Deep Mirror Prooflike NGC.** A brilliant better date Carson City Morgan with mirrored fields and noticeable cameo frost. Softly brought up, and the obverse field displays marks consistent with the grade. (#97207)

**4279 1892 MS64 PCGS. CAC.** Softly struck on the hair over Liberty's ear but without actual wear. In fact, this is a lustrous silver near-Gem with only a few luster grazes and scrapes. (#7212)

---

### Gem 1892 Dollar Only One Coin Certified Finer at NGC

**4280 1892 MS65 NGC.** The 1892 Morgan dollar is available in lower Mint State grades, but the issue becomes scarce at the Gem level, and extremely rare in any finer grade. As of this writing, NGC has certified only a single coin in higher numeric grade (9/10). This example is a well struck Gem, with bright mint luster and abundant eye appeal. (#7212)

**4281 1892-CC MS60 NGC.** Pleasingly detailed with only minor softness at the center of the portrait. Lightly gold-toned across surfaces which show numerous wispy abrasions but relatively few serious marks. (#7214)

**4282 1892-CC MS61 NGC.** This lovely Mint State piece exhibits brilliant silver surfaces with satiny fields. Minor marks in the field and on Liberty's cheek prevent a higher grade, although the overall appearance is much finer than the grade suggests. (#7214)

**4283 1892-CC MS63 PCGS.** A frosty and fully lustrous example, this Select Mint State 1892-CC dollar has brilliant silver surfaces that are void of toning. The strike is typically weak over Liberty's ear but all other design elements are bold. (#7214)

**4284 1892-CC MS63 PCGS.** A frosty Select Mint State piece, this 1892-CC dollar has delicate gold toning over brilliant silver surfaces, creating excellent eye appeal. (#7214)

**4285 1892-CC MS64 PCGS. Ex: Redfield.** Frosted on the devices with generally silver fields. The lustrous margins show dappled gold, claret, and rose-violet patina. A charming Carson City near-Gem. *From The Diotte Collection.* (#7214)

---

### Satiny 1892-O Morgan Dollar, MS65

**4286 1892-O MS65 PCGS.** Although slightly weak at the centers, all other aspects of this satiny Gem suggest a fine addition to a high quality set of these popular coins. Both sides are entirely brilliant with no evidence of toning. PCGS has only certified five finer pieces (9/10). (#7216)

---

### Bright 1893 Morgan Dollar, MS65

**4287 1893 MS65 PCGS.** Though this Philadelphia issue has been overshadowed by its famous S-mint counterpart for many years, the 1893 Morgan dollar is both low-mintage (under 400,000 pieces) and a rarity any finer than this Gem. Strong cartwheels form in the fields and shine through a thin layers of gold-tinged white patina. PCGS has graded just three finer pieces (9/10). (#7220)

**4288 1893-CC XF45 NGC.** Surprisingly bright for the time with bold silver radiance. A few small patches of brown toning are present, most visibly on the eagle's tailfeathers. Lightly worn but with few serious abrasions. (#7222)

**4289 1893-CC—Improperly Cleaned—NGC Details. AU.** Well struck for this final-year Carson City issue, if over-bright from a past cleaning. Moderately abraded silver surfaces show a single claret-and-gold spot of toning at the jaw-to-neck border. (#7222)

- 4290 1893-CC—Improperly Cleaned—NGC Details. AU.** Predominantly cream-gray, although the margins display tobacco-brown and forest-green. Two faded pinscratches are respectively noted beneath Liberty's ear and on the right obverse field, and a couple of moderate marks are near the obverse rim at 6:30. (#7222)

**Challenging Uncirculated Details  
1893-CC Morgan Dollar**

- 4291 1893-CC—Improperly Cleaned—NGC Details. Unc.** Medium honey-gold toning blankets this nicely struck key date Carson City Morgan dollar. The absence of any visible abrasions would suggest a high Mint State grade to the novice, but the cartwheel luster is somewhat subdued and careful inspection under a lens reveals delicate hairlines. (#7222)

**Select 1893-CC Morgan Dollar  
In-Demand, Final-Year Type Coin**

- 4292 1893-CC MS63 PCGS. CAC.** Speaking of the 1893-CC Morgan dollar, Q. David Bowers states, "A piece MS-63 or finer, with minimum bagmarks, is a numismatic find and is very special." The present coin fits Bowers' description quite nicely, with sharp striking details, brilliant lustrous surfaces, and a minimum number of abrasions for the grade. The 1893-CC is a low-mintage issue, prized by mintmark type collectors as the last date from the Carson City Mint. (#7222)

- 4293 1893-S—Scratches—NGC Details. AG.** Gold-orange overtones across light gray surfaces. Several light scratches cross Liberty's portrait, but they are unlikely to bother the interested bidder. (#7226)

- 4294 1893-S AG3 ANACS.** A well-worn but entirely collectible example of the famous 1893-S Morgan dollar. Surfaces are light silver-gray with occasional darker variations. Small to moderate rim bumps are noted on the obverse. (#7226)

- 4295 1893-S—Improperly Cleaned—NGC Details. Good.** A well-worn but readily collectible example of the low-mintage classic. Pearl-gray on the obverse with the reverse partially retoned gold after this coin's cleaning. (#7226)

- 4296 1893-S—Reverse Damage—NGC Details. VG.** This slate-gray key date dollar has a faint hairlines on the eagle's breast, and wispy marks are noted near the peak of Liberty's cap. A small gouge near the right end of the wreath is the source of the NGC designation. (#7226)

- 4297 1893-S—Edge Damage—NGC Details. VG.** The newfangled NGC holder allows viewing of most of the edge, which appears slightly flattened and moderately scratched near 7 o'clock. This cream-gray key date dollar also displays faint hairlines near the eagle's head. Most collectors will readily forgive such imperfections given its Very Good grade. (#7226)

**1893-S Morgan Dollar, Fine 12  
Classic Key Date**

- 4298 1893-S Fine 12 NGC.** The 1893-S is on the must-have list of every Morgan dollar collector, with its series-low mintage of 100,000 pieces. The present Fine 12 example is an appropriate choice for most collectors, as high grade specimens are so elusive and expensive. This piece shows significant wear on the design elements, but all major details remain intact. The surfaces exhibit gray, ice-blue, and gold patina, with slight traces of mint luster still present. (#7226)

**VF30 Sharpness 1893-S Silver Dollar**

- 4299 1893-S—Wire Brushed—ANACS. VF30 Details.** This slate-gray Morgan dollar is thickly hairlined and minutely granular. Four brief faded pinscratches are noted on the left obverse field in front of the profile. Nonetheless, a collectible representative of the most desirable business strike issue of the widely held series. (#7226)

**Pleasing 1893-S Morgan Dollar, XF40**

- 4300 1893-S XF40 PCGS. CAC.** The King of business strike Morgan dollars is the 1893-S, with a mintage of 100,000 coins, although some sources now suggest a smaller real mintage. This light gray example has attractive, natural surfaces with no marks of any consequence. It is a highly collectible, lightly circulated example. (#7226)

- 4301 1894 VF30 NGC.** A lovely silver-gray example, this 1894 Morgan dollar has a natural appearance with light wear but hints of luster still present. Minor surface marks on each side are consistent with the grade. (#7228)
- 4302 1894—Improperly Cleaned—NGC Details. AU.** Substantial luster beckons from this nearly untuned rare date dollar. Wispy hairlines are seen throughout, and the cheek displays slide marks. (#7228)
- 4303 1894—Improperly Cleaned—NGC Details. AU.** Light cleaning has subdued the luster of this 1894 dollar, though considerable cartwheels remain in the fields. Faint golden overtones appear close to the rims. (#7228)
- 4304 1894—Improperly Cleaned—NGC Details. AU.** With just 110,000 business strikes produced, the 1894 is one of the most famous P-mint Morgan dollar issues. Though cleaned in the past, this mildly worn example has vestiges of original luster under pale gold and blue-pink retoning. (#7228)
- 4305 1894—Improperly Cleaned—NCS. AU.** This mildly glossy low mintage Philly dollar displays delicate hairlines, but luster glimmers from design recesses. The obverse is untuned, while the reverse is dusky autumn-gold and stone-gray. The reverse rim appears abraded at 5 o'clock, but no other marks are consequential. *From The Diotte Collection.* (#7228)
- 4306 1894 AU55 PCGS. CAC.** A pleasing Choice AU rare date dollar that displays close to full Mint luster. A trace of wear is noted at the centers, but no marks are remotely consequential. Encapsulated in a green label holder. (#7228)

---

**1894 Morgan Dollar, MS64  
Low-Mintage Philadelphia Issue**

- 4307 1894 MS64 NGC.** The 1894 Morgan dollar claims the second-lowest business-strike mintage of the series, at 110,000 pieces. Examples in Choice Mint State condition are scarce, and any finer grade is quite rare. The present coin is a delightful specimen, with sharply detailed design elements and exceptional mint luster. (#7228)

---

**1894-O Dollar, MS63  
Unusually Vibrant Luster**

- 4308 1894-O MS63 PCGS.** High quality 1894-O Morgan dollars are quite elusive, because of a generally poor strike and typically dull luster. The present Select example is a pleasing exception, with sharp details in most areas, just a touch of softness on the hair above the ears and the eagle's breast, and vibrant, frosty luster. (#7230)

- 4309 1894-S MS63 PCGS.** Well struck for the issue with small hints of golden peripheral toning and a few tiny charcoal-gray spots. This lustrous Select coin has a shallow but grade-defining line on the cheek. Housed in a green label holder. (#7232)
- 4310 1894-S MS64 PCGS.** Better-defined than often seen, particularly on Liberty's hair. This silvery near-Gem shows scattered luster scrapes and a short line of reed marks in back of the jaw. (#7232)
- 4311 1894-S MS64 PCGS.** This satiny beauty has delicate gold toning over brilliant and lustrous surfaces. A few faint striations are evident at the center, remaining from planchet preparation at the Mint. A few minuscule marks are all that prevent a higher grade. (#7232)
- 4312 1895-O AU50 NGC.** A pearl-gray representative of this challenging New Orleans issue. Luster brightens protected regions, the highpoints show only slight wear, and marks are moderate throughout. (#7236)
- 4313 1895-O AU55 NGC.** Luster illuminates design elements beneath the medium chestnut-gray toning. Nicely struck and minimally abraded. The key date of the New Orleans portion of the Morgan dollar series. (#7236)
- 4314 1895-S—Improperly Cleaned—NGC Details. AU.** Lightly cleaned in the past but with substantial luster remaining, particularly on the reverse. Pale gold, pink, and lavender toning washes over each side. (#7238)
- 4315 1895-S—Improperly Cleaned—NGC Details. AU.** Moderately abraded example of the popular low-mintage San Francisco issue. Surfaces mostly silver and bright after a cleaning, though tan retoning appears at the borders. (#7238)

---

**Lustrous 1895-S Morgan, MS64**

- 4316 1895-S MS64 PCGS.** An amazing near-Gem, this fully brilliant and lustrous Morgan dollar approaches the finest available quality for a '95-S. It is also the only affordable date of the year in Choice or Gem Mint State grades. Wispy champagne toning visits part of the reverse, with the balance fully brilliant. The fields are slightly reflective. PCGS has only certified 23 finer examples (9/10). (#7238)
- 4317 1896-O MS61 NGC.** Although this coin's striking softness is typical, the eye appeal is substantially above-average for an MS61 coin. Wispy abrasions are present on and near the portrait, and the pale pearl-gray surfaces show hints of salmon and violet close to the rims. (#7242)

---

### Dusky Choice 1896-S Dollar

- 4318 1896-S MS64 PCGS.** Medium cream-gray embraces this lustrous and nicely struck near-Gem. Well preserved overall, with a small cluster of marks on the left obverse field accounting for the third party grade. Despite a plentiful mintage of 5 million pieces, the 1896-S is scarce in XF and better grades. (#7244)

---

### Borderline Gem 1896-S Morgan, MS64+

- 4319 1896-S MS64+ PCGS.** Given the PCGS + designation, this 1896-S is a true borderline Gem, and would fit nicely in an otherwise Gem set of Morgan silver dollars. Both sides are fully brilliant with slight central weakness over the ear and on the eagle's breast, perhaps the sole reason that an MS65 grade was not assigned. PCGS has only graded two examples of this date in MS64+, with no finer pieces receiving that special designation (9/10). (#7244)

- 
- 4320 1897 MS66 PCGS.** A sensational Premium Gem with frosty silver surfaces, this brilliant beauty lacks any toning on either side. Exceptional surfaces provide grand eye appeal. (#7246)

- 4321 1898-O MS67 NGC.** Aside from trifling softness on the hair over Liberty's ear, this lightly peach-toned O-mint Superb Gem is virtually faultless. Fantastic luster and eye appeal in spades. (#7254)

---

### 1898-S Dollar, MS66 Conditionally Scarce in High Grades

- 4322 1898-S MS66 PCGS.** This better-date S-mint dollar is relatively available in lower grades but the census figures underscore its scarcity in high grades. Only 11 coins have been so graded by NGC with one finer (9/10). This all-brilliant coin has bright surfaces with semireflective fields. Liberty's cheek is remarkably smooth and rounded with no objectionable marks. (#7256)

- 4323 1899 MS65 PCGS.** Light golden toning graces the margins of this highly lustrous and well preserved example. The strike is good, although slightly inexact at the centers. Among the lowest mintage Philadelphia issues of the series, yet affordable in Gem quality. (#7258)

- 4324 1899 MS65 PCGS.** Attentively struck for the date, though Liberty's hair shows minor incompleteness. Strong cartwheel luster under delicate layers of silver-gray patina. (#7258)

- 4325 1899 MS66 PCGS.** An important Premium Gem example of this lower-mintage issue, one of fewer than a third of a million pieces struck. Light forest-green toning appears in patches over pale silver-blue surfaces. PCGS has graded 18 numerically finer pieces (9/10). (#7258)

---

### Superb Gem 1900-O Morgan Dollar Among the Finest Certified

- 4326 1900-O MS67 NGC.** A spectacular Superb Gem example of this popular type coin, this specimen exhibits sharply defined devices, vibrant mint luster, and just a touch of golden toning. The 1900-O was produced in large numbers, but few surviving coins can match the quality of this magnificent piece. No coins have been certified in higher numeric grades by either of the leading grading services (9/10). (#7266)

- 
- 4327 1900-O/CC MS64 PCGS. VAM-8.** A Top 100 Variety. The last appearance of a Carson City mintmark on U.S. coinage, albeit as an undertype. This strongly lustrous near-Gem is minimally toned aside from pale green-gold outer toning and a few dots of deep brown. Housed in a green label holder. (#7268)

---

### Elusive MS62 1901 Morgan Dollar

- 4328 1901 MS62 NGC.** This turn-of-the-century Philadelphia issue is ordinary enough in most circulated grades, yet at the AU level it is elusive, and Mint State pieces are genuinely scarce in the Select and better levels. This silver-lustered MS62 coin provides a balance, with no trace of wear but light abrasions (including shallow reed marks under Liberty's chin) that combine to account for the grade. (#7272)

- 
- 4329 1901-S MS64 NGC.** Splashes of delicate caramel-gold patina endow this lustrous and scarce date near-Gem silver dollar. Nicely struck, and contact is generally confined to the cheekbone. (#7276)

---

Premium Gem 1902-S Morgan Dollar  
Rare High Quality Example

**4330 1902-S MS66 PCGS.** This delightful Premium Gem 1902-S Morgan dollar is one of the few high quality examples of this poorly produced issue. The strike, which is notoriously shallow on the "02-S, is sharp in most areas of this piece, with just the slightest softness on the hair above the ear and the eagle's breast. The surfaces display strong, satiny mint luster, with hints of gold and silver-gray toning. Population: 30 in 66, 4 finer (9/10). (#7282)

**4331 1903-S AU50 NGC.** A hint of gray appears on the light silver surfaces with nearly full luster and only a trace of wear. This issue is difficult to locate in the top circulated grades, and will generate considerable demand. (#7288)

**4332 1903-S Small S VF25 PCGS. VAM-2.** A Top 100 Variety. A problem-free stone-gray example. The 1903-S is a better date regardless of the mintmark size, but the Small S is certainly rarer than its Large S counterpart. The mintmark punch was intended for Barber halves, but mistakenly used on a single 1903-S reverse die. (#7306)

---

Toned 1904-S Morgan Dollar, MS64

**4333 1904-S MS64 PCGS.** The 1904-S is one of the key dates to a complete collection of Morgan dollars, with Gem or finer pieces extremely difficult to locate. For that reason, attractive near-Gems like the present piece are in high demand. This Choice Mint State dollar is highly lustrous with satiny mint brilliance beneath rainbow iridescence. (#7294)

---

PROOF MORGAN DOLLARS

Bold 1884 Morgan Dollar, PR65

**4334 1884 PR65 NGC.** Although NGC did not designate this piece Cameo, the lightly frosted devices create moderate contrast against the watery, deeply mirrored fields, especially on the reverse. This boldly struck specimen has only a couple of light hairlines in the fields but is otherwise flawless. Only 875 proofs were struck. Census: 27 in 65, 21 finer (9/10). (#7319)

**4335 1887—Improperly Cleaned—NGC Details. Proof.** A fully struck specimen that has flashy fields and moderate white-on-black contrast. The obverse is untoned, while the reverse displays light mauve patina. A few inoffensive hairlines are evident on the field near the profile. (#7322)

---

Select Proof 1887 Morgan Dollar

**4336 1887 PR63 PCGS.** One of just 710 proofs coined, and a strongly mirrored example with faint frost that maximizes the possible field-to-device contrast. Silver-gray interiors give way to blue-violet at the rims. Scattered hairlines through the fields account for the grade. PCGS has graded 99 numerically finer examples (9/10). (#7322)

---

Impressive 1891 Morgan Dollar, PR65 Cameo

**4337 1891 PR65 Cameo NGC.** This impressive Gem Cameo proof has fully brilliant silver surfaces on both sides, save for a few delicate splashes of lilac on the reverse. Both sides have deeply mirrored fields that frame the lustrous and sharply defined devices. This is a lovely candidate for a specialized cabinet or type collection. Census: 15 in 65 Cameo, 28 finer (9/10). (#87326)

**4338 1893 PR62 Cameo PCGS.** Softly struck on the hair over Liberty's ear but otherwise well-defined with distinct frost on the devices. Rich green, gold, and violet toning covers field hairlines and other flaws with varying levels of success. Population: 5 in 62 Cameo, 33 finer (9/10).  
*From The Diotte Collection.* (#87328)

---

Deeply Contrasted 1898 Morgan Dollar  
Gem Deep Cameo Proof

- 4339** 1898 PR65 Deep Cameo PCGS. CAC. The 1898 proof Morgan silver dollar is one of a small number of issues in the series (the 1896 and 1897 are others) that are especially prized for their aesthetic appeal and deep cameo contrast. Q. David Bowers comments in his massive *Silver Dollar Encyclopedia* that "proofs of this date are usually sharply struck with beautiful, bold cameo contrast and are unusually beautiful." Examples of the 1898 Morgan have been certified in grades up to PR69 Cameo (NGC) and PR68 Cameo (PCGS). The present Gem Deep Cameo boasts the expected—but nonetheless thoroughly appealing—stark contrast between profoundly mirrored fields and frost-coated devices. The ice-white on jet-black contrast is particularly deep on this piece, an effect that collectors prize enormously. A super type coin, with the CAC kicker as a bonus. Population: 6 in 65 Deep Cameo, 15 finer (9/10). (#97333)
- 

---

Memorable 1899 Morgan Dollar  
PR67+ Ultra Cameo

- 4340** 1899 PR67+ Ultra Cameo NGC. CAC. The proof 1899 Morgans were made in the extent of 846 pieces. The 1899 Morgan dollar is a celebrated issue even as a business strike, an issue that saw a memorably low production of only 330,000 business strikes. This has lent extra cachet to the proofs of this year—not that the present piece needs it. The deep, watery mirrors complement heavily frosted devices. The centers are brilliant on each side, with an golden outline around the peripheries. The strike is full, as expected, but not always achieved on earlier-dated proof Morgans. This piece is one of only two PR67 Ultra Cameo 1899s at NGC, and the only one with the Plus designation (9/10). Close to "wonder coin" quality. (#97334)
-

**1903 Morgan Dollar, PR67**  
**Incredible, Well-Preserved Example**

- 4341 1903 PR67 NGC.** Proof dollars from 1903 were struck in the no-contrast method of proofing that began in earnest at the Mint in 1902. Although many are deeply toned in rich multicolored shades and not advisable candidates to be dipped, less they end up with an unimpressive, “washed-out” appearance, a small quantity such as this piece combine brilliance with superior eye appeal and depth of mirrors. Both sides show bright, incredibly reflective pools of watery reflectivity that, even with the aid of a glass, fail to reveal even the tiniest hairline. One notices a slight amount of contrast between the fields and the devices on the reverse; just another added feature of this supremely preserved Morgan dollar. The population reports undoubtedly mask a number of resubmissions. Census: 23 in 67, 5 finer (9/10). (#7338)

**PEACE DOLLARS**

- 4342 1921 MS65 PCGS.** Gunmetal-gray and chestnut-tan blend throughout this evenly patinated and lustrous Gem. Exceptionally unabraded, and with better definition on the hair over the ear than on most examples of this first-year high relief date. (#7356)
- 4343 1921 MS65 NGC.** Although the central obverse detail is incomplete, this Gem is highly lustrous with brilliant, satiny silver surfaces. Wisps of gold toning heighten its aesthetic desirability. (#7356)
- 4344 1921 MS65 NGC.** A lovely Gem, this 1921 Peace dollar has delicate gold toning with satiny underlying luster. Sharply struck, save for the usual design weakness at the centers. (#7356)
- 4345 1923 MS66+ PCGS. CAC.** Simply outstanding eye appeal with thickly frosted silver luster. Memorably appealing and just a few shallow grazes away from a Superb Gem designation. PCGS has certified just 48 coins as MS67 or better (9/10). (#7360)
- 4346 1923 Tail On O Early Die State MS63 NGC. VAM-1C.** A Top 50 Variety. The “tail” or die break beneath the O in DOLLAR is slender on the present coin, although in later states it is thick and gives the O an appearance of a 9. Sharply struck and lustrous with dappled caramel-gold patina. Combined EDS and LDS NGC Census: 6 in 63, 3 finer (9/10). (#133754)

**Interesting 1923 VAM-1C Peace Dollar, MS64**

- 4347 1923 Tail On O Late Die State MS64 NGC. CAC. VAM-1C.** A Top-50 Variety. This desirable Peace dollar variety has a heavy die break on the reverse, extending down to the left from the O in DOLLAR. A late die state piece, it is described as having a “Tail on O,” according to the NGC label. Both sides are frosty and lustrous with natural ivory surfaces. Although attributed on the holder, NGC has no separate census listing for this variety. (#133754)

**Popular 1927 Peace Dollar, MS65**

- 4348 1927 MS65 NGC.** Strongly struck through the interiors with pale pearl-gray luster accented in gold and tan. Softly frosted notes are most visible on the eagle’s rock perch. This Philadelphia date is available for a price in Gem condition, but anything finer is extremely rare. NGC has graded only two such coins (9/10). (#7370)
- 4349 1927-S MS64 PCGS.** Well struck and impressively lustrous through rich and dappled patina, denim-blue to sky and dove-gray. Additional greenish elements peek through at the margins. PCGS has graded 62 coins finer (9/10). (#7372)

**4350 1928 MS64 PCGS.** A mainly silver-white near-Gem example of this popular key issue. Freckles of gray and gold color appear on Liberty's portrait and at the margins, and a handful of small to moderate marks, including one in the rays above the word DOLLAR, contribute to the grade. (#7373)

**4351 1928 MS64 PCGS. CAC.** Delicate chestnut-tan toning enriches this lustrous and low mintage silver dollar. The obverse has a few faint grazes, and the reverse is smooth save for a solitary tick on the eagle's back. (#7373)

#### Vibrant Premium Gem 1934 Peace Dollar

**4352 1934 MS66 PCGS. CAC.** Boldly impressed with soft dove-gray luster that displays green-tan overtones at the margins. Both sides are remarkably smooth for this elusive later Peace dollar issue, which boasts a mintage of under a million pieces. Just a few tiny ticks on the lower bust preclude an even finer designation. PCGS has graded only three numerically finer pieces (9/10). (#7375)

#### Choice 1934-S Peace Dollar Low-Mintage Key

**4353 1934-S MS64 PCGS. CAC.** The 1934-S Peace dollar, with a low mintage of just over 1 million pieces, is a key date in this popular series. Few coins were saved by collectors, making Mint State examples even more elusive. The present coin is an attractive Choice specimen, with a sharp strike and strong mint luster. The surfaces display golden-brown, gray, and amber toning, with most of the color on the obverse. (#7377)

#### Bright MS64 1934-S Dollar

**4354 1934-S MS64 PCGS.** Just over a million 1934-S Peace dollars were struck, though attractive examples are available, albeit at a price. This is a suitable near-Gem representative, strongly lustrous with a touch of frostiness to the devices. Splashes of peach, rose, and gold toning cover parts of the otherwise silver surfaces. Small, scattered luster grazes and minor marks combine to account for the grade. (#7377)

**4355 1935-S MS65 PCGS. CAC.** Three Rays beneath ONE. The borders display russet-red shades of various intensity, but the remainder of this final-year Gem possesses only delicate gold toning. Nicely struck and impressively undisturbed by contact. (#7379)

**4356 1935-S MS65 PCGS. CAC.** Three Rays below ONE. Delicate sun-gold toning visits this lustrous and boldly struck Gem. The obverse is magnificently preserved, and the obverse exhibits only the infrequent unimportant mark. (#7379)

## COMMEMORATIVE SILVER

#### Near-Gem 1900 Lafayette Dollar

**4357 1900 Lafayette Dollar MS64 PCGS. CAC. DuVall 2-C.** This variety is best known by its obverse, which has repunching on the second S in STATES. Variety aside, this is simply an attractive near-Gem Lafayette dollar, a species that is far from common. Frosted silver centers yield to gold-influenced fields, and blue-gray toning appears around much of the obverse borders and parts of the reverse. (#9222)

#### Exquisite Near-Gem 1900 Lafayette Dollar

**4358 1900 Lafayette Dollar MS64 PCGS. CAC. DuVall 2-C.** Autumn-gold toning illuminates the margins of this lustrous and splendidly unabraded near-Gem. The strike is complete aside from Washington's jaw and lower cheek, which display minor vestiges of the planchet surface. An exceptional example of the only classic silver dollar commemorative issue, which is usually encountered with slight rub or in moderately abraded Uncirculated grades. (#9222)

**4359 1921 Alabama MS65 PCGS.** Delicate almond-gold and olive-gray visit this satiny and lightly abraded Alabama "Plain" half. As is customary for the issue, the eagle's front leg is incompletely brought up. Encased in a green label holder. (#9224)

**4360 1921 Alabama MS65 PCGS. CAC.** The 1921 Alabama Centennial half dollar has an estimated distribution figure of 35,000 pieces. The present coin is a well struck Gem, with bright mint luster and traces of green and ice-blue toning. (#9224)

### High-Grade MS66 Alabama 2x2 Half

- 4361 1921 Alabama 2x2 MS66 PCGS.** Delicate peach and olive toning enriches this satiny, original, and impressively unabraded Premium Gem. The strike on the eagle's leg is above average for the Alabama type, and only the back claw lacks sharp definition. Population: 71 in 66, 5 finer (9/10).

*Ex: Central States Signature (Heritage, 5/2007), lot 5200, which realized \$2,645. (#9225)*

- 4362 1937 Antietam MS67+ NGC.** CAC. Pastel lime and rose-red visit this coruscating and well preserved Civil War commemorative. An outstanding example that would be a highlight of any advanced cabinet. Census: 1 in 67+, 19 finer (9/10). (#9229)

- 4363 1935-D Arkansas MS67 NGC.** A virtually stone-white Superb Gem that boasts dynamic luster and pleasing preservation. Just 5,505 pieces were struck. Census: 26 in 67, 2 finer (9/10).

*Ex: Houston Signature (Heritage, 12/2008), lot 1562, which realized \$1,610. (#9234)*

- 4364 1939 Arkansas PDS Set MS64 to MS65 NGC.** Includes 1939 MS64, green-sage at left obverse and minimally toned elsewhere; 1939-D MS65, faintly gold-tinged at the margins with a spot of deep color at the AR of DOLLAR; and a 1939-S MS64, lustrous with peripheral gold and blue toning. (Total: 3 coins) (#9252)

- 4365 1936-S Bay Bridge MS67 PCGS.** Soft gray luster with tan elements scattered at the margins. This is a well struck Superb Gem example of an issue that is underrated at that level. Housed in a green label holder. PCGS has graded just nine finer pieces (9/10). (#9254)

- 4366 1936-S Bay Bridge MS67 NGC.** A virtually stone-white Superb Gem that boasts dazzling luster and attractive preservation. Appropriate for a Bay area commemorative, this type was struck solely at the San Francisco Mint. Census: 78 in 67, 9 finer (9/10). *From The Classic Collection. (#9254)*

- 4367 1936-S Bay Bridge MS67 PCGS.** Attractive golden-gray patina overlays frosty luster, and the design features are well impressed. The surfaces on both sides are refreshingly well preserved. PCGS has seen only 9 coins finer (9/10).

*From The South Pass Collection. (#9254)*

- 4368 1935/34-D Boone MS66 NGC.** CAC. The 1935-D (with small 1934) Boone commemorative half dollar boasts a minuscule mintage of 2,003 pieces. The present coin is an impressive Premium Gem, with a sharp strike and satiny mint luster, with traces of golden toning. (#9263)

- 4369 1937 Boone MS67 PCGS.** CAC. Gold-orange toning is intense at the obverse borders, while the rest of the coin is mainly pale silver-blue. A smooth Superb Gem. PCGS has graded just three coins finer (9/10). (#9270)

- 4370 1936 Bridgeport MS67 PCGS.** CAC. Golden-brown margins frame cream-gray centers. Immaculate and desirable. Although once the leading citizen of Bridgeport, Connecticut, P.T. Barnum is nonetheless an unlikely subject for a commemorative coin. Even in 1936, he was best known for his quotation "a sucker is born every minute." Population: 57 in 67, 0 finer (9/10). (#9279)

- 4371 1925-S California MS66 NGC.** A California Premium Gem that has bold luster on each side. The well-defined obverse boasts multicolor patina heavy on the reds and yellows, while the reverse has more mild champagne and silver-gray hues.

*From The Classic Collection. (#9281)*

### Gleaming MS67 1925-S California Half

- 4372 1925-S California MS67 PCGS.** The "California Diamond Jubilee" half dollar is among the most celebrated classic silver commemorative designs, thanks to an uncluttered and effective presentation. The artist was Jo Mora, a California resident famous in his time for Native American and Western themes. This Superb Gem shows off the design well, framing the solidly struck silver figures in green-gold and blue-gray peripheral toning. Housed in a green label holder. Population: 82 in 67, 6 finer (9/10).

*From The South Pass Collection. (#9281)*

- 4373 1936 Cincinnati PDS Set MS64 NGC.** The set includes: 1936, apricot-gold, fire-red, and tan toning, minor marks near the chin; 1936-D, lustrous and well preserved with streak green-gold and navy-blue obverse patina; and a 1936-S, sun-green, aqua, and lemon patina, thin marks on the right reverse field. (Total: 3 coins) (#9286)

- 4374 Pair of 1936 Columbia PDS Sets MS64 to MS66 NGC With Ephemera.** All six coins in various states of tab toning P-mint coins graded MS64 and MS66; D-mint coins graded MS65 and MS66; and both S-mint coins graded MS64. Also included in this lot is a suite of ephemera, including two of the original cardboard holders and an envelope addressed to "Mrs. Willaim [sic] Lykes, Sr. / Lykesland, S. C." though not mailed, as well as two carbon copies of the letter sent by the Columbia Sesqui-Centennial Commission apologizing for the delay in distributing the Columbia commemoratives. (Total: 6 coins) (#9294)

- 4375 1893 Columbian MS66 ★ NGC.** CAC. *Ex: Bagne Collection.* This satiny Columbian half has a brilliant reverse and impressive peach-gold toning on the obverse periphery. A few wispy marks on the neck and right obverse field deny perfection. Jerry Bagne's diverse collection of prooflike Silver Commemoratives was offered in our January 2010 FUN Signature. (#9297)

## Superb Gem 1893 Columbian Half Dollar

- 4376 1893 Columbian MS67 PCGS. CAC.** A truly extraordinary piece of 19th century commemorative silver that offers distinctly prooflike attributes. While swirls of luster in the fields point to a business-strike origin, the reflectivity on this Superb Gem is undeniable, and the central devices are better-defined than usual with generous mint frost. Rich gold-orange border toning gives way to a light layer of whitish-gray across the centers. In sum, incredible surface quality and eye appeal for this second Columbian half dollar issue. This is one of just eight MS67 pieces certified by PCGS with none numerically finer (9/10). (#9297)

## Fantastic MS67 1935 Connecticut Half

- 4377 1935 Connecticut MS67 PCGS.** This Superb Gem Connecticut displays coruscating luster. A barely perceptible layer of powder-blue and beige patina crosses each side, and whispers of reddish-gold toning appear along the borders. Well-defined and carefully preserved. This issue is available in grades through MS66, but scarce in MS67 and virtually unavailable any finer. Population: 43 in 67, 1 finer (9/10).  
From The South Pass Collection. (#9299)

- 4378 1936 Gettysburg MS67 PCGS.** The reported distribution figure for the Gettysburg half dollar was 26,928 pieces. This magnificent Superb Gem specimen features a sharp strike, with bright mint luster under ice-blue and dark golden patina. Population: 83 in 67, 2 finer (9/10).  
From The South Pass Collection. (#9305)
- 4379 1922 Grant No Star MS66 PCGS. CAC.** Lilac, aquamarine, and ice-blue compete for territory across this satiny and undisturbed Premium Gem. The present example is noteworthy for its strike, which displays uncommon sharpness on the tree trunk near the left window of the frame house. (#9306)
- 4380 1922 Grant With Star MS63 PCGS.** Surprisingly bright surfaces with little patina. This Select coin is of the With Star variety, one of the more famous "artificial varieties" created in early 1920s commemoratives. (#9307)
- 4381 1928 Hawaiian—Cleaned—ANACS. MS60 Details.** This evenly struck stone-gray representative has mildly subdued luster and is faintly hairlined. The absence of relevant marks helps restore the eye appeal. The key type of the classic commemorative series. (#9309)
- 4382 1928 Hawaiian—Improperly Cleaned—NGC Details. Unc.** Lavender and olive-green encompass this satiny and meticulously struck key commemorative half dollar. Bagmarks are minimal, but both sides are slightly glossy from a relatively mild cleaning. (#9309)

## Upper-End 1928 Hawaiian Half, MS64

- 4383 1928 Hawaiian MS64 PCGS. CAC.** The Hawaiian half has been a collector favorite since it was issued 82 years ago. It is a well-designed commemorative and one that celebrated an actual event. The surfaces on this piece show the usual satiny mint luster and there are no obvious or detracting abrasions. Pale golden color evenly covers each side of this splendidly preserved, upper-end example. (#9309)

## Colorful Gem 1928 Hawaiian Half

- 4384 1928 Hawaiian MS65 PCGS.** Honey-gold, rose, sky-blue, and lime-green colors enrich this beautifully toned and satiny Gem. A well struck example with pleasing preservation and only a few light ticks on the chief's cloak. An all-around pleasing example that warrants careful consideration. PCGS has graded 72 numerically finer examples (9/10).  
Ex: JFS Collection (Heritage, 8/2004), lot 4268, which realized \$4,485.  
From The South Pass Collection. (#9309)

**Patinated 1928 Hawaiian Half, MS66**

**4385 1928 Hawaiian MS66 PCGS.** Dramatic blended lemon-gold, olive-green, and rose-red toning graces approximately 60% of the obverse and two-thirds of the reverse. The remainder of this lustrous Premium Gem features rich powder-blue and lilac shades. The strike is exacting, and carbon is minimal and limited to the reverse. Thorough evaluation beneath a lens reveals only infrequent minor contact. Population: 70 in 66, 4 finer (9/10). (#9309)

**4386 1935 Hudson MS65 PCGS.** This shimmering Gem is predominantly pearl-gray, but a slender band of peach-gold iridescence illuminates the left obverse margin. A beautifully preserved Gem of this low mintage issue, which enraged collectors of the day due to its abusive distribution. (#9312)

**4387 1935 Hudson MS65 PCGS. CAC.** The 1935 Hudson half dollar is one of the most sought-after issues from the “classic era” of commemorative coinage. The present coin is a well struck Gem, with bright mint luster and few signs of contact (important, as most examples are heavily marked). (#9312)

**4388 1925 Lexington MS66 PCGS.** Traces of ice-blue and tan toning visit the otherwise silver-white surfaces of this lustrous high grade half dollar. Boldly struck and only faintly abraded.  
*From The Classic Collection. (#9318)*

**4389 1925 Lexington MS66 NGC.** Pleasing straw-gold, powder-blue, and olive-green shades enrich this lustrous and fully struck Lexington half. Contact is limited to a line at the reverse center and a few minute ticks on the upper right obverse field. (#9318)

**4390 1918 Lincoln MS67 PCGS.** Boldly impressed with exceptionally strong luster. Light russet patina appears around the rims, but the piece has only a pale golden cast otherwise. Housed in a first-generation holder. PCGS has graded just one piece finer (9/10).  
*From The South Pass Collection. (#9320)*

**4391 1918 Lincoln MS67 PCGS.** Bright satiny luster and impeccable surfaces are the hallmarks of this splendid Superb Gem. Fully struck and nearly pristine, the silver-gray coloration yields to orange-gold, crimson, and yellow-green iridescence near some of the peripheries. Population: 83 in 67, 1 finer (9/10).  
*From The South Pass Collection. (#9320)*

**4392 1918 Lincoln MS67 PCGS. CAC.** A sprinkling of dusty golden-brown dapples the obverse, with silver remaining in the protected legends around the rim, an unusual but attractive effect, while the reverse is largely brilliant. The Lincoln (or Illinois) commemorative is a popular one, and seldom seen in finer grade than here. Population: 83 in 67, 1 finer (9/10).  
*From The South Pass Collection. (#9320)*

**4393 1918 Lincoln MS67 PCGS.** Apple-green, magenta, and golden-brown enrich much of the reverse of this lustrous and pristine Superb Gem. The obverse is minimally toned aside from a blush of russet, aqua, and plum-mauve on the right field.  
*From The South Pass Collection. (#9320)*

**4394 1921 Missouri MS65 NGC.** A nearly brilliant Gem that exhibits vibrant luster and lacks any mentionable marks. The strike is bold aside from the usual incompleteness on the shoulder strap. The “plain” variety of this conditionally rare statehood issue. (#9330)

**4395 1923-S Monroe MS65 PCGS. CAC.** The Monroe commemoratives were issued by the California motion picture industry to celebrate the 100th anniversary of the Monroe Doctrine. This lustrous Gem is lightly struck, as all are, with lovely green and ice-blue toning. (#9333)

**4396 1926 Oregon MS67 NGC. CAC.** Caramel-gold and stone-gray embrace this fully impressed Superb Gem. Satiny and essentially immaculate. Struck from moderately rotated dies, and certified in a former generation holder. Census: 51 in 67, 4 finer (9/10). (#9340)

**4397 1926 Oregon MS67 PCGS.** This frosty Superb Gem approaches the finest existing quality for the issue, with a combined population of just six finer coins. Both sides are brilliant and highly lustrous with a few splashes of iridescent toning. Population: 56 in 67, 2 finer (9/10).  
*From The South Pass Collection. (#9340)*

**4398 1926-S Oregon MS67 PCGS.** A fabulous, vibrant specimen with gold and steel-blue peripheral toning. Lustrous and mark free surfaces only add to the desirability. PCGS has only certified four finer coins (9/10).  
*From The South Pass Collection. (#9341)*

**4399 1933-D Oregon MS67 PCGS. CAC. FS-101.** The obverse legends are die tripled. Due to the Great Depression, very few issues of any series were struck at Denver in 1933, but the Oregon Trail half dollar was among them. An essentially pristine Superb Gem is rich olive-gray with peripheral glimpses of ruby-red and orange. Population: 71 in 67, 0 finer (9/10). (#9343)

**4400 1933-D Oregon MS67 PCGS. FS-101.** This is a superb Gem Oregon half dollar with frosty silver surfaces beneath light gold and iridescent toning. Population: 71 in 67, 0 finer (9/10).  
*From The South Pass Collection. (#9343)*

**4401 1934-D Oregon MS67 PCGS.** The 1934-D Oregon Trail half dollar claims a distribution total of 7,006 pieces. The present coin is a lustrous Superb Gem, with a razor-sharp strike, and attractive ice-blue and dark gold toning. Population: 48 in 67, 0 finer (9/10).  
*From The South Pass Collection. (#9344)*

**4402 1936-S Oregon MS67 PCGS.** Housed in a first generation PCGS holder is an amazing Superb Gem 1936-S Oregon half dollar. This piece has silvery-gray luster with splashes of iridescence on each side. PCGS has only certified four finer pieces (9/10).  
*From The South Pass Collection. (#9346)*

**4403 1938 Oregon MS67 PCGS.** Canary-gold borders encompass this otherwise stone-gray Superb Gem. The strike and preservation are perfect throughout, although the back of the front ox is affected by die ejection. Housed in a green label holder. Population: 64 in 67, 1 finer (9/10).  
*From The South Pass Collection. (#9348)*

**4404 1939 Oregon MS67 PCGS.** A bold strike, satiny luster, and peripheral iridescence combine to create a highly appealing Superb Gem example of this scarce closing issue in the long series of Oregon half dollars.  
*From The South Pass Collection. (#9352)*

**4405 1939-D Oregon MS67 PCGS.** The ivory-gray centers are bounded by pastel peripheral chestnut, aqua-green, and lilac patina. This well struck final year Superb Gem is unabraded and satiny with exquisite eye appeal.  
*From The South Pass Collection. (#9353)*

**4406 1939-S Oregon MS67 PCGS. CAC.** Considered by many to be the most beautiful of all commemorative coins, the 1939-S Oregon Trail half dollar boasts a mintage of just 3,005 pieces. This Superb Gem example features blazing mint luster and sharply detailed design elements, with touches of golden toning at the rims. Population: 79 in 67, 9 finer (9/10). (#9354)

**4407 1939-S Oregon MS67 PCGS.** The 1939-S Oregon Trail half dollar enjoyed a distribution total of 3,005 pieces in the last year this issue was offered. The present coin is a lightly toned Superb Gem, with attractive shades of ice-blue and gold color over sharply defined devices and lustrous, pristine fields. Population: 79 in 67, 9 finer (9/10).

*From The South Pass Collection. (#9354)*

**4408 1939 Oregon PDS Set MS66 PCGS. CAC.** All pieces mainly pale silver-gray with varying golden-red accents, strongest overall on the 1939-D with the boldest peripheral toning on the 1939-S. All three coins are well-defined and attractive for the grade, particularly the 1939. (Total: 3 coins) (#9355)

#### 1915-S Panama-Pacific Half, MS66 An Original, Richly Toned Example

**4409 1915-S Panama-Pacific MS66 NGC.** A remarkable, gorgeous Premium Gem, this 1915-S Panama-Pacific half dollar is brightly lustrous with softly frosty surfaces beneath deep, vivid multicolored iridescent toning on each side. Many Pan-Pac halves were carelessly handled by non-collectors. This example is clearly the exception and has been allowed to naturally tone over the decades. NGC has only graded 58 finer examples of this issue (9/10). (#9357)

#### Superb Gem 1915-S Panama-Pacific Half

**4410 1915-S Panama-Pacific MS67 PCGS.** Ex: Troy Wiseman Collection. Both sides are thickly toned in mottled brownish patina, with glints of ice-blue and mauve at the rims. Bold luster emanates from beneath, and perusal with a loupe reveal no singular abrasions. A high-end and lovely commemorative, nearly unsurpassed at either service. Population: 75 in 67, 2 finer (9/10). *From The South Pass Collection. (#9357)*

#### 1921 Pilgrim Half, MS67

**4411 1921 Pilgrim MS67 PCGS.** Bold and swirling luster dominates the eye appeal of this Superb Gem Pilgrim half from the smaller 1921 issue. The obverse is richly toned green-gold, mint, blue, and violet, while the reverse has similar colors compressed at the margins with light silver-gray over a broad center. Population: 22 in 67, 0 finer (9/10). (#9360)

**4412 1936 Rhode Island MS66 Prooflike NGC. CAC.** A stone-white Premium Gem with luminous fields and a good strike. A high grade representative of this curious tercentenary issue, which commemorates the founding of Providence but instead bears the legend RHODE ISLAND, which did not exist as a political entity until decades after 1636. Census: 10 in 66 Prooflike, none finer as Prooflike (9/10). (#89363)

**4413 1935-S San Diego MS67 PCGS.** A sensational San Diego half dollar, the first of two issues struck for the California Pacific International Exposition, this Superb Gem exhibits brilliant ivory centers with lovely peripheral iridescence. PCGS has only certified three finer pieces (9/10).

*From The South Pass Collection. (#9371)*

**4414 1936-D San Diego MS67 PCGS.** Attractively toned and highly lustrous, this San Diego half dollar is any collector's dream coin. The surfaces are frosty and lustrous with splashes of white at the centers, and with surrounding gold and iridescent toning. Population: 72 in 67, 0 finer (9/10).

*From The South Pass Collection. (#9372)*

**4415 1936-D San Diego MS67 NGC. CAC.** The 1936-D San Diego commemorative half dollar was distributed in smaller numbers than its 1935-S counterpart, with a final distribution figure of 30,092 pieces. The present coin is a magnificent Superb Gem, with a sharp strike and bright mint luster, under shades of light lavender and gold toning. Census: 53 in 67, 3 finer. (#9372)

**4416 1935 Spanish Trail MS64 PCGS. CAC.** Pale green-gold overtones cross much of each side, though occasional windows of silver-blue are also present. Small abrasions and light scrapes around the reverse map contribute to the grade. (#9376)

**4417 1935 Spanish Trail MS65 NGC.** Pleasing canary-gold toning blankets this highly lustrous and intricately impressed Gem. A solitary tick beneath the right (facing) horn precludes an even higher grade. (#9376)

**4418 1935 Spanish Trail MS65 NGC.** Almond-gold and powder-blue shades grace this lustrous and intricately struck Gem. A beautifully undisturbed example of a popular low mintage silver type. (#9376)

### Important 1935 Spanish Trail, MS67

- 4419 1935 Spanish Trail MS67 PCGS.** Fully struck with beautiful satin luster and a small degree of attractive russet-orange peripheral patina on both sides. Only with the aid of a magnifier do a couple of tiny nicks become apparent, in the right obverse field. A perennially scarce issue with an original mintage of just 10,008 coins. Population: 90 in 67, 3 finer (9/10).  
*From The South Pass Collection. (#9376)*

- 4420 1925 Stone Mountain MS67 PCGS.** Almond-gold, lime-green, and pearl-gray embraces this satiny and pristine Superb Gem. The Stone Mountain type is plentiful in lightly circulated grades, but examples of the present quality are infrequently encountered.  
*From The Classic Collection. (#9378)*

- 4421 1937-S Texas MS67 PCGS. CAC.** Blushes of light autumn-gold toning fill the borders, while the fields and devices are pale olive-gray. This sharply struck Superb Gem has rich satin luster and a pristine appearance. Population: 75 in 67, 0 finer (9/10). (#9392)

- 4422 1938-S Texas MS67 NGC.** Lime-green and lilac toning occupies the upper right portion of the obverse, while the remainder of this satiny Superb Gem is close to brilliant. The strike is crisp, although traces of the planchet surface remain on the highpoints of the central reverse. (#9396)

### Shining MS67 1925 Vancouver Half

- 4423 1925 Vancouver MS67 PCGS.** A charming Superb Gem example of this Laura Gardin Fraser design, boldly lustrous beneath light layers of peach and gold patina. Glints of silver are also present, most notably at the lower reverse margins. Virtually unavailable in better condition. Population: 46 in 67, 1 finer (9/10).  
*From The South Pass Collection. (#9399)*

### Vibrant Superb Gem 1925 Vancouver Half

- 4424 1925 Vancouver MS67 PCGS. Ex:** Troy Wiseman Collection. A light ring of gold-carmine on the obverse complements glorious multicolored reverse toning, mainly amber-gold and ice-blue with other accents. Exuberant luster shines through the light patina, and there are virtually no abrasions. Boldly struck and high-end. Population: 46 in 67, 1 finer (9/10).  
*From The South Pass Collection. (#9399)*

- 4425 1946-S Booker T. Washington MS67 ★ NGC.** Remarkable forest-green and orange-red toning consumes the obverse. The reverse has a light tan-gold center framed by peripheral lime, gold, and ruby bands. A gorgeous and well preserved Superb Gem. Census: 24 in 67 ★, 10 finer with a Star designation (9/10). (#9406)

- 4426 1947-S Booker T. Washington MS67 NGC. CAC.** Radiant luster exudes from the untuned surfaces of this Superb Gem and a decisive strike brings out sharp definition in the design elements. The few light marks on the lower cheek are primarily as-made planchet marks. Census: 21 in 67, 0 finer (9/10). (#9410)

- 4427 1950-S Booker T. Washington MS67 PCGS.** Pale blue overtones with hints of pink over the light silver-gray surfaces. A well-defined Superb Gem with little of the usual planchet roughness on the jaw. Population: 16 in 67, 0 finer (9/10). (#9422)

- 4428 1950 Booker T. Washington PDS Set MS66 PCGS.** The set includes: 1950, brilliant and immaculate with only minor incompleteness of strike on the cheek; 1950-D, sharply struck, faint tan toning; and a 1950-S, honey-gold patina, satiny, unabraded, a good strike. (Total: 3 coins) (#9423)

- 4429 1951-D Booker T. Washington MS67 PCGS.** An important opportunity is presented to acquire one of the finest certified examples of this elusive issue. With a net mintage of just 7,000 coins, the 1951-D is difficult to locate in all grades. This brilliant Superb Gem has satiny silver luster with a few tiny splashes of gold and iridescent toning. Population: 8 in 67, 0 finer (9/10).  
*Ex: Dallas Signature (Heritage, 11/2006), lot 1726, which realized \$4,743.75. (#9425)*

- 4430 1951-S Booker T. Washington MS67 PCGS.** Light gold toning graces this crisply impressed and semi-prooflike Superb Gem. Marks are nearly absent, and the eye appeal is imposing. Population: 26 in 67, 1 finer as 67+ (9/10). (#9426)

- 4431 1952 Washington-Carver PDS Set MS66 PCGS.** The set includes: 1952, dappled lavender, golden-brown, and aqua toning; 1952-D, blended lime and powder-blue patina, well preserved; and a 1952-S, toned caramel-gold, forest-green, and pearl-gray. (Total: 3 coins) (#9437)

- 4432 1953-D Washington-Carver MS66 PCGS.** Light to medium tan-gold toning visits this lustrous and unmarked Premium Gem. The strike is uncommonly sharp for the Washington-Carver type. Population: 32 in 66, 0 finer (9/10). (#9439)

- 4433 1954 Washington-Carver PDS Set MS66 PCGS.** The set includes: 1954, light pastel patina, a good strike, faint reverse field grazes; 1954-D, delicate olive toning, satiny, minimally abraded; and a 1954-S, lustrous, sun-gold toning, well preserved, minor incompleteness of strike at the centers. (Total: 3 coins) (#9445)

**1936 Wisconsin Half Dollar, MS68  
None Certified Finer**

- 4434 1936 Wisconsin MS68 NGC.** The 1936 Wisconsin commemorative half dollar claims a mintage of 25,015 pieces, and the issue is a somewhat overlooked condition rarity. Few examples can match the quality of the present coin, which displays an exemplary strike and vibrant mint luster, under delightful greenish-gold patina. Census: 29 in 68, 0 finer (9/10). (#9447)

**Marvelous MS68 1936 Wisconsin Half**

- 4435 1936 Wisconsin MS68 NGC.** One of the best-preserved Wisconsin halves extant, tied for numerically finest in the combined certified population (9/10). Well-defined with bold luster shining through gold and gray patina that is at its thickest at the margins, though more vivid in the centers. Carefully preserved throughout. (#9447)

**COMMEMORATIVE GOLD**

- 4436 1903 Louisiana Purchase/Jefferson MS64 PCGS. CAC.** A lustrous near-Gem example of this early classic gold commemorative, bright yellow with intricate details on Jefferson's portrait. Pleasing and housed in a green label holder. (#7443)
- 4437 1903 Louisiana Purchase/Jefferson MS65 ★ NGC. CAC.** This straw-gold Gem has flashy fields, and their moderate reflectivity is undoubtedly the reason why the coin coaxed a Star designation from NGC. Well struck and pristine with a trace of struck-in grease on the reverse. Census: 6 in 65 ★, 16 finer with a Star designation (9/10). (#7443)
- 4438 1903 Louisiana Purchase/Jefferson MS65 PCGS.** Splendid lemon-gold patina endows this highly lustrous and pristine Gem. The 1903 Jefferson gold dollar is always available for a price, but the present piece provides exceptional value due to the eye appeal of its toning. Certified in a green label holder. (#7443)

**Exemplary MS66 1903 Jefferson Gold Dollar**

- 4439 1903 Louisiana Purchase/Jefferson MS66 PCGS.** This orange-gold Premium Gem has dazzling luster, and the strike is full with the exception of the upper reverse denticles. An essentially pristine souvenir of the 1904 St. Louis World's Fair, immortalized for future generations by the Judy Garland musical *Meet Me in St. Louis*. Encapsulated in a green label holder. (#7443)

**Lovely 1903 Louisiana Purchase/Jefferson  
Gold Dollar, MS67**

- 4440 1903 Louisiana Purchase/Jefferson MS67 NGC.** One of the most impressively preserved Louisiana Purchase/Jefferson gold dollars a collector will ever encounter, tied for numerically finest in the combined certified population (9/10). Jefferson's portrait is remarkably detailed, and the canary-yellow surfaces are remarkably lustrous with a subtle frostiness. Fantastic visual appeal. (#7443)
- 4441 1903 Louisiana Purchase/McKinley MS65 PCGS. CAC.** The 1903 Louisiana Purchase/ McKinley gold dollars were produced in large numbers, but probably only about 17,500 examples were actually distributed. The present coin is an appealing Gem, with lustrous orange-gold surfaces and a sharp strike. (#7444)
- 4442 1903 Louisiana Purchase/McKinley MS66 NGC. CAC.** Fully lustrous yellow-gold surfaces and sharp design details are evident on this Premium Gem. It is a delightful example with a relatively small number of finer pieces, just 98 at NGC (9/10). (#7444)
- 4443 1904 Lewis and Clark MS61 NGC.** A sun-gold representative that has prooflike fields and cartwheel luster across the peripheries. Careful rotation reveals a few delicate hairlines, and a few pinpoint flecks affect Meriwether Lewis. (#7447)
- 4444 1904 Lewis and Clark MS62 NGC.** A vibrant yellow-gold representative with shimmering satiny luster. The central high points are a bit soft, and there are a few light handling marks. Die erosion has created an interesting effect around some of the legends. Only 10,025 pieces were struck. (#7447)
- 4445 1904 Lewis and Clark MS62 NGC.** From a mintage of 10,025 pieces, the 1904 Lewis and Clark dollar is more available than its 1905 counterpart. This lustrous MS62 specimen is sharply struck, with light greenish-gold surfaces. (#7447)

- 4446** 1905 Lewis and Clark MS63 PCGS. CAC. Strongly lustrous and well struck for this issue with a low net mintage. Surfaces are generally light yellow-gold, though a deeper area appears at the upper right obverse. (#7448)
- 4447** 1905 Lewis and Clark MS63 PCGS. A lovely lemon-gold example with dynamic cartwheel luster and a bold strike. Infrequent delicate hairlines limit the grade but not the eye appeal. (#7448)
- 4448** 1905 Lewis and Clark MS63 PCGS. The 1905 Lewis and Clark dollar is one of the scarcest classic gold commemoratives. Type collectors of the day who had already purchased the 1904 issue bypassed the 1905. This peach-accented yellow-gold piece shows attractive luster and bold detail on the dual portraits. (#7448)

#### 1915-S Panama-Pacific Gold Dollar A Lovely Premium Gem

- 4449** 1915-S Panama-Pacific Gold Dollar MS66 NGC. CAC. Luster swirls strongly for the issue, and hints of frostiness visit the highest details of the laborer's head. Attractively detailed and carefully preserved, a delightful example of this uncommon but increasingly popular classic commemorative gold dollar issue. NGC has graded 52 numerically finer examples (9/10). (#7449)

#### Superb Gem 1915-S Panama-Pacific Gold Dollar

- 4450** 1915-S Panama-Pacific Gold Dollar MS67 PCGS. An uncommonly well-preserved representative of this popular classic gold commemorative issue, with no numerically finer representatives in the combined certified population (9/10). The yellow-gold luster is uncommonly rich, and traces of frost appear on the cap and other parts of the well-defined obverse portrait. (#7449)

#### Spectacular 1915-S Panama-Pacific Gold Dollar, MS67

- 4451** 1915-S Panama-Pacific Gold Dollar MS67 NGC. A spectacular presentation of light yellow, pale blue, and rose patina sets this Superb Gem apart from the rest. Both sides are brilliant and fully lustrous with pristine surfaces. No finer pieces have been certified at NGC or PCGS. Census: 54 in 67, 0 finer (9/10). (#7449)

- 4452** 1915-S Panama-Pacific Quarter Eagle AU53 PCGS. It is doubtful that the present quarter eagle was used to purchase groceries in Wilson-era commerce. More likely, it was the prized pocket piece of an early owner, at least until another interesting bauble took its place. Unblemished and canary-gold with substantial luster across the legends and devices. (#7450)

#### Attractive 1915-S Panama-Pacific Quarter Eagle, MS64

- 4453** 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. Rich butter-yellow color with soft swirls of luster and orange overtones. Well struck for the type, though Columbia's head shows a measure of the usual softness, and generally smooth. There are no individually significant distractions on this near-Gem, and the overall eye appeal is solid. (#7450)

#### Lovely 1915-S Panama-Pacific Quarter Eagle, MS64

- 4454** 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. Rich butter-yellow luster through the fields with hints of deeper peach close to the reverse rims. Softly struck on Columbia's head, as usually seen, but with generally smooth surfaces. An attractive example of this popular classic gold commemorative issue, one of just 6,749 pieces in the net mintage.  
From The Glenwood Landing Collection. (#7450)

Three Coin 1915-S Panama-Pacific Set  
With Original Panama-Pacific Holder  
Gold Dollar and Quarter Eagle MS66  
Half Dollar, MS67

4455 **Three-Piece 1915-S Panama-Pacific Set with Box MS66 to MS67 PCGS.** The set includes: **Half Dollar MS67**, thoroughly patinated in variegated golden-brown and forest-green, boldly struck, pristine save for a single mark near the right wreath end, a magnificent representative of this famously conditionally rare early silver issue, as of (9/10), just two pieces graded above the MS67 level by both PCGS and NGC combined; **Gold Dollar MS66**, rich apricot toning with glimpses of lilac on the reverse, lustrous and immaculate with a razor-sharp strike; and a **Quarter Eagle MS66**, deep peach-gold toning with occasional hints of apple-green, intricately struck and lustrous with exceptional eye appeal, the reverse is essentially pristine while the obverse is undisturbed aside from faint hairline on the head of the hippocampus, as of (9/10), PCGS has graded just 20 coins above MS66. All three coins are housed in green label holders.

The original holder accompanies the lot. It is square-shaped with a dark cardboard exterior and a purple velvet inset. The hinge works well, but the corners of the box exhibit wear and minor tears. (Total: 3 coins)

---

Premium Gem Panama-Pacific  
1915 Quarter Eagle

- 4456 1915-S Panama-Pacific Quarter Eagle MS66 PCGS.** The Panama-Pacific commemoratives of 1915 show a distinct trend: as face values went up, net mintages went down. Part of this was accounted for in the statutory mintage limits, though none of the issues reached them in sales. This is a lovely Premium Gem example of the quarter eagle issue, well struck with a touch of duskiness to the yellow-orange luster. Housed in a green label holder. PCGS has graded just 20 numerically finer examples (9/10). (#7450)
- 

---

Magnificent MS67 1915-S Quarter Eagle  
Panama-Pacific Exposition

- 4457 1915-S Panama-Pacific Quarter Eagle MS67 PCGS. CAC.** This fully struck Superb Gem has flawless surfaces and pleasing olive-green and apricot-gold toning. Certified in an old green label holder. Although sculptors from outside the Mint designed the other two gold denominations from the Panama-Pacific commemorative program, the quarter eagle was a collaborative effort between veteran Mint engravers Charles Barber and George Morgan. Morgan based his design on the reverse of his famous Judd-1608 1879 "Schoolgirl" silver dollar pattern, although the stand of the defiant eagle was increased in size to accommodate the statutory legend E PLURIBUS UNUM. (#7450)

## Famous Fifty Dollar Round Panama-Pacific Gold Commemorative, MS64

**4458 1915-S Panama-Pacific 50 Dollar Round MS64 NGC. CAC.**

As a tradition in U.S. numismatics, the commemorative is both an early concept and a late-blooming idea. An intriguing perspective on the nature of U.S. commemorative coins appears in a Paul M. Green article that was published in the August 23, 2005 edition of *Numismatic News*. "The use of coins to commemorate events goes back in time almost as far as coins," writes Green, "for it did not take long for rulers to figure out that coins were an excellent way to communicate with the public."

This lesson was not lost on the Founding Fathers:

"By the time the American Revolution came along, there had been centuries of use of coins to send messages and commemorate events. The leaders of the move for independence had no mint to crank out coins with the slogans they wanted, but they did have other options such as tokens, medals and Colonial paper issues, and they used them all."

After the Revolution, however, the U.S. Mint struggled to keep up with regular coinage demand, much less think about commemoratives. The first official commemorative design did not come until the Columbian Exposition half dollar in 1892.

Commemorative coinage is a popular specialty within U.S. numismatics, and few coins are so prized as the Panama-Pacific fifty dollar gold pieces. Both the round and octagonal varieties had extremely low net mintages; this attractive Round representative is one of just 483 pieces sold. Both sides have light and swirling luster, a subtle rose-tinged radiance that graces pale butter-yellow surfaces. A few scattered light flaws are of little consequence in the context of the overall eye appeal. (#7451)

---

## Impressive MS64 Fifty Dollar Octagonal Panama-Pacific Commemorative

**4459** 1915-S Panama-Pacific 50 Dollar Octagonal MS64 PCGS. CAC. From the April 10, 2006 edition of *Coin World* "Pan-Pac Coins Include Novelty" it is easy to guess from the title alone which denomination is referred to. Aside from the fifty dollar denomination, though, what is striking is that the Panama-Pacific commemorative series included the denominations of *all* future classic commemorative issues. As stated by von Klinger:

"Never again in the first period of U.S. commemoratives, through 1954, would an unprecedented denomination such as the \$50 coin be minted, let alone in an unprecedented format (octagonal).

"The gold dollar, though obsolete in commerce, remained a reasonable enough alternative to the half dollar to be chosen twice again for commemorative purposes: in 1916, for the McKinley Memorial coin, and in 1922, for the centennial of Ulysses S. Grant's birth. Only one other quarter eagle was ever made as a commemorative, the 1926 issue of the Sesquicentennial of American Independence. All other commemorative coins through 1954 routinely were half dollars: 46 types."

Beyond their undeniable rarity, the sheer novelty of the massive octagonal fifty dollar gold Panama-Pacific commemoratives has been the key to their popularity with collectors from the time of issue until today. This is an appealing near-Gem representative of the type, bright yellow-gold with stronger luster than often seen. The helmet shows a small area of raised metal with an apparent hairline or other mark trailing off from its left; this is likely the grade-decided, as the surfaces show few other faults. The plastic holder has several light scratches that should not be taken as appearing on the coin itself. (#7452)

## COMMEMORATIVE GOLD

- 4460 1916 McKinley MS65 PCGS.** A fully struck orange-gold Gem with an unmarked appearance and exemplary eye appeal. The second commemorative gold dollar type to honor President McKinley, who was assassinated while attending the 1901 Pan-American Exposition in Buffalo. Encapsulated in a green label holder. (#7454)
- 4461 1916 McKinley MS65 PCGS.** An orange-red beauty whose highly lustrous fields and devices are intricately struck and virtually free from contact. The obverse design was the final issued work of longtime Chief Engraver Charles Barber, who died the following year. (#7454)
- 4462 1917 McKinley MS64 NGC.** Dusky butter-yellow luster lends this second-year McKinley near-Gem understated eye appeal. Well struck with few significant abrasions. *From The Diotte Collection.* (#7455)

### Lively MS66 1917 McKinley Gold Dollar

- 4463 1917 McKinley MS66 PCGS. CAC.** Orange overtones visit essentially yellow-gold surfaces. This is an uncommonly well-preserved example of the second and final McKinley gold dollar issue, attentively struck with few visible faults. The date is a borderline condition rarity any finer, with just 53 such pieces graded by PCGS (9/10). (#7455)
- 4464 1922 Grant No Star AU55 PCGS.** A trace of high point wear limits the grade of this desirable Choice AU commemorative. The green-gold surfaces retain nearly full frosty mint luster with only a few trivial marks in the fields. (#7458)
- 4465 1922 Grant With Star AU58 PCGS.** This unabraded apricot-gold gold dollar would be regarded as Uncirculated by many collectors, but the experienced eye will note the slight color change on Grant's jaw and cheekbone, and on the hair above his ear. (#7459)
- 4466 1922 Grant With Star MS62 NGC.** Both With Star and No Star varieties had a distribution of just 5,016 pieces. Grant's hair and part of the trees are a touch soft, which is typical for this issue. Wispy abrasions are entirely insignificant. (#7459)

### Gorgeous Grant With Star Gold Dollar MS65, CAC Gold Label

- 4467 1922 Grant With Star MS65 PCGS. CAC Gold Label.** A shining yellow-gold example with surface quality that clearly surpasses that of a "mere" Gem. Well-defined overall with the level of detail on Grant's hair particularly noteworthy. Housed in a green label holder that bears a CAC gold label, a suggestion of higher quality that is most agreeable. (#7459)
- 4468 1926 Sesquicentennial MS64 PCGS.** A strongly lustrous near-Gem example of this final classic gold commemorative issue. Slightly satiny surfaces are yellow-gold with peach overtones. (#7466)
- 4469 1926 Sesquicentennial MS64 NGC.** A fully lustrous near-Gem, this 1926 commemorative quarter eagle was issued for distribution during the celebration of the sesquicentennial of our nation's independence. This impressive yellow-gold example has splendid surfaces with only a few trivial marks. (#7466)
- 4470 1926 Sesquicentennial MS64 NGC.** A strongly lustrous, faintly frosted near-Gem example of this famous final commemorative gold issue. Light marks on the scroll and a small luster scrape to the right of Independence Hall contribute to the grade. (#7466)
- 4471 1926 Sesquicentennial MS64 PCGS.** This lustrous Choice gold commemorative is peach-gold throughout, save for a pair of faint alloy spots on the left obverse. The fields appear pristine, as are the devices except for an inconspicuous pinscratch from the knee to shoulder of Liberty. Encapsulated in a green label holder. (#7466)
- 4472 1926 Sesquicentennial MS64 NGC.** A lovely khaki-gold Choice gold commemorative. Cartwheel luster bathes smooth surfaces. The right obverse and lower reverse display infrequent minor alloy spots. (#7466)
- 4473 1926 Sesquicentennial MS64 PCGS.** Booming luster sweeps this beautiful pumpkin-gold near-Gem. The fields are essentially immaculate, and the devices display only inconspicuous marks. The 1926 Sesquicentennial was the final U.S. gold commemorative until the issues for the 1984 Los Angeles Olympics. (#7466)

---

Gem 1926 Sesquicentennial Quarter Eagle

- 4474 1926 Sesquicentennial MS65 PCGS. CAC. Strong yellow luster with elements of sun-gold and green-gold that shift into one another through the fields. A well-defined and attractively preserved Gem example of this final classic commemorative gold issue, popularly known as a condition rarity at Gem and better levels. (#7466)

---

Shining 1926 Sesquicentennial  
Quarter Eagle, MS65

- 4475 1926 Sesquicentennial MS65 PCGS. Strong and swirling luster lends life to this Sesquicentennial quarter eagle, an amber-gold beauty with solid design definition and smooth surfaces. While Liberty's body shows a handful of ticks, the most significant of which is just above her waist, these marks are consistent with the Gem designation. A pleasing example of this famous conditionally challenging issue.  
From The Glenwood Landing Collection. (#7466)

---

1926 Sesquicentennial Quarter Eagle  
A Magnificent Premium Gem

- 4476 1926 Sesquicentennial MS66 PCGS. An attractive Premium Gem representative of the challenging Sesquicentennial quarter eagle issue, tied for numerically finest among PCGS-certified examples (9/10). Swirling yellow-gold surfaces sparkle with subtle frost that graces the highest parts of the design. Simply marvelous quality. (#7466)

---

PROOF COMMEMORATIVE GOLD

Lovely PR66 Cameo 1903  
McKinley Gold Dollar

- 4477 1903 McKinley PR66 Cameo NGC. According to Q. David Bowers in his 1991 *Commemorative Coins of the United States, A Complete Encyclopedia*, "one hundred specimens of each of the two designs [of 1903 gold commemorative dollars, the Jefferson and the McKinley] were struck with proof finish and were distributed to favored insiders as well as exposition and government officials, not to the collecting fraternity." One has to wonder where these 100 proof McKinley gold dollars are today. NGC has certified just 28 pieces, a number of which were presumably resubmitted circa 2000 to achieve a Cameo designation. The present lot is an impressive and untuned specimen with darkly reflective fields that contrast nicely with the fully struck legends and devices. Census: 1 in 66 Cameo, 3 finer (9/10). (#87483)

## MODERN ISSUES

### Impressive 32-Coin Atlanta Olympic Commemorative Set in Wood Case

- 4478 32-Piece 1995-1996 Atlanta Olympic Commemorative Set in Hardwood Case.** The most ambitious American commemorative set ever created, the full Atlanta Olympic commemorative suite with four copper-nickel half dollar, eight silver dollar, and four gold five dollar designs, each represented in proof and Uncirculated formats. All coins uncertified but in their original plastic cases, arranged on two trays in a locking hardwood box with key. (Total: 32 coins)

- 4479 1997-W Franklin D. Roosevelt Gold Five Dollar Two-Coin Set.** Government cased set with certificate of authenticity. Includes both proof and uncirculated versions, both of interest for relatively low mintage, just 11,894 pieces in the case of the uncirculated format. (Total: 2 coins)

- 4480 1997-W Franklin D. Roosevelt Gold Five Dollar Two-Coin Set.** A two-coin set in official government packaging, not certified but as-issued. Includes both the higher-mintage proof and lower-mintage Uncirculated formats. (Total: 2 coins)

## MODERN BULLION COINS

- 4481 1986-W One-Ounce Gold Eagle PR69 Deep Cameo PCGS.** "President Edition," #500 of 500. The PCGS insert is signed by President Gerald R. Ford, who signed the law that once again made gold legal for U.S. citizens to own. Lemon-gold toning blankets this fully struck specimen, which boasts exemplary contrast between the devices and fields. (#9807)

- 4482 1991 Half-Ounce Gold Eagle MS69 NGC.** This butter-gold half-ounce eagle is fully struck, lustrous, and pristine save for a pinpoint tick beneath the upper reverse branch. 1991 was the final year of the Roman numerals date, which proved cumbersome to modern eyes. From The Diotte Collection. (#9852)

### Five-Piece 1995-W American Eagle Set Featuring One-Ounce Silver Key

- 4483 Five-Piece 1995-W 10th Anniversary American Eagle Proof Set.** A five-piece 10th Anniversary American Eagle proof set, uncertified and housed in the original government plush case with certificate of authenticity. Includes the **tenth-ounce, quarter-ounce, half-ounce, and one ounce gold** coins, though as always, the star attraction is the **one-ounce silver**, widely recognized as the key to the silver American Eagle series. From The Diotte Collection. (Total: 5 coins)

### Famous 1995-W Proof Silver American Eagle Part of a 5-Piece 10th Anniversary Set

- 4484 1995-W Proof Silver Eagle in a 10th Anniversary Boxed Set.** The famous 10th Anniversary proof American Eagle set, uncertified in original case with outer box. The gold denominations—the **tenth-ounce, quarter-ounce, half-ounce, and one-ounce** sizes—are all represented, but as always, the series-key **one-ounce silver** is the star attraction. (Total: 5 coins) (#9887)

### Five-Piece 10th Anniversary American Eagle Proof Set Featuring One-Ounce Silver

- 4485 1995-W Proof Silver Eagle in a 10th Anniversary Set.** The five-piece cased set that became famous once collectors realized the **one-ounce silver 1995-W proof** was the key to the silver series. With the recent rise in gold prices—the spot price is close to \$1,300 per troy ounce as of this writing—the other four coins together, the **tenth-ounce, quarter-ounce, half-ounce, and one-ounce gold pieces**, are now approaching the value of the single silver coin. (#9887)

## Reverse Proof 2006-W Gold Eagle, PR70

- 4486 2006-W One-Ounce Gold Eagle Reverse Proof PR70 PCGS.** The 2006-W gold and silver American Eagles were an immediate smash hit when they debuted in this year in the numismatic marketplace. The frosted fields and mirrored devices—the reverse of “normal” modern U.S. proof coinage—were an unusual treat for U.S. numismatists, although common in world coinage such as that from Australia. This piece is certified in one of the special 20th Anniversary PCGS holders, with the First Strike designation. The marvelous surfaces embody perfection, as expected. (#89995)

- 4487 2009 Ultra High Relief Twenty Dollar in Government Case.** The popular modern issue, housed in the government plastic and nestled in the official wood presentation case. Comes with outer cardboard box (one side opened for easy access), slipcover, and certificate of authenticity. (#407404)
- 4488 2009 Ultra High Relief Twenty Dollar MS70 PCGS.** A technically flawless example of this popular modern issue. The concave fields are beautifully reflective, and the devices have a sculptural quality. (#407404)
- 4489 2009 Ultra High Relief Twenty Dollar MS70 NGC.** A perfect prooflike Mint State example of this popular issue that is reminiscent of the double thickness pattern Saint-Gaudens gold coins now in the Smithsonian Institution. *From The Glenwood Landing Collection.* (#407404)
- 4490 2009 Ultra High Relief Twenty Dollar MS70 PCGS.** A flawless honey-gold specimen whose satin luster and intricate definition ensure unimprovable eye appeal. *From The Glenwood Landing Collection.* (#407404)
- 4491 2009 Ultra High Relief Twenty Dollar MS70 PCGS.** This pristine one-ounce gold coin has concave fields and fully struck devices. Among the more unusual mint offerings in recent decades, issued two years too late to commemorate the centennial of its famous 1907 high relief inspiration. *From The Glenwood Landing Collection.* (#407404)
- 4492 2009-W One-Ounce Gold Buffalo PR70 Deep Cameo PCGS.** First Strike. An immaculate representative of this widely held modern gold issue. The bison and Indian demonstrate consistent and pleasing contrast with the textured, yet reflective, fields. (#414465)

## COINS OF HAWAII

- 4493 1847 Hawaii Cent MS63 Brown NGC.** Medcalf 2CC-2. Crosslet 4. Most accessible Hawaii cent type, offered here as a lovely Select Brown example. Great definition with rich rose and violet overtones. (#10965)
- 4494 1883 Hawaii Dollar AU53 NGC.** This lightly circulated cream-gray Hawaiian dollar is refreshingly unabraded except for a small rim ding at 10 o'clock on the reverse. The scarcest of the four 1883 denominations, which were struck sans mintmark at San Francisco. (#10995)

## ERRORS

### Double Struck 1898 Indian Cent, AU55

- 4495 1898 Indian Cent—Double Struck—AU55 NGC.** The first strike is centered and the second strike is 10% off-center to 12 o'clock with two fully visible dates, one directly above the other. Sharp details and pleasing olive-brown surfaces characterize this spectacular Indian cent error.
- 4496 Undated Jefferson Nickel—Mint Cancelled Planchet—NGC; and a 2004-D Peace Medal Nickel—Mint Cancelled—NGC.** Both items have passed through “waffle” cancel machinery, and are ex: New England Collection. *From the New England Collection of Jefferson Nickel Errors.* (Total: 2 pieces)
- 4497 (2) Undated Type Two Five Cent Planchets NGC.** Both planchets weigh 5.0 gm, have narrow raised rims, and are ex: New England Collection. *From the New England Collection of Jefferson Nickel Errors.* (Total: 2 pieces)
- 4498 (2) Undated Type One Five Cent Blanks NGC,** each blank weighs 5.0 gm per NGC. Both pieces are ex: New England Collection. *From the New England Collection of Jefferson Nickel Errors.* (Total: 2 coins)
- 4499 Undated Five Cent Planchet with 5% Curved Clip—Ungraded NGC,** 4.5 gm; and an **Undated Jefferson Nickel—Struck 70% Off Center on a Curved Clip Planchet—MS67 NGC,** uniface obverse, off center toward 8 o'clock, multi-color obverse toning. Both coins are ex: New England Collection. *From the New England Collection of Jefferson Nickel Errors.* (Total: 2 coins)
- 4500 Undated Jefferson Nickel—65% Off Center Stretch Strike—AU58 NGC,** off center toward 12:30; and an **Undated Jefferson Nickel—75% Off Center Stretch Strike—MS67 NGC,** off center toward 3 o'clock, prooflike, heavy clash marks through the S in CENTS. Both coins are ex: New England Collection. *From the New England Collection of Jefferson Nickel Errors.* (Total: 2 coins)
- 4501 Undated Jefferson Nickel—Multi-Struck 90% Off Center—MS64 NGC,** off center toward 8:30 with multiple rims; **Undated Jefferson Nickel—80% Off Center with Reverse Brockage—MS65 NGC,** off center toward 1 o'clock, the reverse was struck against the obverse of a struck nickel; and an **Undated Jefferson Nickel—Double Struck, Both Strikes Off Center and Overlapping with Indents—MS65 NGC,** the first strike was 75% off center toward 5 o'clock relative to the reverse with a partial obverse indent, the second strike was 90% off center toward 2 o'clock with a reverse indent. All three coins are Ex: New England Collection. *From the New England Collection of Jefferson Nickel Errors.* (Total: 3 coins)
- 4502 Undated Jefferson Nickel—85% Off Center on a Type Two Blank—MS66 NGC,** 5.0 gm, uniface obverse, struck far off center toward 8 o'clock; and an **Undated Jefferson Nickel—Off Center on a Type Two Blank—MS64 NGC,** 5.0 gm, uniface obverse, also struck off center toward 8 o'clock. Both coins are Ex: New England Collection. *From the New England Collection of Jefferson Nickel Errors.* (Total: 2 coins)

**4503 Undated Jefferson Nickel—70% Off Center, Obverse Struck Through Capped Die—MS67 NGC**, reverse off center toward 3 o'clock, obverse is nearly featureless; **Undated Jefferson Nickel—75% Off Center with Obverse Indent—MS67 NGC**, reverse far off center toward 6:30, struck portion of obverse is mostly indented leaving only Jefferson's shoulder; **1993-P Jefferson Nickel—55% Off Center on an Unusual Planchet—MS65 NGC**, off center toward 10:30, unstruck portion has lumpy borders; (1999)-D **Jefferson Nickel—75% Off Center, Rim Burr on Planchet Reverse—MS65 NGC**, off center toward 11 o'clock with final 9 in date present, unstruck portion of reverse has a rim burr. All four coins are ex: New England Collection.  
*From the New England Collection of Jefferson Nickel Errors.* (Total: 4 coins)

**Multiple Struck Jefferson Nickel  
 With Reverse Split Die  
 MS67 Full Steps**

**4504 Undated Jefferson Nickel—Multiple Struck, Reverse Split Die—MS67 Full Steps NGC.** Ex: New England Collection. Struck at least five times, with all strikes off center. At least three strikes exhibit obverse indents. A heavy die crack crosses Monticello, with a deep die break northeast of the left-side steps.  
*From the New England Collection of Jefferson Nickel Errors.*

**4505 Undated Jefferson Nickel—Obverse Struck Through Capped Die—MS67 Five Full Steps NGC**, struck against an early stage die cap, the obverse displays an incused, reversed, and nicely detailed image of Monticello; and a **1985-D Jefferson Nickel—Reverse Struck Through Capped Die—AU58 NGC**, struck against a late state die cap, the reverse displays a raised but blurry image of Monticello. Both coins are ex: New England Collection.  
*From the New England Collection of Jefferson Nickel Errors.* (Total: 2 coins)

**4506 Undated Jefferson Nickel—Struck Through Capped Die—MS65 Six Full Steps NGC**, the obverse is mushy but some legends (not the date) are readable, the reverse has heavy die polish lines; **1995-P Jefferson Nickel—Obverse Struck Through Capped Die—MS65 Five Full Steps NGC**, the obverse has a blurry, rough appearance; **2004-P Keelboat Nickel—Obverse and Reverse Struck Through—Ungraded NGC**, struck on dies partly clogged with greasy gunk; and a **2005-P Bison Nickel—Reverse Struck Through—MS65 NGC**, a vertical spear-shaped strike-through passes through the first S in STATES. All four coins are ex: New England Collection.  
*From the New England Collection of Jefferson Nickel Errors.* (Total: 4 coins)

**Lightly Toned Double Struck, Partial Collar  
 1940 Nickel, MS64**

**4507 1940 Jefferson Nickel—Double Struck in Collar, Partial Collar—MS64 PCGS.** The first strike expanded the planchet just enough so that it wouldn't fit back in the collar for the second strike, creating the partial collar at the moment of the second strike. This splendid Mint State piece is fully lustrous with brilliant nickel-gray surfaces and a sharp strike with full steps.

**4508 1944-P Jefferson Nickel—Struck in Rim Burr on Obverse at 12 O'clock—MS66 NGC**, the flattened obverse rim burr is actually near 10:30, attractive obverse green-gold toning; **1987-D Jefferson Nickel—Struck on a Thick Planchet—MS63 NGC**, weighs 5.7 gm instead of the proper 5.0 gm due to improperly rolled stock; and a **1999-P Jefferson Nickel—Double Struck, Second Strike Off Center—MS64 Six Full Steps NGC**, the second strike is slightly off center toward 7:30, design remnants from first strike visible on the reverse near 4:30. All three coins are Ex: New England Collection.  
*From the New England Collection of Jefferson Nickel Errors.* (Total: 3 coins)

**4509 1953-D Jefferson Nickel—Struck on a Split Planchet, Split Before Strike—NGC, 2.4 gm**; and a **1960-D Jefferson Nickel—Struck on a Split Planchet—NGC, 2.5 gm**. In both cases, internal alloy imperfections caused the planchet to be split prior to the strike. Because of the thin flan, the strikes are soft at the centers, with the granular surface of the planchet interior still partly visible on the reverse of each piece. Both coins are ex: New England Collection.  
*From the New England Collection of Jefferson Nickel Errors.* (Total: 2 coins)

**Radically Off Center (65%) 1953-S Nickel, MS66**

**4510 1953-S Jefferson Nickel—Struck 65% Off Center—MS66 NGC.** Ex: New England Collection. Widely off center toward 9 o'clock, but both the date and mintmark are complete. The struck portion is satiny, sharply defined, and has light tan toning.  
 Ex: *Central States Signature (Heritage, 4/2008)*, lot 1827, which realized \$575.  
*From the New England Collection of Jefferson Nickel Errors.*

**Highly Unusual 1962 Nickel Struck on an Ethiopian Cent MS63 Brown**

- 4511 1962 Jefferson Nickel—Struck on Ethiopian 5 Cent—MS63 Brown PCGS.** An unusual error as the most recent coinage of Ethiopian 5 cent pieces at a U.S. Mint is recorded in 1936. Olive-brown surfaces show tinges of pale red mint color with numerous carbon specks.

- 4512 1971 Jefferson Nickel—Struck on a Cracked Planchet—AU58 NGC,** prominent planchet defect at 5 o'clock, an obverse lamination near 10 o'clock; and a **1979 Jefferson Nickel—Struck on a Holed Defective Planchet MS64 NGC,** a large planchet flaw affects Jefferson's chin and jaw. Both coins are Ex: New England Collection.

*From the New England Collection of Jefferson Nickel Errors.* (Total: 2 coins)

- 4513 1974-D Jefferson Nickel—Obverse Misaligned Die—MS63 NGC,** misaligned toward 9 o'clock with slight loss of tops of IN GOD WE TRUST; and a **1975 Jefferson Nickel—Obverse Misaligned Die—MS66 NGC,** misaligned toward 8:30 with much of IN GOD WE TRUST off the flan. Both coins are Ex: New England Collection.

*From the New England Collection of Jefferson Nickel Errors.* (Total: 2 coins)

**Deep Obverse Die Cap on a 1985-P Nickel, MS68**

- 4514 1985-P Jefferson Nickel—Obverse Die Cap—MS68 NGC.** This deep die cap is housed in an extra-thick NGC holder. The coin stuck to the obverse die after the initial normal strike, and was then struck against a series of newly fed planchets. The multiple strikes flattened, spread, and distorted the reverse design, while the obverse partly wrapped around the obverse die.

*From the New England Collection of Jefferson Nickel Errors.*

- 4515 1995-P Jefferson Nickel—Broadstruck on a Blank—MS64 Full Steps NGC,** the listed 5.0 gm weight is normal, the flan bypassed the upset mill then was struck without a collar die; **1996-P Jefferson Nickel—Broadstruck on a Blank, Obverse and Reverse Struck Thru—MS65 NGC,** both sides struck through a partial thin layer of greasy gunk; and a **1999-P Jefferson Nickel—Broadstruck with Reverse Die Crack—MS65 Six Full Steps NGC,** slender but high relief radial die crack on the reverse at 8:30. All three coins are Ex: New England Collection.

*From the New England Collection of Jefferson Nickel Errors.* (Total: 3 coins)

- 4516 1998-P Jefferson Nickel—Partial Collar—MS65 Six Full Steps NGC,** broad, rounded obverse rim; **1999-P Jefferson Nickel—Partial Collar—MS65 Six Full Steps NGC,** railroad rim across much of obverse border; and a **1999-P Jefferson Nickel—Excess Pressure Strike—MS62 Five Full Steps NGC,** prominent clashmarks on the reverse. All three coins are Ex: New England Collection.

*From the New England Collection of Jefferson Nickel Errors.* (Total: 3 coins)

- 4517 2000-P Jefferson Nickel—Struck 45% Off Center—MS67 NGC,** widely off center toward 11:30, full date and mintmark; and a **2000-D Jefferson Nickel—Struck 80% Off Center—MS66 NGC,** uniface obverse struck far off center toward 10 o'clock, nonetheless with a full date and mintmark. Both coins are Ex: New England Collection.

*From the New England Collection of Jefferson Nickel Errors.* (Total: 2 coins)

**Washington Quarter Struck on a Zinc-Coated Steel Planchet, XF Details**

- 4518 Undated Washington Quarter—Struck on a Zinc-Coated Steel Planchet—Environmental Damage—NGC Details. XF. 2.6 gms.** The date is present but illegible on this oval-shaped error. The surfaces exhibit a combination of light gray, pewter-gray, reddish-brown, the latter in the form of light corrosion leading to the NGC designation.

**2000-S New Hampshire Quarter Double Struck With Obverse Rotation, PR69 Ultra Cameo**

- 4519 2000-S New Hampshire Clad—Double Struck, With Obverse Rotation—PR69 Ultra Cameo NGC.** A virtually perfect coin, in terms of preservation, with deeply mirrored fields and fully struck devices. The doubling is most easily detected on the date, with the obverse rotated a few degrees counterclockwise.

---

**1964 Half Dollar—Uniface Obverse, Double Struck, MS63**

- 4520** 1964 Kennedy Half Dollar—Uniface Obverse, Double Struck—MS63 PCGS. The obverse of the first strike is uniface, with a complete reverse design, and the second strike is at least 95% off-center at 3 o'clock. Both sides are brilliant and untoned with satiny luster on the reverse.

---

**1976-D Half Dollar, Die Adjustment Strike, MS60**

- 4521** 1976-D Kennedy Bicentennial Half—Die Adjustment Strike—MS60 PCGS. Known as a set up piece to check die spacing, with the dies still too far apart when this example was struck. Fully lustrous with light gray surfaces, but virtually all detail missing. The profile is flat with only the top curls still present. The date is missing but the mintmark is faintly visible. Just enough of the reverse design remains to identify this as a bicentennial half dollar.

---

**Triple Struck, Double Clipped 2000-P Sacagawea Dollar  
Net MS60**

- 4522** 2000-P Sacagawea Dollar—Triple Struck, Double Clipped, Scratched—ANACS. Net MS60. The effects of the multiple striking can be easily detected in the letters of the legends, the mintmark, and the rims. The planchet is lightly clipped at 12 o'clock and 5 o'clock. A long scratch extends from the reverse rim at 5 o'clock, half way across the central portion of the coin, with another long scratch at 3 o'clock.

---

**One Ounce American Buffalo Blank Planchet  
Type Two (Upset Rims), MS62**

- 4523** One-Ounce Gold American Buffalo—Type Two Blank Planchet—MS62 PCGS. 31 gm. Called “Mint State” by PCGS, though the wide-open fields are prominently reflective. This Type Two pure-gold planchet has upset rims that show beveling and texture down into the broad basin, one of several clues that this is an American Buffalo gold planchet.

---

**GSA DOLLARS**

- 4524** 1882-CC MS66 NGC. Remaining in its plastic GSA holder with the box and certificate is a brilliant and frosty Premium Gem that is boldly defined and entirely untuned. NGC has only certified 52 finer examples (9/10).(#7134)
- 4525** 1884-CC MS66 NGC. CAC. A fully brilliant Premium Gem, this 1884-CC is sharply defined with frosty silver surfaces and no evidence of toning on either side. PCGS has only certified 60 finer examples of the date (9/10).(#7152)
- 4526** 1890-CC MS62 NGC. Light dabs of pale cloud-gray toning in places, and touches of gold appear at the margins. Pleasingly lustrous, if a touch too abraded to qualify for Select status. Band-certified in the GSA holder of issue, no ephemera included. (#7198)
- 4527** 1891-CC MS62 NGC. Light to moderate abrasions do not dim the luster of the minimally toned surfaces. Well struck. Band-certified in the GSA holder of issue but without box or documentation. (#7206)
- 4528** 1903-O GSA Soft Pack MS63 NGC. A bit of numismatic history. This Select 1903-O dollar was one of the many examples released by the Treasury in the 1960s, changing the way collectors perceived its rarity. Lustrous silver overall with light digs and abrasions. Rim patches of crimson-violet appear at the right obverse, and peripheral gold is present elsewhere. (#7286)

---

**Unusual MS64 1903-O Morgan Dollar  
Housed in a GSA Holder**

- 4529** 1903-O MS64 NGC. An unusual sight: an example of the 1903-O Morgan dollar, the issue made famous as a rarity-turned-common by the Treasury releases of the 1960s, housed in a black GSA holder (no box or papers included). Band-certified as MS64 by NGC with light gray patina over lustrous surfaces that show occasional small scrapes and marks, the longest of which appears at the jawline. (#7286)

---

**End of Session Two**

## SESSION THREE

Floor, Telephone, Heritage Live!™, Internet, Fax, and Mail Signature® Auction # 1145

Friday, October 29, 2010, 7:00 PM ET, Lots 4530-5209

Stamford, Connecticut

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots

To view full descriptions, enlargeable images and bid online, visit [HA.com/1145](http://HA.com/1145)

### PATTERNS

1850 Three Cent Pattern With Cap and Rays Design  
Judd-125, Evenly Worn XF40

- 4530** 1850 Three Cent, Judd-125 Restrike, Pollock-171, R.4, XF40 PCGS. CAC. Modeled after the Mexican Cap and Rays design, these patterns were struck only in silver in 1850, but in 1836 this same obverse was used on the gold dollar and struck in gold, silver, copper, and orioide. The surfaces on this piece are evenly worn with few contact marks, indicating it was carried for several years as a pocket piece. Each side has light, even gray color with charcoal accents surrounding the devices. A couple of near-vertical grease stains (as struck) are located in the center of the reverse. The insert states XF40, but we have no reason to doubt this is a circulated proof and should properly be designated as a PR40. (#11538)

Nicely Reflective 1850 Three Cent Pattern  
Judd-125 Restrike, PR62

- 4531** 1850 Three Cent, Judd-125 Restrike, Pollock-147, R.4, PR62 PCGS. CAC. The design for this three cent silver is similar to the famous Judd-67 gold dollar pattern from 1836, but the date has been moved to the obverse below the cap, and the denomination within the palm frond is expressed with a large Roman numeral III. Struck in silver with a plain edge. Both the Judd book and USPatterns.com mentions the existence of restrikes of this issue, but neither gives any diagnostics. This example has bright surfaces with good reflectivity in the fields. Pale iridescent toning can be seen on each side. A couple of short, grade-limiting scratches are located at the top of the reverse between STATES OF. (#11538)

Curious 1854 Cent Pattern in Copper  
Judd-159, PR64 Brown  
Portrait Lathe Used on the Obverse

- 4532** 1854 One Cent, Judd-159, Pollock-186, High R.7, PR64 Brown PCGS. Ex: Bass. The obverse of this small cent die was created by a portrait lathe that used an 1854 silver dollar as a model. The portrait lathe caused many circular die lines, and the design is blurry. Notably, the 4 in the date resembles a 1. On the well-made reverse die, 1 CENT is encircled by an oak and acorn wreath. Struck in copper with a plain edge. This was a widely produced pattern that included piece struck in at least three varieties of German silver, copper-nickel alloy, a 78% silver piece, die struck copper pieces as well as electrotypes. The circular lathe lines are especially prominent on the obverse of this piece. The surfaces are almost uniformly brown with occasional blue accents around the reverse devices. (#11654)

1854 Cent Pattern in Bronze  
Judd-161, PR63 Brown

- 4533** 1854 One Cent, Judd-161, Pollock-187, R.4, PR63 Brown PCGS. CAC (Gold Sticker). The obverse and reverse designs are similar to the adopted Braided Hair designs, but without stars on the obverse and struck on a smaller-sized planchet. These popular patterns are known in copper, bronze, and orioide. This example is struck in bronze and has a plain edge. The surfaces are still nicely reflective through the greenish-tinged brown patina that covers each side. Slight porosity is present in the fields but there are remarkably few contact marks, undoubtedly explaining the coveted CAC gold sticker. (#60251)

**Glossy Brown 1855 Flying Eagle Cent Pattern  
Judd-168, PR55**

- 4534** 1855 Flying Eagle Cent, Judd-168, Pollock-193, R.4, PR55 PCGS. CAC (Gold Sticker). Called AU55 on the holder, but all were struck as proofs. About midway in diameter between the large and small cents, this pattern is also transitional in that it pairs a Flying Eagle obverse and a reverse similar in design to the large cent. Struck in bronze with a plain edge. The surfaces are glossy with intermingled mahogany and chestnut hues. Slight evidence of die clashing is evident in the fields on each side. A high-quality example as reinforced by the rarely seen gold CAC sticker. (#11720)

**1855 Flying Eagle Cent Pattern, Judd-168  
PR60 Brown, Woodgrain Surfaces**

- 4535** 1855 Flying Eagle Cent, Judd-168 Original, Pollock-193, R.4, PR60 Brown NGC. Thirteen stars surround an eagle that is flying slightly upward, similar to the Christian Gobrecht/Titian Peale flying eagle design for the Gobrecht dollars (and soon the Flying Eagle cents). The reverse design is similar to the issued large cent. The diameter is intermediate between the large cents struck for commerce in 1855 and the small cents that were first produced in 1856. Struck in bronze with a plain edge. Each side shows a woodgrain texture, similar to that seen on San Francisco cents from 1909, most likely from improper mixture of the bronze alloy. This pattern issue is known for its general lack of red color. On this particular piece the woodgrain texture actually preserves thin streaks of original red beneath the otherwise brown patina. The strike is soft on each side, and there are a few specks of carbon on the obverse. (#11720)

**Popular 1855 Flying Eagle Cent Pattern  
Judd-168, Proof**

- 4536** 1855 Flying Eagle Cent, Judd-168, Pollock-193, R.4—Improperly Cleaned—NGC Details. Proof. Thirteen stars surround an eagle that is flying slightly upward, similar to the Christian Gobrecht/Titian Peale flying eagle design for the Gobrecht dollars (and soon the Flying Eagle cents). The reverse design is similar to the issued large cent. The diameter is intermediate between the large cents struck for commerce in 1855 and the small cents that were first produced in 1856. Struck in bronze with a plain edge. The surfaces display an unnatural brightness from cleaning and each side has red and blue-brown coloration. Fully struck.

**1858 Flying Eagle Pattern, PR64  
Judd-202, Pollock-245**

- 4537** 1858 Flying Eagle Cent, Judd-202, Pollock-245, R.5, PR64 PCGS. The hook-necked eagle obverse, generally attributed to Longacre, is paired with several reverses during the year, here displaying ONE CENT in a simple laurel wreath with clusters of five leaves. Struck in copper-nickel with a plain edge. Orange-gold color dominates this well struck and attractive near-Gem, although the obverse field exhibits steel-blue hues. Encapsulated in a green-label holder. (#11867)

Desirable 1858 Indian Cent Pattern, PR65  
Judd-208, Pollock-259  
Design of 1859

- 4538 1858 Indian Cent, Judd-208, Pollock-259, R.4, PR65 PCGS. Snow-PT28. Die Pair 1. The Indian Head cent as adopted in 1859, with clusters of five leaves on the reverse wreath. This is the Centered Date variant. Struck in copper-nickel with a plain edge from slightly rotated dies, as often seen. The honey-tan surfaces show a significant undertone of red-gold on the reverse, along with a pair of faint toning streaks that extend, respectively, from the lower rim to the lower edge of the wreath bow, and from the left side of C though the O in ONE into the left upper leaves of the wreath. The 1858 Indian cent patterns with the 1859 design are among the highly sought pattern Indian cents for advanced collectors. An Eagle Eye Photo Seal certificate accompanies this lot. (#11885)

Judd-213 Proof 1858 Indian Cent

- 4539 1858 Indian Cent, Judd-213, Pollock-258, Snow-PT22, R.5—Improperly Cleaned—NGC Details. Proof. The obverse is the Indian type as issued in 1859, but dated 1858. The reverse is the same as used on Flying Eagle cents. The Broad Bust Point, Centered Date, Low Leaves Pollock and Snow subvariety of Judd-213. This well struck example lacks hairlines but the luster is subdued and the straw-gold color is slightly off. (#11897)
- 4540 1859 Indian Cent, Judd-228, Pollock-272, R.1—Improperly Cleaned—NGC Details. Unc. A popular transitional pattern, dated 1859 but with the shield and wreath reverse design that first appeared on Indian cents the following year. Vibrant apricot-gold patina in the margins encircles the more lilac-colored centers. A few minuscule flyspecks do not distract.

Lovely 1866 Nickel Pattern, Judd-508  
PR66 Red and Brown

- 4541 1866 Shield Five Cents, Judd-508, Pollock-592, High R.6, PR66 Red and Brown NGC. Similar to the issued 1866 Shield nickel, but the reverse lacks rays, a change made to the circulating design the next year. Struck in copper with a plain edge. This beautiful Premium Gem is sharply struck with brilliant deep orange surfaces. A hint of lilac toning and scattered carbon flecks are evident. (#70704)

Second 1866 Copper Shield Nickel Pattern  
Judd-508, PR66 Red and Brown

- 4542 1866 Shield Five Cents, Judd-508, Pollock-592, High R.6, PR66 Red and Brown NGC. Same design and metallic composition as the coin above, and also with a plain edge. This is unusual. A High R.6 pattern is estimated to only have 13-20 survivors. In this auction we have two, both in PR66 Red and Brown, and both are from the same consignor. That is the total number certified in this grade by both services (except for one PR66 Brown by NGC) and none are finer. The fields are brightly reflective on this example and the surfaces show a beautiful mixture of pinkish-cherry red and lime-green. Slight cameo contrast can also be seen on each side. (#70704)

**1867 Five Cent Pattern in Nickel**  
Collectible and Obtainable Judd-566, PR64+

- 4543** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR64+ NGC. The obverse features a bust of Liberty facing left, wearing a coronet but lacking a star, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. CENTS is in a straight line. Struck in nickel with a plain edge. This is one of the more available five cent patterns from the 1865 to 1867 period, with about two dozen known. Examples were also struck in copper, and only about half a dozen of these are known. This is a moderately reflective proof (typical of many proof nickels of the period) that has gray-brilliant surfaces with just a bit of lilac over each side. Traces of a fingerprint can be seen at the top of the reverse. (#60776)

**Sharp 1868 Pattern Cent, Judd-608**  
Pollock-673, PR65 Cameo

- 4544** 1868 One Cent, Judd-608, Pollock-673, R.4, PR65 Cameo PCGS. Liberty head design, similar to that used on regular issue Three Cent nickels, with a Roman numeral I in a laurel wreath on the reverse. Struck in nickel with a plain edge. Both sides are untuned with bold cameo contrast between the frosty devices and mirrored fields. Sharply struck throughout with a typical amount of carbon for the Gem grade level. (#60820)

**1868 Five Cent Pattern in Nickel**  
Judd-633, Pollock-705 (High Date Variant), PR63

- 4545** 1868 Five Cents, Judd-633, Pollock-705, R.5, PR63 NGC. The overall design is similar to the circulating three cent nickel, in larger format and with a V in the central reverse to indicate a five cent piece. But Liberty has star on the coronet, and the date 1868 is in exergue. The reverse has a wreath with small Maltese cross atop, surrounded by a scroll bearing IN GOD WE TRUST. Struck in nickel with a plain edge. Two obverse die varieties exist, High Date (Pollock-705, as here) and Low Date (Pollock-704). This example has deeply reflective fields, and each side has hazy gray and rose patina. (#60851)

**Bright, Unoxidized Aluminum 1868 Ten Dollar Pattern**  
Judd-663, PR62

- 4546** 1868 Ten Dollar, Judd-663, Pollock-736, Low R.6, PR62 PCGS. CAC. The obverse has a bust of Liberty facing left, wearing a coronet inscribed LIBERTY. Around, 13 stars, and below, the date. On the reverse, an eagle with wings spread clutches three arrows and an olive branch. A ribbon carries the motto IN GOD WE TRUST. Around, the legend UNITED STATES OF AMERICA, and below, the denomination TEN D. Struck in aluminum with a reeded edge. About a dozen aluminum examples are known, in addition there are copper pieces and four known in gold. This presents the collector with an interesting alternative—to collect gold patterns in off metals. The surfaces are bright and unoxidized. A few light hairlines are present, and each side shows slight, but noticeable cameo contrast. (#60881)

Nicely Reflective 1869 Five Cent Pattern in Nickel  
Judd-684, PR65

- 4547** 1869 Five Cents, Judd-684, Pollock-763, R.5, PR65 NGC. Similar to the contemporary three cent nickel, but the Roman numeral V replaces the Roman III, and a Maltese cross and a scroll bearing the motto closes the reverse wreath. Struck in nickel with a plain edge. Examples of this design were also struck in copper, but only about a half dozen are known. The fields on this piece are nicely reflective for a nickel proof and each side shows just a bit of pale blue over the otherwise brilliant surfaces. The strike is slightly soft on the lowest hair curls of Liberty. (#60909)

Bright 1869 Standard Silver Half Dollar  
Judd-748, PR64 Cameo

- 4548** 1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR64 Cameo NGC. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty is wearing a diadem inscribed LIBERTY, the legend is around the border, and the motto IN GOD WE TRUST is on a scroll at the bottom. The reverse exhibits the denomination 50 CENTS within a wreath of oak and laurel. STANDARD SILVER is at the periphery, the date 1869 is below the wreath. Struck in silver with a reeded edge. The surfaces are bright throughout, and the fields are deeply reflective with slight contrast on each side. Lightly hairlined. (#60977)

Impressive 1869 Pattern Half, Judd-754, PR63

- 4549** 1869 Standard Silver Half Dollar, Judd-754, Pollock-838, R.5, PR63 PCGS. A bust of Liberty faces right, wearing a headband inscribed LIBERTY and ornamented with a star. The reverse features a wreath of oak and laurel that crowds the denomination nestled inside. Struck in silver with a reeded edge. Charming aquamarine and chestnut-gold patina adorns this impressively preserved and suitably struck representative. (#60984)

Reflective 1870 Standard Silver Quarter  
Judd-888, PR64

- 4550** 1870 Standard Silver Quarter Dollar, Judd-888, Pollock-987, R.5, PR64 PCGS. A bust of Liberty wearing a cap ornamented with three stars facing right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center and is surrounded by a wreath of cotton and corn. Struck in silver with a reeded edge. Housed in a first-generation holder, the surfaces are mostly brilliant with just a bit of rose toning around the margins. The fields are deeply reflective, and the only surface flaws are light hairlines and a couple of small spots on the obverse. From The Diotte Collection. (#61132)

1870 Standard Silver Quarter, PR66  
Judd-906, Pollock-994

- 4551** 1870 Standard Silver Quarter Dollar, Judd-906, Pollock-994, Low R.7, PR66 NGC. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty's cap is ornamented with three stars and a ribbon with the inscription LIBERTY, the motto IN GOD WE TRUST is on a scroll at the lower periphery. The reverse depicts the denomination within a wreath of oak and laurel with STANDARD SILVER above and the date below. Struck in silver with a reeded edge. The surfaces are crystal-clear and brilliant throughout with deep reflectivity in the fields. Census: 1 in 66, 0 finer (9/10). (#61150)

**1871 Five Cent With Modified Three Cent Design  
Judd-1050, PR64**

- 4552** 1871 Five Cents, Judd-1050, Pollock-1184, Low R.6, PR64 NGC. The obverse bears a portrait of Liberty similar to that used on the nickel three cent piece. The date is below and UNITED STATES OF AMERICA is above the central device. The reverse depicts a reversed Roman numeral five and the word CENTS is within a wreath. Struck in nickel with a plain edge. The Judd-1050 is one of the more obtainable five cent patterns and it is also available in copper and aluminum. The fields are moderately bright for a nickel product, and the otherwise brilliant-gray surfaces show just a bit of pale reddish patina. (#61309)

**Lovely 1871 Pattern Five Cents, Judd-1054, PR64 Brown**

- 4553** 1871 Five Cents, Judd-1054, Pollock-1189, High R.6, PR64 Brown NGC. Longacre's three cent nickel Liberty motif is adapted for the nickel, although the arrangement of the denomination and wreath is more reminiscent of the two cent piece. Struck in copper with a plain edge. A pleasing Choice proof with mostly light tan surfaces and wisps of iridescent toning. Census: 3 in 64 Brown, 1 finer (9/10). (#61313)

**1877 Morgan Half Dollar Pattern in Copper  
Judd-1515, PR65 Brown  
A Historic and Important Design for the Morgan Dollar**

- 4554** 1877 Morgan Half Dollar, Judd-1515, Pollock-1679, High R.7, PR65 Brown NGC. The obverse shows Liberty (virtually identical to the Morgan dollar), facing left surrounded by a beaded circle. E PLURIBUS UNUM is above, the date 1877 is below, the reverse shows a defiant eagle facing right with upraised wings in the center. A beaded ring encircles the eagle, UNITED STATES OF AMERICA is at the top and sides, HALF DOLLAR completes the circle below. Struck in copper with a reeded edge. Both the obverse and reverse designs on this pattern are believed to be the first models used for the Morgan dollar. Only six examples are known in copper, and there are at least seven silver strikings extant. This is a wonderfully reflective and colorful example. Each side is perfectly balanced to the other and displays rich turquoise and golden-rose toning. A few light spots on each side are well concealed by the toning. (#61853)

---

1879 Washlady Dollar in Silver  
Judd-1603, PR66+  
The Finest Certified

**4555** 1879 Washlady Dollar, Judd-1603, Pollock-1798, High R.6, PR66+ NGC. The famous “Washlady” design by Charles Barber. A portrait of Liberty faces to the left with her hair tied behind her head. She has a headband inscribed LIBERTY, and her hair is adorned by wheat and cotton. Above is the motto IN GOD WE TRUST and below is the date with seven stars to the left and six stars to the right. The reverse depicts an eagle holding an olive branch and three arrows. The statutory legend UNITED STATES OF AMERICA follows the border with the motto E PLURIBUS UNUM, in smaller letters, in the field. The denomination ONE DOLLAR is below. Struck in silver with a reeded edge.

It is interesting to observe how concepts of beauty change over time. In the late 19th century this design was not well received by dealers and collectors. Liberty’s hair appeared disheveled, and the design was apparently given the nickname of Washlady by David Proskey around April 1891 at the Doughty Sale. The name stuck, but today the Washlady design is considered one of the most beautiful ever produced by the Mint. Between 12 and 15 examples are believed known of the Washlady dollar in both copper and silver. There is also one example known in white metal.

This piece may well be the finest known. The fields are brightly mirrored and flash strongly through the rose centers and blue peripheries. There are no singular marks that could be used for pedigree purposes. However, the reverse shows roller marks over both the devices and fields. Truly exceptional quality in what is undoubtedly one of the most famous and highly sought after designs among pattern collectors. This is the finest example certified by both of the major grading services. (#61981)

---

1879 Morgan Dollar Pattern in Silver  
Judd-1611, PR68 Cameo  
Finest Known

**4556** 1879 Morgan Dollar, Judd-1611, Pollock-1807, Low R.7, PR68 Cameo NGC. The obverse is that of the regular-issue Morgan dollar, while the reverse shows a statuesque eagle perched, head facing left, with downward-pointed wings, clutching an olive branch and three arrows. UNITED STATES OF AMERICA and ONE DOLLAR encircle the border. Struck in silver with a reeded edge.

This “near-Morgan dollar” poses an interesting contrast with the adopted design. The obverse is as-issued. The eagle on this reverse shows considerable differences, the shape of the head and the center breast, in particular, approach the circulation design, but are still noticeably different. The result of Morgan’s efforts was an eagle that was described as “scrawny.” About a dozen pieces are extant of this variety, and it is known in both copper and silver.

This is the finest example known of this popular Morgan dollar pattern. A PR67 is recorded at both NGC and PCGS, these are the closest contenders and neither of these pieces are designated as a Cameo. The fields are deeply mirrored with noticeably contrasting mint frost over the devices. When examined with a strong loupe there are simply no contact marks or other imperfections apparent on either side. Even the striking details are complete. When closely examined one notices just the slightest accent of golden patina on each side, but the coin primarily presents as brilliant because of the exceptional depth of mirrored reflectivity in the fields. Morgan dollar collectors take an interest in such patterns as this as it allows the student of the series to trace the progression of various concepts through to the adopted design. (#61989)

---

1879 Goloid Metric Dollar by Morgan  
Judd-1622, PR68 Cameo  
The Finest Known

**4557** 1879 Metric Dollar, Judd-1622, Pollock-1818, Low R.7, PR68 Cameo NGC. Metric dollar pattern designed by George Morgan, featuring a rarely used head of Liberty with hair brushed back and fastened in a bun and with a wide ribbon at the top of the head. The reverse is the standard Metric dollar design with DEO EST GLORIA featured prominently above the composition in the center. Struck in silver (metric alloy) with a reeded edge.

This pattern design was struck in four metals: silver, copper, aluminum, and white metal. The same design was used again in 1880 for silver, copper, and aluminum pieces. Of the 1879 strikings, it is estimated that approximately a dozen are known of the silver and copper pieces, about four are known of the aluminum composition, and the white metal piece is believed unique.

The peculiar metallic composition of goloid was a patented creation of Dr. Wheeler Hubbell. It consisted of gold, silver, and copper. The intention was to reduce the size of the silver dollar and lighten it. As a sidenote, the famous four dollar stella was also a goloid creation. In the case of both this pattern and the stella it is not known if they were actually struck from Hubbell's composition or if regular coin silver and coin gold was used.

This particular coin combines rarity and high grade. Of the Judd-1622 pattern dollars that have been certified at both services, this piece is the finest known. The PR68 Cameo grade tells a great deal about the near-perfect preservation of the surfaces. There are no discernible marks on either side. The fields display light die striations which have imparted the brightness to the mirrored fields. The devices are noticeably frosted, yielding the white-on-black cameo contrast on both obverse and reverse. The surfaces appear to be brilliant, but close examination reveals just the slightest hint of rose patina on each side. (#62000)

**1879 Goloid Metric Dollar—A William Barber Design  
Judd-1626, PR63**

- 4558** 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR63 NGC. William Barber's design for the Goloid Metric dollar with a capped head of Liberty on the obverse, paired with a reverse that carries the statutory as well as elemental inscriptions. A circle of stars about the central inscriptions breaks the otherwise continuous wording. Struck in goloid (5.46% gold, 84.54% silver, 10.00% copper) with a reeded edge. Few examples have undergone metallurgical testing to determine if they are actually goloid or simply coin silver. This is a nicely mirrored example that is mostly brilliant with a pale overlay of golden color and light hairlines. There are no singular contact marks on either side.  
*From The Diotte Collection. (#62004)*

**Elusive 1882 Nickel Pattern, Judd-1679, PR65**

- 4559** 1882 Liberty Head Five Cents, Judd-1679, Pollock-1881, Low R.7, PR65 NGC. The devices are similar to the issued 1883 No Cents Liberty nickel, but the country name is on the obverse instead of stars, while the reverse has IN GOD WE TRUST in small letters instead of UNITED STATES OF AMERICA and E PLURIBUS UNUM. The portrait is slightly smaller, and the wreath significantly larger, relative to the eventually issued type. Struck in aluminum with a plain edge. This is the first example of Judd-1679 that has appeared in any of our auctions since the beginning of our archives in 1993. Faint bluish hues grace the lovely and virtually pristine surfaces of this Gem proof. Census: 2 in 65, 0 finer (9/10). (#62084)

**1882 Transitional Liberty Nickel  
Judd-1680, PR64  
Lightly and Evenly Toned**

- 4560** 1882 Liberty Head Five Cents, Judd-1680, Pollock-1882, Low R.6, PR64 NGC. The portrait of Liberty is identical to the adopted design of 1883, but here it is surrounded by UNITED STATES OF AMERICA instead of stars, and shows the date (1882) below. The border denticles are quite wide. The reverse features a wreath of corn and cotton encircling a large Roman numeral V. The motto E PLURIBUS UNUM is above. Struck in nickel with a plain edge. This design is relatively available in nickel, and it is also known in copper and aluminum. The same design was also used to create the famous "Blind Man's Nickel" with five ridges on the edge. This is a lovely example with moderately reflective fields and rose-gray patina. (#62085)

**Transitional 1883 Nickel in Copper  
Judd-1715, PR64 Brown  
One of Only Four Examples Known**

- 4561** 1883 Liberty Head Five Cents, Judd-1715, Pollock-1920, High R.7, PR64 Brown NGC. The Charles Barber Liberty Head portrait. Here she sports a plain coronet, as the word LIBERTY is at the top rim, with stars six left and seven right, date 1883 below. The reverse displays the regular NO CENTS die of 1883. Struck in copper with a plain edge. This is one of the few patterns that has the wording removed from the diadem, coronet, shield, and other design elements. Only four examples are confirmed of this issue in copper. It is marginally more available (with six pieces believed known) in aluminum, and approximately two dozen nickel examples are known. Both sides are evenly balanced in appearance. The fields are nicely reflective and enliven the otherwise dense brown, rose, and blue colors. The strike is complete on both obverse and reverse. A couple of small spots on each side undoubtedly explain the PR64 grade; otherwise a Gem. (#62132)

- 4562 Private “1876 \$100 Gold Union” Ultra Cameo Gem Proof NGC.** One ounce of 999 Fine gold. Struck by the private New York Mint in 2007. The designs are based on sketches by Mint engraver George T. Morgan for a proposed \$100 gold coin. Immaculate with flashy fields and luminous devices.

## GOLD DOLLARS

### Premium Gem 1849 Gold Dollar Scarce No L Type

- 4563 1849 No L MS66 NGC. Q.** David Bowers estimates the original mintage of the 1849 No L gold dollar at 10,000 pieces, although other writers have suggested smaller figures, as low as 1,000 examples. The present coin is a magnificent Premium Gem, with attractive greenish-gold surfaces and vibrant, satiny mint luster. All design elements are sharply rendered, and eye appeal is overwhelming. Census: 10 in 66, 5 finer (9/10). (#7501)
- 4564 1849 Open Wreath MS64 NGC. Breen-6002.** The star near 5 o'clock is widely repunched. A well-defined yellow-gold example from the first year of the design. Both sides show faint overtones, green or orange depending on the angle. (#7502)
- 4565 1849 Open Wreath MS64 NGC. Breen-6002.** Not specifically described as such on the holder, but the wide spaces are easily visible on the reverse. The obverse has a pale yellow-gold center with green-gold outer color, while the reverse offers a mix of the two shades. (#7502)
- 4566 1849 Closed Wreath MS64 NGC. CAC.** A satiny first-year beauty that has the Closed or Close Wreath reverse. Yellow-gold surfaces are attractively preserved for the grade, and the devices are generally well struck. (#7503)

### 1849-C Closed Wreath Gold Dollar, MS63 Underrated Early Gold Issue

- 4567 1849-C Closed Wreath MS63 NGC. Variety 1.** The only collectible 1849-C gold dollars—the 1849-C Open Wreaths are among the rarest of all U.S. gold coins—the Closed Wreaths were nonetheless produced in a minuscule amount, 11,634 pieces. Mint State examples are very rare, and the present Select coin is one of five at that level at PCGS, with none finer (9/10). The peach-gold surfaces on this coin are lustrous and thoroughly appealing with semireflective fields, an excellent strike, and minimal abrasions. A couple of small contact marks in the left obverse field are mentioned for pedigree purposes, but there are essentially no quibbles about this rare, beautiful, and underrated early gold issue. (#7505)
- 4568 1849-D—Scratches—NGC Details. AU. Variety 1-B.** The scarcer of the two varieties, identified by a more centered mintmark. A few faint scratches and a couple of small digs has caused NGC to give this coin a “details” grade. Pleasing sun-gold patina drapes the still-lustrous surfaces. Liberty’s hair is softly struck, but the rest of the design is crisp. (#7507)

**1849-D Gold Dollar, AU50, Variety 1-A**  
Popular First Year of Issue

- 4569 1849-D AU50 PCGS. Variety 1-A.** The mintmark is positioned to the left. Celebrated as the first-date-of-issue D-mint gold dollar, the 1849-D enjoyed a large mintage of 21,588 pieces. A number of coins were saved as souvenirs, making the issue quite available today, in the context of the series. An estimated 250-300+ examples are known today in all grades, with 85-95 specimens in AU. The present coin is well struck for a D-mint issue, with the typical weakness noted on the curls below LIBERTY. A crack from Liberty's nose into the obverse field is the only mark of note. (#7507)

**Conditionally Rare 1850 Gold Dollar, MS65**

- 4570 1850 MS65 PCGS.** There are many hidden condition rarities in the gold dollar series, such as the 1850 gold dollar that is easy to obtain in lower Mint State grades, but a major rarity in Gem or finer grades. PCGS and NGC have combined to certify just 26 MS65 examples, and only seven finer pieces. This lovely specimen has frosty lemon-yellow surfaces with a hint of design weakness at the centers. However, the surfaces are pristine with only a few trivial, grade-consistent marks. Population: 14 in 65, 4 finer (9/10). (#7509)

- 4571 1850-D—Obverse Damage—NGC Details. AU. Variety 2-C.** A tiny dig on the field near the bridge of Liberty's nose is apparently the cause of the NGC designation. It is debatable whether that mark constitutes "damage," although the coin is slightly bright and has a couple of other, trivial abrasions. Well struck save for Liberty's hair on each side of the ear. (#7511)

- 4572 1851 MS64 PCGS.** Well struck and satiny, a faintly green-gold near-Gem with major butter-yellow color. Attractively preserved with just a few peripheral disturbances. PCGS has graded 96 numerically finer pieces (9/10). (#7513)

- 4573 1851 MS64 PCGS.** Khaki-gold and orange with hints of lilac invigorate this lustrous and impressively unabraded near-Gem. Well struck near the rims although the centers show minor incompleteness. (#7513)

**Premium Gem 1852 Gold Dollar**  
Popular Type One Example

- 4574 1852 MS66 NGC.** The 1852 gold dollar is an available date from a mintage of 2 million pieces. The issue is popular with type collectors seeking an example of a Type One gold dollar. Of course, the population does thin out in higher grades, and Premium Gem specimens, like the present coin, are rare. This coin is sharply struck, with lovely rose-gold patina and no mentionable surface flaws. Census: 19 in 66, 11 finer (9/10). (#7517)

- 4575 1853 MS64 NGC.** The 1853 is the favorite date of type collectors seeking an example to represent the Type One gold dollar. The present coin is a sharply struck Choice Mint State specimen with bright mint luster and rose-gold surfaces. (#7521)

**Scarce 1853-D Gold Dollar, AU55**

- 4576 1853-D AU55 NGC. Variety 5-G.** The only variety identified for the 1853-D gold dollars. The mintage of 6,583 coins is clearly consistent with employment of a single die pair. Slight wear appears on the highest obverse design elements, with deeper orange toning in that area. The balance of the obverse and reverse exhibits lovely green-gold luster. Census: 20 in 55, 75 finer (9/10). (#7523)

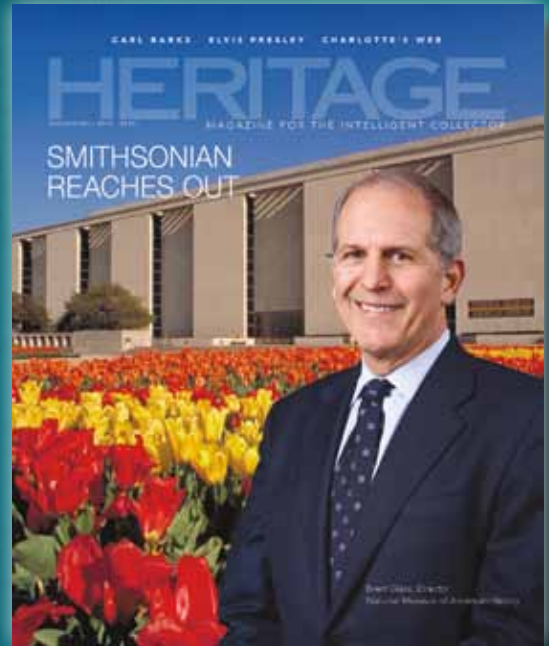

- 4577 1853-O MS63 PCGS.** An attractive example of this popular O-mint Type One gold dollar issue. Warmly lustrous surfaces have rich yellow-orange color and only mild abrasions. PCGS has graded 41 numerically finer examples (9/10). (#7524)

Popular 1854 Type Two Gold Dollar, MS64

- 4578 1854 Type Two MS64 NGC. The Type Two Philadelphia gold dollar issues of 1854 and 1855 enjoy unceasing demand from type collectors, and while the two dates may be available for a price in the lower Mint State grades, by the near-Gem level, demand is well in excess of supply. This is a lovely MS64 example, butter-yellow with canary accents and strong and satiny luster. Liberty's portrait has uncommonly sharp detail, though even this well-defined coin cannot avoid central reverse weakness entirely. Smooth and delightful. NGC has certified just 37 examples in Gem and better grades (9/10). (#7531)

## Incredible MS66 ★ 1854 Type Two Gold Dollar

**4579 1854 Type Two MS66 ★ NGC. CAC.** The first section of the 1849 Coinage Act reads:

“Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be, from time to time, struck and coined at the mint of the United States, and the branches thereof, conformably in all respects to law, (except that on the reverse of the gold dollar the figure of the eagle shall be omitted,) and conformably in all respects to the standard for gold coins now established by law, coins of gold of the following denominations and values, viz.: double eagles, each to be of the value of twenty dollars, or units, and gold dollars, each to be of the value of one dollar, or unit.”

Previously, only quarter eagles, half eagles, and ten dollar eagles had been produced by the United States. The significant gold deposits discovered in California the prior year were undoubtedly the motivation behind this coinage act authorizing two additional gold coin denominations. By the end of 1849, nearly 1 million gold dollars had been struck at the four U.S. mints.

In 1854, the size and design of the gold dollar were altered slightly. The coins were made thinner, with the diameter increased from 13 to 15 millimeters. The obverse portrait of Liberty was changed to the likeness of an Indian princess and also made smaller. This new Type Two design had problems, however, like the Type One; Type Twos were only made from 1854 through 1856, creating a scarcer type for coin collectors.

This marvelous Premium Gem example displays intense, shimmering mint frost over honey-gold surfaces. The design elements are sharply struck and the coin is free of poststrike distractions. Moderate clash marks are noted on both obverse and reverse, a typical feature of the Type Twos. Although NGC has graded six pieces as MS66, this is the only one to also receive the coveted Star designation for exceptional eye appeal. Three coins have been certified numerically finer by NGC, but none of them were awarded the Star (9/10).

*Ex: Baltimore ANA Signature (Heritage, 7/2008), lot 1875, which realized \$52,900. (#7531)*

- 4580 1855 MS61 NGC.** The strike on this popular 19th century type coin is uncommonly sharp for this date, with just a touch of weakness on the central reverse. The surfaces are an attractive greenish-gold color, with bright mint luster. Clash marks show plainly in the reverse fields. (#7532)

#### Lustrous MS62 1855 Gold Dollar

- 4581 1855 MS62 PCGS. CAC.** An impressively detailed Type Two gold dollar which shows the usual clash marks on both sides, though the reverse shows them more boldly. Strong yellow-gold luster tinged with apricot and an assortment of wispy marks that account for the grade. A great piece for the type collector. (#7532)

#### Prized 1855 Gold Dollar, MS62

- 4582 1855 MS62 NGC.** Numismatists hold Mint State examples of the short-lived Type Two gold dollar in high regard, and this lustrous light yellow-gold example will be admired for generations to come. Both sides have frosty surfaces with a few minor marks that prevent a higher grade. Prominent clash marks are evident in the fields on each side. (#7532)

#### Yellow-Green Near-Gem 1855 Gold Dollar Desired Type Two Issue

- 4583 1855 MS64 PCGS.** In the late 1840s-early 1850s, two new denominations introduced the most diminutive U.S. coins ever produced for regular circulation. The gold dollars, premiering in 1849, had a diameter of 13 mm—just about a half-inch—and weighed 1.67 gm, about one-twentieth of a troy ounce. (This was, of course, proportional to the largest regular-issue federal gold coin, the double eagle, which weighed about one troy ounce.)

In 1851 the three cent silver coin debuted, weighing four-fifths of a gram—but even that denomination, which quickly garnered the scornful appellation of “fish scales,” was one millimeter larger than the gold dollar.

Both were easily lost, of course.

The “solution” for the tiny gold dollars made them larger in the Type Two format, introduced in 1854 and continuing through 1855 (1856 in San Francisco). The diameter was 2 mm larger—and it placed the high points of the design on opposing sides, with miserably incomplete strikes, often accompanied by die clashing, the usual result.

This piece is one of the fortunate few survivors that has managed at least to escape the weak strike syndrome. The centers are sharply struck, and there is no weakness on the digits or Liberty’s hair. The yellow-green surfaces do show numerous die clash marks, as usual, which do not affect the technical grade or the strong eye appeal. PCGS has certified only 52 pieces finer (9/10). (#7532)

### Sparkling MS64+ 1855 Gold Dollar

**4584 1855 MS64+ PCGS. CAC.** With all of the well-known hullabaloo about the Type Two gold dollars being conditionally rare and strike-challenged, numismatists sometimes lose sight of the bigger picture—that the design also underwent a significant change, one that imitated the three dollar gold coins and led to many of the problems cited.

After the death of Mint Chief Engraver Christian Gobrecht in 1844, a Mint outsider, James B. Longacre, was named to the post. Even though he lacked die-cutting skills, for most of the 1840s, Longacre was able to get by without introducing any new coin designs. It was 1849 before he was called upon to develop the Liberty Head designs for the one dollar and twenty dollar denominations. (Note that even though business strike half cents were produced in 1849 for the first time since 1835, Longacre did not even attempt a new design, and the series continued unchanged with the Gobrecht design until its discontinuance in 1857.)

The three dollar gold denomination, introduced another five years later in 1854, did not follow its predecessors' designs, rather introducing the Indian Princess motif, the same one that would debut on the one dollar gold. Longacre's decision to place the high points of the design on each side in immediate opposition led to the strike difficulties, and it may also have led to the prevalence of clashed dies for the Type Two issues.

The mint luster sparkles on this softly frosted near-Gem Plus coin. The strike is slightly soft in the centers, and very light die clashing appears on the obverse, while there is a full outline of Liberty on the reverse. There are no mentionable abrasions, although a couple of tiny planchet voids appear on the reverse, one on each side of the 1 in the denomination. Population: 4 in 64+, 53 finer (9/10). (#7532)

### 1855-C Gold Dollar, AU58 Rare Issue in High Grade

**4585 1855-C AU58 NGC. Variety 1.** The mintage for the 1855-C gold dollar is a low 9,803 pieces, with two die varieties known for the date. The position of the second 5 in the date centered below the A in DOLLAR identifies this coin as a representative of Variety 1. Remarkably an estimated 250 to 350 pieces still survive in all grades. The majority of those survivors are VF, and Doug Winter believes only 28 to 45 pieces are extant in AU condition. The 1855-C is the second rarest Charlotte gold dollar in high grades, behind only the famous 1841-C Open Wreath. As always seen on this issue, this piece shows a notable lack of high-point definition in the center of each side. This weakness makes the 1855-C a notoriously difficult coin to grade. The present coin displays slight traces of luster around the devices. The surfaces are orange-gold with traces of lilac on the reverse. The only mentionable mark is a tiny one just in front of the lower part of Liberty's brow. Census: 48 in 58, 14 finer (9/10). (#7533)

**4586 1855-O XF45 PCGS.** The 1855-O is the final gold dollar produced at the New Orleans Mint, with a mintage of just 55,000 pieces. The present coin is lightly worn, and the typical striking weakness shows on the 8 in the date. The surfaces are lustrous, with attractive greenish-gold color. (#7535)

---

### Fabulous Premium Gem 1857 Gold Dollar

**4587 1857 MS66 NGC. CAC.** Pleasingly detailed, particularly at the interiors. Yellow-gold surfaces show touches of green and glimpses of reflectivity in otherwise frosty luster. A notable Premium Gem representative of this earlier Type Three gold dollar issue, tied for numerically finest known to NGC (9/10). (#7544)

**4588 1857-S XF45 PCGS.** Housed in a green-label holder, this Choice XF gold dollar is one of only a few such coins struck in San Francisco. The Western Mint was primarily interested in striking double eagles, and that large denomination took most of their time and effort. This delightful example has lovely orange and blue patina with only a touch of wear. (#7547)

---

### 1859-C Gold Dollar, MS61 Rare Issue, Final C-Mint Gold Dollar

**4589 1859-C MS61 NGC. Variety 1.** From a series-low mintage of 5,235 pieces, with a single die variety known, the 1859-C is the final gold dollar issue from the Charlotte Mint. Among Charlotte Mint gold dollars, only the uncollectible 1849-C Open Wreath is clearly rarer than the 1859-C, although the 1850-C is of almost equal rarity. The present coin exhibits the soft strike always seen on the 1859-C, with both sides weak on the central devices. The light greenish-gold surfaces show vibrant mint luster and considerable eye appeal. Census: 8 in 61, 12 finer (9/10). (#7552)

**4590 1860 MS63 NGC. CAC.** A well-defined piece that is primarily pale yellow-gold, though the satiny surfaces take on a deeper hue close to the rims. Select with few significant abrasions. Census: 19 in 63, 20 finer (9/10). (#7555)

---

### Premium Gem 1862 Gold Dollar Popular Civil War Date

**4591 1862 MS66 NGC.** The 1862 gold dollar was produced in large numbers, but the issue was hoarded in government vaults, due to Civil War uncertainty, and only paid out to the public at a premium. Examples in Premium Gem condition are rare today, and any finer grade is virtually unobtainable. The present coin is a spectacular piece, with a razor-sharp strike and vibrant mint luster. The light peach-gold surfaces are virtually pristine. (#7560)

**4592 1873 Open 3 MS65 NGC.** Strong yellow-gold interiors give way to peach and orange at the lustrous margins. An impressive Gem example bearing the Open 3 reverse. Housed in a prior-generation holder. Census: 46 in 65, 12 finer (9/10). (#7573)

---

### Stunning 1881 Gold Dollar, MS66

**4593 1881 MS66 PCGS.** A stunning Premium Gem representing the low-mintage 1881 gold dollar, and surviving from a production of just 7,620 business strikes. Most of the mintage stayed in Treasury storage, eventually to be released to collectors, so Mint State coins are relatively plentiful in relation to the mintage. Still, pieces as nice as this are scarce and highly desirable. Both sides have impressive orange-gold luster with sharp design motifs and satiny surfaces. (#7582)

**4594 1881 MS63 Prooflike NGC. CAC.** Strongly reflective canary-yellow fields suggest a proof, though the strike on the devices, while solid, is not up to proof standards. Nonetheless, a delightful piece that shows only scattered wispy abrasions to account for the grade. Census: 1 in 63 Prooflike, 15 finer (9/10). (#77582)

**4595 1885 MS64 PCGS.** Considerable reflectivity in the fields, not uncommon for this lower-mintage gold dollar issue. Strong yellow color and luster, a pleasing near-Gem that is housed in a green label holder. PCGS has graded 96 numerically finer examples (9/10). (#7586)

**4596 1885 MS65 NGC.** Areas of violet and red patina intermingle with sun-gold on both sides of this high-grade example. Liberty's hair is a touch soft, but the rest of the details are sharp. A loupe locates only a couple of insignificant handling marks. (#7586)

**4597 1886 MS63 Prooflike NGC.** Boldly impressed and distinctly reflective, not uncommon for this later gold dollar issue. Lightly abraded with a planchet flake to the right of the wreath's bow. (#77587)

**4598 1888 MS64 NGC.** Uncommonly bold detail on both Liberty's hair and the lower reaches of the wreath. Canary-yellow luster has antique-gold accents at the rims. (#7589)

---

### Satiny 1888 Gold Dollar, MS67

- 4599 1888 MS67 PCGS. CAC. A large portion of the mintage of 15,501 gold dollars in 1888 were acquired as holiday gifts at the time they were issued, and a large percentage still exist today, although few are as fine as this piece. Both sides have bold design elements with satiny light yellow luster and pristine surfaces. Hints of pale orange toning enhance the eye appeal. Population: 46 in 67, 5 finer (9/10). (#7589)

---

### Superb Gem 1889 Gold Dollar Final Date of Denomination

- 4600 1889 MS67 PCGS. CAC. The 1889 gold dollar is a favorite issue among type collectors because of its availability in high grade, and its status as the final date of the denomination. The present coin is a delightful Superb Gem, with lustrous peach-gold surfaces and a needle-sharp strike. Housed in a green label holder. Only one coin has been certified in higher numeric grade at PCGS (9/10). (#7590)

---

## PROOF GOLD DOLLARS

---

### Proof 1860 Gold Dollar

- 4601 1860 PCGS Genuine. Proof. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin is a proof specimen that has been lacquered. Both sides of this light yellow proof have bold design features with deeply mirrored fields and lustrous devices.

---

### 1883 Gold Dollar, PR67 Ultra Cameo Single Finest Certified

- 4602 1883 PR67 Ultra Cameo NGC. Only 207 proof gold dollars were minted in 1883, and the issue is seldom encountered today. Q. David Bowers estimates a surviving population of 50-75 examples in all grades, and it is doubtful any surviving specimen can match the quality of the coin offered here. This piece is the only coin certified PR67 Ultra Cameo by either leading grading service, and none have been awarded a higher numeric grade within the designation (9/10). Two varieties are known for the issue, with this example representing the less available variety with the repunched date.

The present coin is a spectacular specimen, with deeply mirrored honey-gold fields of unfathomable depth. The pristine surfaces display the characteristic orange peel effect seen on proofs of this era. The strike is razor-sharp throughout, and the field-device contrast is profound. The visual appeal of this coin is overwhelming. (#97633)

- 4603 1884—Cleaned—ANACS. PR60 Details. Meticulously struck but the obverse displays patches of faint hairlines. An interesting lintmark connects the chin to the first S in STATES. Still somewhat flashy, and the reverse has pleasing cameo contrast. Much scarcer than its initial proof mintage of 1,006 pieces, due to the love token craze of the era. (#7634)

## EARLY QUARTER EAGLES

1806/4 Capped Bust Right Quarter Eagle, AU58  
Scarce BD-1 Variety

**4604 1806/4 8x5 Stars AU58 NGC. Breen-6122, BD-1, High R.4.** Two varieties of quarter eagles were minted in 1806, both are overdates, and both are quite scarce today. The present coin is a representative of the BD-1 variety, characterized by the last digit of the date punched over a 4, and the arrangement of the obverse stars in an 8x5 pattern. The 1806/4 claims an estimated mintage of 1,136 pieces, and John Dannreuther estimates a surviving population of 75-90 pieces in all grades. Currently, NGC has certified seven coins in AU58, with eight examples finer, while PCGS has also graded eight specimens in near-Mint condition, with four pieces finer (9/10).

The present coin displays pleasing greenish-gold surfaces, with areas of prooflike reflectivity. As frequently seen on this issue, the strike is a bit soft on the central devices, especially on the reverse. The obverse exhibits extensive die cracks through the stars on the left side and another through the tops of the letters in LIBERTY. (#7654)

1831 Quarter Eagle, MS63  
Appealing, Low-Mintage Date, BD-1

**4605 1831 MS63 NGC. Breen-6134, BD-1, R.4.** The 1831 Capped Bust Left quarter eagle boasts a low mintage of 4,520 pieces, with a single variety known for the date. John Dannreuther estimates a surviving population of 110-125 examples in all grades. The 1831 is definitely rare in Mint State condition. The present coin is a pleasing Select Mint State specimen with an exceptional strike. Fine detail is present in Liberty's hair and the eagle's feathers. The surfaces are prooflike, as might be expected with the small mintage, and both sides display vivid greenish-gold color. Eye appeal is exceptional. Census: 7 in 63, 15 finer (9/10). (#7671)

## CLASSIC QUARTER EAGLES

- 4606** 1835 AU55 PCGS. Breen-6141, Variety-6, R.2. The most available of the 1835 quarter eagle varieties. Distinctly worn on the high points with scattered abrasions, yet the yellow-gold fields retain considerable radiance. Population: 17 in 55, 67 finer (9/10). (#7693)

### 1839-C Classic Head Quarter Eagle, AU58 Two-Year Mintmark Type Coin

- 4607** 1839-C AU58 NGC. Breen-6150, Winter-2, Variety-22, R.4. The 1839-C Classic Head quarter eagle is popular with mintmark type collectors as the second year of a two-year design type. The reported mintage was 18,140 pieces, and Doug Winter estimates a surviving population of 300-400 examples in all grades. Perhaps 70-115 coins are extant at AU levels. Three varieties are known for the date, with this example representing the rarest Winter-2 variety, with the 3 in the date recut and the mintmark centered over the gap between the 8 and 3. This specimen displays light greenish-gold surfaces, with much remaining mint luster. The reverse is sharply struck, but the obverse shows a little softness on the star centers. Census: 79 in 58, 18 finer (9/10). (#7699)

### 1839-D Quarter Eagle, XF45 Only D-Mint Classic Head Quarter Eagle

- 4608** 1839-D XF45 PCGS. Breen-6151, Winter 1-A, Variety-26, R.3. The 1839-D is the only Classic Head quarter eagle minted at the storied Dahlonega Mint. With a mintage of just 13,674 pieces, the 1839-D is known in two die varieties. The present coin represents the more available Variety 1-A, identified by the weak branch stem on the reverse. This coin has rich orange-gold surfaces, with light wear on the devices and much remaining mint luster. A scattering of abrasions and handling marks are evident on both sides, the worst being two crossing scratches below OF on the reverse. Population: 26 in 45, 53 finer (9/10). (#7700)

## LIBERTY QUARTER EAGLES

### Choice 1840 Quarter Eagle Important First-Year Type Coin Among the Finest Certified

- 4609** 1840 MS64 PCGS. CAC. The 1840 Liberty Head quarter eagle boasts a mintage of just 18,859 pieces, small in comparison to most denominations, but nominal in the context of the series. The year saw the first use of Gobrecht's Liberty Head design, and the date is prized by type collectors today, but few examples were saved by the general public at the time of issue. Examples in Choice Mint State condition are very rare, as reflected by the population data. Currently, PCGS has certified only two coins in MS64, with none finer, while NGC has graded seven examples at the Choice level, also with none finer (8/10).

The present coin is an attractive Choice example with strong visual appeal to complement the high technical grade. The lustrous fields are highlighted by flashes of orange-gold color and display areas of prooflike reflectivity. The 1840 is known for its weak central strike, and this piece does show some softness in Liberty's hair above the ear. The shield and eagle's feathers also show some incompleteness, but the peripheral devices are strongly impressed. A few shallow scratches in the obverse field, near star 2, prevent an even higher grade. (#7717)

---

### Typical 1842-D Quarter Eagle, XF45

- 4610 1842-D XF45 NGC. Variety 3-F.** Only one die marriage is identified, consistent with a mintage of 4,643 coins. This Choice XF specimen has light wear on the high points with splashes of faint olive toning over its light yellow surfaces. The low mintage is consistent with a scarce issue, especially in higher circulated grades. The average grade of all NGC and PCGS certified 1842-D quarter eagles is 45, so this piece represents the typical survivor. Census: 19 in 45, 32 finer (9/10). (#7725)

---

### Desirable 1843-C Large Date Quarter Eagle Variety-1, Unc Details

- 4611 1843-C Large Date, Plain 4—Improperly Cleaned—NGC Details. Unc. Variety-1.** Two varieties are known for the 1843-C quarter eagles, one with a Small Date obverse and the other (offered here) with a Large Date obverse. The date is delicately recut and the mintmark shows minute doubling at its outer left curve. This piece is a splendid survivor, with frosty luster and only a few small marks. Both sides show light hairlines from cleaning. *From The Diotte Collection.*

- 4612 1843-D Large D XF40 NGC. CAC. Variety 4-H.** The uncommon and popular Large Mintmark, which has a slight counterclockwise turn from level orientation. Yellow-orange surfaces show glimmers of luster and occasional pinscratches and rim bumps. Housed in a prior-generation holder.(#97730)

- 4613 1844 AU53 PCGS.** Only 6,784 quarter eagles were struck at Philadelphia in 1844, quite a drop from the more than 90,000 pieces struck in both 1843 and 1845. This straw-gold example has noticeable luster and only a single consequential mark, on the field above the eagle's beak. Population: 8 in 53, 10 finer (9/10). (#7734)

- 4614 1847 AU58 PCGS.** Pale lemon-gold surfaces offer bright radiance with considerable reflectivity and only a touch of rub. Excellent design definition with a bold "T-crack" that crosses the reverse. Population: 1 in 58, 12 finer (9/10).(#7744)

---

### Satiny 1847-O Quarter Eagle, AU58

- 4615 1847-O AU58 NGC.** Among gold pieces of this issue, the quarter eagles and eagles are plentiful, while the half eagles are major rarities. The base of the 1 is delicately recut above on this near-Mint specimen. Both sides have excellent detail with satiny green-gold luster. A small depression near star 6 is likely of mint origin. Census: 43 in 58, 30 finer (9/10). (#7747)

- 4616 1849-D VF20 PCGS. Variety 11-M.** The High Date variety, more available than 12-M although both share a mintage of only 10,945 pieces. Luminous orange-gold with steel-gray toning in protected areas. One thin mark above the hairbun. Encapsulated in an old green label holder.(#7754)

- 4617 1850-O AU53 PCGS.** This canary-yellow New Orleans quarter eagle has unmarked surfaces that retain glints of remaining luster. The borders are intricately struck, but the centers are typically impressed.(#7758)

**Sparkling 1850-O Two and a Half, MS63  
Only One Graded Finer at PCGS**

**4618 1850-O MS63 PCGS. CAC.** The mintage of the 1850-O quarter eagle is a deceptively large 84,000 pieces, but the issue is scarce in all grades and rare in Mint State. The issue is another strike-challenged O-mint issue, and most survivors saw heavy circulation as well. Due to the strike difficulties, remaining mint luster is usually the key grading criterion. This example offers bright, sparkling yellow-gold surfaces with just a tinge of green. The strike is soft on the eagle's neck, the left (facing) wing at the juncture of the shield, and the left leg. Minor abrasions consistent with the grade appear in the right obverse field and the upper reverse field. This piece, with the CAC green label, is tied with three others so certified at PCGS, and there is one finer (9/10). An elusive antebellum O-mint issue, this piece should stir some excitement when it crosses the auction block. (#7758)

**4619 1851-C—Rim Filing—NGC Details. AU. Variety 1.** The obverse rim is filed between 9:30 and 10:30, partly obscured by one of the four tabs of the NGC holder. The surfaces appear minutely granular but are free from consequential marks. A small roundish strike-through is noted on the base of Liberty's neck. (#7760)

**4620 1851-O AU58 PCGS. CAC.** Pale lemon-gold luster and great eye appeal. This near-Mint example has just a touch of rub, though moderate abrasions are present in the obverse fields. A pleasing O-mint quarter eagle. Population: 9 in 58, 14 finer (9/10). (#7762)

**4621 1854-O MS61 PCGS.** Pleasing lavender accents combine with yellow-gold patination on both sides. Faint clash marks are seen in the fields. The strike is a bit weak, which is to be expected for the grade. The 1854-O quarter eagle, however, is seldom seen in higher grades. Population: 8 in 61, 16 finer (9/10). (#7772)

**4622 1856 MS63 PCGS. CAC.** Rich orange-yellow toning confirms the originality of this lustrous and pleasantly unabraded quarter eagle. Minor incompleteness of strike on the eagle's left (facing) leg does not fully account for the conservative grade. Population: 32 in 63, 27 finer (9/10). (#7777)

**4623 1856-O AU50 PCGS.** Sharp and highly lustrous with pleasing green-gold surfaces. This issue is scarce with only a few survivors from the modest mintage of 21,100 coins. (#7780)

**Reflective Near-Mint 1856-O Quarter Eagle**

**4624 1856-O AU58 PCGS.** Remarkably reflective in the pale yellow-gold fields. Hints of lemon shine at the borders, and a small copper spot is noted below Liberty's chin. Lightly abraded throughout but with only a modicum of wear on the well struck devices. Great all-around eye appeal for this elusive O-mint quarter eagle issue. Population: 7 in 58, 2 finer (9/10). (#7780)

**4625 1857-S AU55 ANACS.** Pale yellow-gold surfaces are unusually radiant. A lightly worn example of this early S-mint issue that shows scattered abrasions and digs in the portrait area. (#7785)

**4626 1859 Old Reverse, Type One AU58 NGC. CAC.** The old reverse with thick and close arrowheads. A lustrous near-Mint piece that shows only slight friction on green-tinged golden surfaces. Census: 49 in 58, 36 finer (9/10). (#97788)

**4627 1860 New Reverse, Type Two MS62 PCGS.** Deep honey toning graces this attractive two and a half. Only stars 10 and 11 lack a sharp strike. Smooth save for a mark beneath the second T in STATES. Although the New Reverse is more available than its Old Reverse (large arrowheads) counterpart, this variety is nonetheless scarce in Mint State. Population: 10 in 62, 13 finer (9/10).  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 3189, which realized \$1,840. (#7791)*

**4628 1861 Old Reverse, Type One AU58 NGC.** The upper two arrowheads touch, indicative of the very scarce Type One reverse. As a date, the 1861 is common, but a preponderance of examples are from Type Two dies. This is a generally lustrous apricot and sea-green Civil War quarter eagle with myriad fine die polish lines, all as made. (#97794)

Select 1861 Quarter Eagle  
Rare Old Reverse Type

**4629 1861 Old Reverse MS63 PCGS. CAC.** The 1861 Liberty Head quarter eagle, struck from the Old Reverse hub, is a rare issue that was not discovered until 1976. The present coin is a well struck example, with the typical weakness on the eagle's leg. The surfaces are a lovely rose-gold color, with bright mint luster. Population: 8 in 63, 4 finer (9/10). (#97794)

**4630 1861 New Reverse, Type Two MS62 NGC.** A sharply struck canary-gold quarter eagle that has the expected small marks on the cheek and fields. With the exception of the three dollar piece, Philadelphia mintages of all gold denominations rose substantially in 1861, undoubtedly due to the onset of the Civil War. (#7794)

Near-Mint 1861-S Quarter Eagle  
One of 24,000 Pieces Struck

**4631 1861-S AU58 NGC.** Well struck for its low-mintage issue, if slightly soft on the devices, with low-key yet intense sun-gold luster that veers into orange at parts of the fields. Only modestly rubbed but with shallow pinscratches in the right obverse field. Housed in a prior-generation holder. Census: 21 in 58, 6 finer (9/10). (#7795)

Important 1862-S Quarter Eagle, AU58

**4632 1862-S AU58 PCGS.** This is one of the important San Francisco Mint quarter eagles with a low mintage of only 8,000 coins and a nearly complete circulation of that mintage, meaning that survivors are usually in lower circulated grades. Both sides are satiny with nearly full luster, and the surfaces exhibit attractive rose-gold patina with traces of delicate blue toning. Population: 4 in 58, 3 finer (9/10). (#7798)

Choice AU 1866 Quarter Eagle  
Vivid Color, Low Mintage

**4633 1866 AU55 PCGS.** The 1866 Liberty Head quarter eagle is an elusive issue, especially in high grade. Multiple layerings of olive-gold color lie over both sides of this impressive example, and tinges of orange patina are evident at certain angles. The strike is typically sharp for a product of the Philadelphia Mint, and the number of abrasions is minimal for a circulated gold coin. An important, high grade survivor from an original mintage of a mere 3,110 pieces. Population: 5 in 55, 2 finer (9/10). (#7803)

**4634 1866-S AU53 NGC.** Considerable yellow-gold luster remains in the fields, and occasional dots of coppery alloy appear near the rims. Lightly worn but well struck with few abrasions aside from a couple of digs to the left of Liberty's face. Census: 19 in 53, 49 finer (9/10). (#7804)

**4635 1867 AU55 PCGS.** A sharply struck and luminous Choice AU representative that has a few faded field marks on the reverse. One of only 3,200 pieces struck for this unheralded but difficult issue. Population: 6 in 55, 12 finer (9/10). (#7805)

**4636 1869 AU58 NGC. CAC.** Lightly rubbed but fantastically reflective in pale yellow-gold fields. A modestly marked coin that is housed in a prior-generation holder. NGC has graded just 21 Mint State examples of the date (8/10). (#7809)

Elusive 1869-S Quarter Eagle, MS61

**4637 1869-S MS61 PCGS.** Throughout the 1860s, the San Francisco Mint concentrated on the larger denominations. Quarter eagles had universally low mintages, including 29,500 coins in 1869. That Mint only produced nine more quarter eagle issues through 1879 (with none in 1874). Despite the limited production, the smaller gold denomination was obviously needed in commerce, judging from the well worn condition of most surviving pieces. This Mint State example has violet and blue toning over the yellow obverse surface, with a fully brilliant and lighter yellow reverse. Population: 7 in 61, 7 finer (9/10). (#7810)

- 4638 1870 AU55 PCGS.** The 1870 has a mintage of a mere 4,520 business strikes, since unbacked Federal paper money drove gold coins from circulation, and export payment demand was limited to the double eagle. This lightly worn example is crisply struck and lightly abraded. The margins exhibit bright luster. Population: 14 in 55, 15 finer (9/10). (#7811)
- 4639 1870 AU58 NGC.** Areas of prooflike reflectivity are evident on the surfaces of this charming near-Mint quarter eagle, from a minuscule mintage of 4,520 pieces. All design elements are sharply detailed and a shallow scratch in the obverse field near star 4 is the only mark of note. (#7811)
- 4640 1870-S AU58 NGC.** The borders glimmer with luster, and the pale peach surfaces display minimal contact. An even strike without any indistinct areas. A much better date, since only 16,000 pieces were produced. Census: 26 in 58, 12 finer (9/10). (#7812)
- 4641 1872 AU55 PCGS.** A glossy yellow-orange coin with considerable reflectivity remaining in lightly abraded fields. Only a touch of wear is noted on the highest design elements. Housed in a green label holder and a lovely representative of this low-mintage date. Population: 6 in 55, 11 finer (9/10). (#7815)

**1872-S Quarter Eagle, MS62**  
**Low-Mintage, Rare in Mint State**

- 4642 1872-S MS62 NGC.** The 1872-S quarter eagle claims a mintage of 18,000 pieces, and few examples were saved for numismatic purposes. The coin offered here displays lustrous, greenish-gold surfaces with a scattering of grade-consistent minor abrasions on both sides. The strike is sharp in most areas, but a little softness shows on the eagle's leg. Census: 3 in 62, 6 finer (9/10). (#7816)
- 4643 1875-S—Spot Removed—PCGS Genuine.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has a spot removed. Actually, the spot is still apparent at 2 o'clock on the obverse dentils. Both sides are virtually Mint State with frosty light yellow luster. Only 11,600 pieces were struck.

**Sensational 1876 Quarter Eagle, MS64**

- 4644 1876 MS64 NGC.** Just 4,176 business strikes were minted, and that production ranks as the fifth lowest mintage of any quarter eagle struck in the 1870s. Although often overshadowed by the 1875 rarity, the 1876 is an extremely important date and, when found at all, is found in lower grades. This is only the 14th Mint State example that we have offered in our auctions since January 1993 when we began our archives. Prior to the present coin, the best that crossed our desks graded just MS62. Altogether, 93 examples of this issue in our sales have an average grade of 51.

It is hard to emphasize clearly enough the importance of this issue. This near-Gem is fully brilliant with intense orange-gold luster and satiny surfaces. Only a few trivial marks on the obverse prevent an even higher grade. Census: 3 in 64, 1 finer (9/10). (#7824)

---

**1877 Liberty Head Quarter Eagle, MS62**  
**Rare, Limited Mintage Issue**

- 4645 1877 MS62 PCGS.** Paradoxically, the 1877 quarter eagle is always in demand from series enthusiasts, but the coin seems to be undervalued at current price levels. The prooflike, orange and greenish-gold surfaces of this attractive MS62 example are what might be expected of an issue with a mintage of just 1,632 pieces. All design elements are sharply rendered and only minor abrasions are evident in the fields. Population: 6 in 62, 5 finer (9/10). (#7826)

- 4646 1877-S MS63 PCGS.** Splendid peach-red and apple-green colors compete for territory across this boldly struck and lustrous representative. Faint field marks are present but appear trivial for the MS63 level. A relatively low mintage issue at only 35,400 pieces. Population: 19 in 63, 10 finer (9/10).  
*Ex: Della Collection (Heritage, 9/2006), lot 3209. (#7827)*

- 4647 1878-S MS63 PCGS.** Lustrous orange-gold surfaces exhibit peripheral accents of lime-green. The design elements are sharply impressed, and only a few minor marks on the left obverse field limit the grade. Population: 33 in 63, 10 finer (9/10).  
*Ex: Dallas Signature (Heritage, 7/2006), lot 942, which realized \$1,552.50. (#7829)*

- 4648 1880 MS62 PCGS.** A pleasing orange-gold example with good luster, uncommonly smooth surfaces, and an intricate strike. 1880 marked a return to the low mintage years that prevailed between 1863 and 1872. Only 2,960 quarter eagles were struck in 1880, and production remained at very low levels until the end of the 19th century. Population: 10 in 62, 20 finer (9/10). (#7832)

---

**1881 Quarter Eagle, MS61**  
**Only 640 Examples Minted**

- 4649 1881 MS61 PCGS.** The 1881 quarter eagle is always in demand because of its incredibly low mintage of just 640 pieces. It goes without saying that Mint State examples are very rare. The present coin exhibits prooflike surfaces, with intermingled areas of dark and light greenish-gold color. The design elements are sharply impressed and the fields show only minor abrasions. Housed in a green label holder. Population: 7 in 61, 4 finer (9/10). (#7833)

---

**Select 1882 Liberty Head Quarter Eagle**  
**Prooflike Fields**

- 4650 1882 MS63 NGC.** From a tiny mintage of 4,000 pieces, the 1882 Liberty Head quarter eagle is rare in Select Mint State condition. The present coin displays reflective, prooflike fields with pleasing orange-gold highlights. The design elements are sharply detailed, and the surfaces are lightly abraded for the grade. Census: 9 in 63, 20 finer (9/10). (#7834)

---

**1882 Quarter Eagle, MS63**  
**Prized, Low-Mintage Date**

- 4651 1882 MS63 PCGS.** With only 4,000 examples struck, the 1882 Liberty Head quarter eagle often displays areas of prooflike reflectivity, as can be seen on this coin. The design elements are crisply rendered throughout, and the lustrous surfaces exhibit yellow-gold and pale greenish coloration. Carefully preserved, free of distractions, and perhaps even conservatively graded at the Select Mint State level. Population: 8 in 63, 27 finer (9/10). (#7834)

- 4652 1883 AU55 PCGS.** Flashy rose-red luster illuminates the borders of this rare date quarter eagle. The devices are well struck and show minimal wear. A few small field marks are noted near the mouth and the TA in STATES. Just 1,920 pieces were struck. (#7835)

**4653 1884 MS62 PCGS.** This attractive quarter eagle, one of just 1,950 pieces coined, has bright luster and deeper coloration than many examples from surrounding issues. Peach-gold throughout save for a blush of cherry-red near 9 o'clock on the reverse. Karl Stecher, Sr. purchased this piece for \$6.00 from the Gutttag Bros. of New York during the 1930s. Population: 9 in 62, 15 finer (9/10).  
Ex: Stecher Collection (Heritage, 3/2007), lot 1757, which realized \$2,415. (#7836)

**4654 1886 MS62 PCGS.** A sharply struck and moderately prooflike example of this challenging date. Radiant peach-gold toning ensures the eye appeal. A scant 4,000 pieces were struck. Population: 15 in 62, 20 finer (9/10).  
Ex: Houston Signature (Heritage, 12/2008), lot 1876, which realized \$2,012.50. (#7838)

**4655 1890 MS63 PCGS.** Well struck with bright semi-prooflike fields and rich apricot-gold toning. Wispy field marks prevent a higher grade designation. Struck from a limited mintage of 8,720 pieces and scarce at all levels. Population: 29 in 63, 26 finer (9/10).  
Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 1668, which realized \$1,782.50. (#7842)

**4656 1891 MS63 PCGS.** AMERICA is nicely die doubled, as is always the case on the 10,960 business strikes of this low mintage date. This orange-gold example is lustrous, sharply struck, and well preserved except for a few faint thin obverse marks. Housed in an old green label holder. Population: 29 in 63, 34 finer (9/10).  
Ex: Central States Signature (Heritage, 5/2007), lot 3386, which realized \$1,092.50. (#7843)

#### Choice 1892 Quarter Eagle Rare, Low-Mintage Issue

**4657 1892 MS64 PCGS.** The 1892 Liberty Head quarter eagle boasts one of the lowest mintages of the later series, at 2,440 pieces. Even though a number of coins were saved by collectors, examples in Choice Mint State condition are quite rare. The present coin displays attractive greenish-gold surfaces, with vibrant mint luster, and a needle-sharp strike. Population: 16 in 64, 12 finer (9/10). (#7844)

#### Frosty 1894 Quarter Eagle, MS64

**4658 1894 MS64 PCGS. CAC.** From 1880 to 1899, quarter eagle mintages bounced around from a low of 640 business strikes in 1881 to a high of 30,000 in 1893. The 1894 quarter eagle had a rather low mintage of 4,000 coins, and survivors are infrequently seen. A splendid near-Mint example, this piece has frosty yellow and orange luster with bold design motifs. Only a few tiny marks are evident, including two small scrapes in the eagle detail on the reverse. Population: 19 in 64, 20 finer (9/10). (#7846)

**4659 1897 MS64 PCGS.** A splendid olive-green and tan-gold near-Gem. Fully struck and lustrous with a nearly pristine reverse and only inconsequential obverse grazes. A relatively low emission of 29,768 pieces, but apparently targeted by dealers of the day since better grade examples are only scarce instead of rare. (#7849)

**4660 1901 MS64 PCGS. CAC.** Impressively detailed with touches of green against the satiny yellow-gold surfaces. Just a few tiny disturbances in the portrait area preclude an even finer designation. An ideal 20th century type selection. (#7853)

**4661 1902 MS65 NGC.** The yellow and rose-gold surfaces of this delightful Gem are virtually unmarked, and the mint luster is strong and vibrant. A needle-sharp strike complements the pleasing surfaces to create outstanding eye appeal. (#7854)

**4662 1904 MS65 NGC.** The coin offered here is a splendid Gem 1904 quarter eagle, with an exquisite strike and strong, vibrant mint luster. The fields are an attractive, light greenish-gold color, and only a single scratch across Liberty's throat prevents an even higher grade. (#7856)

**4663 1905 MS65 PCGS.** Sharply struck with prominent reflectivity in the yellow-gold fields. Only a few tiny faults are scattered in the fields. A great Gem example for the type collector. (#7857)

**4664 1906 MS64+ PCGS. CAC.** Outstanding reflectivity on the yellow-gold obverse with more swirling luster on the reverse. A boldly struck and tantalizing coin that comes remarkably close to Gem status. (#7858)

**4665 1906 MS66 NGC.** Impressively detailed on the central devices. Bold lemon-yellow luster shows a few paler variations near the rims. NGC has graded just 65 numerically finer examples (9/10). (#7858)

**4666 1907 MS64 PCGS.** An attractive Choice Mint State example of this last-year type coin, the striking details are sharp on all design elements, and the yellow-gold surfaces are accented by hints of red. Only some tiny nicks on Liberty's nose prevents a higher grade. (#7859)

**4667 1907 MS64+ NGC.** 1907 was the end of the road for the Liberty quarter eagle type, which had remained nearly unchanged since its 1840 introduction. The 1907 is a common date, but examples with nearly pristine fields, such as the present well struck piece, are always in demand. (#7859)

**4668 1907 MS65 PCGS.** Splendid apple-green and lemon-gold compete for territory across this lustrous and gorgeously smooth Gem. The strike is bold, although the eagle's left (facing) leg shows slight inexactness. (#7859)

---

**Superb Gem 1907 Quarter Eagle  
Popular Last-Year Type Coin**

**4669 1907 MS67 PCGS.** Always popular with type collectors as the last date of the Liberty Head design, the 1907 quarter eagle is an available issue from a mintage of 336,294 pieces. The present coin is a spectacular Superb Gem, with blinding mint luster and a full strike. The surfaces are a bright yellow-gold color, with hints of rose. Only five coins have been certified in higher numeric grades by PCGS and NGC combined (9/10). (#7859)

---

**Amazing 1907 Quarter Eagle, MS67**

**4670 1907 MS67 PCGS. CAC.** A stunning Superb Gem executed in delicate green and yellow-gold with considerable light orange patina. Both sides are remarkably preserved with pristine surfaces. The design motifs are boldly rendered, and the overall aesthetic desirability is unexcelled. Population: 52 in 67, 1 finer (9/10). (#7859)

---

**PROOF LIBERTY QUARTER EAGLES**

**1872 Two and a Half, PR64 Deep Cameo  
Rare, Low-Mintage Issue, Only 30 Proofs Minted**

**4671 1872 PR64 Deep Cameo PCGS.** Only 30 proof quarter eagles were produced in 1872. Garrett and Guth estimate a survivorship of 12 to 18 pieces. Both PCGS and NGC have registered 20 certification events in non-Cameo, Cameo, and Deep/Ultra Cameo, which we interpret as approximately 15 individual coins extant. It has been 11 years since we have offered an 1872 proof for sale at public auction, and since we have been keeping records in 1992 we have only sold one other piece (in 1998).

As one would expect from a Deep Cameo, the fields are deeply reflective and provide a "black" background against the frosted devices. Close examination reveals a few stray hairlines and there are several tiny planchet flakes and lint marks on each side. If one were determined to trace the pedigree of this coin, it would be easiest to do by a distinctive red alloy spot just below the eagle's right (facing) claw. The finest certified as non-Cameo, Cameo, and Deep/Ultra Cameo are a trio of PR66 coins, placing this example squarely at the top of the finest proofs known from this early, low-mintage year. (#97898)

---

Splendid 1892 Quarter Eagle, PR67 Ultra Cameo  
Tied for Finest Certified

**4672 1892 PR67 Ultra Cameo NGC.** The 1892 proof quarter eagle mintage is, as Jeff Garrett and Ron Guth admit in their *Gold Encyclopedia*, “about average for the decade” at 105 coins. The 1893 proof two and a halves were produced to the extent of 106 examples, and the 1891s to the tune of 80 pieces. The present piece’s allure, however, is enhanced by three characteristics—one of them pertinent to the issue, and two to this particular piece.

The added cachet of the proof 1892 quarter eagles is a function of the meager business strike production of 2,440 coins. While some nice high-grade examples of the circulation strikes were saved, the low overall production does enhance the perception—and reality—of the date’s rarity, particularly as a high-grade proof. Garrett and Guth surmise that “almost half of the original [proof] mintage is probably still in private hands.”

The two features particular to this specific coin that set it apart from the crowd are, of course, the Superb Gem proof grade and the Ultra Cameo designation from NGC. The PR67 grade puts this piece as one of just four in this highest grade for the issue assigned at NGC, while the Ultra Cameo designation further narrows the piece down as tied with two other PR67 Ultra Cameos as the finest certified.

As might be expected from such a coin, this piece displays profound contrast between the fields and devices throughout both sides, with no singular—and no minor—distractions of any sort, simply a coin that is essentially perfect. The pronounced orange-peel texture in the fields on both sides of this splendid golden-orange piece is also typical.

Some of the Liberty Head proof gold coinage of the late 19th century is renowned for its quality and phenomenal field-device contrast, just like several issues of proof Morgan dollars from the same era. This is one such piece, destined for a fine collection and a worthy acquisition by even the pickiest numismatist. Census: 3 in 67 Ultra Cameo, 0 finer (9/10). (#97918)

---

Stunning 1895 Quarter Eagle, PR66 Ultra Cameo

- 4673 1895 PR66 Ultra Cameo NGC.** This impressive proof gold representative combines heavily contrasted fields and devices with delicate orange patina over both sides. Among the joys of cataloging for Heritage is the ability to welcome back “old friends” that we have handled before such as the present piece, a coin that is even more stunning to us than in its previous appearance. The 1895 proof quarter eagles were produced to the extent of only 119 coins, and only 6,000 business strikes complement the issue. To put that mintage figure in context, it is about one-eighth of the number of 1895 proof Morgan dollars struck. The Mint was known to produce exceptional silver dollars in the last half of the 1890s; the superior production values extend to proof gold as well, as this piece so eloquently illustrates. Census: 14 in 66 Ultra Cameo, 9 finer (9/10).

Ex: FUN Signature (Heritage, 1/2005), lot 30418, which brought \$13,800. (#97921)

---

---

1900 Quarter Eagle, PR61 Cameo  
An Affordable Proof Gold Piece

- 4674 1900 PR61 Cameo NGC.** Although the 1900 proof mintage of 205 pieces was one of the highest among the Liberty quarter eagle series (eclipsed only by the 1901 at 223 pieces), it should not be overlooked how rare this piece is in the broader scope of numismatics. Probably no more than half of the original mintage exists today in all grades. This example exhibits a number of contact marks, yet the mirrors are still notably deep and the cameo contrast still bold. This is an ideal opportunity to enter the realm of proof gold without spending multiples more on a Gem. (#87926)

---

Lovely 1901 Quarter Eagle, PR62 Cameo

- 4675 1901 PR62 Cameo NGC. CAC.** A lovely Cameo proof, this desirable example has deep yellow surfaces with fully mirrored fields and lustrous devices, imparting slight cameo contrast on each side. A few insignificant marks are visible on the devices, with myriad tiny abrasions in the fields. Census: 9 in 62 Cameo, 58 finer (9/10). (#87927)
-

1903 Quarter Eagle, PR67  
The Finest Certified by PCGS

**4676 1903 PR67 PCGS.** The 1903 is one of the more available dates as a proof in the Liberty quarter eagle series. The original mintage was 197 pieces and of that number it is believed that more than 100 still exist as recognizable proofs. However, at the PR67 level this is the finest grade obtainable. This is the only PR67 coin certified by PCGS and there are four that have been graded by NGC (9/10). This piece has distinctive surfaces. Each side has deep, even reddish-golden color. The fields lack the depth of mirroring of proofs from the 1860s through the 1890s, but there is no mistaking the special striking status of this coin. In terms of surface disturbances, the only marks we see are a couple of microscopic planchet flakes out of the field in front of the nose of Liberty, and these require a magnifier to see. Extraordinary quality. (#7929)

1906 Quarter Eagle, PR64 Cameo  
Excellent, Late-Date Type Issue

**4677 1906 PR64 Cameo PCGS. CAC.** The Mint abandoned the polishing of devices on proof gold after 1903. While a short-lived experiment, the resumption of contrasted surfaces only allowed a few short years for collectors to acquire a proof Liberty quarter eagle before Pratt's Indian design was adopted in 1908. The official mintage for the 1906 was 160 proofs, and there seems to be a higher-than-usual number of survivors for this date. This is a spectacularly deep cameo that has a slight reddish tint to the otherwise yellow-gold color. Close examination with a loupe reveals a few faint hairlines, but there are no singular contact marks worthy of mention on either side. Population: 8 in 64 Cameo, 16 finer (9/10). (#87932)

**1907 Liberty Two and a Half, PR66 Ultra Cameo  
A Spectacular Proof Striking**

- 4678 1907 PR66 Ultra Cameo NGC.** The 1907 is the final year of issue for the Liberty type. However, it is not the most frequently encountered proof date. As Akers points out, "that honor goes to the 1900 and 1901." The mintage was 154 pieces. Of that number it seems an inordinately high percentage was saved. There are obviously a high number of resubmissions for the 1907 because if the non-Cameo, Cameo, and Deep/Ultra Cameo coins are added together they exceed the mintage by more than 50 coins! This is a deeply mirrored, glassy proof that displays strongly contrasting cameo devices. The surfaces are essentially perfect. On the reverse there are two interesting small patches where the die was unpolished: to the left of the eagle's neck and just right of the D. Census: 2 in 66 Ultra Cameo, 2 finer (9/10). (#97933)

**INDIAN QUARTER EAGLES**

- 4679 1908 MS64 PCGS. CAC.** Popular as a first-year type coin, the 1908 Indian quarter eagle is reasonably available in high grades. The present coin is a sharply struck Choice example, with orange-gold surfaces and bright mint luster.  
*From The Glenwood Landing Collection. (#7939)*
- 4680 1909 MS63 NGC.** The 1909 Indian quarter eagle occupies the number three position in the rarity rankings for the series, after the famous 1911-D and the 1914. This Select Mint State example is sharply detailed, with vibrant mint luster and attractive orange-gold surfaces. (#7940)

**Near-Gem 1909 Quarter Eagle**

- 4681 1909 MS64 NGC.** This second-year Philadelphia issue is available for a price in MS64, though it becomes scarce in finer grades. The present example offers strong eye appeal for the grade, thanks to pleasing central definition and satiny luster that enlivens peach-tinged yellow-gold surfaces. (#7940)

**Lustrous 1909 Indian Quarter Eagle, MS64**

- 4682 1909 MS64 PCGS.** The Indian quarter eagles can be divided into two distinct subsets: the issues from 1908 to 1915 that are relatively scarce in higher Mint State grades, and the issues from 1925 to 1929 that are rather common in similar grades. This splendid near-Gem has bold design elements with satiny yellow-gold luster. Both sides have faint green and orange overtones. (#7940)

**1909 Indian Quarter Eagle, MS64  
Third Rarest Issue of the Series**

**4683 1909 MS64 NGC.** With its mintage of 441,760 pieces, the 1909 Indian Head quarter eagle is the third rarest issue of the series. The present coin is a well struck Choice specimen, with yellow and rose-gold surfaces, and bright mint luster. The attractive color and luster produce strong eye appeal.

*From The Glenwood Landing Collection. (#7940)*

**4684 1910 MS63 NGC. CAC.** A well struck Select Mint State example of this popular 20th century type coin, this specimen features bright mint luster and attractive yellow-gold surfaces, with hints of rose color. (#7941)

**4685 1910 MS63 NGC.** Hints of rose color highlight the light greenish-gold surfaces of this well struck Select Mint State Indian quarter eagle. Vibrant mint luster adds to the already considerable visual appeal. *From The Glenwood Landing Collection. (#7941)*

**Gem 1910 Indian Quarter Eagle  
Attractive Color, Good Mint Luster**

**4686 1910 MS65 NGC.** From a reported mintage of 492,000 pieces, the 1910 Indian quarter eagle is a better date in the early series. This pleasing Gem specimen is well struck in most areas, but it shows the die buckling near the rims that is often seen on this issue. The surfaces are an attractive rose-gold color, with strong mint luster. Only 11 coins have been certified in higher numeric grades at NGC (9/10). (#7941)

**4687 1911—Curved Clip at 3 O'Clock—AU55 NGC.** An unusual gold coin error, this piece shows a small but distinct curved clip at 3 o'clock on the obverse. Lightly worn, well struck, and attractive. (#7942)

**4688 1911 MS64 NGC.** A scarcer date in the series, the 1911 Indian quarter eagle is surprisingly elusive in grades above MS64. The present coin is an attractive Choice Mint State example, with a bold strike and lustrous, greenish-gold surfaces. (#7942)

**Key 1911-D Indian Head Quarter Eagle, XF45  
Rarest Issue of the Series**

**4689 1911-D XF45 PCGS.** The 1911-D is the rarest Indian Head quarter eagle, with a series-low mintage of 55,680 pieces. This popular key is on the wantlist of every quarter eagle specialist and its fame extends far beyond the boundaries of the Indian Head series. The present coin is a lightly worn specimen, with orange-gold surfaces and strong, if slightly subdued, mint luster. The devices, including the mintmark, are strongly impressed. (#7943)

**AU Sharpness 1911-D Quarter Eagle**

**4690 1911-D—Improperly Cleaned—NGC Details. AU.** The key status of the 1911-D quarter eagle makes it a prized commodity regardless of condition. While this lightly worn example was cleaned in the past, leaving the pale canary-yellow surfaces oddly bright, its strong design definition gives it redeeming eye appeal. An edge scrape is noted near 10 o'clock on the obverse. (#7943)

**1911-D Quarter Eagle, AU Details  
High-Demand, Series Key**

- 4691 1911-D—Improperly Cleaned—NGC Details. AU.** Prized by collectors as the rarest Indian Head quarter eagle, any example of the 1911-D is a valuable, high-demand coin. The coin offered here is a sharply detailed specimen, with yellow-gold surfaces, graced by shades of rose color. The surfaces are perhaps unnaturally bright, a result of the cleaning noted on the holder. (#7943)

**1911-D Indian Head Quarter Eagle, AU53  
Sharply Struck Key**

- 4692 1911-D AU53 ANACS.** The 1911-D Indian Head quarter eagle is the acknowledged key to the series. Any example of this date is a valuable, sought-after coin that will inspire intense competition among series enthusiasts. The present coin is a sharply detailed piece, with attractive rose-gold surfaces and satiny mint luster. (#7943)

**Popular Choice AU 1911-D Quarter Eagle**

- 4693 1911-D AU55 NGC.** A briefly circulated example of the popular key date, yellow-orange with greenish overtones in parts of the fields and aspects of rose along the bottom of the reverse. Minimally abraded aside from a small mark to the left of the mouth, and a thoroughly pleasing coin that could be added to an otherwise Mint State set. (#7943)

**Bold 1911-D Quarter Eagle, AU55**

- 4694 1911-D AU55 NGC.** Although lightly worn, this piece has excellent design definition on both sides, including a bold mintmark that is visible without a glass. Both sides have satiny surfaces with lemon-yellow color. An attractive example and a desirable issue in the Indian quarter eagle series. (#7943)

**Striking AU58+ 1911-D Quarter Eagle**

- 4695 1911-D AU58+ NGC. CAC.** The concept of a "slider" made real, this is a wonderful near-Mint coin that shows just a touch too much unambiguous rub to get a fully Mint State designation. Pale yellow-gold luster occupies the centers, while the margins show deeper orange hues with reddish overtones around the upper obverse. (#7943)

**1911-D Indian Head Quarter Eagle, Unc Details**

- 4696 1911-D—Improperly Cleaned—NGC Details. Unc.** Always in demand as the key to the Indian Head quarter eagle series, the 1911-D has a devoted following among series aficionados. The present coin displays sharply detailed design elements, with greenish-gold surfaces and attractive hints of red color. The mint luster is perhaps a little too bright as a result of the noted cleaning, but it does seem attractive nonetheless.

1911-D Quarter Eagle, MS63  
Clean and Sharply Struck

**4697 1911-D MS63 NGC. CAC.** The 1911-D quarter eagle, key to the Indian Head series, has such a unique surface texture that seasoned numismatists often can spot examples without looking at the date and mintmark. The luster has a granular quality that is generally coarser than that found on the 1914-D quarter eagle. Mike Fuljenz, in the recently released (2010) *Indian Gold Coins of the 20th Century*, calls the luster “a combination of granular and frosty.” The strike is usually excellent on the issue. Most examples tend to the orange-gold or yellow-gold range of the spectrum; greenish-gold examples are seen less often. (This piece tends more to the orange-gold end of the color spectrum.) The wire rim from 1 to 5 o’clock on the obverse is diagnostic, and some examples show a weak mintmark. The mintmark on this piece is strong and easily seen without a loupe, and the wire rim on the obverse is especially pronounced. Numerous small abrasions are scattered over each side, but none are singularly notable. (#7943)

Select 1911-D Quarter Eagle  
Sparkling and Sharply Struck

**4698 1911-D MS63 NGC.** The 1911-D is the undisputed key to the Indian Head quarter eagle series, and one of only three mintmarked quarter eagles in the entire series along with the 1914-D and 1925-D. The San Francisco Mint never produced an Indian Head quarter eagle in the 22-year series run. The 1911-D, with its low mintage of only 55,680 coins, is *foundationally rare*, or rare in all grades. But the 1914-D quarter eagle, with a larger mintage of 448,000 coins, is *conditionally rare*: common in circulated grades, but rarer than the 1911-D *only* in the higher Mint State levels (at or above MS65). Interestingly, the last D-mint issue, the 1925-D, is collected as one of the four type issues, along with the 1926-28 Philadelphia strikes. This is a remarkably attractive piece, especially for the grade. The surfaces lack the larger abrasions that usually explain an MS63 coin. The mint luster is softly frosted and unbroken over the high points of the design.  
*From The Glenwood Landing Collection. (#7943)*

**4699 1912 MS63 NGC.** Boldly struck with intense apricot-gold coloration and shimmering mint luster. A couple of small marks are detected on the upper right reverse, including one just behind the eagle's head. *From The Glenwood Landing Collection.* (#7944)

**4700 1912 MS64 PCGS. CAC.** The 1912 Indian quarter eagle is an underrated date in the series in high grade. The present coin is a charming Choice Mint State example, with sharply detailed design elements and lustrous orange-gold surfaces. (#7944)

#### Near-Gem 1912 Quarter Eagle

**4701 1912 MS64 NGC.** Soft but pleasing yellow-orange luster flickers across each side of this Choice 1912 quarter eagle. The strike is crisp, particularly on the pendants, and aside from a few peripheral marks, the surfaces are well-preserved. This date is elusive any finer, with just 55 such pieces certified by NGC (9/10). (#7944)

**4702 1912 MS64+ PCGS. CAC.** A beautiful Choice Indian gold type coin that exhibits a sharp strike and an unmarked appearance. Sun-gold overall with glimpses of apple-green on the portrait and obverse margin. (#7944)

**4703 1913 MS64 PCGS.** Strong yellow-gold luster with sun-gold elements close to the edges. A crisply struck near-Gem with remarkable definition on the pendants in the necklace. (#7945)

**4704 1913 MS64+ PCGS. CAC.** Slightly satiny with an impressive overall appearance. Boldly struck and carefully preserved, remarkably close to Gem quality. PCGS has graded just 92 numerically finer pieces (9/10). (#7945)

**4705 1914 MS62 PCGS.** A sharply struck example of the second rarest date in the series, this delightful MS62 1914 Indian quarter eagle possesses vibrant mint luster and pale rose-gold surfaces. Eye appeal is outstanding. (#7946)

**4706 1914 MS62 PCGS.** This highly lustrous and frosty lemon-yellow example features traces of pale blue-green patina. The design features on both sides are sharply detailed. A few tiny reverse marks prevent a higher grade. *From The Glenwood Landing Collection.* (#7946)

**4707 1914-D MS63 PCGS. CAC.** From a mintage of 448,000 pieces, the 1914-D Indian quarter eagle is the rarest coin in the series in high grade. This example is an impressive Select specimen, with a sharp strike and lustrous, rose-gold surfaces. (#7947)

#### Lustrous MS64 1914-D Quarter Eagle

**4708 1914-D MS64 PCGS.** MS64 is the limit of availability for most collectors seeking a 1914-D quarter eagle, as PCGS has graded only 39 coins finer (9/10). This example offers great eye appeal for the near-Gem level, thanks to a solid strike and impressive wheat-gold luster. Just a few wispy marks keep the piece from an even finer designation. (#7947)

#### Exceptional 1914-D Quarter Eagle, MS64

**4709 1914-D MS64 NGC. CAC.** The second of just three Denver Mint Indian quarter eagles, and also the second rarest of the three issues. This Choice Mint State piece is frosty and highly lustrous with rich honey-gold surfaces and exceptional eye appeal. NGC has only certified 36 finer pieces (9/10). (#7947)

#### Choice 1914-D Quarter Eagle Rare Date in Higher Grades

**4710 1914-D MS64 NGC.** The 1914-D Indian quarter eagle is a prime condition rarity in the series, and the supply of available example falls off dramatically above the MS64 level. The quality of the well struck MS64 coin offered here would be difficult to improve upon. The surfaces are an attractive green and rose-gold color, and the mint luster is bright and inviting. *From The Glenwood Landing Collection.* (#7947)

**4711 1915 MS64 PCGS. CAC.** Strong yellow-gold luster is generally light, though deeper color appears in a crescent along the right obverse and a copper spot is noted at the left side of the G in GOD. Well struck save for the lower obverse. PCGS has graded 99 numerically finer examples (9/10). (#7948)

- 4712 1915 MS64 PCGS. CAC.** The 1915 Indian quarter eagle is easily located in high grade, making it a favorite choice for type collectors. The present coin is a well struck near-Gem, with greenish-gold surfaces and bright mint luster. (#7948)
- 4713 1915 MS64+ PCGS. CAC.** An exemplary example whose gently shimmering green-gold fields and devices are practically free from contact. The strike is uncommonly sharp for the type, with virtually complete detail within the headdress. (#7948)
- 4714 1925-D MS64 NGC.** The 1925-D Indian quarter eagle claims a mintage of 578,000 pieces, and the date is a popular choice for mintmark type collectors. This Choice Mint State specimen is well struck, with just a touch of softness on the headdress feathers. The lustrous surfaces are a pale rose-gold color. (#7949)
- 4715 1925-D MS64 ANACS.** This Choice Mint State Indian quarter eagle is boldly defined with brilliant light yellow surfaces and exquisite, frosty luster. Splashes of deeper yellow appear within the devices. (#7949)
- 4716 1925-D MS65 NGC.** The surfaces of this exciting Gem quarter eagle are an enticing yellow-gold color, with strong hints of red. The strike is a little soft on the headdress feathers and the eagle's leg, as almost always seen on this date. Visual appeal is quite strong. (#7949)
- 4717 1925-D MS65 NGC.** Rich butter-yellow luster with aspects of orange. This well struck Gem hails from the final Denver quarter eagle issue. NGC has graded just 43 numerically finer examples (9/10). (#7949)
- 4718 1926 MS64 PCGS. CAC.** Crisply detailed with yellow-orange color on each side, closer to the former on the obverse with more of the latter on the reverse. Great eye appeal for the near-Gem designation and technically solid as well. (#7950)
- 4719 1926 MS64 PCGS.** A lovely rose-gold example of this available 20th century type coin, this Choice Mint State 1926 Indian quarter eagle is sharply struck, with vibrant, frosty mint luster. Eye appeal is outstanding. (#7950)
- 4720 1927 MS64 PCGS.** Sharply struck on the necklace and other, more central details. Rich yellow-gold luster with few obverse abrasions, though the reverse fields show a number of shallow marks. (#7951)
- 4721 1928 MS64 NGC.** A well struck example of this penultimate date in the series, this Choice Mint State specimen possesses vibrant mint luster and pleasing orange-gold surfaces. Visual appeal is quite strong. (#7952)

**1928 Indian Quarter Eagle, MS65  
Better Date in High Grade**

- 4722 1928 MS65 PCGS.** From a mintage of 416,000 pieces, the 1928 Indian quarter eagle is one of the scarcer dates in the later series. Coins at the Gem level can be located with patience, but any finer grade is quite rare. The present coin is a sharply struck Gem, with rose-gold surfaces and vibrant mint luster. Only 10 coins have been certified in higher numeric grades at PCGS (9/10). (#7952)

**PROOF INDIAN QUARTER EAGLE**

**First-Year Matte PR67 1908 Quarter Eagle**

- 4723 1908 PR67 NGC.** Although unpopular in their day, the matte proof gold coins by Bela Pratt and Augustus Saint-Gaudens are treasured rarities today. First-year proof gold issues, such as the present Superb Gem proof 1908 quarter eagle, have added cachet, with particular appeal to type collectors, who use them to delineate the changes in coinage design. Although most 1908 quarter eagles with original surfaces have a deep, dark brownish color, this piece is somewhat lighter in hue than is the norm, with more of a sandy-brown appearance. Note the razor-sharp strike throughout, and the partial wire rim visible even in the slab at the right obverse and left reverse margins. Census: 26 in 67, 0 finer (9/10). (#7957)

## THREE DOLLAR GOLD PIECES

- 4724 1854 AU53 NGC.** A lightly worn example of this first-year three dollar gold issue, still-lustrous and suitable for a type collector. The green-tinged yellow-gold fields show few significant abrasions. (#7969)
- 4725 1854 AU58 PCGS.** A pleasing apricot-gold Borderline Uncirculated example of the single-year Small Letters subtype. Liberty's cheek and hair show light wear, but considerable luster beckons from the wreath and legends. *From The Diotte Collection.* (#7969)
- 4726 1854—Reverse Damage—NGC Details. Unc.** Upon initial inspection, this appears to be a lustrous and problem-free Mint State example from the first year of this scarce type. Close study locates a cluster of small bright marks near 9:30 on the reverse, but many collectors will nonetheless be pleased. (#7969)

### Important 1854-O Three Dollar Gold Piece, AU50

- 4727 1854-O AU50 NGC.** The only New Orleans Mint three dollar gold piece had a mintage of 24,000 coins, a relatively large total for the denomination, but a low mintage when all gold denominations are considered. This piece has pleasing green-gold surfaces with trivial grade-consistent marks. (#7971)

### Popular 1854-O Three, AU50

- 4728 1854-O AU50 NGC.** The New Orleans Mint produced silver and gold coins from 1838 to 1861, and again from 1879 to 1909. Among those issues was the 1854-O three dollar gold piece, minted during the first year of the denomination and the only New Orleans Mint three dollar gold piece ever coined. This piece has satiny light yellow surfaces with peripheral luster on both sides. (#7971)
- 4729 1855 XF45 NGC.** Ample luster emerges from the legends and wreath. There is a whisper of struck-in grease above the headdress. The large DOLLARS subtype was introduced in 1855, and lasted through the remainder of the series. *From The Diotte Collection.* (#7972)

### Lustrous 1855 Three, MS62

- 4730 1855 MS62 PCGS. CAC.** With a mintage of just over 50,000 coins, the 1855 three is one of the readily available dates, if any three dollar gold piece can be called that. This example is fully lustrous with brilliant and frosty yellow surfaces. It is a remarkable piece destined for a fine cabinet of these coins. (#7972)
- 4731 1856 AU50 PCGS.** The appealing orange-gold surfaces of this piece are lustrous and lightly abraded for the grade. Slight wear shows on the hair and plumes on the obverse, and on the ribbon bow on the reverse, but much original detail remains undisturbed. (#7974)

### 1856-S Three Dollar Gold Piece, AU53

- 4732 1856-S AU53 NGC. Medium S.** A mintage of 34,500 three dollar gold pieces was accomplished at the San Francisco Mint in 1856, with most examples released into circulation at the time of issue, and virtually none saved by collectors. The present coin displays pleasing greenish-gold surfaces, with hints of rose and turquoise color. The strike is a little soft on the central devices, but little actual wear is detected and much original mint luster is still evident. (#7975)
- 4733 1858—Cleaned—ANACS. AU50 Details.** A well struck example of this low-mintage three dollar gold issue with minor wear on the devices. Lightly abraded lemon-yellow surfaces show the effects of a past cleaning, though snatches of original luster appear in the protected areas. (#7978)

---

**Scarce 1861 Three Dollar Gold Piece, AU55**

- 4734 1861 AU55 NGC.** With a total mintage of 5,959 business strikes, the 1861 is classified as a scarce three dollar gold piece that is usually found in XF or low AU grades. This pleasing piece is slightly finer than the norm, with satiny yellow-gold luster and scattered, inconsequential surface marks expected at the grade level. (#7982)

---

**1863 Three Dollar Gold Piece, AU53  
Scarce Civil War Issue**

- 4735 1863 AU53 PCGS.** From a mintage of only 5,000 pieces, the 1863 three dollar gold piece is a scarce Civil War issue. The present coin is well detailed, with the slightest touches of wear evident on the high points of the design. The fields are a light orange-gold color, with much original mint luster remaining. Population: 15 in 53, 80 finer (9/10). (#7984)

---

**Near-Mint 1863 Three Dollar Gold  
Only 5,000 Pieces Minted**

- 4736 1863 AU58 NGC.** From a modest mintage of 5,000 pieces, the 1863 three dollar gold piece is a scarce Civil War issue. The present coin is an attractive near-Mint example, with pleasing greenish-gold surfaces and semiprooflike fields. The devices are well detailed, with traces of light wear on the high points of the design. Census: 71 in 58, 49 finer (9/10). (#7984)

---

**Impressive 1866 Three Dollar, MS61**

- 4737 1866 MS61 PCGS.** While the Civil War was over, reconstruction was just underway, and with it continued the hoarding of all coins, especially those of gold and silver. The result of the hoarding was continued low mintages for smaller gold coins. Only the double eagles seemed exempt from that rule. Total production for the five smaller gold denominations at Philadelphia was less than \$100,000 face value, including \$12,000 in three dollar pieces. This survivor from that 4,000 coin mintage has satiny light yellow luster with a few trivial, scattered marks on each side. It has few peers or finer pieces. Population: 8 in 61, 27 finer (9/10). (#7987)

- 4738 1870 XF45 PCGS.** Peach-gold and mint-green interact over both sides and give this Choice XF three dollar pleasing eye appeal. A minimally abraded coin in a very collectible grade. (#7991)

- 4739 1874—Improperly Cleaned—NGC Details. AU.** The obverse is noticeably prooflike, with the reflectivity perhaps aided by a relatively mild cleaning. The reverse displays cartwheel sheen. Substantial luster remains, but light wear is evident on Liberty's eyebrow and the left border of her hair. (#7998)

- 4740 1874 AU55 NGC.** A lightly circulated Choice AU gold type coin with ample pumpkin-gold luster in protected regions. Refreshingly unabraded save for a thin mark or two near DOLLARS. (#7998)

- 4741 1878 AU58 NGC.** Lightly rubbed on the high points, but the luster in the yellow-gold fields is virtually intact. An attractive selection for the type collector who wants an appealing alternative to a Mint State survivor. (#8000)

- 4742 1878—Improperly Cleaned—NGC Details. Unc.** A softly struck example of this popular type issue. No trace of wear, though the surfaces have subdued and disturbed yellow-gold luster from a past cleaning. (#8000)

- 4743 1878—Obverse Damage—NGC Details. Unc.** The cheek has four or five pinpoint digs, and a thin vertical scratch affects the upright of the 7 in the date. All of these marks have been strictly assessed by NGC to qualify as "damage." A lustrous example that has smooth fields and attractive eye appeal despite the aforementioned abrasions. (#8000)

---

#### Choice 1878 Three Dollar Gold Piece

- 4744 1878 MS64 PCGS.** More than 82,000 of these 1878 three dollar gold pieces were minted, a production total that was exceeded only by the 1854 debut issue. Therefore, the date is popular among type collectors. This near-Gem has fully lustrous yellow surfaces with wisps of light orange patina on both sides. Slight design weakness is evident at the upper obverse and lower reverse, but all other aspects of this piece are exceptional. (#8000)

---

#### Satiny 1879 Three Dollar Gold Piece, MS64

- 4745 1879 MS64 PCGS. CAC.** Here is a rare issue with a mintage of 3,000 business strikes and a survival rate lower than several dates from the following decade. This Choice Mint State piece has satiny luster with full reflectivity on both sides. Light cameo contrast is evident with a few trivial, grade-limiting marks on each side. PCGS has only certified 38 finer examples (9/10). (#8001)

---

#### Pleasing 1882 Three Dollar Gold Piece, MS60

- 4746 1882 MS60 NGC.** This pleasing Mint State piece represents the 1882 three, an issue with a business strike mintage of only 1,500 pieces. Both sides have reflective light yellow surfaces with a few scattered but entirely trivial surface marks. No individual marks of any significance are visible on either side. (#8004)

---

#### 1882 Three Dollar Gold , AU58 Prooflike Popular Low-Mintage Date

- 4747 1882 AU58 Prooflike NGC.** A meager mintage of 1,500 three dollar gold pieces was achieved in 1882, and the date has always been popular with numismatists. The present coin is an attractive near-Mint specimen, with reflective prooflike surfaces. The imperfect numeral 2 in the date establishes this piece as a business strike. The devices are sharply rendered, and eye appeal is quite strong. Census: 3 in 58 Prooflike, 19 finer (9/10). (#78004)

---

#### Prized 1886 Three Dollar Gold Piece, MS61

- 4748 1886 MS61 PCGS.** Slightly prooflike surfaces are evident with satiny devices on light yellow surfaces. A few minuscule surface marks and scratches can be seen on each side, consistent with the lower Mint State grade of this scarce issue. Just 1,000 business strikes were minted, and survivors in any grade are prized. Population: 12 in 61, 30 finer (9/10). (#8008)

---

#### Lovely MS62 1888 Three Dollar

- 4749 1888 MS62 NGC.** A pleasingly detailed example of this penultimate three dollar gold issue with gorgeous honey overtones to the luster. Mildly reflective with a number of wispy and ultimately grade-defining abrasions, yet the eye appeal is considerable. One of just 5,000 business strikes produced. (#8010)

## PROOF THREE DOLLAR GOLD PIECE

1885 Three Dollar, PR62

Uncommon as a Proof, Only 109 Pieces Produced

- 4750 1885 PR62 PCGS.** The 1885 has a relatively high mintage of proofs with 109 pieces, but that should be understood in the context of this rare series. Few proof three dollar gold pieces are known of any date in any grade. The Garrett-Guth gold reference states "Proofs have noticeable recutting on the 3 ..." What we see on this piece is not recutting, but an outline of the entire 3 from a number punch that was sunk too deeply into the die, the same effect as the so-called Longacre Doubling seen on gold dollars from the 1850s. In addition to uncommonly deep mirroring on each side, the fields also show a slight orange-peel texture, an effect seen on many, if not most, proof gold coins from the 1870s through the 1890s. Each side is slightly hazy and there is a slight accent of peripheral reddish patina. Light hairlines and a few small contact marks account for the grade. (#8049)

## EARLY HALF EAGLES

1795 Capped Bust Right Half Eagle, VF Details

First Year of Denomination, Scarce BD-1 Variety

- 4751 1795—Mount Removed, Damaged—NGC Details. VF. Small Eagle, Breen-6412, BD-1, R.5..** The tiny mintage of 8,707 half eagles in 1795 represents the first coinage of this denomination produced at the U.S. Mint. The present coin is an example of the scarce BD-1 variety, with star 1 penetrating the curl, and star 11 distant from Y in LIBERTY. John Dannreuther estimates only 40-50 examples of the BD-1 variety survive today in all grades. Slight rim damage indicates this example was used as a jewelry piece, and the surfaces are unnaturally bright and granular. With all the listed faults, the coin is still a genuine example of a scarce variety of this first-year type coin. (#8066)

1795 Capped Bust Right Half Eagle, AU Details  
First Year of Gold Coinage, BD-3

- 4752 1795—Damaged—NGC Details. AU. Small Eagle, Breen-6412, BD-3, High R.3.** The year 1795 saw the first production of half eagles at the Philadelphia Mint, with a reported mintage of 8,707 pieces. Two major design types were struck during the year, one with the Small Eagle reverse and the other with the Heraldic Eagle reverse. There are 12 die varieties known for the Small Eagle reverse, with the present coin representing the relatively available BD-3 variety, characterized by the position of star 11 joining both the Y in LIBERTY and star 12 on the obverse, and the position of the leaf end under I in UNITED on the reverse. John Dannreuther believes the BD-3 variety accounts for 2,000-3,000 pieces of the original mintage, with perhaps 175-225 examples surviving today.

The present coin displays bright greenish-gold surfaces, with sharply detailed devices, and strong mint luster. Several rim bumps, the most serious at 6 o'clock and 8 o'clock on the obverse, and a short, deep scratch on the truncation of the bust are the mentionable flaws on this otherwise attractive early gold piece.

**1795 Half Eagle, AU53  
First U.S. Gold Coin Issue, BD-3**

**4753 1795 Small Eagle AU53 PCGS. CAC. Breen-6412, BD-3, High R.3.** The 1795 Capped Bust Right half eagle boasts a tiny mintage of 8,707 pieces. Three varieties of this date are known with the Heraldic Eagle reverse, but it is believed they were actually struck at a later date, using leftover obverse dies. Twelve different 1795 Small Eagle varieties exist, but the BD-3 is promptly attributed by short vertical die lines above TE in UNITED. Ample luster outlines the legends and devices of this piece, and although the design elements have light highpoint rub, the only abrasion that is even remotely worthy of mention is a short pinscratch below the right (facing) wing. The 1795 Small Eagle has significant historical importance, since it was the first gold coin issue produced by the U.S. Mint. (#8066)

**4754 1799 Small Stars Reverse—Mount Removed, Damaged—NGC Details. VF. Breen-6434, BD-2, High R.5.** Bass Dannreuther Die State b/e with a radial die crack through the left (facing) claw. A mount at 12 o'clock was removed, with slight loss of metal on the edge and traces of solder on the denticles. Bright from a thorough cleaning, and inundated with tiny marks typical of jewelry use and storage. The obverse has a few moderate pinscratches. (#8081)

**Breen-6438, BD-5 1800 Half Eagle**

**4755 1800 Genuine PCGS. Breen-6438, BD-5, High R.3.** The PCGS number ending in .82 suggests Filed Rims as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this piece has the details of an AU specimen that has filed rims and has been repaired and cleaned. Yellow-gold surfaces are unnaturally bright, and an area on Liberty's cheek has been smoothed out. Yet these flaws, even combined with the rim filing, have left the piece with considerable eye appeal. (#8082)

**Extremely Rare BD-4 1802/1 Five**

**4756 1802/1 Genuine PCGS. Breen-6440, BD-4, R.7.** Bass-Dannreuther Die State c/b. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that is ex-jewelry and has been damaged and polished. Silver-colored solder is obvious at 12, 3, and 9 o'clock on the reverse, where the piece was once affixed to jewelry. Bright from polishing, and the obverse field displays moderate marks. An extremely rare variety; the Bass-Dannreuther reference states 10 to 12 known. (#8083)

**1802/1 Half Eagle, XF Details  
Very Rare BD-4 Variety**

**4757 1802/1—Mount Removed—NGC Details. XF. Breen-6440, BD-4, R.7.** A substantial total of 53,176 Capped Bust Right half eagles was minted in 1802, all using overdated dies from 1801. Eight die varieties are known for the date, with the present coin representing the very rare BD-4 variety, with the 2 free of the bust and the arrows on the reverse extending only to the middle of N in UNITED. The BD-4 variety probably accounts for only 1,500-2,000 pieces of the original mintage, and John Dannreuther estimates no more than 10-12 examples survive today in all grades. The present coin shows rim damage consistent with the removal of a mount, but the pleasing greenish-gold surfaces are lightly worn and lightly abraded. Much original detail and mint luster has been retained on this very rare early half eagle. (#8083)

---

**Lustrous 1806 BD-6 Half Eagle, AU55**

**4758** 1806 Round Top 6, 7x6 Stars AU55 PCGS. Breen-6448, BD-6, R.2. The only Round-Top 6 variety, the BD-6 is far the most available early half eagle of the type, with examples available in nearly any desired grade. Pieces that grade AU55 or AU58 are especially desirable, as they provide nearly the same appearance of a Mint State specimen at a considerable savings. This lovely greenish-gold half eagle has nearly full luster with minor surface marks that are expected for the grade. It is a delightful and attractive representative of the date and type. (#8089)

**4759** 1807 Bust Right—Plugged—NGC Details. VF. Breen-6450, BD-2, R.5. Bass-Dannreuther Die State d/a without the prominent cud over the E in LIBERTY. A large round plug at 10:30 affects the top of Liberty's cap and the U in UNITED. Those two design elements are re-engraved, along with the eagle's arrows and left (facing) claw. The coin is whizzed throughout and harshly cleaned. A brief scratch is noted near the right wingtip, and the reverse has a minor rim bruise over the E in AMERICA.

---

**Elusive BD-6 1807 Bust Right Five Dollar Sharpness of AU**

**4760** 1807 Bust Right—Obverse Scratched—NGC Details. AU. Breen-6452, BD-6, High R.4. The obverse, diagnostic for the variety, is distinguished by the closeness between the 1 and 8 in the date and the Y in LIBERTY and the nearest star. Yellow-gold surfaces offer sharp radiance, and while the obverse shows a number of scratches, the reverse has a comparatively clean appearance. (#8092)

---

**Bust Right BD-4 1807 Five Dollar, AU55**

**4761** 1807 Bust Right AU55 NGC. Breen-6450, BD-4, High R.4. This is the first of three uses for this large stars reverse die. Appealing sun-gold patina graces the lustrous surfaces of this Choice AU specimen. Several shallow scratches are noted on the bust of Liberty, while the center of the reverse has some mint-made adjustment marks. The centers are softly defined, as often seen. (#8092)

---

**Amazing 1807 Bust Left Five Dollar Breen-6453, BD-8, MS64**

**4762** 1807 Bust Left MS64 NGC. Breen-6453, BD-8, R.2. Bass-Dannreuther Die State c/a, with the obverse lapped from its last BD-7 appearance and the reverse still fresh. The BD-8 is the more available of two first-year Capped Bust Left half eagle die pairs, as the BD-7 is rare regardless of grade. Bass and Dannreuther describes the BD-8 as "among the most available of all varieties of early gold coins," so it comes as little surprise that it is popular with today's type collectors.

This is a magnificent near-Gem example, lustrous green-gold with scattered orange overtones. Well-defined devices show only a handful of post-striking abrasions. The lower left obverse shows adjustment marks, and a small planchet void is noted between the right wingtip and the first A in AMERICA. (#8101)

---

### Challenging 1808/7 BD-2 Half Eagle, MS61

- 4763 1808/7 MS61 NGC. Breen-6455, BD-2, High R.4.** The upper crossbar of the 7 is obvious within the upper loop of the final 8 in the date. Part of the shaft of the 7 is also visible inside the lower left loop of the 8, and there is no sign of the 7 outside of the 8, unlike with the BD-1 that shares the same reverse die. Those enterprising numismatists who collect by die variety also look for the tiny incuse circle on the obverse center, as made and an artifact of the die's production. There are two die marriages for the 1808/7, but since BD-1 is rare, those who collect by *Guide Book* variety usually obtain an example of BD-2.

This sun-gold piece is well defined aside from minor strike bluntness on the lower left quadrant of the eagle's neck. A thin mark reaches the middle arrowhead, but the overall appearance is blemish-free. A challenging issue, particularly when compared with its 1807 predecessor. Census: 13 in 61, 12 finer (9/10). (#8103)

---

- 4764 1810 Large Date, Large 5—Mount Removed—NGC Details. XF. Breen-6459, BD-4, R.2.** Rim filing and re-engraved reeding at 11:30 indicates a removed mount. Both sides are bright from cleaning, and myriad small marks suggests a stint as jewelry. The reverse has a rim ding at 9 o'clock, and a thin horizontal scratch crosses the cap. (#8108)

- 4765 1811 Small 5—Mount Removed, Reverse Damaged—NGC Details. XF. Breen-6464, BD-2, R.3.** The reverse was apparently once affixed to jewelry. There is no sign of a bend, but the reverse displays substantial remaining mount material, which appears to have been a gold alloy instead of the usual white metal. The coin has been cleaned, and the obverse has a rim ding at 9 o'clock and is tooled beneath the 11 in the date.
- 

### 1811 Capped Bust Left Half Eagle, MS62 Scarce Small 5, BD-2 Example

- 4766 1811 Small 5 MS62 PCGS. Breen-6464, BD-2, R.3.** Half eagles were struck in large numbers in 1811, with a reported mintage of 99,581 pieces. The dies were fairly robust, and only two varieties are known for the date. This coin represents the slightly more available BD-2 variety, with the small 5 in the denomination. This numeral punch had been used on different dies in 1810. The BD-2 die marriage probably accounts for 35,000-50,000 pieces of the original mintage, and John Dannreuther estimates a surviving population of 225-300 examples today in all grades.

The present coin is an attractive MS62 specimen, with well detailed devices and bright mint luster. The surfaces are a pleasing greenish-gold color, with accents of turquoise and rose color. Population: 30 in 62, 53 finer (9/10). (#8109)

---

**4767** 1813—Damaged, Cleaned—NGC Details. VF. Breen-6467, BD-1, R.2. A harshly cleaned and somewhat granular orange-yellow representative of the scarce Capped Head Left type. The obverse rim is lightly filed, but there are no rim dings or individually significant marks. (#8116)

**AU Sharpness 1813 Half Eagle, BD-1**

**4768** 1813—Repaired, Whizzed—NGC Details. AU. BD-1, R.2. The 1813 half eagle is among the more popular dates for early gold type collectors, thanks to the BD-1 variety, which is less scarce than most of its peers. This is a lightly rubbed but crisply detailed example, bright from whizzing and repaired in the fields above the eagle's head, yet readily collectible. (#8116)

**1813 Capped Bust Left Half Eagle, MS61  
Scarce BD-2 Variety**

**4769** 1813 MS61 PCGS. Breen-6467, BD-2, R.4. The 1813 Capped Bust Left half eagle was produced in large numbers, with a reported mintage of 95,428 pieces. There are two die varieties known for the date, with this coin representing the scarcer BD-2 variety, identified by the position of the first S in STATES almost centered over E in the ribbon. The BD-2 die marriage probably accounts for 15,000-25,000 pieces of the original mintage, and John Dannreuther estimates a surviving population of 150-200 examples in all grades. The issue was once considered very rare, but it has appeared with greater frequency in recent years.

The present coin is an attractive MS61 example, with lustrous, yellow-gold surfaces, accented by strong shades of rose color. The design elements are sharply detailed, with just a touch of softness showing on the eagle's talons. A scattering of minor abrasions, the most prominent on Liberty's mouth and neck, is consistent with the grade. (#8116)

## CLASSIC HALF EAGLES

- 4770** 1834 Plain 4 AU53 NGC. CAC. Second Head, Breen-6502, McCloskey 2-A, R.1. This charming and undisturbed green-gold Classic half eagle type coin has a good strike, with incompleteness limited to the forehead curls and the vertical shield lines. No marks are remotely consequential. (#8171)
- 4771** 1834 Plain 4—Improperly Cleaned—NGC Details. Unc. Second Head, Breen-6502, McCloskey 2-A, R.1. The obverse with triple-punched 4 in the date. Softly struck but with no trace of wear. The pale yellow-gold fields have subdued luster with oddly textured surfaces from a past cleaning. (#8171)

### McCloskey 2-B 1838 Half Eagle, MS62

- 4772** 1838 MS62 NGC. Small Arrows, Large 5, Breen-6515, McCloskey 2-B, R.2. Ex: S.S. New York. A boldly struck Classic Head half eagle with considerable reflectivity in the pale yellow-gold luster. Lightly abraded throughout but with considerable eye appeal, a piece particularly suited to a similarly graded type collection. NGC has graded 15 numerically finer examples (9/10). From *The Glenwood Landing Collection*. (#8176)
- 4773** 1838-D—Improperly Cleaned—NGC Details. Unc. McCloskey 1-A, R.3. The reverse has faint peripheral die cracks through the tops of some letters. Only one die marriage is known for the 1838-D half eagles, and that single die pair was used to coin 20,583 half eagles, the entire Dahlonega gold coin production of the year. That production used just under 2,500 ounces of gold, probably all mined in the region. Although it has been cleaned, this satiny Mint State piece has decided green coloration with faint reflectivity on both sides. The design elements are boldly detailed. An excellent example for the advanced collector. (#8178)

## LIBERTY HALF EAGLES

### Important AU 1839-D Five Dollar

- 4774** 1839-D AU50 NGC. Variety 2-A. The mintmark-on-obverse subtype of Southern gold enjoys remarkable popularity, not only for the elusiveness of the elusive issues but the way such coins display their Charlotte, Dahlonega, or New Orleans origin when placed on ordinary display. This well-defined D-mint example has bright green-gold luster remaining through much of the fields. Lightly abraded overall with digs on the portrait and a scrape at the eagle's right (facing) wingtip. (#8193)

### Narrow Mill 1840-O Half Eagle, AU53

- 4775** 1840-O Narrow Mill AU53 NGC. The short denticles and "fat" rims on the obverse are ambiguous, but the reverse has a more pronounced Narrow Mill appearance, and a measured diameter of 22 millimeters removes all doubt about the Narrow Mill status of this coin. Typically soft through the centers but with considerable remaining luster in pale lemon-gold. A small copper spot appears above star 6. (#8200)
- 4776** 1842-D Small Date—Improperly Cleaned, Obverse Damage—NGC Details. XF. Variety 8-E. Sole Small Date die pair. Lightly worn with a hairlined glow to the yellow-orange surfaces. The obverse shows numerous digs and gouges, though the reverse displays well in spite of the cleaning. (#8210)
- 4777** 1842-D Small Date XF45 PCGS. Variety 8-E. Subtly green-gold surfaces are surprisingly radiant for a Choice XF coin. Well-defined for the date with scattered light to moderate abrasions over each side. (#8210)

**1843-O Half Eagle, AU58  
Scarce Small Letters Type**

**4778 1843-O Small Letters AU58 NGC. Variety One.** The 1843-O Small Letters half eagle claims a mintage of 19,075 pieces, with a single variety known for the date. The issue is quite rare in high grades. The present coin is an attractive near-Mint example, with bright greenish-gold surfaces. The design elements are well detailed in most areas, with just a touch of softness on Liberty's hair. Census: 7 in 58, 5 finer (9/10). (#8217)

**4779 1844-D XF40 PCGS. Variety 11-H.** An original green-gold Dahlonega five that has ample luster across the borders and within the devices. Well defined save for softness of strike on the eagle's neck and on Liberty's lovelock. One moderate mark is noted on the upper reverse field. Encapsulated in an old green label holder. (#8221)

**About Uncirculated 1845-D Five Dollar  
A Pleasing Dahlonega Type Coin**

**4780 1845-D AU50 PCGS. Variety 12-I.** The 1845-D half eagle is a reasonably available date, from a mintage of 90,629 pieces. The best estimate of the surviving population is 225-250 examples, with about 50 specimens in AU. The present coin features remarkable striking detail for a D-mint coin. The surfaces exhibit no distracting marks, with only minimal wear, suggestive of a higher grade. Population: 29 in 50, 88 finer (9/10). (#8224)

**4781 1847 MS61 PCGS. Breen-6570.** The peak of the 7 is recut, one of numerous repunched date and misplaced date varieties known for the issue. This honey gold No Motto Mint State five has a good strike and surprisingly few bagmarks. Faint field hairlines and two hair-thin marks on the reverse exergue account for the grade. (#8231)

**4782 1847-D—Improperly Cleaned—NGC Details. AU. Variety 17-1.** Cracked through FIVE D. Well-defined with little actual wear, though the moderately abraded surfaces have been brightened to pale yellow-gold by a past cleaning. (#8234)

**4783 1848-D—Scratches—NGC Details. AU. Variety 18-M.** Yellow-gold radiance with considerable reddish-brown spotting and encrustation at the margins and within the central devices. Well-defined with die cracks running off the eagle in several places. The obverse shows a number of significant scratches, particularly to the left. (#8238)

**4784 1852-D XF45 PCGS. Variety 28-U.** This tan-gold Choice XF Dahlonega half eagle has a typical strike on the extremities of the eagle and the highpoints of Liberty, but actual wear is moderate and there are no detracting abrasions. (#8252)

**1853-D Half Eagle, MS61  
Popular Mintmark Type Issue, Rare in Mint State**

**4785 1853-D Large D MS61 NGC. Variety 29-V.** From a mintage of 89,678 pieces, the 1853-D is the most available half eagle from the Dahlonega Mint. Doug Winter estimates a surviving population of 275-325 examples in all grades, with only 15-20 specimens in Mint State. There are four die varieties known for the date, with this coin representing the Variety 29-V, with the Large D mintmark located away from the feather and stem. Vibrant mint luster highlights the pleasing greenish-gold surfaces of this piece, and the strike is sharp in all areas. Census: 18 in 61, 12 finer (9/10). (#8255)

**4786 1854-C—Improperly Cleaned—NGC Details. XF. Variety 2.** A thickly hairlined and glossy No Motto half eagle from the elusive Charlotte Mint. A small triangle-shaped strike-through (as made) is noted near the eagle's neck. The mintmark was lightly entered and appears faint to the unaided eye, yet its full shape is present. (#8257)

**Lustrous 1855 Medium D Half Eagle, AU58**

**4787 1855-D Medium D AU58 NGC. Variety 32-W.** The minutely rough surfaces are typical of pieces that have been recovered from older treasures. Such pieces are routinely called "saltwater" coins, although it is apparently not the saltwater that caused the roughness. This lemon-gold example has nearly full luster with hints of deeper gold color. (#98263)

---

### Choice XF 1857-C Half Eagle

- 4788 1857-C XF45 PCGS. Variety 1.** A single die pair was used to struck the 31,360 pieces of this later Charlotte half eagle issue. This Choice XF coin has pleasing detail through the centers and ample remaining yellow and orange luster. Population: 23 in 45, 70 finer (9/10), though heavy resubmissions have distorted the numbers in the AU grades. (#8272)
- 4789 1859-D Medium D—Improperly Cleaned—NGC Details. XF. Variety 36-CC.** This straw-gold rare date Dahlonega five is noticeably bright but lacks any offensive marks. The strike is typical on Liberty's curls and the eagle's neck and fletchings. (#8282)
- 4790 1859-S Good 6 NGC.** As usual for the era, the San Francisco Mint concentrated on double eagle production, and issued only 13,220 half eagles in 1859. This example shows the expected wear on the portrait and plumage, but the apricot surfaces are unblemished save for a faded thin mark near the arrowheads. (#8283)
- 4791 1861 MS61 NGC.** This No Motto Civil War five has substantial luster and is devoid of consequential abrasions. Portions of the devices are lightly impressed. A scarce type in Mint State grades. (#8288)

---

### 1861 Liberty Head Half Eagle, MS62 In-Demand Civil War Type Coin

- 4792 1861 MS62 NGC.** The 1861 half eagle is the first choice for type collectors seeking an example of the No Motto type, because of its availability in high grade and its popular Civil War date. The present coin is a lustrous MS62 specimen, with greenish-gold surfaces, accented by hints of rose. The strike is sharp in most areas, with just a touch of softness on the eagle's neck. Census: 78 in 62, 64 finer (9/10). (#8288)
- 4793 1866-S Motto VF25 PCGS.** Moderately worn but with faint glimmers of yellow-gold luster remaining in the protected areas. This lightly abraded Motto piece comes from the first year of the reverse design. A depression is noted to the left of Liberty's lips. Population: 3 in 25, 32 finer (9/10). (#8312)
- 4794 1869-S XF45 PCGS.** Ample luster shimmers from the legends, stars, and wings. A typical strike and a couple of moderate marks correspond to the grade. A mere 31,000 pieces were struck, due to a preference for double eagles by West Coast bankers and merchants. Population: 8 in 45, 16 finer (9/10). (#8318)

- 4795 1870-S XF40 PCGS.** Bold orange-gold luster with traces of copper-red and glimmers of luster remaining in the fields. Distinctly worn on the high points but with few serious marks. Population: 10 in 40, 36 finer (9/10). (#8321)

---

### Important XF45 1872-CC Half Eagle

- 4796 1872-CC XF45 PCGS. Variety 1-B.** The 1872-CC half eagle issue has survived in only relatively small quantities, thanks to a minor initial mintage of 16,980 pieces and heavy circulation at the time of release. At the Choice XF level, the present coin shows many typical characteristics of the issue, but also some differentiating positives. While the centers show the usual striking softness, the luster is bright for a Choice XF coin, and the orange-tinged yellow-gold color is pleasing. A small copper spot appears just below Liberty's hair bun, and the fields and devices show a series of minor abrasions and reed marks that contribute to the grade. Overall eye appeal is positive, and this coin would fit well in most Carson City collections. Population: 11 in 45, 20 finer (9/10). (#8326)
- 4797 1873 Closed 3 MS61 PCGS.** Gold production at Philadelphia was increased in 1873, partly due to a Treasury belief that Federal paper would soon trade at par with gold coin. The 1873 half eagle is scarce nonetheless, and the Closed 3 is thought to be more difficult variety. This generally lustrous example is noteworthy for a strike-through in the field above FIVE. Population: 27 in 61, 36 finer (4/07). (#8329)

---

**Impressive 1873 Closed 3 Five, MS62**

**4798** 1873 Closed 3 MS62 PCGS. Slightly weak on the eagle's neck, but all other design elements are nicely defined. This desirable half eagle has attractive light yellow luster with pleasing surfaces that show only a few trivial, insignificant marks. Population: 18 in 62, 18 finer (9/10). (#8329)

---

**Select 1873 Closed 3 Half Eagle**

**4799** 1873 Closed 3 MS63 PCGS. An impressive example of the conditionally rare 1873 Closed 3 half eagle, this Select Mint State piece has bright yellow luster with mostly sharp design motifs. The surfaces are finer than usual for the grade. Slight central weakness may be the deciding factor that limits the grade. Population: 10 in 63, 8 finer (9/10). (#8329)

---

**1874-CC Half Eagle  
Well-Struck Choice AU**

**4800** 1874-CC AU55 PCGS. While the 1874-CC Liberty five is an available issue compared to most early CC-mint half eagles, the average specimen only grades Very Fine to low XF. A Choice AU coin such as the present example is conditionally elusive, and Mint State examples are rare. The mintage of the issue was 21,198 pieces, three times the previous year's CC-mint production. Minor high-point wear is consistent with the grade, but the surfaces are well-struck and retain considerable luster. Minimal abrasions and attractive orange-gold surfaces round out the appeal. Population: 15 in 55, 10 finer (9/10). (#8334)

---

---

## The Single Finest 1879-CC Half Eagle, MS62

**4801 1879-CC MS62 PCGS. CAC.** Writing in 2001, Doug Winter offered this concluding commentary for the 1879-CC half dollar issue in his *Gold Coins of the Carson City Mint*:

“The 1879-CC is the most obtainable Carson City half eagle from the 1870’s. It is relatively easy to locate in lower grades and is not even that hard to obtain in the lower range of About Uncirculated. This date becomes rare in the higher About Uncirculated grades and it is extremely rare in Mint State. I am aware of just two or three Uncirculated 1879-CC half eagles and none of these grade higher than Mint State-61.”

After almost a decade, the numbers have nudged up slightly; there are now seven Mint State 1879-CC half eagles in the combined certified population, four graded by NGC and three by PCGS, a number that doubtless includes a resubmission or two (9/10). In addition, the “alpha coin” of the date is no longer graded MS61, as it was when Winter wrote and single examples from NGC and PCGS were at the top of his condition census. Now the honor belongs to a single MS62 coin, the present PCGS-certified piece, which also bears a CAC green label that further attests to its condition.

The overall detail is impressive, particularly on the peripheral obverse stars, which show full centers. The central devices too show excellent definition, and sun-yellow fields are warmly lustrous. Aside from a few light abrasions at the back of Liberty’s neck, this coin shows little more than an assortment of wispy, though ultimately grade-defining marks. A remarkable trophy for the Carson City enthusiast who collects at the highest levels. (#8349)

- 4802 1880 MS64 PCGS. CAC.** A beautiful orange-red near-Gem whose lustrous surfaces are remarkably unabrased. The strike is generally sharp, although Liberty's lovelock and the eagle's neck show unimportant incompleteness. (#8351)
- 4803 1881 MS64 PCGS. CAC.** This well struck half eagle pairs a beautifully preserved reverse with a lightly abraded obverse. Exemplary luster illuminates honey-gold fields and the forest-green peripheries. (#8354)
- 4804 1881-S MS64 PCGS.** A lovely high-end pumpkin-gold near-Gem. The 1881-S half eagle and eagle each have nearly identical mintages of 969,000 and 970,000 pieces, respectively. Their rarity at the MS64 level is an entirely different matter, since no 1881-S tens have been certified by either NGC or PCGS above MS63, while the 1881-S half eagle is merely scarce to very scarce in the present grade. Population: 93 in 64, 3 finer (9/10). (#8357)
- 4805 1882 MS64 PCGS. CAC.** The yellow-gold centers are encompassed by a peripheral band of sea-green toning. Precisely struck and lustrous with no distracting marks. The 1882 is a high mintage issue, but most certified examples are abraded and grade between AU58 and MS63. (#8358)

**1882-CC Liberty Head Half Eagle, AU58  
Popular Carson City Type Coin**

- 4806 1882-CC AU58 NGC. CAC.** A substantial mintage of 82,817 half eagles was achieved by the Carson City Mint in 1882 and Doug Winter estimates a surviving population of 350-400 pieces today. Of those survivors, Winter believes 60-70 examples are in AU grades. The present coin is an attractive near-Mint specimen, with green and rose-gold surfaces that retain much original mint luster. The devices are sharply rendered, and the surfaces show only minor signs of circulation. (#8359)

- 4807 1882-S MS64 PCGS.** A wonderful apple-green and peach-gold representative of this conditionally challenging branch mint issue. Well struck and lustrous. Marks of any size are difficult to find, but we note a lintmark beneath the hairbun and a small alloy spot between the NI in UNITED. PCGS has certified a mere 11 pieces finer (9/10). (#8360)

**Lustrous 1884-CC Half Eagle, AU58**

- 4808 1884-CC AU58 NGC.** This sharply struck example has original golden-brown color, extensive shimmering luster, and problem-free surfaces. Only 16,402 pieces were produced, and the hundred or so survivors are clustered in XF40 to AU55 grades. All 1884-CC Half Eagles have bold die scratches (as made) through the RTY in LIBERTY and below Liberty's eye. Similar die scratches are even more evident on the 1884-CC Eagle; possibly both obverse dies were mishandled during their journey from Philadelphia to Carson City. Census: 49 in 58, 6 finer (9/10). (#8365)

- 4809 1887-S MS64 PCGS. CAC.** Attractive sun-gold overtones grace the lustrous yellow surfaces on this S-mint near-Gem. Excellent detail through the centers and great eye appeal. Population: 40 in 64, 3 finer (9/10). (#8371)
- 4810 1890-CC MS61 PCGS. CAC.** Luster dominates the margins and devices of this nicely struck and moderately abraded CC-mint half eagle. Peach-gold is prevalent aside from jade-green near the rims. (#8376)
- 4811 1890-CC MS61 NGC.** This popular Carson City issue has approximately one-fourth the mintage of its 1891-CC successor. Luster dominates design elements, and although the devices lack an absolute strike, marks are trivial aside from a hair-thin line beneath the left (facing) wing. (#8376)

**Elusive Gem 1891 Half Eagle  
Tied for Finest Certified**

- 4812 1891 MS65 NGC.** This Gem example is tied with two other NGC-certified coins at the top of the Condition Census for the issue—fairly recent appearances, since in 2006 Garrett and Guth wrote that only a single MS65 coin had been certified. The finest at PCGS are a number of MS64 coins. Although the 1891 half eagle had a mintage substantially larger than the 1888-1890 fives, most examples found grade only MS63 or MS64, often with prooflike surfaces. This piece has a full strike throughout, one that has brought up all the details of the lovelock and the eagle's wing feathers and fletchings. Radiant mint luster beams from reddish-orange surfaces. Census: 3 in 65, 0 finer (9/10). (#8377)

- 4813 1891-CC MS61 PCGS.** This lustrous Carson City type coin has an impeccable strike and the expected number of wispy abrasions. Hints of rose and aqua emerge from the primarily straw-gold surfaces. (#8378)
- 4814 1891-CC MS62 PCGS.** Strongly struck with considerable reflectivity in the yellow-gold luster. This Carson City coin shows just a few too many scattered abrasions to qualify for a Select designation. (#8378)
- 4815 1891-CC MS62 PCGS. CAC.** Undisturbed sea-green and caramel-gold toning blend throughout this well struck and moderately abraded Carson City half eagle. Luster dominates the borders and devices. (#8378)
- 4816 1891-CC MS62 NGC.** A pleasingly detailed and attractively lustrous example of this popular Carson City five dollar issue. No trace of wear, though each side has light to moderate abrasions on faintly green-gold surfaces. (#8378)
- 4817 1891-CC MS62+ PCGS. CAC.** A khaki-gold Carson City type coin that provides a bold strike and impressive eye appeal. All marks are minor, save for the moderate ticks beneath the chin that prevent a full MS63 designation. (#8378)

### Striking Premium Gem 1893 Half Eagle

- 4818 1893 MS66 NGC.** A beautifully detailed and delightfully lustrous Premium Gem example of this popular 19th century type issue, available for a price in many Mint State grades but a genuinely rare date in MS66. Yellow-gold surfaces show prominent orange overtones through much of the fields. Smooth and charming. Census: 8 in 66, 1 finer (9/10). (#8383)
- 4819 1894 MS64 PCGS. CAC.** Satiny butter-yellow surfaces are lightly patinated with orange overtones. A well-defined and pleasing near-Gem example of this popular 19th century type issue. Population: 30 in 64, 2 finer (9/10). (#8387)
- 4820 1894 MS64 PCGS.** The relatively high mintage 1894 is plentiful in MS61 through MS63 grades, but is surprisingly scarce as a near-Gem. This well struck example is mostly peach-gold but has aqua-green margins. The faint field grazes are slightly more prominent on the reverse. Population: 30 in 64, 2 finer (9/10). (#8387)

### Gem 1894 Liberty Head Half Eagle Condition Rarity

- 4821 1894 MS65 NGC.** With a mintage of nearly 1 million pieces, the 1894 Liberty Head half eagle is an available date in lower Mint State grades, but Gems are very rare. The present coin is a delightful Gem specimen, with vibrant mint luster, and an exemplary strike. The surfaces are a pleasing greenish-gold color, and a short scratch on Liberty's chin is the only mentionable mark. Census: 12 in 65, 1 finer (9/10). (#8387)

### 1898 Liberty Head Half Eagle, MS65 Only One Coin Certified Finer at PCGS

- 4822 1898 MS65 PCGS.** The 1898 Liberty Head half eagle was produced in large numbers, but few high-grade examples have been preserved over the years. The present coin is a delightful Gem, with lustrous, rose-gold surfaces, and a razor-sharp strike. Outstanding eye appeal complements the high technical grade. Population: 4 in 65, 1 finer (9/10). (#8396)
- 4823 1899-S MS64 PCGS.** This needle-sharp near-Gem has radiant sun-gold color and dynamic cartwheel sheen. A tick on the chin is all that prevents an even higher grade. The 1899-S is plentiful in MS61 and MS62 but very scarce at this level of preservation. Population: 34 in 64, 8 finer (9/10). (#8399)
- 4824 1900-S MS64 NGC. CAC.** A coruscating and sharply struck Choice better date half eagle that displays uncommonly smooth surfaces for the MS64 level. Light lime and honey toning contributes further to the eye appeal. The 00 in the date is lightly repunched. Census: 79 in 64, 4 finer (9/10). (#8401)
- 4825 1901/0-S MS63 PCGS. FS-301.** The curve of an underdigit is obvious near the northeast corner of the second 1 in the date. Deep orange-gold toning blankets this needle-sharp and lustrous Select half eagle. This coin may merit a higher technical grade, but a bright strike-through (as made) is present in the field near Liberty's mouth. Encased in an old green label holder. (#8403)

- 4826 1901-S MS64 NGC.** This fully struck Liberty type coin is virtually void of abrasions, and all that precludes a much higher grade is a slight diminution of the obverse luster. (#8404)
- 4827 1901-S MS64 NGC. CAC.** This lovely green-gold Choice Liberty type coin is awash in cartwheel luster and has an unimprovable strike. A tick on the reverse rim at 6 o'clock may be all that limits the grade. (#8404)
- 4828 1901-S MS64 ANACS.** A boldly impressed near-Gem with subtle green and lavender peripheral overtones to the satiny yellow-gold luster. Ideal for a 20th century type set. (#8404)

#### Lustrous Gem 1903 Half Eagle

- 4829 1903 MS65 PCGS.** While a handful of 20th century Liberty half eagle issues are readily available in high grades, the 1903 is not among them. This yellow-gold Gem is an unusual offering, boldly struck with rich luster. Only a few small pinpoint marks are scattered on each side. Population: 17 in 65, 14 finer (9/10). (#8407)

#### Satiny MS65+ 1905 Half Eagle

- 4830 1905 MS65+ NGC.** A satiny yellow-gold beauty with a pair of small copper spots close to the obverse rim. This exquisitely detailed piece is carefully preserved, a clear step above the "usual" Gem appearance. An important example of a date that is conditionally rare any better. NGC has graded 30 numerically finer pieces (9/10). (#8411)
- 4831 1906-D MS64 NGC. CAC.** A lovely green-gold near-Gem that boasts original color, good luster, and a nice strike. The reverse is beautifully unabraded. As of (9/10), CAC has only certified five MS64 examples of this introductory Denver issue. (#8414)
- 4832 1908 MS64+ PCGS. CAC.** This fully struck final year Liberty five has an essentially immaculate reverse, and the obverse has only faint marks. Light apricot toning cedes to a narrow band of sea-green near the rims. (#8418)

## PROOF LIBERTY HALF EAGLES

### 1903 Liberty Head Half Eagle, PR65 Rare Gem Example, Outstanding Eye Appeal

- 4833 1903 PR65 NGC.** A nominal mintage of 154 proof Liberty Head half eagles was accomplished in 1903, and the issue is reasonably available in the context of the series. However, any proof Liberty Head half eagle should be considered a rare and valuable coin in the absolute sense. Certainly, examples of the 1903 proof, in Gem condition, are very rare. Currently, NGC has certified four coins in PR65, with three finer, while PCGS has graded only three examples in Gem proof, with a single specimen finer (9/10).

The present coin is a delightful Gem specimen, with brightly reflective surfaces, and attractive yellow-gold color. As on almost all examples from this time period, the finish does not have cameo contrast. The strike is needle-sharp throughout, and no mentionable distractions are evident. Eye appeal is extraordinary. (#8498)

---

Rare 1904 Liberty Half Eagle, PR62

- 4834 1904 PR62 PCGS. CAC. Proof gold coins are sometimes called numismatic delicacies due to the combination of their beauty and rarity. The total proof mintage of 1904 half eagles was a mere 136 coins, and we estimate that half of those coins still survive today. While this piece has a number of scattered surface marks that limit the grade, it exhibits fully mirrored fields and satiny devices with rich yellow color. A few small copper toning splashes are evident on each side. Population: 5 in 62, 21 finer (9/10). (#8499)

---

Gem Cameo Proof 1905 Half Eagle

- 4835 1905 PR65 Cameo NGC. An unusual Cameo representative of this brilliant-era proof gold issue from the end of the Liberty half eagle series, not specifically frosted on the central devices but with distinct contrast between them and the pale yellow-gold gleam of the smooth fields. Great all-around preservation as the Gem grade implies. This date's proof mintage of just 108 pieces is a marked step down from the 230 specimens struck in 1900 and the mid-100s mintages of earlier years in the 20th century, and it serves as a prelude to the double-digit proof gold production of 1906 and 1907. Census: 6 in 65 Cameo, 3 finer (8/10). (#88500)

---

Historic 1907 Liberty Head Five Dollar  
PR64, Last of a Long-Running Era

- 4836 1907 PR64 PCGS. Ex: HW Bass Jr Collection. The 1907 Liberty Head five dollar marks the passing of a long and historic coinage era. The Liberty Head design of Christian Gobrecht was introduced on the eagle in 1838, the half eagle in 1839, and the quarter eagle in 1840, a staggered debut reflecting the relative importance of those, the three standard gold coinage denominations of the era, in international banking. The designs ran through the lifetimes of many Americans in the 19th-early 20th centuries, ending in 1907 (1908 for the half eagle, although no proofs were struck of the 1908 Liberty Head design). After Gobrecht's death in 1844, James B. Longacre was appointed chief engraver, developing a different design, also called Liberty Head, for the double eagle denomination that debuted in 1849-50.

This last-year proof Liberty Head five should have special appeal for type collectors, who often prefer first- or last-year productions for their sets. The slightly contrasted gold-on-black surfaces approach a Cameo designation, and only some minor thin contact marks appear to preclude an even finer grade. Quite appealing, and fully struck throughout. Population: 11 in 64, 7 finer (9/10). (#8502)

## INDIAN HALF EAGLES

### Frosty 1908 Indian Five, MS64

- 4837 1908 MS64 NGC.** This frosty and beautiful Choice Mint State Indian half eagle will find a nice home in a complete set of the series or in a type collection that features first year of issue coinage. Both sides are brilliant yellow with bold design details and minimal abrasions. (#8510)

### 1908 Indian Head Half Eagle, MS64+ Quintessential First-Year Type Coin

- 4838 1908 MS64+ PCGS.** The 1908 half eagle enjoys great popularity with type collectors as the first date of the Indian Head design. The present coin exhibits sharply defined design elements, pleasing orange-gold surfaces, and vibrant mint luster. This high-end Choice example should inspire intense competition among type collectors and series specialists alike. (#8510)

### 1908 Indian Half Eagle, MS64+ Popular First Date of Design

- 4839 1908 MS64+ PCGS. CAC.** The 1908 half eagle is always popular with type collectors as the first year of the distinctive incuse Indian Head design. The present coin is a sharply struck specimen, with fine detail evident on all design elements. The surfaces are brightly lustrous, with a light greenish-gold color, highlighted by hints of rose. The high-end status of this example is confirmed by the plus designation. (#8510)
- 4840 1908-D MS63 NGC.** A lustrous first-year Indian five, Select with scattered light abrasions but considerable eye appeal. Violet-tinged orange-gold surfaces show a coppery streak below the R in LIBERTY. (#8511)
- 4841 1908-D MS63 PCGS.** Strong yellow-orange luster is the key attribute of this Select example. Well-defined with small, scattered abrasions that combine to account for the grade. Housed in a green label holder. (#8511)

- 4842 1908-D MS64 PCGS.** This satiny Denver Mint near-Gem is predominantly orange-gold, although aqua toning is also evident. Carefully preserved, nicely struck, and encapsulated in a green label holder. (#8511)

### Choice 1909 Indian Half Eagle Interesting Mint Luster

- 4843 1909 MS64 NGC.** A Choice Mint State example of this second-year Indian Head half eagle, the coin offered here displays sharply detailed design elements and pleasing orange-gold surfaces. The satiny mint luster is a little reminiscent of the Roman finish proofs of this year. The population of this date falls off sharply at the Gem level. (#8513)
- 4844 1909-D MS63+ NGC.** This luminous and precisely struck Indian gold five is impressively unmarked and has good eye appeal. A pleasing combination of both value and quality. (#8514)
- 4845 1909-D MS63+ PCGS.** Well-defined through the centers with only slight peripheral softness at the bottom of the yellow-gold obverse. Excellent quality for the Select grade range, though a few tiny digs below the R in LIBERTY preclude a near-Gem designation. (#8514)
- 4846 1909-D MS64 NGC. CAC.** An attractively lustrous near-Gem, lightly grazed in the fields but without serious marks. Strong design definition with eye appeal to match. (#8514)
- 4847 1909-D MS64 NGC.** Rich sun-yellow luster with prominent orange overtones. This Choice coin offers great detail and shows only a handful of significant marks. NGC has graded 70 numerically finer pieces (9/10). (#8514)

### 1909-O Indian Half Eagle Last New Orleans Mint Half Eagle

- 4848 1909-O Genuine PCGS.** The PCGS number ending in 95 suggests scratch/rim dent as the reason, or one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been scratched. The surfaces of this coin are a vivid orange-gold color, with bright mint luster. The mentioned scratch is located in the headdress feathers, and is not obtrusive. The 1909-O is a low-mintage date, with a production total of just 34,200 pieces, and the only Indian half eagle from the New Orleans Mint. (#8515)

---

Luminous AU58 1909-O Half Eagle

**4849 1909-O AU58 NGC. CAC.** The New Orleans Mint never recaptured its pre-Civil War importance, not even when it struck millions of Morgan dollars. By the start of the 20th century, it was lagging behind the other Mints, and the opening of Denver in 1906 only hastened the decline. After the 1906-O ten dollar issue, the New Orleans Mint struck no gold coinage in 1907 or 1909. The 1909-O five dollar, an issue that amounted to just 34,200 pieces, proved to be Southern gold's last gasp.

Today, of course, the 1909-O is best known as a key in the Indian half eagle series. This is a scarcely-worn orange-gold example, luminous with pleasing detail in the centers. Abrasions are at a minimum, and eye appeal is great for the grade. A coin that is sure to reward the winning bidder. (#8515)

---

---

Popular 1909-O Half Eagle, AU58

**4850 1909-O AU58 NGC. CAC.** It has been more than a century since the New Orleans Mint coined its last pieces in 1909. The highest-mintage issue of the year was in dimes, nearly 2.3 million of them. Neither quarters nor half dollars cracked a million examples minted, though the half dollar came close. As for the long tradition of O-mint gold coinage, it ended with a tiny issuance of half eagles, just 34,200 coins.

Today, of course, these pieces are highly prized as the key to the Indian half eagle series, and this near-Mint example is an ideal selection for the collector assembling an otherwise Mint State set. Rich orange-gold luster is virtually intact, with only the slightest rub on the softly struck devices. The reverse has a few color variations, lavender in the fields with a copper spot at the front of the eagle's neck. (#8515)

---

### Lustrous Near-Mint 1909-O Half Eagle

**4851 1909-O AU58 PCGS. CAC.** The Jeff Garrett-Ron Guth *Gold Encyclopedia* says succinctly of the 1909-O Indian half eagle that "it has long been considered a key date and is in feverish demand." Although not as rare in high grades as the conditionally rare trio of 1912-S, 1914-S, and 1915-S, the 1909-O is an issue that is scarce in the upper AU grades and very scarce in Mint State.

The present near-Mint State example boasts a remarkable amount of luster remaining on each side, undoubtedly the reason for the CAC endorsement. The surfaces are attractive yellow-orange and exhibit no obvious signs of contact. The strike is a bit soft on the lowest feather of the headdress and the upper part of the eagle's wing—the norm for the issue. Population: 69 in 58, 56 finer (9/10). (#8515)

**4852 1910-D MS62 PCGS.** A dusky yellow-orange piece, mildly copper-spotted with a dappled appearance on the reverse. Well struck overall with more small ticks than serious abrasions. (#8518)

**4853 1910-D MS62 PCGS.** A lustrous yellow-gold example of this lower-mintage Denver issue. Pleasingly detailed with a few too many marks for a Select designation. A copper spot appears at the bottom of the L in LIBERTY. (#8518)

### Choice 1910-D Indian Half Eagle Only Three Coins Certified Finer at NGC

**4854 1910-D MS64 NGC. CAC.** The 1910-D Indian Head half eagle is a rare issue in Choice Mint State condition. The present coin is a delightful Choice example with rose-gold surfaces and satiny mint luster. The design elements are sharply rendered and only minor abrasions are evident, mostly in the reverse field. Census: 14 in 64, 3 finer (9/10). (#8518)

**4855 1911 MS63 PCGS.** Bold sun-yellow luster prevails on this well struck Select coin. Green-gold elements are also present in lightly abraded fields. An intriguing selection for the type collector. (#8520)

**4856 1911 MS63+ PCGS.** A well-defined sun-yellow piece with pleasing luster and strong surface quality for a Select coin. If not for a tiny mark on the cheek, this coin would have a strong claim to an MS64 grade. (#8520)

### 1911 Indian Half Eagle, MS64+ Sharply Struck, Strong Eye Appeal

**4857 1911 MS64+ PCGS. CAC.** The 1911 Indian half eagle is an available date and a favorite of type collectors. This specimen exhibits sharp details on all design elements, unusual for this issue, which often has a weak strike. The surfaces are a lovely rose-gold color, with ample mint luster. The high-end quality of this issue is confirmed by the plus designation. (#8520)

- 4858** 1911-D AU55 NGC. Strong lavender-violet overtones scattered at the margins, though the interiors are still-lustrous yellow-orange. A well struck example of this Indian half eagle issue with a five-figure mintage. (#8521)

**Near-Mint 1911-D Half Eagle**

- 4859** 1911-D AU58 NGC. While the 1911-D *quarter eagle* is far more famous, the same date's *half eagles* are not much more numerous, as series specialists can attest. This is a briefly circulated yellow-orange example that shows only minor rub on still-lustrous yellow-orange surfaces. Well-defined overall with only a touch of softness on the necklace. (#8521)

**Attractive 1911-D Half Eagle, AU58**

- 4860** 1911-D AU58 NGC. Among gold coins struck in Denver in 1911, the quarter eagle gets all the press, but the half eagle is an important piece as well. The mintage of 72,500 coins was the second lowest in the entire series behind the 1909-O. Only one other issue, the 1908-S, had a mintage of less than 100,000 coins. This near-Mint specimen has satiny light yellow surfaces with a hint of pink toning. It is nicely struck and quite attractive. (#8521)

**Lustrous 1913-S Half Eagle, MS61**

- 4861** 1913-S MS61 NGC. This satiny Mint State example exhibits full luster on light yellow surfaces. It is sharply defined, despite a weak but visible mintmark. An attractive representative for the advanced collector of Indian half eagles, and usually found in lower numeric grades. (#8526)

**1914-D Indian Half Eagle, MS64  
Rare in Higher Grades**

- 4862** 1914-D MS64 PCGS. From a mintage of 247,000 pieces, the 1914-D Indian half eagle can only be called scarce in Choice condition, but any higher grade is nothing less than rare. The present coin is an attractive yellow-gold example, with subtle hints of red. The design elements are sharply detailed and mint luster is strong. Visual appeal is quite compelling. (#8528)

---

Condition Rarity 1915 Half Eagle, MS65

**4863 1915 MS65 PCGS.** The 1915 Indian Head half eagle claims a large mintage of 588,000 pieces, and the date is not difficult to locate in lower Mint State grades. The issue is a condition rarity, however, and Gem Mint State examples are quite scarce. Improving on a nice MS65 coin, like the present specimen, is virtually impossible, as no coins have been certified in higher numeric grades by either of the leading grading services (9/10).

The coin offered here is a splendid Gem, with vivid orange-gold surfaces, highlighted by strong hints of red. The strike is exemplary, with fine detail on the headdress feathers and the eagle's leg. Mint luster is strong and vibrant, and eye appeal is outstanding. (#8530)

---

Gem 1915 Indian Half Eagle  
Sharply Struck Example

**4864 1915 MS65 PCGS. CAC.** The 1915 Indian half eagle claims a large mintage of 588,000 pieces, and the date is not difficult to locate in lower Mint State grades. The 1915 does become scarce at the Gem level, however, and the date is virtually unknown in any finer grade. The present coin is a spectacular Gem, with sharply detailed design elements. The surfaces are a light greenish-gold hue, with subtle highlights of rose color. The mint luster is softly frosted, rather than brightly vibrant. No mentionable distractions are evident, and eye appeal is quite strong. Population: 42 in 65, 0 finer (9/10). (#8530)

## PROOF INDIAN HALF EAGLE

### Exceptional 1909 Indian Half Eagle Roman Finish, PR67 Only Two Graded Finer at NGC

**4865 1909 PR67 NGC.** Roman Finish. The proof five dollar coinage of 1907 through 1909 provides quite an object lesson in the evolution of Mint technology and consumer tastes. The 1907 Liberty Head proof, last of the series, was produced in a mostly brilliant or “semibrilliant” proof format that was introduced in 1902; as a result, most proof gold from 1902-1907 lacks much cameo contrast—half eagles or otherwise.

The 1908 gold coins of the new Bela Lyon Pratt and Augustus Saint-Gaudens designs were launched with a new “matte” proof format that was all the rage in European mints of the era. The Robert Loewinger reference, *Proof Gold Coinage of the United States*, offers this:

“The [matte proof] process originally started in Belgium and was popularized in the Paris Mint. The finish was applied after striking and was made by sandblasting the coins at different forces and speeds with different sizes of grains of sand. Also pickling the coins in a weak acid was another technique that was used on these coins after striking.”

We are unsure how widespread the “pickling” was, but the sandblasting was a well-known, widespread Mint technique that produced a granular (sometimes fine, sometimes coarser), usually dark, subdued finish to the product, a function of the lack of normally reflective surfaces. The matte proof coins of 1908 are usually dark, brownish-gold to olive-brown, and they were extremely unpopular with collectors accustomed to a more brilliant finish.

The Mint in 1909 reverted to a lighter Roman or satin finish for proof gold. The updated Akers *Handbook* offers these thoughts:

“The proof 1909 introduced the Roman Gold proofing method in the Indian Half Eagle series, although at least one specimen was prepared using the dark matte finish of 1908. Despite having brighter, flashier surfaces than the proof 1908, the proof 1909 still failed to gain wide acceptance among the contemporary public. The Mint melted many examples at year’s end. Interestingly, even though most survivors present as overall smooth, the issue has the lowest average grade in the entire proof Indian Half Eagle series.”

The present PR67 piece, however, is one of the nicest survivors of the proof 1909 half eagle mintage, recorded as 78 pieces. It is one of six so graded at NGC, with but two coins finer (9/10). The surfaces are finely granular, as struck, from an untreated (unsandblasted) planchet. The coloration is even yellow-gold throughout. The only ripple in the fabric of the surface is a shallow planchet flaw below the Y in LIBERTY. Exceptional quality, and sure to inspire feverish bidding among proof gold aficionados. (#8540)

## EARLY EAGLE

Near-Mint 1801 BD-2 Eagle

**4866** 1801 AU58 NGC. Breen-6843, Taraszka-25, BD-2, R.2. Star 1 is noticeably separated from the hair and star 8 is a bit closer to the cap on the BD-2 die combination. This variety is plentiful in the context of early eagles, representing one of the two most common die marriages of the entire series along with 1799 BD-10. John Dannreuther suggests that 600 to 800 examples of 1801 BD-2 survive today, and that figure may be a little conservative.

Its availability means that early gold collectors and type collectors have an excellent opportunity to acquire an attractive example such as the present piece. It is a satiny near-Mint representative with mostly bold design features and excellent eye appeal. The surfaces exhibit lovely green-gold color with hints of pale orange patina. A few scattered marks on each side are entirely trivial and consistent with the grade. (#8564)

## LIBERTY EAGLES

Near-Mint 1838 Eagle  
Low-Mintage, Two-Year Type Coin

**4867** 1838 AU58 NGC. Coinage of ten dollar gold pieces resumed in 1838, after a hiatus of 34 years. The 1838 Liberty Head eagle boasts a minuscule mintage of 7,200 pieces, making the date scarce-to-rare in all grades. Gobrecht's Liberty Head design was modified in 1839, leaving a two-year design type that is quite popular with type collectors. Coins in near-Mint condition are very rare today, and Mint State examples are virtually unobtainable.

The present coin is a pleasing AU58 specimen, with lustrous, greenish-gold surfaces and frosty devices. The central design elements are strongly impressed, with fine detail present on Liberty's hair and the eagle's neck. A few star centers are a little flat. The surfaces show few abrasions for the grade. Census: 7 in 58, 2 finer (9/10). (#8575)

**4868** 1839 Type of 1838, Large Letters Genuine PCGS. The PCGS number ending in .82 suggests Filed Rims as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of an AU specimen that has filed rims. A still-lustrous, moderately abraded yellow-gold example of the Type of 1838, solidly defined on Liberty's distinctly shaped hair. (#8576)

**1839 Type of 1838 Ten Dollar, AU Details  
Bright Yellow-Gold Surfaces**

**4869** 1839 Type of 1838, Large Letters—Improperly Cleaned—NGC Details. AU. Crisp definition is evident on every aspect of this early Liberty eagle. Bright yellow in color, it otherwise would have graded Choice AU if not for improper methods of preservation, which has left both sides modestly hairlined. For only two years—1838 and 1839—this adaptation of Liberty's profile was used. These two dates are very challenging in AU, and they can be prohibitively difficult to locate in true Uncirculated grades.

**Near-Mint 1839 Large Letters Ten Dollar  
The Prized Type of 1838**

**4870** 1839 Type of 1838, Large Letters AU58 NGC. The Type of 1838 (also known as "Head of 1838") is an important early subtype of the Liberty Coronet ten, distinguished by a bold swirl of hair that curls from the beads in back of Liberty's hair all the way to her temple. High-end circulated examples enjoy constant demand, as Mint State coins are conditionally rare, and this survivor is just a touch of rub away from full Uncirculated status. Small rim nicks appear on each side, and the most visible inner abrasion appears above the 9 in the date. Such flaws notwithstanding, this is a highly appealing coin for the type. NGC has graded just 10 Mint State survivors (9/10). (#8576)

**1839/8 Ten Dollar, Type of 1838, MS61  
A Major Condition Rarity**

**4871 1839 Type of 1838, Large Letters MS61 PCGS.** For reasons that are not clear today, the Mint modified Gobrecht's original design for the ten dollar gold coin partway through the year 1839. Most examples seen are overdates, but Walter Breen reports a prohibitively rare normal date variety (possibly just a late die state, with the remnants of the undertype worn completely away). The new design featured differences in Liberty's hairdo, neck truncation, and the size of the letters in the reverse legends. As David Akers points out, these differences in design are dramatic, and each design should be considered a separate subtype of the Liberty Head, No Motto eagle. In *Collecting & Investing Strategies for United States Gold Coins*, Jeff Ambio notes this date as the least expensive option for inclusion in a type set of major subtypes of the Liberty Head, No Motto eagle.

With an original mintage of 25,801 pieces, this issue is scarce-to-rare in all grades. Seven specimens were recovered from the wreck of the *S.S. Republic*. The total surviving population is estimated at 250-300 pieces, with Mint State examples rare.

The present coin is an attractive orange-gold example with full mint luster. The strike is sharp in most areas, with some weakness on the stars, typical of the issue. The surfaces show a number of small handling marks, consistent with the grade. Overall eye appeal is strong. Population: 4 in 61, 7 finer (9/10). (#8576)

**4872 1842 Large Date—Improperly Cleaned—NGC Details. AU.** Incorrectly designated as a Small Date by NGC. Orange and lime toning visits the moderately bright and glossy surfaces. Moderate rim dings are noted at 4:30 on the obverse and at 9:30 on the reverse. The reverse displays several lengthy bold die cracks.

**Rare Mint State 1844-O Eagle  
Only One Piece Finer at PCGS**

**4873 1844-O MS61 PCGS.** The 1844-O eagles were formerly rare in AU grade, and now they are merely scarce, thanks to the *S.S. Republic* shipwreck, which had a few dozen examples. The issue is also quite rare in Mint State, even though it is the third most common No Motto O-mint eagle, after the 1847-O and 1843-O. This MS61 specimen is one of two so certified at PCGS, and there is one finer (9/10). A few contact marks in the prime focal areas and elsewhere appear to preclude an even finer grade, but well-struck surfaces, attractive yellowish-orange color, and much luster emanating from both sides sum up to a coin with greater eye appeal than the numerical grade might suggest. Population: 2 in 61, 1 finer (9/10). (#8591)

**4874 1846 XF45 PCGS.** A well-defined piece, generally pale yellow-gold but with stronger butter and orange shades at parts of the margins. Still-lustrous fields are moderately abraded. Population: 17 in 45, 18 finer (9/10). (#8594)

**4875 1847-O AU58 NGC.** The 1847-O Liberty Head eagle was a well-produced, high-mintage issue that is quite scarce in near-Mint condition. The present coin shows slight wear on Liberty's hair above the ears, but most original detail remains sharp. The surfaces are an attractive greenish-gold color, with bright luster and minimal abrasions. Census: 86 in 58, 20 finer (8/10). (#8598)

---

**Radiant Choice XF 1849-O Ten Dollar**

- 4876 1849-O XF45 PCGS.** A yellow-orange example from the famous Gold Rush year, well struck for the New Orleans issue with surprising radiance for a Choice XF coin. Scattered light abrasions appear close to the softly struck stars, and a depression is noted just above the second S in STATES. Population: 24 in 45, 13 finer (9/10). (#8602)

---

**Luminous XF45 1849-O Ten Dollar**

- 4877 1849-O XF45 PCGS. CAC.** While a mintage of 23,900 pieces is not necessarily low by New Orleans gold standards, there is a clear lack of availability for the issue even at the XF level. This is a subtly luminous orange-gold example, well-defined on the central devices but softly struck on the stars. The coin's scattered abrasions are light and generally inoffensive. PCGS has graded only 13 coins finer (9/10). (#8602)

---

**Near-Mint 1850-O Ten Dollar**

- 4878 1850-O AU58 PCGS. CAC.** Ten dollar gold production at New Orleans was highly variable in the pre-Civil War years. The 1850-O issue marks one of the upswings, and 57,500 pieces were produced. The vast majority circulated heavily, and a near-Mint survivor like the present piece is a condition rarity. Just a touch of rub visits lightly abraded but still-lustrous yellow-orange surfaces that have a deeper hue on the reverse. Population: 5 in 58, 1 finer (9/10). (#8605)

---

**Notable AU58 1851-O Eagle**

- 4879 1851-O AU58 NGC.** Great luster with just a touch of friction on the well struck devices. Bold yellow-gold color has greenish overtones within the fields. Lightly abraded with a couple of small copper spots within the date exergue. NGC has certified just 12 examples of this O-mint eagle issue as Mint State (9/10). (#8607)

---

**1854 Liberty Head Eagle, AU58  
Ex: S.S. Republic**

- 4880 1854 AU58 NGC. Ex: S.S. Republic.** One of just 22 examples recovered from the celebrated treasure. A well-defined specimen, with sparkling lemon-gold surfaces that give off a delightful radiance. Only a trace of friction at the highest parts of the devices precludes a Mint State grade. Census: 52 in 58, 13 finer (9/10). *From The Glenwood Landing Collection.* (#8613)
- 4881 1855 AU58 PCGS. CAC.** Lightly worn on the high points with scattered minor abrasions. Yellow-gold surfaces offer generous luster and a distinctive reddish copper spot just below the eagle's right (facing) wingtip. Population: 21 in 58, 17 finer (9/10). (#8616)
- 4882 1855 AU58 NGC.** Pale yellow-gold luster offers a degree of reflectivity. A lightly abraded but fundamentally pleasing piece that has just a touch of rub across the devices. (#8616)

---

Appealing 1855-S Eagle, AU53

- 4883 1855-S AU53 PCGS.** The San Francisco Mint produced their first coins in 1854, almost exclusively eagles and double eagles. The trend continued in 1855, although double eagles were minted in much larger quantities than any other denomination. Just 9,000 eagles were coined in 1855, and nearly all of those that survive today are in lower grades. This lovely AU53 example has bright green-gold luster with only a few marks of any consequence. It is appealing, desirable, and rare. Population: 7 in 53, 1 finer (9/10). (#8618)

---

1860 Liberty Head Eagle, AU58

Ex: S.S. Republic

- 4884 1860 AU58 NGC.** Ex: *S.S. Republic*. Only nine examples of the 1860 Liberty Head eagle were found on the wreck of the *S.S. Republic*, so the date remains quite rare in high grades. The present coin is an impressive lemon-yellow piece, with a sharp strike and bright mint luster. Census: 27 in 58, 6 finer (9/10). *From The Glenwood Landing Collection.* (#8631)

- 4885 1860-O Genuine PCGS.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of an XF specimen that has been cleaned. Well-defined with only light wear, though the moderately abraded green-gold surfaces have an artificial brightness. (#8631)

---

1863 Liberty Head Eagle, XF40  
Only 1,248 Struck

- 4886 1863 XF40 NGC.** An astonishingly low mintage of 1,248 Liberty Head eagles was achieved at the Philadelphia Mint in 1863, probably an indication of the extremes Civil War hoarding reached at the time. This coin shows only light, even wear on the devices, and the pleasing greenish-gold surfaces retain much original mint luster. A short scratch on Liberty's chin is the only mark of note. Census: 1 in 40, 17 finer (9/10). (#8637)

---

Elusive 1869-S Liberty Eagle, AU55

- 4887 1869-S AU55 PCGS.** During the Reconstruction Era following the Civil War, the San Francisco Mint was the primary facility for coinage of gold and silver. The area was largely unaffected by hoarding activities in the eastern states. Most of the coins minted on the West coast entered circulation where coinage was scarce. This impressive piece has rich orange-gold color with nearly full luster. Satiny fields host scattered surface marks expected at the Choice AU grade. This is an important piece for the advanced collector, with few finer examples known. Population: 4 in 55, 4 finer (9/10). (#8656)

- 4888 1872-S XF45 PCGS.** The 1872-S has a tiny mintage of 17,300 pieces, and since they received no numismatic consideration in the Old West, it is unsurprising that PCGS has yet to certify any as Mint State. This slightly subdued straw-gold example is minimally abraded and possesses noticeable luster. Population: 25 in 45, 25 finer (9/10). (#8665)

---

1874-CC Eagle, Elusive Choice AU

- 4889 1874-CC AU55 NGC.** Both eagles and double eagles were produced in comparatively plentiful proportion in 1874 as bullion deposits saw a huge increase, with the preponderance Liberty twenties. The 1874-CC tens were produced to the extent of 16,767 coins, but a Choice AU piece such as the present coin is quite scarce, and examples in Mint State are few and far between, with only one confirmed example each at NGC and PCGS. The attractive orange-gold surfaces are well-struck and lightly abraded, a pleasant surprise given the hard-money traditions of the Old West that caused most gold to circulate extensively: The average grade of certified survivors of this issue is only a bit better than VF35. Census: 42 in 55, 3 finer (9/10). (#8670)
- 

---

Elusive 1874-S Liberty Ten, AU53

- 4890 1874-S AU53 NGC. CAC.** Like many San Francisco Mint gold coins, the 1874-S is an important rarity with a mintage of only 10,000 coins at a time when the larger double eagles were the denomination of choice at that facility. The typical survivor grades about XF40, and any AU50 or finer example is conditionally rare. NGC has never certified a Mint State example of the issue. This piece has deep yellow surfaces with hints of olive patina and considerable luster. Scattered surface marks on each side are consistent with the grade. Census: 10 in 53, 15 finer (9/10). (#8671)
- 

---

Lightly Abraded 1875-CC Eagle, AU50

- 4891 1875-CC AU50 NGC.** This low-mintage issue has a production of only 7,715 pieces, and today the average certified survivor only grades VF35 or XF40. This AU coin displays appealing khaki-gold surfaces with a few stray contact marks scattered about, although none are overly distracting. The somewhat weak strike that the issue is known for is evident, but once again the degree of severity is less than usually encountered, so that the star centrils are partially brought up. On the reverse the mintmark is clear but softly impressed, as are some of the details on either side of the shield, the wing feathers, and fletchings. Census: 7 in 50, 12 finer (9/10). (#8673)

**Remarkable AU53 1876 Ten Dollar  
One of 687 Business Strikes**

- 4892 1876 AU53 PCGS.** As Garrett and Guth put it in their *Encyclopedia of U.S. Gold Coins*, "Although the low-mintage 1875 eagle was a tough act to follow, the 1876 issue came in with its own tiny mintage of only 687 pieces." While the 1875 date has become legendary for its production of just 100 coins, the 1876 remains underrated, a treasure to be discovered by the discerning collector. This is a lightly worn example, rubbed on the high points but with considerable yellow-gold luster remaining in the fields. Assorted wispy marks and fine abrasions in the fields contribute to the grade, though their impact on the overall eye appeal is minimal. Population: 4 in 53, 5 finer (9/10). (#8674)

**Lustrous AU58 1880-O Ten Dollar**

- 4893 1880-O AU58 NGC. CAC.** Soft luster almost rises to the level of cartwheels in the pale yellow-gold fields. A scarcely worn, faintly abraded example that offers considerable visual quality for this second-phase New Orleans eagle issue. A few copper spots are noted between the obverse stars and the rim. Census: 29 in 58, 11 finer (9/10). (#8689)
- 4894 1880-S MS63 NGC. Breen-7000.** Medium S. The 1880-S is a difficult coin to locate at the MS63 level and examples are virtually impossible to find in higher grades. Olive-gold patina along the rims surrounds the yellow-gold centers. Scattered light marks are commensurate with the grade. Census: 32 in 63, 3 finer (9/10). (#8690)

**Near-Mint 1881-CC Eagle**

- 4895 1881-CC AU58 NGC.** The 1881-CC eagle claims a substantial mintage of 24,015 pieces and Doug Winter estimates a surviving population of 300-400 examples in all grades. Possibly 120 -180 specimens are extant in AU. The present coin is a lightly circulated piece, with greenish-gold surfaces and much original mint luster. Census: 87 in 58, 65 finer (9/10). (#8692)

**1883-CC Liberty Head Ten, AU50  
Scarce Issue in High Grade**

- 4896 1883-CC AU50 PCGS.** From a mintage of just 12,000 pieces, the 1883-CC eagle is a challenging date in high grade. The present coin is sharply detailed on the peripheries, but the central devices show the typical softness always seen on this issue. The surfaces are an attractive greenish-gold color, and display much prooflike reflectivity. Population: 25 in 50, 29 finer (9/10). (#8700)

**1890-CC Eagle, MS61  
Sharply Struck Example, Low-Mintage Issue**

- 4897 1890-CC MS61 PCGS.** The 1890-CC eagle boasts a low mintage of 17,500 pieces. Doug Winter estimates a surviving population of 350-400 pieces, with 55-65 examples extant in Mint State. The present coin exhibits sharply detailed design elements and lustrous greenish-gold surfaces, with turquoise highlights. The surfaces show a moderate number of abrasions for the grade. Population: 29 in 61, 41 finer (9/10). (#8718)

---

#### Satiny MS61 1890-CC Eagle

**4898 1890-CC MS61 PCGS. CAC.** Strongly struck with rich orange-gold color that comes alive through satiny luster. Though numerous fine abrasions appear in the fields, the portrait was spared all but a handful of significant marks. A pleasing example of this later but lower-mintage Carson City eagle issue. Population: 29 in 61, 41 finer (9/10). (#8718)

**4899 1891-CC MS60 NGC.** No trace of wear with great wheat-gold luster and design definition. Though both sides show numerous abrasions, the eye appeal is better than the MS60 designation might suggest. (#8720)

---

#### 1891-CC Liberty Head Eagle, MS62 Impressive Mintmarked Type Coin

**4900 1891-CC MS62 PCGS. FS-501.** The mintmark is widely repunched. The 1891-CC eagle is the most available issue of the Carson City series, and a favorite of mintmark type collectors. The present coin displays attractive orange-gold surfaces, with strong mint luster and a sharp strike. A scattering of minor abrasions and luster grazes on both sides explains the grade. (#8720)

---

#### Charming MS62 1891-CC Eagle

**4901 1891-CC MS62 NGC. CAC.** Attractively detailed with dusky but strong yellow-gold luster. Visible abrasions are few but significant where seen, such as the curving mark at the base of the bust and the digs under the eagle's beak. Nonetheless, an attractive coin for the grade and for the popular Carson City issue. NGC has graded 98 numerically finer pieces (9/10). (#8720)

---

#### Popular 1891-CC Liberty Ten, MS62

**4902 1891-CC MS62 NGC.** From 1870 to 1893 the Carson City Mint produced 19 different issues in the Liberty eagle series, with mintages that ranged from a low of 1,762 pieces in 1879 to a high of 103,732 in 1891, the year of the present piece. That high mintage represents 34.6% of the total production of 299,778 coins, meaning that the 1891-CC is an ideal choice for the Carson City type collector. This example is a remarkable piece with frosty yellow luster and excellent design features. A few tiny abrasions on each side prevent a higher grade. (#8720)

---

#### Select 1891-CC Liberty Head Eagle

**4903 1891-CC MS63 NGC. Variety 1-A.** With its large mintage of 103,732 pieces, the 1891-CC Liberty Head eagle is an available date and the first choice for mintmark type collectors. This Select specimen is sharply detailed in most areas, with a little softness evident on Liberty's hair. The pleasing greenish-gold surfaces display vibrant mint luster, with a moderate number of abrasions for the grade. The mintmark positioned far to the left, with the first C higher than the second identifies this piece as an example of Variety 1-A. Census: 89 in 63, 9 finer (9/10). (#8720)

**4904 1892-O MS62 PCGS.** Well-defined overall with strong and satiny yellow-gold luster. Only slight softness is noted at the lower portrait of the lightly abraded reverse. PCGS has graded just five coins in MS63 and finer (9/10). (#8723)

**4905 1892-S MS62 PCGS.** This sharply struck better date Liberty ten has cartwheel luster across the obverse, while the reverse is semi-prooflike. Small marks are scattered, with one larger bagmark beneath the first T in TRUST. (#8724)

**Near-Mint 1893-CC Eagle  
Last Carson City Issue**

**4906 1893-CC AU58 NGC.** The 1893-CC ten is generally not seen above the AU58 level and this grade represents excellent value for this final-year issue. A significant amount of mint luster remains on each side and the surfaces are sun-gold with sharply defined devices. Both sides are minimally abraded save for moderate marks on the upper left obverse field. Census: 43 in 58, 12 finer (9/10). (#8726)

**4907 1895 MS64+ PCGS.** This sun-gold near-Gem exhibits sweeping luster, and the strike is essentially full. Well preserved overall, especially on the portrait, with minor contact limited to the obverse field. Population: 3 in 64+, 1 finer (9/10).(#8732)

**4908 1895-O MS61 NGC.** New Orleans Motto eagles have low mintages and are scarce in Mint State. The present honey-gold piece is crisply struck and displays abrasions consistent with the designated grade.(#8733)

**Important 1895-S Liberty Ten, MS60**

**4909 1895-S MS60 NGC.** When Liberty eagle rarities are discussed, the 1895-S is barely mentioned, yet it is one of the important condition rarities in the series, with a total mintage of a mere 49,000 coins. In all grades, NGC has certified 213 examples but only 18 of those grade MS60 or finer. Similarly PCGS has certified 235 examples including just 17 in MS60 or finer grades. The average numerical grade of all 448 coins is just 50.

This Mint State piece has light abrasions that are expected for the grade, with bright yellow luster and hints of peripheral orange toning. Census: 6 in 60, 12 finer (9/10). (#8734)

**1896-S Liberty Head Eagle, MS62  
Elusive Date in Mint State**

**4910 1896-S MS62 NGC.** A substantial mintage of 123,750 Liberty Head eagles was achieved by the San Francisco Mint in 1896, but the date is scarce in Mint State grades today. The present coin is an attractive MS62 example, with sharply defined devices and minimal abrasions for the grade. The lustrous surfaces are a pleasing rose-gold color. Census: 25 in 62, 2 finer (9/10). (#8736)

**4911 1897 MS64 NGC.** Boldly impressed with a stark and satiny appearance, yellow-gold with prominent orange overtones. A generally smooth and appealing near-Gem. NGC has graded 26 numerically finer pieces (9/10).(#8737)

**4912 1897-O MS61 NGC.** Within the eagle denomination, New Orleans is a scarce mintmark to acquire in Mint State. The present example is well struck save for the final two stars, and while the luminous straw-gold fields display marks, none are singularly distracting.(#8738)

**Impressive Gem 1899 Ten Dollar**

**4913 1899 MS65 PCGS.** Strongly struck with bold cartwheel luster under a light layer of gauzy patina. The strike is crisp, and the surfaces are smooth aside from a couple of small marks in the portrait area. PCGS has certified just a relative handful of coins at this level and even fewer in higher grades. Population: 25 in 65, 5 finer (9/10). (#8742)

**Premium Gem 1899 Eagle  
Favorite Type Coin**

**4914 1899 MS66 NGC.** From a huge mintage of more than 1.2 million pieces the 1899 was, nevertheless, a well produced issue. As a result, the date is a favorite with type collectors. Examples in Premium gem condition are quite rare, however. This piece is a stunning Premium Gem, with a needle-sharp strike, vibrant mint luster, and lovely yellow-gold surfaces, with wisps of rose. Census: 23 in 66, 4 finer (9/10). (#8742)

### Shining Select 1899-O Ten Dollar

- 4915 1899-O MS63 NGC.** A fading New Orleans Mint on the cusp of the 20th century struck this ten dollar coin, one of 37,047 such pieces it produced in 1899. This Select survivor is better-preserved than the vast majority, entirely lustrous with pale canary-yellow color and solid interior detail. Softness on the outer stars and an abrasion to the left of Liberty's nose contribute to the grade. Census: 7 in 63, 3 finer (9/10). (#8743)
- 4916 1899-S MS63 NGC.** Well-defined with a light layer of patina across yellow-gold surfaces. Strongly lustrous with just a few scattered abrasions and minor spotting at the right reverse border. Census: 35 in 63, 15 finer (9/10). (#8744)
- 4917 1901 MS64 NGC. CAC.** Impressively detailed with bold orange overtones against satiny butter-yellow surfaces. This is a lightly toned and minimally abraded near-Gem, ideal for a type set. (#8747)

### Gem 1901 Liberty Head Eagle Excellent Type Coin

- 4918 1901 MS65 NGC.** The 1901 Liberty Head eagle is an available date, even at the Gem level, and enjoys great popularity with type collectors. The present coin is an exquisite Gem, with light greenish-gold surfaces and vibrant mint luster. This coin is fully struck, and represents a great blend of quality and value. (#8747)
- 4919 1901-O MS62 NGC.** The New Orleans Mint struck eagles intermittently between 1879 and 1906, on more occasions than any other gold denomination. Mintages were always limited, and Uncirculated examples of any issue are scarce. This is a green-gold piece with good luster and a precise strike. Small, faded field marks are of little consequence. (#8748)
- 4920 1901-S MS64 PCGS.** Peach-gold and apple-green alternate across the reverse, while the obverse is consistently khaki-gold. This sharply struck Choice Liberty ten has booming luster and pleasing preservation. (#8749)

- 4921 1901-S MS64 PCGS.** A handsome khaki-gold near-Gem Liberty type coin. Luster sheen sweeps across lustrous and impeccably struck surfaces. Marks are minimal save for a wispy cluster of grazes above the upper arrowhead. (#8749)
- 4922 1901-S MS64 PCGS.** Beautiful apple-green and peach patina endows this lustrous and decisively struck Choice gold type coin. Careful rotation fails to reveal any mentionable marks. (#8749)
- 4923 1901-S MS64+ NGC. CAC.** Sea-green margins surround the pumpkin-gold centers of this highly lustrous ten dollar type coin. The strike is full, and marks are generally limited to minor field grazes. (#8749)

### Dynamic MS65+ 1901-S Ten Dollar

- 4924 1901-S MS65+ PCGS.** A gorgeous Gem that boasts an intricate strike and splendidly smooth surfaces. Pumpkin-gold toning is deepest on the reverse, since it shares the obverse with hints of aquamarine. Cartwheel luster blazes across both sides, and although higher graded examples are obtainable, the present coin should satisfy the most demanding collector. (#8749)

### Notable Near-Gem 1903-O Eagle

- 4925 1903-O MS64 PCGS.** A 20th century O-mint beauty with bold yellow-gold color that shows tinges of orange across parts of the fields. Great design definition with suggestions of satin in the luster and two small copper spots on the reverse, with that at the TE of STATES more visible. Housed in a green label holder. Population: 11 in 64, 1 finer (9/10). (#8753)
- 4926 1904-O MS62 PCGS.** This boldly struck and unblemished Motto ten provides unbroken satin luster and features original light khaki-gold toning. A pleasing representative of conditionally scarce New Orleans issue. (#8756)
- 4927 1907 MS64 PCGS. CAC.** A gorgeous yellow-orange near-Gem from among the last of the Liberty type. Well-defined with only small marks on the cheek, and housed in a green label holder. PCGS has graded just 13 coins finer (9/10). (#8763)
- 4928 1907-D MS63 PCGS.** Among the two Denver issues of Liberty tens, the 1907-D is scarcer than its 1906-D predecessor in nice Mint State. A lustrous apricot-gold example with moderate marks beneath the original toning. (#8764)

## PROOF LIBERTY EAGLE

1896 PR66 Ten Dollar

Ex: Trompeter

**4929 1896 PR66 PCGS. CAC.** The high quality of the production of proofs from 1896 and 1898 are well known, reaching a high-water mark in these years, thus making these dates the obvious choices for type collectors. The mintage for the 1896 proof ten was 78 pieces. Of that number there have been 46 submission events over the past 24 years to both of the major services. If one subtracts perhaps a quarter of that number as resubmissions that have not been removed from the population data, there should be around 34 individual pieces extant today. This is slightly higher than Akers and Breen's estimates from two to three decades ago of 20-25 pieces.

This is the Ex: Trompeter coin. The pedigree identifiers are unmistakable, even though it is not designated as such on the insert. What is curious is the lack of a Cameo or even Deep Cameo designation. The coin was designated as a Cameo when we handled it in 1999, and the contrast is strong between the fields and devices on each side. The physical description from 1999 is just as valid today and we repeat it here:

"This sparkling coin has incredibly deep mirrors that provide a nearly black backdrop to the frosted golden devices seen on each side. There are some light, almost imperceptible hairlines in the fields. The only visual distractions we see are a couple of tiny contact marks to the left of the 11th star, and an almost invisible scratch from the border to the right of the 6 in the date vertically to Liberty's hair curl."

This is a terrifically attractive coin and one that was a part of one of the premier collections of proof gold assembled in the past hundred years. Population: 1 in 66, 0 finer (9/10).

Ex: Trompeter Collection (Heritage, 1/1999), lot 8258. (#8836)

## INDIAN EAGLES

### 1907 Indian Head Eagle, MS63, No Periods

- 4930 1907 No Periods MS63 NGC.** The 1907 No Periods Indian Head eagle was the first regular-issue coinage of this design. The No Periods type was saved in large numbers by the public, and Mint State examples are not too difficult to locate today. The present coin is an appealing Select example, with medium greenish-gold surfaces and satiny luster. The coin is well struck, with just a little softness on the hair and headdress feathers. *From The Glenwood Landing Collection. (#8852)*

### 1907 Indian Eagle, MS64 First-Year Type Coin

- 4931 1907 No Periods MS64 NGC.** The year 1907 saw the first use of Saint-Gaudens Indian Head design on the ten dollar gold piece. The coin offered here is a splendid Choice example, with pleasing greenish-gold surfaces and strong satiny luster. As almost always seen on this date, the details are a little soft on Liberty's hair, but sharp on the peripheries. (#8852)

### Choice 1907 Indian Eagle No Periods, First Year of Design

- 4932 1907 No Periods MS64 NGC.** The 1907 No Periods Indian eagle is the first date of the popular design by Augustus Saint-Gaudens, and a popular first-year type coin. This specimen is an attractive Choice example, With the typical softness seen on Liberty's hair, but otherwise sharply detailed. The lustrous surfaces are a pleasing greenish-gold color. (#8852)

### Frosty 1907 No Periods Ten, MS64

- 4933 1907 No Periods MS64 PCGS.** After a brief production of With Periods coins destined for contemporary collectors, the Mint turned its attention to the No Periods Indian eagles with a mintage of just under 240,000 coins. The No Periods coins are effectively the first year of issue coins for type collectors. This near-Gem, housed in a green-label PCGS holder, is a lovely example with rich honey-gold luster and soft, frosty surfaces. (#8852)

### 1908-D Indian Eagle, MS63 Scarce No Motto Type

- 4934 1908-D No Motto MS63 PCGS.** The 1908-D No Motto Indian eagle is a low-mintage issue, with a reported production figure of 210,000 pieces. The present coin features blazing mint luster, with bright yellow-gold surfaces. The strike is always flat on this issue, but this piece shows more detail than the average specimen, especially on the reverse. Population: 77 in 63, 41 finer (9/10). (#8854)

- 4935 1908 Motto MS62+ PCGS.** Potent luster sweeps blended apple-green and sun-gold fields and devices. A good strike with any incompleteness limited to the highpoints of the eagle's plumage. One shallow mark near the mouth, otherwise well preserved. (#8859)

### 1908 Indian Eagle, MS64 First Date of the Motto Design

- 4936 1908 Motto MS64 NGC. CAC.** The 1908 With Motto Indian eagle is the first date of the design type. Consequently, the issue is a popular one with type collectors. This specimen is a Choice Mint State example, with greenish-gold surfaces and bright mint luster. The design elements are sharply rendered, with fine detail present on the hair and headdress feathers. (#8859)

---

**Delightful 1908 Motto Ten, MS65**

**4937 1908 Motto MS65 NGC.** With just over a third of a million pieces produced, the With Motto 1908 ten dollar issue has easy availability through a range of grades, including MS63 and MS64. By the MS65 level, though, it is clearly scarce, and there are not enough examples to meet demand. Nonetheless, the date occasionally becomes available in Gem, as offered here. The present coin has excellent detail on the hair over Liberty's ear, and the coin's yellow-gold luster is strong. Pleasingly preserved with only a few shallow marks and a hidden graze on the jawline. NGC has graded 43 pieces as MS66 or better (9/10). (#8859)

**4938 1908-D Motto MS61 PCGS.** A coruscating yellow-gold representative of the introductory Denver Motto issue. Nicely struck, and the only consequential bagmark is on the Indian's cheek. Conditionally scarce, more plentiful in AU than in Mint State. (#8860)

**4939 1908-D Motto MS61 PCGS.** Lustrous and unworn with lightly abraded fields and moderate marks on the cheek. The 1908-D is unexpected scarce in Mint State, given its initial mintage of 836,500 pieces. Presumably, much of the issue went into circulation, considering that nearly 300 examples have been certified as AU58 by either NGC or PCGS. (#8860)

---

**Select 1908-S Indian Eagle  
Vivid Color, Sharp Strike**

**4940 1908-S MS63 PCGS. CAC.** The 1908-S Indian ten dollar gold piece boasts an extremely small mintage of 59,850 pieces. The issue is rare today in all Mint State grades. The present coin is an attractive Select Mint State example, with razor-sharp definition on all design elements. The surfaces are a vivid greenish-gold color, with turquoise highlights on the reverse. Vibrant, frosty mint luster radiates from the finely granular surfaces. A few widely scattered minor abrasions on both sides explain the grade. Overall visual appeal is quite strong. Population: 39 in 63, 65 finer (9/10). (#8861)

---

---

### Brilliant 1909 Indian Eagle, MS63

- 4941 1909 MS63 PCGS.** Several Indian eagle issues are scarce or rare in higher grades, and one of those is the 1909, despite a mintage of 184,789 coins. That mintage actually ranks about in the middle of the series, 18th of 32 issues. This lovely example has frosty orange-gold surfaces with a few trivial marks on each side as one would expect for the grade. PCGS has only certified 94 finer pieces (9/10). (#8862)

---

### 1909 Indian Eagle, MS63+ Underrated Early series Date

- 4942 1909 MS63+ PCGS. CAC.** David Akers considers the 1909 Indian eagle a “grossly underrated issue”, especially in high grades. While MS63 specimens can be located with a little patience, anything finer is definitely scarce. Attractive Select pieces, like the present coin, are a good balance of quality and value. This coin is a pleasing greenish-gold example, with satiny luster, and a sharp strike. The high-end status of this specimen is confirmed by the plus designation. (#8862)

---

### Choice 1909 Indian Head Eagle Scarcer Philadelphia Issue

- 4943 1909 MS64 NGC. CAC.** The 1909 Indian Head eagle is a scarcer Philadelphia issue, with a mintage of 184,789 pieces. Examples in Choice Mint State condition are quite scarce on today's market. The present coin is a medium greenish-gold specimen, with a sharp strike, and vibrant mint luster. Census: 57 in 64, 30 finer (9/10). (#8862)

---

### Frosty Near-Gem 1909-D Indian Eagle Seldom Seen So Fine

- 4944 1909-D MS64 PCGS.** Mike Fuljenz's useful *Indian Gold Coins of the 20th Century* informs us:

“Unless you are a specialist in the series, it is surprising to learn just how scarce this date really is. Despite its relatively high mintage of 121,540, the 1909-D is a tough coin in any grade above MS63 and many experts regard it as one of the most undervalued Indian Head Eagles.”

In the near-Gem grade of the present coin, PCGS has certified only 30 examples, with a mere nine finer (9/10). Frosty luster abounds throughout both sides, with orange-gold predominating amid accents of yellow-gold. Minor signs of contact are consistent with the grade but completely undistracting. The mintmark is bold, and the reverse is choice for the grade. (#8863)

- 4945 1909-S AU58 PCGS.** Only the slightest traces of circulation can be detected on this attractive near-Mint Indian Head eagle. The surfaces are a pleasing greenish-gold color, with bright mint luster and boldly defined devices. (#8864)

---

#### Conditionally Scarce 1910 Eagle, MS65

- 4946 1910 MS65 NGC.** A satiny and brilliant Gem, this 1910 Indian eagle is a lovely specimen that is destined for an advanced cabinet of these coins. It is a plentiful issue in lower grades, but seldom encountered any finer. Only 48 coins have received a higher grade among all submissions to NGC, less than 1% of the total NGC population of 4,934 coins (9/10). (#8865)

---

#### Glittering 1910-S Eagle, MS64

- 4947 1910-S MS64 PCGS. CAC.** The 1910-S is one of the most cleverly concealed condition rarities of the Saint-Gaudens eagle series. As recounted in Garrett and Guth, *Encyclopedia of U.S. Gold Coins*: "Even in MS-64 this date is difficult to locate... Forget the reported mintage, virtually all were melted during the 1930s, and only a few thousand likely survive in all grades, but most of those are in circulated condition." This is a thoroughly delightful survivor, a trifle softly struck at the centers but with uncommonly intense yellow-gold luster. The surfaces are generally smooth aside from an abrasion just off the final A of AMERICA. Population: 25 in 64, 4 finer (9/10). (#8867)

- 4948 1911 MS64 NGC.** The surfaces of this Choice Mint State Indian eagle are an attractive orange-gold color, with strong hints of green. The design elements are sharply defined and the frosty mint luster adds to the considerable eye appeal. (#8868)

- 4949 1911 MS64 PCGS.** Well struck with softly frosted elements to the bright yellow-gold luster. Wispy marks appear on each side, but only a small dig to the left of Liberty's nose warrants individual mention. PCGS has graded 83 coins finer (8/10). (#8868)

---

#### Lustrous 1911 Indian Ten, MS65

- 4950 1911 MS65 NGC.** In 1911 the Philadelphia Mint coined more than half a million eagles, and NGC has graded 7,700 of those coins but only 64 of those are in grades finer than this coin (9/10). That means that only a small number of 20th century gold collectors can own a finer piece. Here is an excellent candidate for a complete collection or a type set. The surfaces are brilliant light yellow with frosty luster and only a few insignificant marks. (#8868)

---

#### Low-Mintage 1911-D Ten Dollar, AU55

- 4951 1911-D AU55 PCGS. CAC.** This famously low-mintage Saint-Gaudens eagle issue (production 30,100 pieces) is available for a price in the midrange circulated grades, though a coin as fine as this Choice AU example poses a greater challenge. Lightly rubbed on the high points with considerable wheat-gold luster remaining in the fields. Scattered abrasions contribute to the grade. (#8869)

---

#### Near-Mint 1911-D Indian Ten Appealing Luster and Color

- 4952 1911-D AU58 PCGS. CAC.** The 1911-D Indian eagle boasts a small mintage of 30,100 pieces, and the issue is rare in high grade. The coin offered here is a pleasing near-Mint specimen, with sharply detailed devices and lustrous, greenish-gold surfaces. Eye appeal is quite strong, as only the slightest signs of circulation are evident. (#8869)

**4953 1911-D—Obverse Damage—NGC Details. Unc.** A satiny apricot-gold example of this elusive low mintage Denver issue. “Damage” may be an overly harsh assessment of the three relevant obverse marks, respectively located near the nose tip and on the cheek and upper neck. (#8869)

**Gem 1911-S Indian Eagle  
Seldom Seen So Fine**

**4954 1911-S MS65 PCGS. CAC.** The 1911-S Indian eagle was produced to the unusually low extent of a mere 51,000 pieces, although the issue is overshadowed by its still-lower sibling, the 1911-D, which saw a mintage of 30,100 coins. Nonetheless the 1911-S is a well-respected series rarity, even despite the discovery in the 1970s of a small European hoard of 30-40 high-grade coins. Writes Mike Fuljenz in *Indian Gold Coins of the 20th Century*:

“The fact that there was a decent sized hoard of Gem 1911-S Eagles at one time should not deter the advanced collector from according this date a high level of respect. These coins have been long since dispersed and, today, no more than one or two Gems are seen at auction on an annual basis.”

The present specimen, with CAC sticker, is a marvelous representative of the issue. Abundant luster is the most obvious attribute, but virtually mark-free, mattelike surfaces and glorious apricot-gold coloration are equally impressive. Population: 22 in 65, 9 finer (9/10). (#8870)

**1912 Indian Eagle, MS65  
Outstanding Mint Luster and Color**

**4955 1912 MS65 PCGS. CAC.** The 1912 Indian eagle enjoyed a substantial mintage of 405,000 pieces, but the date is elusive in high grades today. Examples in Gem condition are rare. The present coin is an impressive Gem, with sharply detailed design elements. Liberty's tresses are particularly sharp. The surfaces are a vivid greenish-gold color, with orange and turquoise highlights. The exceptional mint luster is both vibrant and frosty, and eye appeal is outstanding. No mentionable distractions are evident. Housed in a green label holder. Population: 23 in 65, 10 finer (9/10). (#8871)

**4956 1912-S AU58 PCGS.** From a mintage of just 300,000 pieces, the 1912-S Indian eagle is a challenging date in high grades. The coin offered here is a well detailed near-Mint specimen, with much original mint luster. The surfaces are a pleasing greenish-gold, with orange highlights. (#8872)

**4957 1913 MS63 PCGS.** This attractive Select Mint State 1913 Indian eagle displays the sharp strike and vibrant luster this issue is known for. The surfaces are a surprising, delightful orange-gold color, unusual on this date, which usually comes in yellow or green-gold hues. From *The Glenwood Landing Collection*. (#8873)

**4958 1913-S AU55 PCGS.** A lightly circulated gold-orange example of this famous S-mint issue with a five-figure mintage. Rub is mostly on the high points, though the margins show abrasions and a few greenish overtones. A long mark is noted to the left of Liberty's lips. (#8874)

---

#### Low-Mintage 1913-S Indian Eagle, AU58

- 4959 1913-S AU58 PCGS.** From a small mintage of 66,000 pieces, the 1913-S Indian eagle is one of the rarest dates of the series in high grades. Pleasing near-Mint specimens, like the present coin, are scarce. The surfaces of this coin are lustrous, with attractive greenish-gold color and few abrasions for the grade. The strike is sharp throughout, and only the slightest touch of wear is evident on the design elements. (#8874)

---

#### Original 1913-S Ten, AU58+

- 4960 1913-S AU58+ PCGS. CAC.** A fully original yellow-gold example with dark high point toning and only a trace of rub on each side. The 1913-S had a mintage of 66,000 coins and ranks among the scarcer issues in the Indian eagle series. Full Mint State examples are decidedly rare. (#8874)

---

#### 1914-D Indian Head Eagle, MS64 Attractive Mintmarked Type Coin

- 4961 1914-D MS64 PCGS.** Although the 1914-D is considerably rarer than the 1910-D, it is still one of the most available mintmarked Indian eagles. The present coin would be an appropriate choice for a nice type or date set, as the population drops off drastically at the Gem level. This example is sharply struck, with light orange-gold surfaces, and frosty mint luster.  
*From The Glenwood Landing Collection.* (#8876)

---

#### Impressive 1914-D Indian Ten, MS64

- 4962 1914-D MS64 PCGS.** A condition rarity in the series from a mintage of 343,500 coins. Most surviving examples are AU or low level Mint State coins, while the present piece has a moderate number of peers and few finer pieces. PCGS has only graded 27 coins at higher levels (9/10). This near-Gem has frosty luster with light yellow obverse color and deeper orange-gold reverse color. the only noticeable marks are a few small ticks at the center of the obverse. (#8876)

- 
- 4963 1914-S AU58 NGC.** Lightly rubbed on the high points and faintly abraded, yet a charming near-Mint example of this underrated San Francisco issue. Ample yellow-gold luster remains in the fields. (#8877)

- 4964 1914-S AU58 NGC. Breen-7126.** The mintmark is lightly but widely repunched. This tan-gold better date Indian ten exhibits unbroken cartwheel sheen, but the forehead curls display a hint of wear. There are no distracting marks. (#8877)

---

#### Lustrous 1914-S Eagle, MS62

- 4965 1914-S MS62 PCGS. CAC.** A splendid Mint State piece is this 1914-S ten, relatively plentiful in lower grades but seldom seen any finer than this piece. Both sides have a hint of green on the brilliant and frosty yellow surfaces with a touch of deep steel toning. An excellent opportunity is presented to the advanced collector. (#8877)

---

**1914-S Indian Eagle, MS64  
Sharp Strike, Exceptional Luster**

- 4966 1914-S MS64 PCGS. CAC.** From a mintage of just 208,000 pieces, the 1914-S Indian Head eagle is a challenging date in higher grades. The present coin is a delightful Choice Mint State example, with an exemplary strike. This specimen shows unusually fine detail on the headdress feathers and Liberty's hair. Mint luster is also exceptional, vibrant and richly frosted. The surfaces are an attractive greenish-gold color, with hints of orange on the reverse. Overall eye appeal is outstanding. The difficulty of improving on the high quality of the present coin is underscored by data from the grading services. Currently PCGS has certified only 11 coins in higher numeric grades, while NGC has graded 15 examples at the Gem level or finer (9/10). (#8877)
- 

- 4967 1915 MS63 NGC.** The yellow-gold of the obverse takes on slightly deeper shadings on the reverse. A well-defined example for the issue with soft, yet pleasing luster. Modest abrasions preclude a finer designation.  
*From The Glenwood Landing Collection. (#8878)*

- 4968 1915 MS63+ PCGS.** This carefully preserved Philadelphia eagle is mostly lime-green with hints of straw-gold at the centers. The strike is crisp throughout, and no marks are remotely noticeable. (#8878)
- 

**1915 Indian Head Eagle, MS64+  
Extraordinary Eye Appeal**

- 4969 1915 MS64+ NGC.** Vivid greenish-gold surfaces, with a slightly granular texture, and satiny mint luster complement an exemplary strike to establish the high-end quality of this Choice Mint State Indian eagle. The present coin features abundant eye appeal, and may be conservatively graded at the Choice level. (#8878)
- 

**1916-S Indian Head Ten, MS62**

- 4970 1916-S MS62 PCGS.** The 1916-S Indian eagle was produced in large quantities and no more ten dollar coins were minted until 1920. The present coin is an attractive MS62 example, with pleasing orange-gold surfaces, accented by hints of green. The strike is sharp throughout and a few shallow scratches on Liberty's cheek account for the grade. (#8880)
- 

- 4971 1926 MS63+ PCGS. CAC.** A delightful combination of yellow and rose-gold visits the surfaces of this frosty and highly lustrous gold eagle. Few surface marks are noted of any kind on either side of this beauty. (#8882)

- 4972 1926 MS64 PCGS. CAC.** This Choice Mint State 1926 Indian eagle displays a razor-sharp strike and strong mint luster. The surfaces are a rich greenish-gold color, with highlights of rose. Outstanding eye appeal. (#8882)
- 4973 1926 MS64+ PCGS. CAC.** A frosty and delightful coin that puts the “near” in “near-Gem.” Pale yellow-gold surfaces are generally smooth with just a few shallow grazes. (#8882)
- 4974 1926 MS65 NGC.** This delightful Gem specimen shows impressive detail on all design elements and displays flashy, vibrant mint luster. The surfaces are a pleasing greenish-gold, and eye appeal is outstanding.  
*From The Glenwood Landing Collection. (#8882)*
- 4975 1932 MS64 NGC. CAC.** Pleasingly detailed with impressive satiny luster. This well struck and minimally marked near-Gem is an ideal selection for the 20th century gold type collector. (#8884)
- 4976 1932 MS64 PCGS.** Impressively detailed with a generally yellow-orange appearance that takes on bright peach attributes. Rewarding luster and great eye appeal for the grade. (#8884)
- 4977 1932 MS64+ NGC.** A satiny honey-gold near-Gem that boasts a sharp strike and minimally marked surfaces. The 1932 is the sole collectible gold issue of any denomination from its decade, and was apparently exported in large quantity to the safety of European bank vaults. (#8884)
- 4978 1932 MS64+ NGC. CAC.** Vibrant luster and a bold strike affirm the quality of this green-gold Indian eagle type coin. No bagmarks are evident, and luster grazes are elusive save for a few on the right reverse field. (#8884)
- 4979 1932 MS65 PCGS.** The surfaces of this delightful Gem are an attractive mixture of greenish-gold and orange hues. The design elements are sharply defined throughout and the mint luster is frosty and vibrant. (#8884)

#### Impressive MS65+ 1932 Indian Eagle

- 4980 1932 MS65+ NGC.** Lemon-gold overall with glimpses of peach within the upper reaches of the headdress. This highly lustrous type coin is nicely struck and has a gorgeously smooth obverse field. Faint marks are limited to the area near the top of the eagle's breast. A wonderful series representative. (#8884)

## LIBERTY DOUBLE EAGLES

### Lustrous AU53 1850 Double Eagle

- 4981 1850 AU53 NGC.** While the unique pattern 1849 double eagle has become a legend from its place in the National Numismatic Collection, the issues of 1850 were the first double eagles released into commerce. This example circulated only briefly, and while both sides are moderately abraded, the fields around the well struck devices retain considerable yellow-gold luster. (#8902)

### 1850 Liberty Head Double Eagle, AU55 First Date of Denomination

- 4982 1850 AU55 NGC.** The 1850 Liberty Head double eagle is always popular as the first year of the denomination, and high grade examples are ardently pursued by type collectors, as well as double eagle specialists. The present coin is a lightly circulated, well struck specimen, with just a touch of softness evident on the central devices. The surfaces are greenish-gold, and display much original mint luster. The surfaces show the usual number of minor abrasions for the grade. (#8902)

---

**1851 Double Eagle, AU58**  
**Large Mintage, Low Survival Rate**

- 4983 1851 AU58 PCGS.** The huge influx of gold from California was utilized in a massive mintage of over 2 million double eagles in 1851. The issue circulated heavily, and few examples were saved, as coin collecting did not become widely popular in this country until 1857. In spite of the enormous production total, high grade examples are quite rare today. The present coin is lightly circulated, and shows a little softness in the details of the central devices. The surfaces are a light greenish-gold color, with hints of rose. Much original mint luster is still evident. (#8904)
- 
- 4984 1852 Repunched Date XF45 NGC. FS-301.** The repunching at the top of the date is visible to the sharp unaided eye. A lightly circulated example of the variety, still lustrous but with scattered abrasions on yellow-gold surfaces, including a cut in the upper obverse stars.
- 4985 1854 Small Date—Improperly Cleaned—NGC Details. AU.** This Type One twenty is bright from a cleaning that has left wispy hairlines and muted the color to pale gold. However, the design is bold and the sole noticeable mark is relegated to the reverse above the left (facing) wingtip. (#8911)

---

**1855-O Twenty, XF45**  
**Scarce Type One New Orleans Issue**

- 4986 1855-O XF45 PCGS.** Once the San Francisco Mint opened in 1854, mintage of double eagles in New Orleans dropped substantially. Only 13,500 pieces were coined from 1854 through 1856, including just 8,000 coins in 1855. While the 1854-O and 1856-O double eagles are both classic rarities, the 1855-O can be obtained with a little patience, yet fewer than 100 are thought to exist.
- The surfaces show vibrant green-gold color with faint traces of light orange. Both sides are noticeably abraded, a common characteristic of the rare 1855-O double eagle. Despite the surface marks, there are no individually significant blemishes that need to be described and the overall appearance is still quite acceptable. (#8915)
-

- 4987 **1855-S XF40 PCGS.** Housed in a green-label PCGS holder is an 1855-S double eagle with rich orange-gold toning. Remaining luster is prevalent and corresponds to Choice AU, but two obverse scratches explain the XF designation. (#8916)

**1856 Double Eagle, AU58  
Challenging Issue in High Grade**

- 4988 **1856 AU58 NGC.** The 1856 Liberty Head double eagle touts a mintage of 329,878 pieces, but most examples seen today are well-worn. The date is definitely more difficult to locate than other Philadelphia issues from the same period. The coin offered here is a near-Mint specimen, with lustrous orange-gold surfaces, and much original mint luster. This is a well struck specimen, with a touch of softness on Liberty's hair, and a scattering of minor abrasions on both sides. Census: 52 in 58, 25 finer (9/10). (#8917)

**Near-Mint 1857-S Double Eagle  
Famous as a Shipwreck Issue**

- 4989 **1857-S AU58 PCGS. CAC.** The 1857-S double eagle was a rare date in high grades before the discovery of the S.S. *Central America*, but many high quality pieces were recovered from that source. As a result of the increased interest occasioned by the treasure recovery, Jeff Garrett and Ron Guth have included the 1857-S among the 100 *Greatest U.S. Coins*. The present example is an attractive near-Mint piece, with orange-gold surfaces and bright mint luster. The design elements are sharply detailed except for the slightest touch of softness on the hair. Abrasions are minimal for the grade. (#8922)

**Choice 1857-S Liberty Head Twenty  
Ex: S.S. *Central America***

- 4990 **1857-S MS64 NGC.** Ex: S.S. *Central America*. An exciting Choice Mint State example from the famous "Ship of Gold." The pale yellow-gold interiors yield to a deepening orange color at the rims, while a sharp strike imparts crisp definition to all design elements. The surfaces display strong mint luster, and a few scattered, minor abrasions are evident, mostly on the obverse. From The Glenwood Landing Collection. (#8922)

**Magnificent S.S. *Central America* 1857-S  
Spiked Shield Twenty, MS66**

- 4991 **1857-S Spiked Shield MS66 PCGS. Variety 20A.** Ex: S.S. *Central America*. SSCA 4967. Few shipwrecks have captured the imagination of numismatists like the S.S. *Central America*. Then again, few shipwrecks have introduced an entirely new field to collectors (California assayers' bars) or created a new gold type issue overnight (the 1857-S double eagle). This is one of the grander 1857-S twenties recovered from that wreck, an immensely lustrous Premium Gem that has intense yellow coloration at the borders and paler straw-gold inner color. Exactly struck with smooth surfaces, an absolute delight that offers tangible history. Housed in a gold label holder. From The Glenwood Landing Collection. (#70000)

---

Select 1857-S Bold S Double Eagle  
Ex: S.S. Central America

- 4992 1857-S Bold S MS63 PCGS. Variety 20B.** Ex: S.S. Central America. SSCA 3060. An attractive Select example of the famous 1857-S double eagle issue, salvaged from the wreck that made it famous. Lightly abraded yellow-gold surfaces show areas of whitish-gray color, most prominently at the peripheral obverse. Comes with outer box and book-style case, along with certificate of authenticity. An ideal piece for the shipwreck-interested collector or the numismatist seeking a pre-1866 double eagle for a type set. (#70001)

---

Pleasing 1858-O Double Eagle, VF30

- 4993 1858-O VF30 PCGS.** Housed in a green-label PCGS holder is a mid-range Choice VF 1858-O double eagle with greenish-gold surfaces and delicate ice-blue toning on both sides. The surfaces are lightly marked, but void of the usual heavy bagmarks that so often plague this issue. The Large O mintmark on the reverse is high and barely misses the eagle's tail. (#8924)

---

Elusive Mint State 1860 Double Eagle

- 4994 1860 MS60 PCGS.** While this Type One issue is not particularly elusive in most circulated grades, the date is very scarce at the Mint State levels inclusive. Though this well struck example shows moderate to heavy abrasions on each side, the yellow-orange luster is scarcely dimmed. Population: 8 in 60, 40 finer (9/10). (#8929)

---

Near-Mint 1861 Double Eagle  
Popular Type Issue

- 4995 1861 AU58 PCGS.** The 1861 Liberty Head twenty is an available date, and the first choice of type collectors seeking an example of the Type One double eagle. The present coin is a well struck, lightly circulated example with greenish-gold surfaces graced by strong hints of rose color. (#8932)

---

## Impressive 1861-O Double Eagle, AU53

**4996 1861-O AU53 PCGS. CAC.** The New Orleans Mint produced half dollars and double eagles in the first few months of 1861 before Louisiana seceded, with additional examples struck under State authority and still more under Confederate authority. Mintage figures for each government are known including 5,000 double eagles for the United States; 9,750 for Louisiana; and 2,991 for the Confederate States. Those mintage figures derive from the *Annual Report of the Director of the Mint* for the fiscal year ending June 30, 1887.

Only one obverse die was used for the entire mintage of 1861-O double eagles, in combination with reverse dies that remained from previous years. Despite substantial study of die states, it is still uncertain which coins were struck under each different government. Some pieces have a weak date, others have a strong date, and some of the strong date coins have a die crack from the rim over star 2, extending inward toward Liberty's chin.

In his 2006 revision of the *Gold Coins of the New Orleans Mint: 1839-1909*, Doug Winter provides a plausible theory that the weak date coins were struck first, the strong date coins next, and the strong date coins with the obverse die crack last. His observations indicate that about one-fifth of all 1861-O double eagles offered at auction show the strong date with the obverse die crack, and that those coins correspond to the 2,991 coins struck under Confederate authority.

Two years earlier, in *A Guide Book of Double Eagle Gold Coins*, Dave Bowers discussed coins with a hand-strengthened or patched 8 in the date, suggesting that the patched 8 feature might be a key to identification of the Confederate issue. Clearly more study and discussion is needed.

The present specimen clearly shows the patched 8 feature in the date. However, we are unprepared to state that this is a Confederate issue. Bowers suggests that it *might* be. Winter suggests otherwise. This highly lustrous example has bold design features with lovely honey-gold surfaces. Traces of prooflike reflectivity remain in the protected areas. A small scrape near stars 4 and 5 is the only noticeable imperfection on an otherwise wonderful green-gold representative. Population: 9 in 53, 21 finer (9/10). (#8934)

- 4997 1861-S AU50 NGC. This olive-gold double eagle has pleasing definition and lacks any distracting marks. Traces of luster are particularly prevalent on the reverse. The absence of an intercontinental railroad ensured that the West Coast economy was isolated from the calamities of the Civil War. (#8935)

1865 Liberty Head Double Eagle, MS61  
Ex: S.S. Republic

- 4998 1865 MS61 NGC. Ex: S.S. Republic. This delightful Mint State survivor from the famous shipwreck displays tremendous mint luster and pinpoint definition on all design elements. The surfaces are a vivid yellow-gold color, and eye appeal is outstanding. A reported 320 specimens of this date were recovered from the wreck, accounting for virtually all high grade examples known today. From The Glenwood Landing Collection. (#8943)

SAN FRANCISCO.

Lustrous Select 1865-S Twenty Dollar  
From the S.S. Brother Jonathan

- 4999 1865-S MS63 PCGS. Ex: S.S. Brother Jonathan, #758. The 1865-S issue has emerged as the "other" Mint State Type One double eagle issue, after the 1857-S. It is not so widely distributed as the S.S. Central America treasure, but its presence in two prominent wrecks, the S.S. Republic and the S.S. Brother Jonathan (as seen here), ensure its availability, particularly relative to non-shipwreck San Francisco double eagles of the time. This is a lustrous Select coin, bright pumpkin-orange at the interiors with a shift to yellow at the borders. Softly struck on the first three stars but with pleasing detail elsewhere and only light, scattered abrasions. From The Glenwood Landing Collection. (#8944)

---

**Memorable MS61 1866-S Motto Twenty**

- 5000 1866-S Motto MS61 PCGS. CAC.** This first San Francisco Type Two double eagle issue, like other S-mints in the subtype, is a relatively common coin in the lower to midrange circulated grades, but by the AU55 level it is distinctly scarce, and Mint State coins are considerable condition rarities. This MS61 example has ample yellow-gold luster and a slightly dusky appearance overall with coppery areas on Liberty's hair behind the coronet and along the rims. Though moderately abraded, this is a coin of considerable visual appeal. PCGS has graded just 14 examples at the MS61 level and only six finer (9/10). (#8950)
- 

---

**1868 Double Eagle, AU58  
Scarce Date, Semiprooflike Surfaces**

- 5001 1868 AU58 PCGS. CAC.** Only 98,575 double eagles were coined at the Philadelphia Mint in 1868, and the issue is scarce in any grade today. The present coin features semiprooflike surfaces, with rich orange-gold color, and scattered minor abrasions on both sides. Traces of light wear are evident on Liberty's hair, but most of the original detail remains. Population: 24 in 58, 8 finer (9/10). (#8953)
- 

---

**1869-S Liberty Head Double Eagle, AU58  
Scarce Issue in High Grade**

- 5002 1869-S AU58 NGC.** A lustrous, well struck example of this popular Type Two double eagle, the surfaces of this attractive near-Mint piece are bright greenish-gold, with accents of rose. Only minor abrasions can be detected on the pleasing surfaces and eye appeal is quite strong. The 1869-S is scarce in AU58, and Mint State examples are rare. (#8956)
-

1871-CC Twenty  
A Sharply Struck, Choice XF Example

**5003 1871-CC XF45 PCGS. CAC.** The second-year double eagle issue from the Carson City Mint was about five times that of the first-year issue—17,387 pieces for the 1871-CC, compared to 3,789 coins for the 1870-CC—but the 1871-CC is still the second-rarest issue by a wide margin; most examples are well-circulated, often showing extensive contact marks as well. This piece shows abrasions that are less severe than usually seen, the only singular marks a couple near Liberty's mouth and in the left obverse field near star 5. The reverse is relatively unabraded, the strike is sharp, and attractive reddish-gold coloration further enhances the appeal. Population: 47 in 45, 29 finer (9/10). (#8961)

Frosty 1872-CC Liberty Twenty, AU55

**5004 1872-CC AU55 NGC.** The Carson City Mint was established only a few years after the city was established, with the primary role of easing the burden of silver mining companies in the area. During its brief history, gold coins were also an integral part of production with double eagles leading the way. In 1872 that facility produced \$538,000 in double eagles, and \$268,000 in all other denominations combined.

This desirable survivor has light yellow mint frost with nearly full luster that is only broken on the highest design points. Both sides have pleasing surfaces with only a few grade consistent abrasions. (#8964)

**5005 1873 Open 3 MS61 ★ NGC.** The obverse is prooflike, which explains the Star designation from NGC. The reverse has normal cartwheel luster. Minor marks are distributed, and we note an obverse rim ding at 5:30. Type Two twenties are scarce in Mint State. (#8967)

### Elusive 1873-S Closed 3 Twenty, MS61

- 5006 1873-S Closed 3 MS61 PCGS.** Although this piece falls at the lower end of the Mint State grade range, it is still a desirable condition rarity. In fact, PCGS has only graded 20 examples of this variety in higher grades. This piece has myriad tiny abrasions, but none that are singular. It is frosty and lustrous with faint pink toning over its bright yellow surfaces. (#8969)

### Frosty Mint State 1873-S Twenty Dollar

- 5007 1873-S Open 3 MS61 NGC. CAC.** The 1873-S double eagle mintage is divided unevenly into the Closed (or Close) 3 and Open 3 varieties, with a total production of slightly more than 1 million pieces. The Open 3 is noticeably more elusive, with the certified populations suggesting that about three-eighths of the mintage is of that variety, with the Closed 3 constituting five-eighths. The frosted mint luster on this Mint State example is interrupted only by numerous small to medium-sized abrasions that explain the MS61 grade. The color is a pronounced orange-gold, and the strike is good for a Type Two twenty. Census: 34 in 61, 3 finer (9/10). (#8979)

- 5008 1874 MS60 PCGS.** This khaki-gold Type Two Uncirculated double eagle has vibrant luster and a bold strike. The fields exhibit myriad faint scuffs appropriate to the grade, and the cheekbone displays a bagmark. (#8970)

- 5009 1874-CC—Harshly Cleaned—NGC Details. AU.** This richly detailed Carson City double eagle has specks of struck-in grease on the portrait. The reverse displays freckles of reddish patina in protected areas. It appears the piece was harshly cleaned in an attempt to remove the specks and freckles. The pale tan surfaces display closely spaced multi-directional hairlines. (#8971)

### 1874-CC Double Eagle, AU50 Popular Mintmark Type Coin

- 5010 1874-CC AU50 ANACS.** The 1874-CC double eagle is an available issue, due to its large mintage of 115,085 pieces. Doug Winter estimates 1,500-2,000 examples survive in all grades, with 585-710 pieces in AU. The present coin is an attractive greenish-gold specimen, with hints of rose color. The surfaces are lightly abraded for the grade, and retain much original mint luster. The strike is typical of the 1874-CC, with significant softness on the central devices. (#8971)

**1874-CC Double Eagle, MS61  
Only Two Coins Certified Finer**

- 5011 1874-CC MS61 PCGS. Variety 1-A.** The 1874-CC Liberty Head double eagle claims a substantial mintage of 115,085 pieces, with a single variety known for the date. Doug Winter estimates a surviving population of 1500-2000 pieces, but almost all examples seen are in circulated grades. Winter postulates a Mint State population of only 12-15 coins. Current population data corresponds well with this, as PCGS has certified six coins in MS61, with one finer, while NGC has also graded six examples in MS61, with a single specimen finer (9/10).

The present coin is an attractive Mint State piece, with bright semiprooflike fields. The surfaces are a pleasing greenish-gold color and show few abrasions for the grade. The strike is sharp on the peripheries, but a touch of softness is evident on Liberty's hair. Eye appeal is quite strong. (#8971)

**Lustrous MS62 1875 Twenty Dollar**

- 5012 1875 MS62 PCGS.** A simply fantastic coin for what it is, an attractive MS62 example of a Type Two double eagle issue. Swirling yellow-gold luster shows occasional variations and a small copper spot just behind the hair bun. The most visible scrape is visible just below and to the left of the eagle's tail. PCGS has graded 54 numerically finer examples (9/10). (#8973)

- 5013 1875-CC AU53 PCGS.** This Carson City gold type coin has luminous sun-gold color and substantial remaining luster, especially on the reverse. The centers show minor incompleteness of strike. Marks are scattered but are inoffensive for the grade. (#8974)

**1875-CC Double Eagle, AU58+  
Favorite Mintmark Type Coin**

- 5014 1875-CC AU58+ NGC.** The 1875-CC double eagle was struck in large numbers, and the issue is extremely popular with mintmark type collectors. The present coin is a well struck example, with sharp detail in many areas, but some softness showing on the hair and left obverse stars. The lustrous surfaces are a light greenish-gold color, and only minimal abrasions are evident. The high-end status of this coin is confirmed by the plus designation. (#8974)

**1875-CC Double Eagle, MS63  
With Superior Eye Appeal**

**5015 1875-CC MS63 PCGS.** As the most abundant Liberty Head double eagle issue from the renowned Carson City Mint, the 1875-CC makes a superlative coin for the type collector looking for that “something extra” in a potential acquisition. The issue’s mintage was more than 110,000 pieces, in a year that preceded the peak production volumes for the massive Comstock Lode of silver and gold. This flashy specimen offers superior eye appeal, with minimal marks over well-struck orange-gold surfaces. Virtually the finest obtainable at either service, despite the generous mintage. Population: 25 in 63, 1 finer (9/10). (#8974)

**5016 1875-S MS61 NGC.** Uncommonly bold luster for this Type Two issue. Softly struck but with a distinctive patinated appearance on the obverse, which is most visible as milky color at the lower right. (#8975)

**1875-S Double Eagle, MS62  
Rare Issue in Higher Grades**

**5017 1875-S MS62 NGC.** The 1875-S claims a mintage of more than 1.2 million pieces, but most survivors grade in the VF-AU range. Examples in MS62 condition are quite scarce, and inspire spirited competition among series specialists. The present coin displays attractive greenish-gold surfaces and vibrant mint luster. The peripheral elements are strongly impressed, but a touch of softness is evident on Liberty’s hair. Both sides are moderately abraded for the grade. (#8975)

**1875-S Liberty Head Double Eagle, MS62+  
Large Mintage, Rare in High Grades**

**5018 1875-S MS62+ NGC. CAC.** The 1875-S double eagle was produced in large quantities, but the date was used heavily in foreign trade. Consequently, the high grade survival rate was low. The present coin is a delightful MS62+ survivor, with pleasing greenish-gold surfaces and bright mint luster. The strike is sharp in most areas, but a little softness shows on Liberty’s hair. The high-end status of this specimen is confirmed by the plus designation. Only 13 coins have been certified in higher numeric grades at NGC (9/10). (#8975)

**5019 1876 MS61 PCGS.** A bright yellow-gold Type Two twenty with considerable reflectivity in the fields. Better-defined than usual, though still soft on the portrait, with scattered moderate marks. (#8976)

**5020 1876 MS61 PCGS. Light Motto,** a curious reverse subtype coined only in 1876, and only at Philadelphia. The facility also struck the usual Heavy Motto subtype that year. This is a lustrous Uncirculated example with just one noticeable mark between the jaw and the bust tip. (#8976)

**5021 1876 MS61 NGC.** Well-defined with a surprising level of reflectivity in the fields, though not quite to Prooflike levels. Yellow-gold with numerous small scrapes that combine to account for the grade. (#8976)

**5022 1876-CC—Improperly Cleaned—NGC Details. AU.** A well-defined example of the centennial Carson City double eagle issue. Lightly worn with uniform yellow-gold luster from a past cleaning, and a pair of reed marks appear on Liberty’s lower cheek. (#8977)

---

**Pleasing 1876-CC Twenty, AU58**

**5023 1876-CC AU58 PCGS.** The 1876-CC is a hoard coin that has just in recent years become available in better grades. This is an especially pleasing example that has bright surfaces with significant remaining mint luster. There is just a tad of friction in the fields—many might believe it to actually be Mint State. The devices are fully struck and there are no obvious or distracting marks on either side. (#8977)

**5024 1876-S MS61 NGC.** This powerfully struck Centennial-year twenty exhibits good luster and original lime and pumpkin-gold toning. Customary for the MS61 level, small abrasions are scattered throughout the obverse, although the reverse is only lightly marked. (#8978)

**5025 1876-S MS61 PCGS.** Struck from later-state dies that are cracked around almost the entirety of the reverse margins. A strongly lustrous yellow-gold survivor, orange-kissed and moderately abraded. (#8978)

---

**Bright MS62 1876-S Twenty Dollar**

**5026 1876-S MS62 PCGS. CAC.** The centennial year for America marked the end of the Type Two double eagles, as the 1877 issues had the denomination spelled out TWENTY DOLLARS instead. This is a boldly lustrous MS62 example, yellow-gold with an assortment of marks. Intriguingly, the depression behind Liberty's head has natural luster flow with the rest of the coin, suggesting a planchet flaw rather than a post-striking abrasion. (#8978)

---

---

**Scarce 1876-S Double Eagle, MS62**

**5027 1876-S MS62 PCGS. CAC.** As a class, the Type Two double eagles are the rarest in Mint State grades, due partly to the short 11 year use of the design, and partly to the absence of treasure containing these coins. Several treasure discoveries in the past couple decades have brought many thousand type one twenties to market, and large quantities of Type Three coins have been imported from European and South American holdings. The Type Two coins seem to be exempt from both of those surfaces.

This beautiful specimen has brilliant and frosty yellow luster with minor surface marks and faint striations on the obverse, remaining from planchet preparation. (#8978)

**5028 1877-S MS61 PCGS.** Scintillating luster shines beneath the vivid apricot-gold patina that covers both sides. Scattered grade-defining abrasions are not individually significant. The 1877-S is seldom seen above low mint state grades. (#8984)

---

**1878-CC Double Eagle, VF35  
Low-Mintage Key**

**5029 1878-CC VF35 NGC. CAC. Variety 1-A.** Only one die marriage was needed to produce the scant mintage of 13,180 coins. No distractions require individual mention on this pleasing, red-gold exemplar, and honest wear defines the grade. Dave Bowers, in his *Guide Book of Double Eagle Gold Coins*, opines that the 1878-CC "is one of the keys to the Carson City double eagle series." Only 25 coins have been certified in higher numeric grades at NGC (9/10). (#8986)

**5030 1878-S MS61 PCGS.** Unbroken cartwheel luster sweeps across the boldly impressed design of this conditionally elusive Type Three twenty. The reverse is free from any noteworthy marks, while the obverse is typically abraded. (#8987)

---

---

Conditionally Scarce 1878-S Twenty, MS62

- 5031 1878-S—Lamination on Obverse—MS62 NGC.** Despite a large mintage that approached 2 million coins, the 1878-S is an important condition rarity in the Liberty double eagle series. This boldly detailed piece has brilliant yellow luster with a single dark blemish above Liberty's head. While available from time to time in MS62, the 1878-S is rarely seen any finer. NGC has only graded eight finer examples, and PCGS has only certified seven better ones (9/10). (#8987)

---

1879-CC Double Eagle, AU53  
Low-Mintage Carson City Issue

- 5032 1879-CC AU53 PCGS. Variety 1-A.** The 1879-CC Liberty Head double eagle boasts a low mintage of 10,708 pieces, the fourth smallest production total of the series. Doug Winter believes perhaps 300-350 examples survive today in all grades, with approximately 60-80 specimens in AU. A single variety is known for the date.

The present coin is a pleasing AU53 example, with sharply impressed devices and a minimum number of abrasions for the grade. The surfaces are a bright greenish-gold color, with much prooflike reflectivity. Only slight traces of wear can be detected on the design elements. Eye appeal is strong. Population: 19 in 53, 46 finer (9/10). (#8989)

---

1879-S Double Eagle, MS61  
Nice Color and Luster

- 5033 1879-S MS61 PCGS.** From a mintage of 1.2 million pieces, the 1879-S Liberty Head double eagle is an available date in circulated grades, but it does become scarce in Mint State. The present coin is an attractive MS61 specimen, with pleasing greenish-gold surfaces and bright mint luster. The strike is sharp in most areas, but a little softness shows on Liberty's hair. (#8991)

---

1880-S Double Eagle, MS61  
Greenish-Gold Surfaces

- 5034 1880-S MS61 NGC.** The 1880-S Liberty Head double eagle enjoyed a large mintage of 836,000 pieces, but the issue was heavily circulated, and few examples were saved. Today, Mint State coins are quite scarce. The present coin displays sharply defined devices and vibrant mint luster. The surfaces are a vivid greenish-gold color, with strong eye appeal. A scattering of minor abrasions accounts for the grade. (#8993)

---

1880-S Twenty, MS61  
Well Struck and Lustrous for the Issue

- 5035 1880-S MS61 PCGS.** The 1880-S is scarcer than the mintage of 836,000 pieces would suggest, and most of the Uncirculated survivors top out at this grade level. This is an uncommonly lustrous and well-struck example for the grade and issue. The surfaces are reddish tinged with only small, scattered abrasions over each side. (#8993)

---

## Famously Rare 1882 Twenty, AU53 Only 571 Pieces Struck

**5036 1882 AU53 PCGS.** The 1882 double eagle is so rare that even the Smithsonian Institution, keeper of the National Numismatic Collection, lacks an example of this issue. While there are numerous double eagle issues from the late 1870s through early 1890s that boast extraordinarily low mintages, the 1882 is the absolute lowest-mintage of them all, at 571 coins.

Any representative of this issue, in *any grade*, is an extraordinary rarity.

The next-lowest mintage of the denomination in the 1880s is the 1885, produced to the extent of 751 coins—an increase of over 30% in comparison to the 1882. In fact, the 1882 double eagle has the lowest mintage of any circulation strike in the double eagle series, save for the 1861-P Paquet Reverse.

The 1882 double eagle is not only an issue with a remarkably low mintage to begin with, but its rarity is compounded because so few were saved. The handful of contemporary collectors who specialized in gold—and they were few and far between—preferred proof examples, which could be had from the Mint for a modest premium.

The reasons for the minuscule mintage are complicated. Mint officials had adopted a new policy to stimulate national demand for half eagles and eagles, according to Rusty Goe in *The Mint on Carson Street*.

“... double eagle output was decreased on a national scale as the Treasury implemented its new policy of expanding the distribution of \$5 and \$10 gold pieces.

“It was the Treasury’s conviction that if more gold coins in denominations less than twenty dollars were in reserve at Mint offices around the country, depositors would accept these coins in payment in lieu of waiting for additional double eagles to be struck.”

At any rate, the nation’s operating mints had other troubles, as they shouldered the enormous burden of Morgan silver dollar production in 1882, amounting to more than 27.5 million pieces at four facilities.

By contrast, only three mints struck double eagles at all, as New Orleans’ last twenty was the 1879-O. In 1882 San Francisco struck 1.13 million twenties, with nearly 40,000 in Carson City—and the legendary low mintage of 571 double eagles in Philadelphia.

The present AU53 example boasts light orange-gold surfaces that are highly reflective and semiprooflike, as expected. The piece is sharply detailed overall, with slight wear appearing on the high points. A scattering of handling marks and light abrasions on both sides is consistent with a short stint in circulation. Watch the bidder cards fly on this rare coin. Population: 2 in 53, 7 finer (9/10). (#8996)

**1882-CC Double Eagle, MS61  
Scarce Issue in Mint State**

**5037 1882-CC MS61 PCGS. Variety 2-B.** The 1882-CC Liberty Head double eagle enjoyed a mintage of 39,140 pieces, with two varieties known for the date. Noted gold specialist Doug Winter suggests perhaps 800-900 examples survive today in all grades, with 30-35 specimens in Mint State.

The present coin is a representative of Variety 2-B, with a leaning mintmark and the first C lower than the second. This piece is from a late state of the die, with a die crack that nearly encircles the reverse, running through the top of the letters in the legend and the denomination. This attractive Mint State example is sharply struck, with pleasing greenish-gold surfaces that show remarkably few abrasions for an MS61 coin. The vivid color combines with vibrant mint luster to produce outstanding eye appeal. Population: 26 in 61, 17 finer (9/10). (#8997)

**1882-S Double Eagle, MS62  
Sharp Details, Good Luster**

**5038 1882-S MS62 PCGS. CAC.** The 1882-S Liberty Head double eagle was produced in large numbers, but the issue circulated heavily and few examples were saved by collectors. While the 1882-S can only be called scarce at the MS62 level, any finer grade is definitely rare, and examples are quite expensive and difficult to locate. A nice MS62 example is an appropriate choice for most collectors. The present coin is sharply detailed and lustrous, with pleasing greenish-gold surfaces, and a moderate number of abrasions for the grade. (#8998)

**1882-S Double Eagle, MS62  
Rare in Higher Grades**

**5039 1882-S MS62 NGC.** This attractive 1882-S double eagle exhibits lovely greenish-gold surfaces, with highlights of orange, and strong mint luster. The design elements are sharply detailed, and the surfaces show a moderate number of abrasions for the grade. Currently, NGC has certified only 14 coins in higher numeric grades (9/10). (#8998)

**1883-CC Twenty, XF45  
A Choice Example for the Grade**

**5040 1883-CC XF45 PCGS. CAC.** The 1883-CC twenty is one of the more available Carson City double eagles and one of the few candidates for type purposes. This is a lovely example for the grade. The surfaces are bright orange-gold and there are significant traces of luster remaining around the devices. Well-defined for the grade with no obvious or detracting marks. (#8999)

---

**Outstanding 1883-S Double Eagle, MS63+**

- 5041 1883-S MS63+ PCGS.** Here is a sensational 1883-S Liberty double eagle, the only collectible issue of the year in Mint State grades. Philadelphia only coined proofs, and PCGS has only certified 62 Carson City pieces in all Mint State grades. This 1883-S is intricately detailed with frosty yellow surfaces and hints of light pink toning on each side. Population: 2 in 63+, 11 finer (9/10). (#9000)

---

**Splendid 1884-CC Twenty, AU58**

- 5042 1884-CC AU58 NGC. CAC.** The 1884-CC is one of the more available CC twenties, especially among pre-1890 issues. This is a splendid example that retains almost complete mint luster. The surfaces are just a bit dull from handling, which explains the grade. The striking definition is sharp overall and there are no detracting abrasions. (#9001)

---

**1884-CC Double Eagle, MS61  
Popular Carson City Type Coin**

- 5043 1884-CC MS61 PCGS.** A popular mintmark type coin, the 1884-CC double eagle enjoyed a substantial mintage of 81,139 pieces. Doug Winter estimates a surviving population of 100-150 examples in Mint State grades. The present coin is sharply struck, with strong mint luster and rich greenish-gold surfaces. Population: 72 in 61, 41 finer (9/10). (#9001)

---

**1884-S Liberty Head Double Eagle, MS63+  
Vivid Color, Strong Mint Luster**

- 5044 1884-S MS63+ PCGS. CAC.** The 1884-S double eagle claims a large mintage of 916,000 pieces, but the issue was heavily circulated in foreign trade channels during the 19th century. The 1884-S is rare in high grades today. The present coin is a high-end Select specimen, with sharply detailed design elements, vivid greenish-gold surfaces, and vibrant mint luster. Only 18 coins have been certified in higher numeric grades at PCGS (9/10). (#9002)

- 5045 1889-S MS62+ PCGS. CAC.** Pale yellow-gold with copper-spotting at the high points. An attractively lustrous coin, well struck with surface quality that comes close to Select status. (#9012)

---

**1889-S Liberty Head Double Eagle, MS63  
High Quality, Outstanding Eye Appeal**

- 5046 1889-S MS63 PCGS.** This 1889-S double eagle displays phenomenal eye appeal, with a razor-sharp strike, vibrant mint luster, and lightly abraded greenish-gold surfaces. This piece is definitely premium quality for the grade, and only 15 coins have been certified in higher numeric grades by PCGS and NGC combined (9/10). (#9012)

- 5047 1890 MS62 NGC.** This better date double eagle is evenly struck and has only its share of wispy grazes on the portrait and fields. Philadelphia mintages of twenties were uncommonly low between 1889 and 1892, corresponding to the Presidential term of Benjamin Harrison. (#9013)

- 5048 1890 MS62 PCGS.** An attractive lemon-gold example of this underappreciated low mintage Philadelphia issue. Generally lightly abraded, with marks a bit more noticeable on the eagle's shield and tail. (#9013)

---

1890-CC Double Eagle, AU55  
Popular Type Issue

**5049** 1890-CC AU55 NGC. CAC. A favorite of mintmark type collectors, the 1890-CC double eagle is an available date, from a mintage of 91,209 pieces. The present coin is well detailed for a Carson City issue, and the lustrous surfaces are an attractive orange-gold color. A scattering of minor, grade-consistent abrasions is evident on both sides. Eye appeal is quite strong. (#9014)

---

Near-Mint 1890-CC Double Eagle

**5050** 1890-CC AU58 NGC. CAC. Boldly impressed through the centers with only a touch of rub on the high points. Impressive yellow-orange luster thrives in the faintly mirrored fields. A copper streak that laces through the eagle's head adds visual interest to the reverse. A lovely near-Mint Carson City double eagle. (#9014)

---

In-Demand 1890-CC Double Eagle, MS62

**5051** 1890-CC MS62 PCGS. Although the 1890-CC is a high-mintage issue for the Carson City Mint, at 91,209 coins, it is a popular one as well, and most examples range from XF up to near-Mint State or so. AU examples are scarce, even though an occasional low-end Mint State coin appears. Choice and finer specimens are seldom offered. This MS62 example displays bright, semireflective fields, with even orange-gold color and a sharp (but not full) strike. Abrasions are minimal for the grade, with a modicum of widely scattered field marks. A popular type coin from the legendary Western mint. Population: 62 in 62, 5 finer (9/10). (#9014)

---

---

Mint State 1891-CC Double Eagle  
Sharp Strike, Strong Luster

**5052 1891-CC MS60 NGC.** Gold coinage at Carson City in 1891 tilted strongly toward the smaller half eagle and eagle denominations and away from the hefty double eagles that are so associated with that Old West facility today. The 1891-CC double eagle mintage amounted to just 5,000 pieces, and the date is a condition rarity in the various Mint State levels. The present piece has no trace of wear, and the orange-tinged yellow-gold luster is bold. While the sharply struck portrait and the fields show numerous fine abrasions, accounting for the grade, there are few marks of any individual significance, a refreshing change from the usual 1891-CC twenty dollar. Census: 9 in 60, 25 finer (9/10). (#9017)

---

---

Sharp 1892 Twenty Dollar, AU58+  
Low-Mintage 1890s Issue

**5053 1892 AU58+ PCGS.** The 1892 double eagle, mintage 4,430 pieces, is a member of a string of low-production issues from the Philadelphia Mint that span several years in the 1880s and 1890s. Mint State examples can be quite pricey when found, making this near-Mint example with PCGS' Plus kicker an interesting proposition. Abundant mint luster radiates from the orange-gold surfaces, and only the merest whisper of high-point rub separates this coin from Mint State. The light contact marks are consistent with an extremely short spate in circulation, and the strike is razor-sharp. Population: 1 in 58+, 24 finer (9/10). (#9019)

---

---

Well-Frosted MS62 1892-CC Twenty Dollar

- 5054 1892-CC MS62 PCGS. CAC.** The next-to-last double eagle issue from the legendary Carson City Mint, the 1892-CC saw a smallish production of only 27,265 pieces, a production nonetheless bolstered by continued heavy export demand for gold from whatever source—even a mint viewed as an unnecessary and expensive extravagance by many Washington politicians. This MS62 example displays superior mint frost, as one would expect from a CC-mint production, with semireflective fields and sharply struck surfaces overall. Minor scuffiness on Liberty's cheek is the primary deterrent to an even higher grade, but the fields are remarkably clean. Population: 43 in 62, 5 finer (9/10). (#9020)

---

1892-S Liberty Head Double Eagle, MS63  
Excellent Eye Appeal

- 5055 1892-S MS63 NGC. CAC.** A delightful, high quality Type Three double eagle, with vibrant mint luster and sharp striking details throughout. The present coin possesses attractive orange-gold surfaces, with a minimum number of minor abrasions for the grade. The visual appeal of this coin is exceptional. (#9021)

---

Final-Year 1893-CC Twenty Dollar  
Frosted MS62

- 5056 1893-CC MS62 PCGS.** The 1893-CC double eagle is perennially popular as the final issue of the denomination from the Carson City Mint. Once Grover Cleveland returned to the presidency in 1893, he set about closing the Nevada facility, as he felt it was an unnecessary extravagance and a waste of taxpayers' money. Cleveland felt that the San Francisco Mint was more than capable of handling the coinage needs of the West, and the hazards of shipping bullion from the Nevada mines to San Francisco had become much safer with better railroad service in that period. The luster on the present orange-gold piece is frosty throughout, and the strike is typically strong. The surfaces are attractive for the grade, with no deep or distracting marks on Liberty's face and neck. An excellent collector choice, seldom seen finer. Population: 92 in 62, 17 finer (9/10). Ex: ANA Signature (Heritage, 7/2005), lot 7772, which realized \$9,775. (#9023)

---

**Choice 1893-S Double Eagle  
Only One Coin Certified Finer**

**5057 1893-S MS64 NGC.** Although the 1893-S Liberty Head double eagle is easy to locate in lower Mint State grades, the date is rare at the MS64 level. Only one coin has been certified finer at either of the leading grading services, a PCGS graded MS65 specimen (9/10). The present coin is a marvelous Choice example, with lustrous greenish-gold surfaces and sharply detailed design elements. Census: 22 in 64, 0 finer (9/10). (#9024)

**5058 1895 MS64+ NGC. CAC.** The 1895 Liberty Head double eagle was minted in large quantities, and Mint State coins can be located without too much difficulty today. Even Choice examples can be found with patience. Trying to improve on the MS64+ grade of the present coin would be a daunting task, however, as only 11 coins have been certified in higher numeric grades by NGC and PCGS combined (9/10). The present coin is sharply detailed, with attractive orange-gold surfaces and vibrant mint luster. The high-end status of this coin is confirmed by the plus designation. (#9027)

**5059 1895-S MS63 PCGS.** A lovely lemon-gold representative of this collectible San Francisco issue. Luster dominates all areas, and the surfaces are only minimally abraded. A desirable addition to an advanced holding of double eagles. (#9028)

**5060 1895-S MS62 Prooflike NGC.** The fields display impressive reflectivity, despite the presence of minor marks that account for the grade. Precisely struck, and a rarity with both sides prooflike. Census: 6 in 62 Prooflike, 1 finer (9/10). (#79028)

---

**1897-S Liberty Head Eagle, MS65  
Only Three Coins Certified Finer**

**5061 1897-S MS65 PCGS.** From a large mintage of nearly 1.5 million pieces, the 1897-S Liberty Head double eagle is an available date in lower Mint State grades, but few examples survive at the Gem level. Current population data reveals PCGS has certified seven coins in MS65, with two finer, while NGC has graded eighteen Gem specimens, with a single coin in higher numeric grade (9/10).

The present coin is a magnificent Gem, with vibrant mint luster and pleasing greenish-gold surfaces. A few accents of rose color are evident, and only a few insignificant marks can be detected without a loupe. The strike is sharp in most areas, but just a touch of softness shows on the obverse stars. (#9032)

---

---

**1898-S Double Eagle, MS64+**

- 5062 1898-S MS64+ PCGS. CAC.** A delightful specimen of this popular date, with sharply defined design elements and vibrant mint luster. The pleasing orange-gold surfaces display hints of rose and green color. Only minor abrasions can be detected on both sides. The high-end status of this coin is confirmed by the plus designation. (#9034)
- 5063 1898-S MS64+ PCGS. CAC.** Smooth-cheeked with beautiful, satiny canary-gold luster. This is a marvelous coin that offers great eye appeal despite the wispy abrasions that leave it just short of Gem status. PCGS has graded just 86 finer examples (9/10). (#9034)
- 5064 1898-S MS64+ NGC. CAC.** The butter-gold toning gradually deepens to apple-green near the rims. This precisely struck double eagle exhibits potent luster and clean surfaces. The few relevant marks are limited to the area near the lower hair bun. (#9034)
- 5065 1899 MS64 PCGS.** Satin-frost luster characterizes this 19th century near-Gem double eagle. The yellow-gold reverse has two purplish copper spots, one below the A in STATES and the other between TWENTY and DOLLARS. PCGS has graded 14 coins finer (9/10). (#9035)
- 5066 1899 MS64 PCGS.** Bright luster with sun-gold variations on yellow and orange. A boldly struck piece from late in the 19th century. PCGS has graded 14 coins at the Gem level or better (9/10). (#9035)
- 5067 1899 MS64 NGC.** A satiny gold-orange near-Gem that shows slightly lighter color on the reverse, though also a touch of copper alloy at the left glory. Well struck with pleasing surfaces. NGC has graded just 69 numerically finer examples (9/10). (#9035)

---

**Tied for Finest Certified 1899 Twenty, MS65**

- 5068 1899 MS65 PCGS. CAC.** A boldly impressed late-19th century Gem with tantalizing color and luster. Frosty cartwheels blossom in gold-orange fields that show broad variations into yellow and deep peach. Minimally abraded save for a single small mark on the cheek. Population: 14 in 65, 0 finer (9/10). (#9035)
- 5069 1900—Reverse Lamination—MS61 NGC.** Although designated as a lamination by NGC, we believe that the slender 7mm depression is instead a strike-through, also of mint origin. It is located near the left border of the eagle's tail. Lustrous and boldly struck. The reverse is well preserved, but the grade is limited by abrasions on the cheek and forehead of the portrait. (#9037)
- 5070 1900 MS64 NGC. CAC.** A satiny turn-of-the-century piece, lightly patinated over yellow-orange surfaces that are slightly deeper on the reverse. Small scrapes at the truncation of the bust contribute to the grade. (#9037)
- 5071 1900 MS64 NGC. CAC.** Yellow-orange luster overall with a paler core area noted on the reverse. Strongly defined and satiny, a tempting turn-of-the-century double eagle selection. (#9037)
- 5072 1900 MS64+ NGC.** Booming butter-gold luster bathes this alertly struck turn-of-the-century double eagle. Close to the Gem level despite minor abrasions near obverse star 13 and a tick on the reverse rim at 3 o'clock. (#9037)
- 5073 1901-S MS62+ PCGS.** Yellow-gold interiors with a deepening toward orange at the margins. Moderately abraded on the cheek but well-defined with a copper spot at the bottom of the coronet. (#9040)

**Overlooked 1902 Double Eagle, MS63+  
Mintage 31,140 Business Strikes  
Sole Example So Graded at PCGS**

- 5074 1902 MS63+ PCGS. CAC.** The 1902 double eagle is a forgotten, overlooked entry in the the Liberty Head P-mint lineup, manufactured in the astonishingly low quantity of 31,140 coins. Compare that figure with the renowned 1909-O Indian half eagle, struck to the tune of 34,200 pieces, for a better appreciation of the 1902 twenty. The surfaces on this Select Plus coin are bright throughout, with semiprooflike fields and a good if not full strike. The level of abrasions is minimal for a Select coin, and this piece is high-end aesthetically and numerically. This is currently the sole MS63+ at PCGS, with eight MS64 and one MS66 finer (9/10). (#9041)

**Lovely 1902-S Double Eagle, MS63**

- 5075 1902-S MS63 PCGS. CAC.** An important date in the 20th century Liberty double eagle series, the 1902-S remains collectible in MS63, but is a condition rarity any finer. PCGS has only certified 63 finer coins since they began operations 24 years ago. This Select Mint State example is fully lustrous with frosty surfaces. A hint of green appears on each side. (#9042)
- 5076 1903 MS64 NGC.** Bold yellow-gold luster with glimpses of orange and a reddish area at the left obverse rim. Well-defined and appealing despite a few luster scrapes around the portrait. (#9043)
- 5077 1903 MS64+ NGC. CAC.** Well-defined with yellow-orange luster overall that occasionally veers to one of the two "pure" colors. A touch of copper appears at the faintly abraded truncation of the bust. (#9043)
- 5078 1903-S MS63+ PCGS. CAC.** The olive-green borders and canary-yellow centers correspond with the original color seen on many Federal gold coins from this era. The reverse is beautifully preserved, and the obverse is also pleasing for the designated grade. The mintmark is lightly entered, and the centers display minor incompleteness. (#9044)
- 5079 1904 MS64 NGC.** Bold yellow-gold luster with sharp detail. A near-Gem example of the popular type issue, copper-spotted in several places on and next to Liberty's portrait. (#9045)
- 5080 1904 MS64 PCGS. CAC.** The date may be familiar, but the deep lemon-gold toning and impressively smooth surfaces ensures exemplary eye appeal. Crisply struck, highly lustrous, and encapsulated in an old green label holder. (#9045)
- 5081 1904 MS64 PCGS.** A lustrous apricot-gold near-Gem of the popular Liberty twenty type. A bold strike and smooth surfaces ensure the quality.  
*Ex: Long Beach Bullet (Heritage, 2/2000), lot 532.* (#9045)
- 5082 1904 MS64+ NGC. CAC.** A boldly impressed coin that comes close to Gem status. If not for a depression on the truncation of the bust, this coin could be graded finer, for smoothness reigns on the rest of the yellow-gold surfaces. (#9045)
- 5083 1904 MS64+ PCGS. CAC.** Bright, slightly satiny canary to yellow-orange luster with uncommonly smooth fields. Without just one of the marks on Liberty's portrait, this would be a no-questions Gem. (#9045)

---

### Imposing Gem 1904 Double Eagle

- 5084 1904 MS65 PCGS. CAC.** This magnificent double eagle type coin has vibrant luster and rich canary-gold and lime toning. Refreshingly free from visible marks, and the strike is meticulous across all design elements. A plentiful issue, but premium quality examples are always in demand. Housed in an old green label holder. (#9045)

---

### 1904 Twenty, MS66 Distinctive Rose and Lilac Patina

- 5085 1904 MS66 PCGS.** The 1904 is widely recognized as the most available Liberty double eagle. Many thousands of pieces have been found in European bank vaults and repatriated over the years back to this country. As such it is not surprising that this date is an overlooked condition rarity. The surfaces on this piece are pleasing and satiny with an equal intermingling of rose and lilac on each side. In addition to the distinctive coloration perhaps this coin's most notable feature is the highly unusual lack of abrasions. The strike is also fully brought up on both obverse and reverse. Noticeably finer than even the usual MS65 example. (#9045)

---

### 1904-S Double Eagle A Colorful Gem Example

- 5086 1904-S MS65 PCGS.** Well-defined and a delightful Gem, the second highest-mintage of the Liberty double eagles and the S-mint counterpart to the famously available 1904. Strongly detailed with rich yellow-orange luster that shows windows of lavender and violet scattered in the fields. PCGS has graded just two numerically finer examples (9/10). (#9046)

---

### Frosty 1906 Liberty Twenty, MS63

- 5087 1906 MS63 PCGS. CAC.** A bold strike and frosty mint luster are evident on this brilliant yellow-gold example. Both sides have nearly full design definition and exceptional eye appeal. The 1906 double eagle is an elusive date in all grades, with a mintage of just 69,596 coins. Few examples exceed this piece, with just 32 finer PCGS graded coins (9/10). (#9049)

---

### Lustrous 1906-D Twenty, MS64+

- 5088 1906-D MS64+ PCGS. CAC.** An exceptional representative of the first Denver Mint issue, this near-Gem has frosty yellow-gold surfaces and sharp details, combining to create excellent aesthetic appeal. Although authorized more than 40 years earlier, the Denver Mint struck their first coins in 1906, and continues to produce coins today, more than a century later. Population: 2 in 64+, 8 finer (9/10). (#9050)

## PROOF LIBERTY DOUBLE EAGLES

### Remarkable PR65 Cameo 1904 Twenty

**5089 1904 PR65 Cameo PCGS.** For double eagle collectors, the date "1904" usually conjures up images of thousands upon thousands of type coins, back in the U.S. after an extended stay in European gold holdings. For *proof* double eagle enthusiasts, however, 1904 is important for a far different reason: it is the year that the mintage for proof twenties fell back into the double digits after reaching a then-high 158 pieces the year before. The production of 98 specimens in 1904, in turn, would not be reached again in the Liberty double eagle series.

Proof coins of 1902 to 1916, particularly the proof gold of 1902-1907, is noted for its usually seen "brilliant" surface style, which shows little to no contrast between fields and devices. The presence of appreciable frost, and thus a cameo effect, is unusual on these later dates and particularly prized when seen, especially on higher-graded representatives.

The moderate contrast on this Gem specimen sets it apart. Gold-frost devices are exquisitely detailed and surrounded by deep mirrors that sport rich honey-gold and orange hues. Occasional hints of light clouding in the fields and a few small peripheral defects combine to account for the grade, but the overall visual effect is remarkable. Between the impressive preservation and the uncommon level of cameo contrast, this proof gold beauty is a winner in every respect. Population: 6 in 65 Cameo, 0 finer (9/10). (#89120)

---

**Circulated Proof 1906 Double Eagle, PR55**  
**Deeply Mirrored Fields**

**5090 1906 PR55 PCGS.** One of Walter Breen's favorite ways to explain whether a coin was a proof or not is "It carries its own credentials." It was not a precise explanation, but it worked. This coin certainly carries its own credentials as a proof in spite of the fuzziness in the fields from obvious time in circulation. The fields show extraordinary depth of reflectivity, definitely unlike a prooflike business strike. Curiously there are a substantial number of circulated proofs known of the 1906, 10 in fact. Each side shows numerous small contact marks with other coins. The color is orange-gold and the striking details are complete throughout. Population: 3 in 55, 41 finer (9/10). (#9122)

---

---

**Cameo PR61 1907 Liberty Twenty Dollar**  
**Deeply Mirrored With Frosted Devices**

**5091 1907 Liberty PR61 Cameo PCGS.** Similar to the 1906, the 1907 proof twenty has several circulated and impaired proofs. However, the 1907 has half as many circulated pieces (5 for the 1907 vs. 10 for the 1906), but the 1907 is a much scarcer proof with a mintage of only 78 pieces. Probably 30-35 proofs are known today with most in the PR63-64 grade range. The fields of this coin show evidence of some rough handling in the past, but the numerous, small contact marks do little to inhibit the incredible depth of mirrored reflectivity seen on each side. The devices are noticeably frosted and present a surprising amount of cameo contrast on both obverse and reverse. Population: 1 in 61 Cameo, 14 finer (9/10). (#89123)

---

---

## Glorious 1907 Liberty Head Twenty, PR64 Cameo

**5092 1907 Liberty PR64 Cameo PCGS.** Any representative of the Liberty Head double eagle series in high-grade proof format is a glory to behold. The redesigned gold coins by Augustus Saint-Gaudens and Bela Lyon Pratt, which debuted in 1907 and 1908, respectively, had concave fields that were unsuited to the traditional proof gold format, and accordingly were given a matte texture (or textures, more accurately, that vary from year to year and sometimes coin to coin) quite unlike the earlier brilliant or semibrilliant proof finishes seen in the Liberty Head series.

As a last-year issue of the long-running Liberty Head design, this 1907 proof Liberty Head will likely possess extra appeal for type collectors. Breen's *Proof Encyclopedia* says tersely:

"Popular final year of the design, becoming appreciated as such. Date almost centered, slants up; 'broken nose' as in 1906. [Auction citation.] Many survivors are impaired. ..."

Only 78 examples of the 1907 Liberty Head were recorded to have been produced, and PCGS has never certified a Deep Cameo example of the issue. The present PR64 Cameo coin is at the lower end of the PCGS Condition Census for Cameo coins, tied with eight PR64 Cameo coins and bettered only by two in PR65 Cameo and one in PR67 Cameo.

At first glance, this coin's appearance suggests a considerably finer grade, a combination of the extremely reflective fields and well-frosted devices producing the gold-on-black contrast that proof gold aficionados admire—as well as anyone else with an ounce of aesthetic sensibility. Further perusal reveals a few wispy marks on Liberty's cheek and in the fields that may preclude an even finer grade, but certainly do not dampen the broad appeal. Population: 9 in 64 Cameo, 3 finer (9/10). (#89123)

## HIGH RELIEF DOUBLE EAGLES

### Uncirculated Details 1907 Wire Rim High Relief Twenty

- 5093 1907 High Relief, Wire Rim—Improperly Cleaned—NGC Details. Unc.** No trace of wear, though the pale yellow surfaces have subdued luster from a past cleaning. Nonetheless, this High Relief double eagle retains all of the majesty collectors have come to expect from the design, and the wire rim is prominent all the way around the obverse. A desirable and intriguing example. (#9135)

### Pleasing 1907 High Relief Twenty Wire Rim Format, MS63

- 5094 1907 High Relief, Wire Rim MS63 NGC.** This delightful Select Mint State piece survives from the initial production of Saint-Gaudens double eagles. Just over 12,000 High Relief pieces were minted and many of those still survive today. NGC and PCGS have certified more than 8,000 of the 12,000 coins minted but that figure undoubtedly includes multiple resubmissions. Despite a seemingly substantial population, examples appearing in auction venues always find willing buyers, meaning that demand remains greater than the existing supply.

The demand for this piece should be considerable, given its aesthetic appeal. Both sides are brilliant and bold with bright yellow surfaces and frosty luster. Minor surface marks are expected at this grade level with none of any particular consequence. (#9135)

---

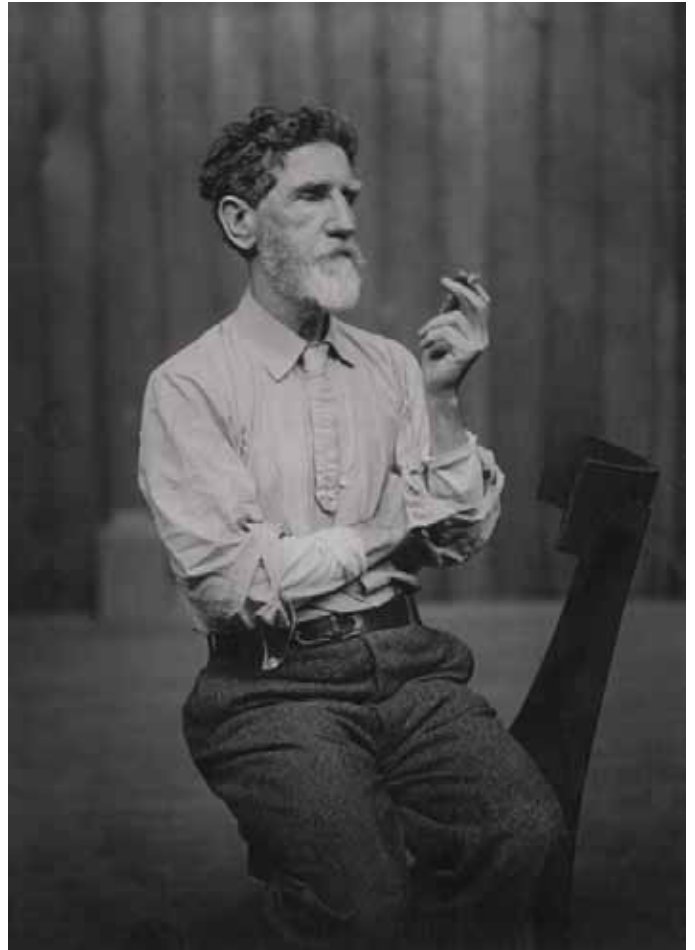

1907 Saint-Gaudens Twenty, MS63  
High Relief, Wire Rim

**5095** 1907 High Relief, Wire Rim MS63 PCGS. Struck in a limited mintage of 12,367 pieces, the 1907 High Relief Saint-Gaudens double eagle is a well-regarded issue by collectors of all disciplines. Acclaimed as the most beautiful regular-issue U.S. coinage design, the High Relief is on the want list of collectors who include no other gold coins in their collections. The issue is known in two major varieties, the Flat Rim and Wire Rim types, with this coin representing the more available Wire Rim variety, with a raised fin of metal around the coin's circumference. This feature was caused by metal flow between the die and collar, when the coin was struck. Although the wire edge was considered a flaw at the time of issue, it is quite popular with collectors today.

The present coin is sharply struck, except for a little softness on the sun on the reverse. Eye appeal is quite strong, with vibrant, satiny luster, and pleasing greenish-gold surfaces. (#9135)

---

---

1907 Wire Rim High Relief Twenty, MS65  
Extraordinary Quality and Satiny Luster

**5096 1907 High Relief, Wire Rim MS65 PCGS.** The dynamic quality and sheer beauty of the High Relief twenties can be explained by the personal credo of Augustus Saint-Gaudens:

"a sculptor's work endures for so long that it is next to a crime for him to neglect to do everything that lies in his power to execute a result that will not be a disgrace ... It is plastered up before the world to stick and stick for centuries, while men and nations pass away."

Several generations have passed and more than a century has gone by since these coins were produced, and yet their beauty and collectability not only endures but grows with each succeeding generation of collectors. The other commissions that Augustus Saint-Gaudens is most celebrated for, the Sherman Monument, the Shaw Memorial, and the Farragut Monument all commemorate Union heroes from the Civil War. While their artistry is still relevant today, the heroes that depicted are less well-known 140+ years after the end of the Civil War. However, the more abstract concept of Liberty, as embodied in the High Relief twenties from 1907, is one that is just as relevant to collectors and non-collectors today as it was more than a century ago.

This High Relief perfectly preserves that concept of Liberty in coin form with no visible imperfections. The thick, satiny mint luster shows a few tiny contact marks, but magnification is needed to discern them. Each side displays the usual light reddish cast, and the striking details are fully brought up throughout. (#9135)

## SAINT-GAUDENS DOUBLE EAGLES

### Premium Gem 1908 Double Eagle No Motto, Wells Fargo Hoard

**5099 1908 No Motto, Wells Fargo Nevada MS66 PCGS.** Short Rays obverse. The 1908 No Motto double eagle is extremely popular as the second date of a two-year design type. The coin offered here has an interesting pedigree as it was once a part of the famous "Wells Fargo Hoard." This example displays unusually sharp striking details, with exceptional mint luster, and vivid greenish-gold surfaces. Housed in a green label holder. (#9142)

**5100 1908-D No Motto MS64+ PCGS.** Long Rays obverse. A predominantly sun-gold near-Gem that has a narrow band of lime-green near the rims. Booming luster and minimally marked surfaces confirm the quality of this early Saint-Gaudens twenty. (#9143)

**5101 1908 Motto MS63+ PCGS.** A khaki-gold representative that has coruscating luster and a precise strike. Lightly abraded overall with a few unobtrusive marks on the sun. (#9147)

**5102 1908 Motto MS63+ PCGS. CAC.** A charming green-gold representative of the introductory Motto issue, which has a much lower mintage than its No Motto counterpart. Lustrous, well struck, and refreshingly unabraded save for a mark on the nose and a moderate abrasion within the plumage. (#9147)

### Choice 1908 Saint-Gaudens Double Eagle Less Available With Motto Issue

**5103 1908 Motto MS64 PCGS.** The 1908 Saint-Gaudens double eagle With Motto is less available than several other dates of the early series. While MS64 examples can be located with patience, higher grade pieces are rare. The present coin is an attractive Choice specimen, with sharply defined design elements, strong mint luster, and light orange-gold fields. (#9147)

### 1908 Saint Gaudens Double Eagle, MS64+ With Motto Type

**5104 1908 Motto MS64+ PCGS.** From a smaller mintage of 156,258 pieces, the 1908 Saint-Gaudens double eagle, with the motto IN GOD WE TRUST, is more difficult to locate than its counterpart without the motto. The present coin is a sharply struck specimen, with orange-gold surfaces, and bright mint luster. This coin is definitely high-end quality for the Choice grade level, as confirmed by the plus designation. (#9147)

### Frosty 1908 Motto Twenty, MS65

**5105 1908 Motto MS65 NGC.** After coining more than 4 million No Motto double eagles in 1908, the Philadelphia Mint produced just 156,258 With Motto pieces late in the year. Gem examples are rarely encountered, with a combined NGC and PCGS population of only 67 pieces, with just 20 finer examples. Although both sides have a few typical handling marks accumulated over many years, the surfaces exhibit frosty mint luster with rich yellow color. Wisps of pink patina visit the obverse of this Gem. The strike is sharp and the overall eye appeal is excellent. Census: 19 in 65, 10 finer (9/10). (#9147)

**5106 1908-D Motto MS64 PCGS.** The 1908-D Saint-Gaudens double eagle with Motto is a popular mintmark type coin. This attractive near-Gem specimen displays a razor-sharp strike, vibrant mint luster, and pleasing greenish-gold surfaces. (#9148)

**5107 1909 MS62 NGC. CAC.** From a mintage of 161,282 pieces, the 1909 Saint-Gaudens double eagle is an underrated issue in high grade. The present coin is a pleasing MS62 specimen, with satiny mint luster, sharply defined devices and greenish-gold surfaces. A scattering of minor abrasions on both sides explains the grade. (#9150)

---

#### Select 1909 Saint-Gaudens Double Eagle

**5108 1909 MS63 PCGS. CAC.** The 1909 Saint-Gaudens double eagle is a challenging date in high grades, but Select Mint State examples can be located with patience. The present coin displays pleasing orange-gold surfaces, with strong mint luster and few abrasions for the grade. Visual appeal is quite strong. (#9150)

---

#### Choice 1909 Saint-Gaudens Twenty Attractive, Underrated Issue

**5109 1909 MS64 PCGS. CAC.** David Akers believes the 1909 Saint-Gaudens double eagle is "one of the most underrated issues in the series at or above the MS-64 grade level." The present coin displays vibrant mint luster and a razor-sharp strike, as well as attractive greenish-gold surfaces. Only 25 coins have been certified in higher numeric grades at PCGS (9/10). (#9150)

---

#### Notable Near-Gem 1909/8 Twenty

**5110 1909/8 MS64 PCGS. FS-301.** As the only known overdate in the Saint-Gaudens double eagle series, this *Guide Book* variety has instant appeal regardless of grade. The condition-conscious collector will want to examine this near-Gem survivor, as the variety is scarce at the MS64 level and a rarity any finer. The present piece has strong luster that enlivens even yellow-gold surfaces that show just a touch of sun-orange. Both sides are well struck, though Liberty's torch hand is a trifle soft. Light abrasions on either side of Liberty's figure contribute to the grade. PCGS has certified just 20 higher-graded pieces (9/10). (#9151)

**5111 1909-S MS64+ PCGS. CAC.** A well-defined and satiny S-mint Saint-Gaudens twenty that comes mighty close to Gem status. Bold yellow-orange luster is the coin's greatest asset. (#9153)

**5112 1909-S MS64+ PCGS. CAC.** Flashy luster glistens beneath the delightful apricot-gold patina. The strike is sharp save for slight weakness on the highpoints of Liberty. An above-average specimen with only minor abrasions. (#9153)

**5113 1911 MS63 PCGS. CAC.** Considerable orange overtones enhance the yellow-gold main color on this Select piece. Lustrous with copper spots noted on the eagle's trailing feathers. (#9157)

**5114 1911 MS63 PCGS.** An especially fine Select representative of this underrated issue, the present coin displays sharply detailed devices and remarkably clean fields for an MS63 example. The surfaces are an attractive orange-gold color, with vibrant luster and strong eye appeal. (#9157)

**5115 1911-D MS65+ NGC.** The Normal D variety of this collectible pre-war issue. Olive-tinged margins frame the straw-gold fields and devices. Lustrous and boldly impressed with splendidly smooth surfaces. (#9158)

**Gem 1911-D/D Saint-Gaudens Double Eagle  
Repunched Mintmark, FS-501**

**5116 1911-D/D MS65 NGC. FS-501.** The 1911-D Saint-Gaudens double eagle is an available date in high grade and enjoys great popularity with type collectors. The present coin is an interesting variety, with a repunched mintmark. The underlying D shows plainly to the right of the primary mintmark. The surfaces of this delightful Gem are a light orange-gold color, with bright mint luster. The devices are sharply detailed throughout. (#145010)

**1911-S Saint-Gaudens Twenty, MS65  
Nice Color and Luster**

**5117 1911-S MS65 NGC.** While the 1911-S Saint-Gaudens double eagle can only be considered scarce in Gem condition, the issue is definitely rare in higher numeric grades. The present coin is a sharply detailed example, with greenish-gold surfaces, and orange highlights. Strong mint luster adds to the exceptional visual appeal. (#9159)

**Delightful 1911-S Twenty, MS65**

**5118 1911-S MS65 PCGS.** A delightful green-gold Gem that possesses vibrant luster and a pleasing strike, particularly on Liberty's face, torch fingers, and on the panes of the Capitol building. Skipping 1912, the next San Francisco double eagle was minted in 1913. PCGS has only graded 25 finer pieces (9/10). (#9159)

**5119 1913-D MS64+ PCGS. CAC.** Scintillating luster illuminates this fully struck canary-gold near-Gem. Marks are exceptionally few, and the eye appeal is excellent. The ideal grade to balance quality with value. (#9162)

**1913-D Saint-Gaudens Twenty, MS65+**

**5120 1913-D MS65+ PCGS.** David Akers considers the 1913-D Saint-Gaudens double eagle an underrated issue in high grade, as only 14 coins have been certified above the Gem level by PCGS and NGC combined (9/10). The present coin is sharply struck, with lustrous greenish-gold surfaces and no mentionable flaws. The high-end status of this coin is confirmed by the plus designation. (#9162)

**1913-D Saint-Gaudens Double Eagle, MS65+  
High-End Quality and Visual Appeal**

**5121 1913-D MS65+ PCGS.** Regarding the 1913-D double eagle, David Akers observes, "This is one of the more underrated Saint-Gaudens Double Eagles in high grades." The present MS65+ example would certainly be hard to improve upon. Currently, only five coins have been certified in higher numeric grades at PCGS (9/10). This coin displays sharply defined devices, with vivid greenish-gold color, and vibrant mint luster. The high-end status of this coin is confirmed by the plus designation. (#9162)

**1913-S Saint-Gaudens Double Eagle, MS62  
Low-Mintage, Early Series Better Date**

**5122 1913-S MS62 NGC.** Among early series issues, the 1913-S Saint-Gaudens double eagle is a better date, with a low mintage of 34,000 pieces. The present coin is sharply detailed in most areas, with a touch of softness showing on the Capitol building. The pleasing orange-gold surfaces are lustrous and lightly abraded for the grade, but a streak of dark color (possibly grease) is noted on the reverse. (#9163)

---

### Lovely MS64 1913-S Twenty

**5123 1913-S MS64 PCGS.** The second of the two famous low-mintage Saint-Gaudens double eagles, with one of the 34,000 pieces struck offered here. This orange-kissed yellow-gold near-Gem is well struck with attractive surface quality, though a handful of ticks on Liberty's legs preclude a finer designation. PCGS has graded just 22 coins at the Gem and finer levels (9/10). (#9163)

**5124 1914 MS62 PCGS.** The 1914 Saint-Gaudens double eagle boasts a low-mintage of just 95,250 pieces, and the issue is quite scarce in high grades. The present coin is a sharply struck MS62 example, with pleasing orange-gold surfaces and frosty mint luster. (#9164)

**5125 1914 MS63+ PCGS. CAC.** The 1914 Saint-Gaudens double eagle claims a small mintage of 95,250 pieces, and the date is rare in high grades. The present coin is a pleasing MS63+ example, with attractive orange-gold surfaces and strong mint luster. The strike is sharp throughout, and the surfaces are minimally abraded for the grade. (#9164)

**5126 1914-D MS65 PCGS.** A well struck olive-gold Denver Mint twenty whose lustrous fields and devices display only scattered minute contact. This issue is readily obtained in typical Mint State grades, but becomes a rarity above the MS65 level. (#9165)

**5127 1914-S MS65 NGC.** A popular choice among mintmark type collectors, the 1914-S Saint-Gaudens double eagle is not difficult to locate in Gem condition, but higher grade pieces are scarce. The present coin is an impressive Gem, with sharply defined devices, satiny mint luster, and pale greenish-gold surfaces.  
*From The Glenwood Landing Collection. (#9166)*

**5128 1915 MS63 PCGS. CAC.** The 1915 Saint-Gaudens double eagle boasts a low-mintage of 152,000 pieces. The present coin is an attractive Select specimen, with rich orange-gold surfaces and vibrant mint luster. All design elements are sharply detailed and eye appeal is outstanding. (#9167)

**5129 1915-S MS64+ PCGS.** Rich orange toning blankets this sharply struck, exceptionally lustrous, and lightly abraded near-Gem. An attractive representative of this perennially popular gold series. (#9168)

**5130 1915-S MS65 NGC. CAC.** Prominent yellow-gold luster with glimpses of orange at the margins. An attractive Gem example of this S-mint double eagle issue, unique among Saint-Gaudens twenties for not being the highest-denomination coin struck at its Mint that year (the Panama-Pacific fifties are 1915-S as well). (#9168)

**5131 1915-S MS65 NGC.** This 1915-S Saint-Gaudens double eagle features a sharp strike and outstanding eye appeal. The surfaces of this amazing Gem are a rich greenish-gold color, with hints of orange, and the mint luster is unusually vibrant for this issue.  
*From The Glenwood Landing Collection. (#9168)*

---

### Shining MS66 1915-S Twenty

**5132 1915-S MS66 NGC.** Above-average definition for this San Francisco issue with impressive surface quality. Orange overtones grace shining yellow-gold fields that show occasional dots of coppery alloy, as well as an intriguing line of the same that meanders through the lower left obverse field. NGC has graded only one Superb Gem survivor (9/10). (#9168)

**5133 1916-S MS65 PCGS. CAC.** A spectacular Gem example of this popular Saint-Gaudens type coin, the attractive greenish-gold surfaces of this coin are remarkably free of distractions. The strike is exemplary, imparting crisp detail to all design elements. The vibrant mint luster adds to the considerable visual appeal. (#9169)

**5134 1916-S MS65 PCGS.** This yellow-gold and apple-green Gem has vibrant luster and an intricate strike. No consequential abrasions are present, although wispy grazes are distributed. (#9169)

---

### 1916-S Twenty, MS66 Scarce and Popular in High Grade

**5135 1916-S MS66 PCGS.** The 1916-S has perennially been overlooked by collectors, but it is impossible to ignore the significance of this issue in MS66 condition. This is a magnificent coin. Fully struck and nearly abrasion-free, the frosted surfaces have the usual matte-like texture and rich rose tinted patina. A tiny alloy spot is located near the obverse rim at 10 o'clock. None are certified finer at PCGS (9/10). (#9169)

**1920 Saint-Gaudens Double Eagle, MS64+  
Underrated Condition Rarity**

- 5136 1920 MS64+ PCGS.** David Akers calls the 1920 Saint-Gaudens double eagle “the most underrated condition rarity in the entire 20th century U.S. gold series.” To underscore this point, only eight coins have been certified in grades above MS64 by PCGS and NGC combined (9/10). The present example is thus a coin of almost unimprovable quality, a high-end Choice specimen with a sharp strike, vibrant mint luster, and pleasing orange-gold surfaces. An unobtrusive grease spot at 6 o’clock on the obverse, and a few abrasions on Liberty’s arm can serve as pedigree markers. (#9170)

**Gem 1923 Saint-Gaudens Double Eagle  
Vivid Color, Vibrant Luster**

- 5137 1923 MS65 PCGS.** The 1923 Saint-Gaudens double eagle is an available date in lower Mint State grades, but examples in Gem condition are more elusive than generally realized. Improving on an MS65 specimen is almost impossible, as only four coins have been certified in higher numeric grades by PCGS and NGC combined (9/10). The present piece is a delightful Gem, with sharply defined devices, pleasing orange-gold surfaces, and vibrant mint luster. (#9175)
- 5138 1923-D MS65 PCGS.** Rich honey-gold toning drapes this lustrous and boldly struck Denver double eagle. The fields are well preserved, and the devices exhibit only moderate contact. Housed in an old green label holder. (#9176)
- 5139 1923-D MS66+ PCGS Secure. CAC.** Ex: Chicago Classics. Boldly impressed with gorgeous luster. Most of each side has a frosty “skin,” though the area around the A in DOLLARS has a brightly reflective appearance. A single mark in the left obverse field is the only barrier to a Superb Gem designation. PCGS has graded just 59 numerically finer pieces (9/10). (#9176)

**Stunning 1923-D Twenty, MS66+**

- 5140 1923-D MS66+ NGC. CAC.** Here is an amazing 1923-D Saint-Gaudens double eagle with vibrant and brilliant yellow luster hosting pale rose toning on both sides. The surfaces are entirely original and the design elements are boldly detailed. Only about one of every 140 coins certified have received the + designation. Census: 6 in 66+, 42 finer (9/10). (#9176)
- 5141 1924 MS65 PCGS.** An attractive Gem specimen of this available date, the surfaces are bright yellow-gold, with vibrant, frosty luster. The strike is razor-sharp throughout, and only the tiniest imperfections can be detected. (#9177)
- 5142 1924 MS65 NGC.** A delightful Gem, with pleasing yellow-gold surfaces, vibrant mint luster, and sharply defined design elements. The rims show a number of small nicks, and a few minor abrasions can be detected in the fields. (#9177)
- 5143 1924 MS65 PCGS.** Apricot-gold and lime toning enrich this crisply struck and lustrous Saint-Gaudens twenty. Attractively preserved, and ideal for a quality gold type set. (#9177)
- 5144 1924 MS65 PCGS. CAC.** Khaki-gold and apricot shades alternate across this lustrous and well preserved Gem. The strike is bold save for minor incompleteness on the dome of the Capitol building. (#9177)
- 5145 1924 MS65 PCGS. CAC.** A lovely yellow-gold Gem whose minimally abraded and lustrous surfaces combine for a good strike to provide pleasing eye appeal. A handsome addition to a quality gold type set. (#9177)
- 5146 1924 MS65 NGC.** A pleasing canary-gold example whose vibrant luster and unmarked fields attest to its status as a Gem. One tiny alloy spot near Liberty’s raised knee. Housed in a prior generation holder. (#9177)
- 5147 1924 MS66 NGC.** A spectacular Premium Gem example of this popular Saint-Gaudens double eagle. The lustrous surfaces of this piece are a pleasing yellow-gold color, with strong highlights of red. The strike imparts fine detail to all design elements, and the fields show only a few minor handling marks. (#9177)
- 5148 1924 MS66+ NGC.** A beautiful olive-gold high grade Saint-Gaudens twenty that provides shimmering luster and is essentially devoid of marks. We have seen a number of 1924 examples over the years, but the present piece surpasses the technical quality of nearly all of them. (#9177)
- 5149 1924 MS66+ NGC. CAC.** An intricately struck and highly lustrous double eagle. The fields are remarkably smooth, and contact is limited to inconspicuous grazes on the sun. (#9177)
- 5150 1924 MS66+ NGC.** A razor-sharp strike complements the vibrant mint luster and pristine fields to create a Premium Gem double eagle of outstanding quality. The high-end status of this coin is confirmed by the plus designation. (#9177)

---

**Two-Toned Near-Gem 1924-D Twenty Dollar  
Seldom Seen in Finer Grades**

- 5151 1924-D MS64 PCGS.** While the 1924-D is available for a price at the near-Gem level, it is an issue that is curiously *unavailable* in Gem condition, given the large recorded production exceeding 3 million coins. Currently PCGS has certified only eight examples in MS65 and three in MS66; NGC has certified nine in MS65 and one in MS66. Both figures are likely to contain duplicates and crackouts.

The memorable Phillip H. Morse Collection contained six examples of the 1924-D, with one each in MS65 and MS66. One reason for the paucity of high-grade examples is the tendency of many pieces to show strike weakness at the rims, from dies that were kept in service too long. The present lovely near-Gem piece is no exception, with some softness showing on the pillars of the Capitol, on the lower rock, and the olive branches. Lovely two-tone patina is compensation, with lilac and golden shades, and a few contact marks consistent with the near-Gem grade. (#9178)

---

- 5152 1925 MS65 NGC.** Blazing mint luster is the first outstanding attribute to be noticed on this magnificent Gem 1925 Saint-Gaudens double eagle. However, the incredible luster is matched by the exemplary strike that imparts exquisite detail to all design elements. The surfaces are an attractive yellow-gold color, completing the outstanding eye appeal of this spectacular coin. (#9180)

- 5153 1925 MS65 PCGS.** An impressive Gem whose smooth sea-green fields and unmarked pale peach devices display uncommon eye appeal. A sharp strike further ensures the quality. (#9180)
- 

**Lovely Select 1925-S Double Eagle**

- 5154 1925-S MS63 PCGS.** The 1925-S is proof that mintages are irrelevant when it comes to Saint-Gaudens double eagles from the 1920s. More than 3.7 pieces fell from the dies, but nearly the entire mintage simply reposed in Mint vaults until they were melted sometime after the 1933 Gold Recall. Among the survivors, a surprising number are in briefly circulated grades, perhaps due to improper storage or non-numismatic handling. The present lemon-gold piece has bright mint luster on both sides, with the reverse luster a bit more vibrant. Several small marks are seen on the obverse, none worthy of singular mention, while the reverse is quite attractive. Many numismatists begin collections of this series, but few manage to add mintmarked twenties issues aside from the common 1923-D. However, it is these issues that make such collections desirable. (#9182)
-

### Beautiful MS63 1925-S Double Eagle

- 5155 1925-S MS63 PCGS.** The recently released update to Akers' *Handbook of 20th Century United States Gold Coins* rates the 1925-S double eagle as number 13 in overall rarity, and number 5 in high-grade rarity, noting that even MS64 specimens are elusive. As confirmation, PCGS has certified only 25 survivors finer than the present coin—20 in MS64, two in MS65, and one each in MS66, MS67, and MS68 (9/10). The present beautiful specimen offers much aesthetic appeal, with a bold strike and excellent orange-gold coloration, despite the few minor contact marks that constitute the grade. (#9182)

### Fascinating 1926 Double Eagle, MS65 Tripled Die Obverse, FS-101

- 5156 1926 MS65 PCGS. Tripled Die Obverse, FS-101.** The tripling is most easily seen at the lower right part of the obverse, with the monogram below the date having an especially fancy appearance. It was only recently that PCGS assigned a separate coin number and began grading this variety, with only 29 pieces appearing on their population report. This lovely Gem has frosty yellow-gold luster with light orange toning on each side. Population: 12 in 65, 2 finer (9/10). (#9183)

### Appealing 1926-S Twenty, MS64

- 5157 1926-S MS64 PCGS.** The 1926-S saw a limited degree of circulation and distribution, and examples are available for a price even at the MS64 level, though anything finer is a condition rarity. This Choice coin has above-average detail and strong yellow-orange luster. Scattered small marks combine to account for the grade. PCGS has graded just 33 better pieces (9/10). (#9185)

### 1926-S Double Eagle, MS64+ Strong Eye Appeal

- 5158 1926-S MS64+ PCGS.** The medium greenish-gold surfaces of this attractive coin are free of mentionable distractions and display vibrant mint luster. All design elements are sharply defined, and the eye appeal is outstanding. The high-end status of this coin is confirmed by the plus designation. (#9185)
- 5159 1927 MS65 PCGS.** A sharply struck, lustrous Gem specimen of this popular date, the attractive yellow-gold surfaces of this piece are lightly abraded. A scrape on the Capitol dome and a light horizontal scratch on Liberty's thigh are all that prevent a higher grade. (#9186)

### 1927 Double Eagle, MS66+ ★ Incredible Overall Quality

- 5160 1927 MS66+ ★ NGC. CAC.** The 1927 Saint-Gaudens double eagle is an available date, and a popular type issue. The present example is a coin of surpassing quality, fully struck, with blazing mint luster, and virtually pristine greenish-gold surfaces. The high-end status of this specimen is attested by the star designation, further confirmed by the plus designation, and the grade is approved by the CAC sticker. (#9186)

---

**1927-S Twenty Dollar, MS64**  
**One of the Scarcest Issues in the Series**

**5161 1927-S MS64 NGC.** Once considered to be among the rarest Saint-Gaudens issues, the 1927-S is today still viewed as a key date in the series, if not in the “virtually impossible” category of the 1927-D and the (so far) near-uncollectible 1933-dated coins. Over the years Heritage has been privileged to offer quite a number of 1927-S double eagles. The finest we have ever offered was the MS67 NGC specimen that came from the Museum of Connecticut History (6/1995, lot 6027), one that brought \$181,500 back in 1995, a phenomenal price for that time (for a phenomenal coin) that was the finest certified. More recently that same 1927-S, crossed to an MS67 PCGS holder, brought \$345,000 in our auction of the Phillip H. Morse Collection (11/2005, lot 6698).

The 1927-S has always been a popular issue as well due to its association with the celebrated 1927-D double eagle, one of the rarest gold coins of the 20th century. We have also handled the 1927-D MS66 PCGS example from the Museum of Connecticut History (and others) on more than one occasion, most recently in our FUN auction where it brought \$1.495 million (1/2010, lot 2331).

While this near-Gem 1927-S is not quite in the same otherworldly class of those above, it is still extremely elusive at the MS64 grade level. This coin would fit well into a mostly Gem set with no apology. The total certified population at NGC and PCGS combined is 22 coins, with 18 finer—and both totals are certain to represent a few duplications.

The 1927-S as a rule comes sharply struck, and this example is no exception. The strike is uniformly bold throughout. Bright, radiant mint luster is the order of the day. Although a few small surface marks prevent a Gem grade, a glass is needed to detect them. A marvelous, lustrous example of this issue, one that is justly celebrated today. Census: 17 in 64, 11 finer (9/10). (#9188)

---

**5162 1928 MS65 PCGS. CAC.** A marvelously detailed strike is the outstanding feature of this spectacular Gem double eagle, but the booming mint luster and pleasing greenish-gold surfaces are almost as impressive. Eye appeal is tremendous. (#9189)

---

1931 Twenty, MS63  
Rarely Encountered End-of-the-Series Issue

**5163 1931 MS63 PCGS.** The 1931 Saint-Gaudens double eagle is one of the premier rarities in the 20th century U.S. gold series, and any auction appearance is a noteworthy, and frequently record breaking, numismatic occasion. The recent sale of the finest-known specimen, a stunning PCGS graded MS67 example, in the ANA Signature Auction (Heritage, 8/2010), lot 3650, realized \$322,000. While the present coin may not equal the fantastic quality of that piece, its appearance is sure to generate excitement among series enthusiasts.

The 1931 is one of the famous “late dates” of the series—coins that were primarily held in domestic banks and Treasury vaults from the day they were minted until the day they were melted, after the Gold Recall of 1933—whose mintage figures are meaningless in relationship to their availability today. The 1931 claims a huge reported mintage of 2.9 million pieces, but virtually all of this production was never released into circulation. Ground-breaking research by Dr. Charles W. Green in the 1940s suggests only 45 coins were actually released through official channels. It is certain that other examples were saved by Mint personnel and Treasury officials, who made a cottage industry of exchanging common-date double eagles for the 1931 dated coins, and selling the 1931s to Philadelphia and New York area coin dealers, but the supply has always been quite small. Noted gold specialist David Akers believes the 1931 is the sixth rarest coin in the 53-coin series, with a surviving population of 65 to 85 specimens in Mint State. The 1931 is almost always seen in Uncirculated condition. Current population data from NGC and PCGS suggests a slightly larger population, with a combined total of more than 115 submission events between them, but this figure is undoubtedly inflated by resubmissions.

The 1931 double eagles were well produced, with surprisingly good quality control for such a large mintage. The strike is usually sharp, and the luster is vibrant and frosty, and surface abrasions are seldom a problem. This holds true for this example. The softly frosted surfaces display a subtle interplay of rose and orange-gold color, and there are no singularly mentionable abrasions on either side. (#9192)

## TERRITORIAL GOLD

- 5164** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge—**Damaged**—NGC Details. XF. K-24, R.3. This moderately wavy Bechtler type coin has been tooled, whizzed, and cleaned to provide a uniform smooth appearance to the novice. Listed on page 365 of the 2011 *Guide Book*. (#10040)
- 5165** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge—**Damaged**—NGC Details. AU. K-24, R.3. This August Bechtler gold dollar is wavy and has one or two prominent laminations on each side, the largest of which spans from the flag of the prominent 1 to the border between 8 and 9 o'clock. Listed on page 365 of the 2011 *Guide Book*. (#10040)
- 5166** 1861 Clark, Gruber & Co. Quarter Eagle—**Improperly Cleaned**—NGC Details. AU. K-5, R.4. Wispy hairlines on the moderately bright fields confirm a past cleaning, but this pioneer gold coin is unmarked and minimally circulated. The centers are lightly impressed, due to the high relief portrait. Listed on page 382 of the 2011 *Guide Book*. (#10139)

## K-5 1851 Humbert 880 Thous. Fifty Dollar Reeded Edge, No 50, VF30

- 5167** 1851 Humbert Fifty Dollar, Reeded Edge, 880 Thous. VF30 PCGS. K-5, Low R.5. No 50 on Reverse. The 1851 Reeded Edge Humbert fifty is the first design that was issued after the transition from the cumbersome Lettered Edge pieces, with 50 D C on the obverse representing an even fifty dollars. The re-placement of the AUGUSTUS HUMBERT legend around the obverse rim, along with the reeded edge, eliminated several error-prone manual edge-stamping operations. This piece circulated to a considerable degree consistent with the VF30 grade—most visible in the central obverse—signifying how useful these coins were in a period when few smaller-denomination gold coins were to be had. A couple of rim bumps and minor abrasions are expected, but they are also less severe and numerous than usual. The surfaces show the typical subdued orange-gold coloration. Listed on page 368 of the 2011 *Guide Book*. (#10211)

**1851 Humbert Reeded Edge Octagonal Slug  
K-7, 887 Thous.**

- 5168** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous.—Surfaces Tooled—Genuine PCGS. K-7, R.4. The K-7 can be distinguished from the similar K-6 by the “ribbon” around the reverse edge being a bit closer to the engine turning in the center. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has the obverse damaged, reengraved, repaired, and cleaned. The eagle feathers, shield, and branch on the obverse are all unnaturally bold from the detailed reengraving. The field above the eagle is the most apparent area where repair has been effected, and the entire obverse is peppered with numerous small abrasions, most likely done to conceal the repair. The coin is unnaturally bright from cleaning, yet still retains tiny portions of mint luster around the devices. Each side has a green-gold color, and the only obvious (probably mint-caused) planchet depression is in the field just to the left of the left (facing) scroll. Listed on page 368 of the 2011 *Guide Book*.

**1851 Humbert Fifty Dollar Slug, VF Details  
Scarce Variety, K-6**

- 5169** 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous.—Damaged, Harshly Cleaned—NGC Details. VF. K-6, R.4. These spectacular slugs were produced by the U.S. Assay Office, acting as a provisional government mint under the auspices of Moffat & Co., with Augustus Humbert as assayer. The present coin is a well worn example, with several rim bruises and unnaturally bright surfaces. A scarce and interesting survivor from the halcyon days of the Old West.

**Historic 1851 Humbert Fifty Dollar Slug  
K-7, 887 Thous., VF25**

- 5170 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. VF25 PCGS. K-7, R.4.** Similar to the other .887 fifties from 1851, this variety differs by the positioning of the peripheral device on the reverse, which is set in from the rim and in smaller concentric circles. The importance of Humbert coinage is best expressed in the Kagin reference: "Many numismatists feel that since this provisional mint operated very much like a regular U.S. branch mint, that their issues should be considered regular U.S. coinage."

The surfaces of this piece show the usual heavy abrasions seen on this large-format gold coin. The peripheries show the typical strike weakness, with the centers better-defined. The surfaces are bright overall, with rich green-gold color. Listed on page 368 of the 2011 *Guide Book*.

Ex: Long Beach Signature (Heritage, 2/2008), lot 2858, which brought \$23,000. (#10214)

**1852 Humbert Ten Dollar  
Elusive K-10 Variety**

- 5171 1852 Humbert Ten Dollar Genuine PCGS. K-10, Low R.4.** The PCGS number ending in 98 suggests damage as the reason, or one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been heavily tooled in the fields. This greenish-gold specimen shows much original detail remaining on the devices, with bright mint luster.

*George Küner, engraver to various California Gold Rush private mints.*

1852 Humbert Fifty, K-11, 887 Thous.

Famous 1852 Assay Office Fifty Dollar "Slug"  
VF30, 900 Thous., Kagin-14

- 5172** 1852 Humbert Fifty Dollar, 887 Thous. Genuine PCGS. K-11, R.5. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been damaged and cleaned. We note a fairly severe rim bump at 8 o'clock on the obverse that has moved some metal, and some scrapes near the reverse rim at 12 o'clock (opposite the date). The surfaces display a brightness that is too uniform, the result of a cleaning, but much essential design integrity and appeal remain, consistent with our assessment of AU details. Multiple contact marks appear throughout. Listed on page 368 of the 2011 *Guide Book*.  
*From The Glenwood Landing Collection.*

- 5173** 1852 Assay Office Fifty Dollar, 900 Thous. VF30 PCGS. K-14, High R.5. A charming example of the legendary Gold Rush "slug," which dominated West Coast commerce from 1851 until 1856, when the nascent San Francisco Mint finally produced enough gold coins to meet demand. This piece has wear on the eagle's claws and central reverse, but the wings and lathe work show substantial detail. Traces of luster remain within the legends and wings, except for OFFICE OF, which is well worn. Small to moderate marks on each side correspond to the grade and hefty denomination. Listed on page 370 of the 2011 *Guide Book*. (#10019)

1853 Assay Office Twenty, AU Details  
900 THOUS., K-18

- 5174 1853 Assay Office Twenty Dollar, 900 THOUS.—Repaired—NGC Details. AU. K-18, R.2. These popular twenty dollar pieces were minted in large numbers between March and October of 1853. This example shows little actual wear, but some tooling is evident in the left obverse field. The devices retain much original detail and the lustrous surfaces are an interesting greenish-gold color. (#10013)

1855 Kellogg & Co. Twenty, AU Details  
K-3b Short Arrows Type

- 5175 1855 Kellogg & Co. Twenty Dollar—Improperly Cleaned—NGC Details. AU. K-3b, R.5. A well detailed example of this scarce variety, with unnaturally bright greenish-gold surfaces. These popular twenty dollar pieces were struck to the tune of 300,000 examples from early 1854 through 1855. The 1855 dated twenties were probably produced by Augustus Humbert, who replaced Richter in the Kellogg operation around this time. (#10225)

Late State 1849 K-4a Moffat Five, VF20

- 5176 1849 Moffat & Co. Five Dollar VF20 NGC. K-4a, R.4. This late die state example has a heavy die crack through the tops of FIVE DOL., with a branch through the E to the border. The extent of the die crack suggests a large mintage from a single die pair, and the R.4 rarity rating also suggests a significant survival rate. This green-gold piece has a few light hairlines and other imperfections, but presents a nice look despite considerable wear. (#10240)

Rare K-9 1855 Wass Molitor Fifty  
Details of XF

- 5177 1855 Wass Molitor Fifty Dollar—Re-Engraved, Polished—NGC Details. XF. K-9, R.5. The massive Wass Molitor fifty dollar gold coins are among the most coveted large-scale Territorial gold issues, and examples are rare regardless of condition. Grading this Wass Molitor fifty must have been a challenge, as the extensive re-engraving on Liberty's hair affects the level of visible detail on that side, and the polishing of the yellow-gold surfaces has effaced any luster clues. Judging by the remaining definition on the reverse, however, XF Details seems appropriate. A coin well worth considering for collectors who might consider the issue unobtainable otherwise.

## S.S.C.A. RELIC GOLD MEDAL

- 5178** 1855 SSCA Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. Struck September 6, 2001 per the counterstamp on the back. Gleaming surfaces are virtually perfect on this modern restrike, made out of gold taken from an S.S. *Central America* ingot. The piece comes in a plastic holder only; none of the usual accessories are present.  
From *The Glenwood Landing Collection*. (#10358)

## CALIFORNIA FRACTIONAL GOLD

- 5179** 1854 Liberty Octagonal 25 Cents, BG-105, R.3, MS65 PCGS. A simple but bold design. Heavily polished dies have wiped out a large chunk of Liberty's hair. Carefully preserved and a pleasing Gem. Population: 21 in 65, 5 finer (9/10). (#10374)
- 5180** 1854 Liberty Octagonal 25 Cents, BG-105, R.3, MS66 NGC. Mild to moderate reflectivity on understated butter-yellow surfaces. Much of Liberty's inner hair and part of the coronet space is polished away. Census: 1 in 66, 0 finer (9/10). (#10374)
- 5181** 1855 Liberty Round 25 Cents, BG-225, Low R.7, MS62 PCGS. The formidable rarity of BG-225 is undoubtedly due to its many die cracks, especially the heavy crack between Liberty's ear and the rim at 7 o'clock. This peach-gold Period One round quarter has a few thin marks on the left obverse, and these are all that limit the grade. Population: 3 in 62, 5 finer (9/10). (#10410)
- 5182** 1855 Liberty Octagonal 50 Cents, BG-309, R.5, MS63 PCGS. Pale yellow with considerable silver-green in the gold. A lovely Select example of this rare 50 cent octagonal die pair. Population: 7 in 63, 2 finer (9/10). (#10429)
- 5183** 1853 Liberty Round 50 Cents, BG-408, R.6, AU55 NGC. A lightly circulated example of this very rare type, yellow-gold with lavender to violet overtones on each side. Minimally abraded and strongly appealing. Census: 1 in 55, 1 finer (9/10). (#10444)

### 1853 Liberty Gold 50 Cent Piece, BG-416, MS64

- 5184** 1853 Liberty Round 50 Cents, BG-416, Low R.7, MS64 NGC. An important Period One California fractional gold 50 cent piece and one of only 10 to 12 surviving examples of the variety. This piece exhibits lustrous green-gold surfaces with only a few trivial marks on each side. Census: 2 in 64, 0 finer (9/10). (#10452)

### 1853 Liberty Octagonal Dollar, MS 64 Prooflike Scarce BG-505 Variety

- 5185** 1853 Liberty Octagonal 1 Dollar, BG-505, R.4, MS64 Prooflike NGC. This 1853 Liberty Octagonal dollar was produced by Frontier, Deviercy & Co. using a small head punch, similar to the punch used on their half dollar pieces. The present coin has glittering prooflike fields, and the central devices are well struck, but the peripheral legend and denomination are weak on the reverse. Census: 2 in 64 Prooflike, 1 finer (9/10). (#710482)
- 5186** 1853 Liberty Octagonal 1 Dollar, BG-519, Low R.4, MS62 PCGS. One dollar octagonals are among the most popular California fractional types, and this BG-519 example is a beauty. Bold yellow-gold luster on the obverse gives way to a softly spotted green-gold appearance on the reverse. Housed in a green label holder. Population: 26 in 62, 11 finer (9/10). (#10496)
- 5187** 1853 Liberty Octagonal 1 Dollar, BG-523, R.5, AU58 NGC. Just a touch of rub crosses the high points on this near-Mint example, a rare octagonal one dollar with Liberty head. Dusky yellow-orange surfaces show hints of violet. Census: 1 in 58, 3 finer (9/10). (#10500)
- 5188** 1853 Liberty Octagonal 1 Dollar, BG-530, R.2, MS63 PCGS. A shining Select example of this popular, relatively accessible Liberty octagonal one dollar issue. Pale canary-gold surfaces offer satiny luster. (#10507)
- 5189** 1855 Liberty Octagonal 1 Dollar, BG-533, Low R.4, MS62 PCGS. The broad fields of this octagonal one dollar piece are mildly reflective yellow-gold. While a number of wispy abrasions are present, the eye appeal is strong for the grade. Population: 16 in 62, 6 finer (9/10). (#10510)
- 5190** 1867 Liberty Octagonal 25 Cents, BG-709, R.4, MS65 NGC. Outstanding reflectivity in yellow-gold fields with considerable frostiness on the broad portrait. A small octagonal piece with mighty eye appeal. Census: 4 in 65, 6 finer (9/10). (#10536)
- 5191** 1869 Liberty Octagonal 25 Cents, BG-712, High R.4, MS65 PCGS. Generally well struck with greenish-gold luster emanating from both sides. A hair-thin mark is located under AR of DOLLAR. Population: 21 in 65, 5 finer (9/10). (#10539)

- 5192 1872 Liberty Octagonal 25 Cents, BG-726, High R.5, MS64 PCGS.** A luminous example of this rarer small octagonal variant. Surfaces are generally butter-yellow with significant lime accents. As always for BG-726, the central reverse displays bluntness, although the strike is sharper than on the Breen-Gillio Second Edition plate coin. Population: 5 in 64, 0 finer (9/10). (#10553)
- 5193 1873 Liberty Octagonal 25 Cents, BG-728, R.3, MS66 PCGS.** A high-end example of this relatively available (though still scarce) octagonal quarter dollar issue. Strongly struck with bold yellow-gold luster and impressive preservation. Population: 24 in 66, 2 finer (9/10). (#10555)
- 5194 1866 Liberty Octagonal 25 Cents, BG-740, Low R.6, MS63 PCGS.** Ex: Bass. Lemon-gold with peripheral suggests of ruby-red. The central reverse exhibits the incompleteness of strike characteristic of the series, but no marks are evident. Population: 6 in 63, 2 finer (9/10).  
Ex: *Isadore Herman, 11/1973; Harry W. Bass, Jr. Collection, Part I (Bowers and Merena, 5/1999), lot 2532.* (#10567)
- 5195 1868 Liberty Round 25 Cents, BG-806, R.3, MS66 PCGS.** This Premium Gem has unusually rich color, deep butter-yellow with none of the typical green-gold. Satiny texture and great eye appeal. (#10667)
- 5196 1872 Liberty Round 25 Cents, BG-814, High R.5, MS65 PCGS.** A Liberty Round 25 cents that has remarkable frost on the broad portrait. Great mirrors through the reverse, green-gold and pale. Population: 4 in 65, 0 finer (9/10). (#10675)
- 5197 1878/6 Indian Round 25 Cents, BG-883, High R.4, MS65 Prooflike NGC.** Considerable reflectivity in the fields and ample contrast. This is a well-preserved Gem with a strongly struck and frosted portrait. Census: 4 in 65 Prooflike, 0 finer (9/10). (#710744)
- 5198 1881 Indian Round 25 Cents, BG-887, R.3, MS66 Prooflike NGC.** Impressively mirrored with prominent contrast, particularly on the obverse with its large portrait. A carefully preserved example of this diminutive issue. Census: 2 in 66 Prooflike, 0 finer (9/10). (#710748)
- 5199 1869 Liberty Octagonal 50 Cents, BG-907, Low R.5, MS65 PCGS.** Dusky yellow-gold with aspects of violet, particularly on the reverse. Pleasingly preserved with considerable eye appeal. Very scarce to rare. Population: 11 in 65, 8 finer (9/10). (#10765)
- 5200 1880 Indian Octagonal 50 Cents, BG-954, Low R.4, MS65 PCGS.** The fully mirrored fields appear unabraded, and the strike is consistently sharp throughout the design. The central reverse displays tiny strike-throughs and faint roller marks, all as made. Population: 12 in 65, 2 finer (9/10). (#10812)
- 5201 1867 Liberty Round 50 Cents, BG-1007, High R.4, MS65 PCGS.** A delightful light yellow-gold representative, this fractional gold half dollar has frosty luster with reflective fields and traces of pale green patina. Population: 9 in 65, 1 finer (9/10). (#10836)
- 5202 1870 Liberty Round 50 Cents, BG-1010, R.3, MS66 PCGS.** A remarkable butter-gold Premium Gem of this popular Period Two variety. The strike is above average, and there is no indication of post-strike contact. Population: 1 in 66, 1 finer (9/10). (#10839)

**Prooflike 1876 BG-1061 Indian Half Dollar, MS63**  
**From the Kenneth W. Lee Collection**  
**The Discovery Coin for the Variety**

- 5203 1876 Indian Round 50 Cents, BG-1061, High R.7, MS63 NGC.** In the second edition of *California Pioneer Fractional Gold*, exactly four examples of this rarity were enumerated. This piece is an exact match for the plate in the January 1992 Bowers and Merena sale of the Texas Collection, with an earlier provenance to Kenneth W. Lee. **It is the discovery specimen for the variety.** An irregular strike on a minutely warped planchet, this piece had deep green-gold surfaces with prooflike fields and frosty design motifs. Three of the four pieces are all similar quality, so it is hard to say exactly where this piece falls in the Condition Census, but as the discovery coin does it really matter? An extremely important opportunity is presented to the California Fractional Gold specialist. (#10890)
- 5204 1880/70 Indian Round 50 Cents, BG-1067, Low R.4, MS64 PCGS.** Profoundly reflective fields give this round Indian 50 cent eye-popping appeal. Great striking characteristics and preservation. Population: 25 in 64, 6 finer (9/10). (#10896)

**Remarkable 1860 BG-1102 Gold Dollar, MS65**

- 5205 1860 Liberty Octagonal 1 Dollar, BG-1102, R.4, MS65 NGC.** This early Period Two California gold dollar was issued by Frontier, Deviercy & Co., a firm that operated from 1853 to 1864, producing a variety of small gold pieces. This example is an amazing Gem with prooflike surfaces and splashes of iridescent toning. It is remarkably well preserved and will grace the finest collection. Census: 2 in 65, 0 finer (9/10). (#10913)
- 5206 1869 Liberty Octagonal 1 Dollar, BG-1106, High R.4, MS62 PCGS.** Great reflectivity with characteristically pale green-gold surfaces. Both obverse and reverse show a number of die cracks. A great octagonal one dollar. Population: 23 in 62, 10 finer (9/10). (#10917)

## INGOTS

- 5207 San Francisco Mint 4.91 Ounce Silver Ingot.** This small-sized ingot has the oval stamp of the mint at the top and it is just off the right edge a bit. The top side reads: San Francisco oval imprint / 544 / 999.75 / FINE. On the back side the weight is given as 4.91 with OZS punched in upside-down. The sides have no imprints. The bright silver surfaces show a bit of light reddish toning on all faces. The ingot measures 31 x 52 x 8 mm. An attractive, problem-free small-sized ingot.
- 5208 San Francisco Mint 9.94 Ounce Silver Ingot.** This well-made, medium-sized ingot has the oval mint imprint perfectly centered at the top of the front side. The imprint is followed by / 537 / 999.75 / FINE. The sides are free from imprints. The back has 9.94 / OZS (OZS is in unusually large letters). The top side is bright and appears to have been rubbed, perhaps from handling, while the back side lacks this brightness. Light gray patina overall. The ingot measures 31 x 51 x 18 mm.
- 5209 San Francisco Mint 25.04 Ounce Silver Ingot.** This larger-sized silver ingot has an oval mint imprint at the top followed by / 524 / 999.75 FINE. The sides are clear, and the back is stamped: 25.04 / OZS (like the medium-sized ingot, OZS is unusually large). The ingot is slightly trapezoidal and the surfaces are bright with light tinge of gray-rose. A gas bubble on the top side looks at first like a digit 1, but it is just a random gas depression. The ingot measures 40 x 71 x 24 mm.

### *End of Session Three*

# SESSION FOUR

Heritage Live!™, Internet, Fax, and Mail Only  
Saturday, October 30, 2010, 10:00 AM CT, Lots 8001-10172  
Dallas, Texas

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots  
To view full descriptions, enlargeable images and bid online, visit HA.com/1145  
Viewing for lots in this Session will only be available in Dallas.

## SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live™, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

**8052** 1723 Hibernia Farthing, DEI GRATIA—Corroded—ANACS. VF30 Details. W-12550. NGC Census: (4/57). PCGS Population (1/184). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8053** 1723 Hibernia Farthing, DEI GRATIA—Corroded—ANACS. VF30 Details. W-12350. NGC Census: (4/57). PCGS Population (1/184). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8054** 1723 Hibernia Farthing, DEI GRATIA VF30 ANACS. W-12550. NGC Census: (4/57). PCGS Population (1/184). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8055** 1723 Hibernia Farthing, DEI GRATIA VF30 ANACS. W-12350. NGC Census: (4/57). PCGS Population (1/184). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8056** 1723 Hibernia Farthing, DEI GRATIA VF30 ANACS. W-12350. NGC Census: (4/57). PCGS Population (1/184). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8057** 1723 Hibernia Farthing, DEI GRATIA—Corroded—ANACS. VF30 Details. W-12350. NGC Census: (4/57). PCGS Population (1/184). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8058** 1723 Hibernia Farthing, DEI GRATIA VF35 ANACS. W-12290. NGC Census: (2/55). PCGS Population (4/180). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8059** 1723 Hibernia Farthing, DEI GRATIA—Improperly Cleaned—NGC Details. XF. Martin 3.3-Bc.3, R.1. NGC Census: (8/47). PCGS Population (15/165). (#176)  
Purchased from Hutter (10/19/1954).  
From the W. Philip Keller Collection of U.S. Colonials.

**8060** 1723 Hibernia Farthing, DEI GRATIA XF40 NGC. NGC Census: (8/47). PCGS Population (15/165). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8061** 1723 Hibernia Farthing, DEI GRATIA XF40 NGC. NGC Census: (8/47). PCGS Population (15/165). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8062** 1723 Hibernia Farthing, DEI GRATIA XF40 ANACS. W-12550. NGC Census: (8/47). PCGS Population (15/165). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8063** 1723 Hibernia Farthing, DEI GRATIA—Corroded—ANACS. XF40 Details. W-12290. NGC Census: (8/47). PCGS Population (15/165). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8064** 1723 Hibernia Farthing, DEI GRATIA XF40 ANACS. W-12290. NGC Census: (8/47). PCGS Population (15/165). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8065** 1723 Hibernia Farthing, DEI GRATIA XF45 NGC. NGC Census: (7/40). PCGS Population (18/147). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8066** 1723 Hibernia Farthing, DEI GRATIA XF45 ANACS. W-12255. NGC Census: (7/40). PCGS Population (18/147). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8067** 1723 Hibernia Farthing, DEI GRATIA—Improperly Cleaned—NGC Details. AU. NGC Census: (3/37). PCGS Population (18/129). (#176)  
From the W. Philip Keller Collection of U.S. Colonials.

**8068** 1723 Hibernia Halfpenny VG10 ANACS. W-13470. NGC Census: (0/138). PCGS Population (1/406). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8069** 1723 Hibernia Halfpenny VG10 ANACS. W-13120. NGC Census: (0/138). PCGS Population (1/406). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8070** 1723 Hibernia Halfpenny VG10 ANACS. W-13120. NGC Census: (0/138). PCGS Population (1/406). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8071** 1723 Hibernia Halfpenny VG10 ANACS. W-13470. NGC Census: (0/138). PCGS Population (1/406). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8072** 1723 Hibernia Halfpenny Fine 12 ANACS. W-13120. NGC Census: (1/137). PCGS Population (7/399). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8073** 1723 Hibernia Halfpenny Fine 12 ANACS. W-13120. NGC Census: (1/137). PCGS Population (7/399). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8074** 1723 Hibernia Halfpenny—Corroded—ANACS. Fine 12 Details. W-13120. NGC Census: (1/137). PCGS Population (7/399). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8075** 1723 Hibernia Halfpenny Fine 12 ANACS. W-13470. NGC Census: (1/137). PCGS Population (7/399). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8076** 1723 Hibernia Halfpenny Fine 15 ANACS. W-13120. NGC Census: (2/135). PCGS Population (6/393). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8077** 1723 Hibernia Halfpenny Fine 15 ANACS. W-13470. NGC Census: (2/135). PCGS Population (6/393). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8078** 1723 Hibernia Halfpenny VF20 ANACS. W-13120. NGC Census: (0/135). PCGS Population (16/377). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8079** 1723 Hibernia Halfpenny VF20 ANACS. W-1312. NGC Census: (0/135). PCGS Population (16/377). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**8080** 1723 Hibernia Halfpenny VF20 ANACS. W-13470. NGC Census: (0/135). PCGS Population (16/377). (#180)  
From the W. Philip Keller Collection of U.S. Colonials.

**9065 1964-D MS65 Full Steps PCGS.** Ex: Compadore Collection. PCGS Population (25/3). NGC Census: (4/5). (#84076)

## PROOF JEFFERSON NICKELS

**9066 1942-P Type Two PR67 NGC.** NGC Census: (342/19). PCGS Population (305/12). Mintage: 27,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$170. (#4180)

**9067 1950 PR67 Cameo PCGS.** PCGS Population (35/0). NGC Census: (52/6). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR67: \$520. (#84182)

**9068 1952 PR66 Cameo PCGS.** PCGS Population (85/131). NGC Census: (35/186). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$73. (#84184)

## EARLY HALF DIMES

**9069 1794 PCGS Genuine.** The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 7,700. (#4250)

**9070 1794—Damaged—ANACS. VG8 Details.** LM-4. NGC Census: (1/118). PCGS Population (3/158). Mintage: 7,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$1,275. (#4250)

**9071 1795 PCGS Genuine.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 78,600. (#4251)

**9072 1795 AG3 PCGS.** PCGS Population (6/499). NGC Census: (1/335). Mintage: 78,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3: \$519. (#4251)

**9073 1795—Damaged—ANACS. Good 4 Details.** LM-10. NGC Census: (4/331). PCGS Population (7/492). Mintage: 78,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$850. (#4251)

**9074 1795—Plugged—NGC Details. VF.** LM-10. NGC Census: (4/307). PCGS Population (29/388). Mintage: 78,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$2,525. (#4251)

**9075 1796—Damaged—ANACS. Good 4 Details.** LM-1. NGC Census: (0/58). PCGS Population (0/74). Mintage: 10,230. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$1,000. (#4254)

## BUST HALF DIMES

**9076 1830—Artificial Toning—NGC Details. Unc.** LM-14. NGC Census: (5/369). PCGS Population (10/291). Mintage: 1,200,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$350. (#4277)

**9077 1833 AU50 ANACS. LM-8.** NGC Census: (8/466). PCGS Population (27/410). Mintage: 1,370,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$200. (#4280)

**9078 1834 Reversed 3—Damaged—ANACS. XF40 Details.** LM-1. NGC Census: (6/502). PCGS Population (13/462). Mintage: 1,480,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$145. (#4281)

**9079 1834 AU55 PCGS.** PCGS Population (52/357). NGC Census: (18/458). Mintage: 1,480,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$240. (#4281)

**9080 1834 AU58 ANACS. LM-2.** NGC Census: (83/375). PCGS Population (62/295). Mintage: 1,480,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$300. (#4281)

**9081 1834 MS63 NGC.** NGC Census: (88/194). PCGS Population (81/136). Mintage: 1,480,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$725. (#4281)

**9082 1837 Large 5C Genuine PCGS.** The PCGS number ending in .GN suggests an unknown reason why PCGS deemed this coin not gradable. LM-3. Ex: Classic Coin Collection. *From The Classic Collection.*

## SEATED HALF DIMES

**9083 1837 No Stars, Large Date (Curl Top 1) PCGS Genuine.** The PCGS number ending in .92 suggest Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 1,405,000. (#4311)

**9084 1837 No Stars, Large Date (Curl Top 1) AU50 ANACS.** NGC Census: (18/882). PCGS Population (36/625). Mintage: 1,405,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$325. (#4311) *From The Diotte Collection.*

**9085 1837 No Stars, Large Date (Curl Top 1) AU50 ANACS.** NGC Census: (18/882). PCGS Population (36/625). Mintage: 1,405,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$325. (#4311)

**9086 1837 No Stars, Large Date (Curl Top 1) MS63 NGC.** NGC Census: (125/466). PCGS Population (129/238). Mintage: 1,405,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$800. (#4311)

**9087 1837 No Stars, Large Date (Curl Top 1) MS63 PCGS.** PCGS Population (129/238). NGC Census: (125/466). Mintage: 1,405,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$800. (#4311)

**9088 1838 Large Stars, No Drapery AU55 PCGS.** PCGS Population (40/375). NGC Census: (18/556). Mintage: 2,225,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$155. (#4317)

**9089 1838 Large Stars, No Drapery AU58 NGC.** NGC Census: (62/494). PCGS Population (48/326). Mintage: 2,225,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$190. (#4317)

**9090 1838 Large Stars, No Drapery MS62 NGC.** NGC Census: (81/392). PCGS Population (52/254). Mintage: 2,225,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$290. (#4317)

**9091 1839 No Drapery AU58 PCGS.** PCGS Population (23/154). NGC Census: (23/199). Mintage: 1,069,150. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$210. (#4319)  
*From The Diotte Collection.*

**9092 1840 No Drapery MS64 NGC.** NGC Census: (58/40). PCGS Population (39/34). Mintage: 1,000,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$575. (#4321)

**9093 1845 AU58 NGC.** NGC Census: (29/133). PCGS Population (20/132). Mintage: 1,564,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$130. (#4335)

**9094 1852 AU55 ANACS.** NGC Census: (2/143). PCGS Population (4/126). Mintage: 1,000,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$110. (#4349)  
*From The ALG Collection.*

**9095 1853 Arrows MS62 NGC.** NGC Census: (157/502). PCGS Population (126/373). Mintage: 13,210,020. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$190. (#4356)

**9096 1856 MS63 PCGS.** PCGS Population (65/112). NGC Census: (74/194). Mintage: 4,880,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$250. (#4363)

**9097 1857 MS61 PCGS.** PCGS Population (15/406). NGC Census: (21/539). Mintage: 7,280,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$155. (#4365)  
*From The Diotte Collection.*

**9098 1858 MS62 NGC.** NGC Census: (57/455). PCGS Population (42/348). Mintage: 3,500,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$185. (#4367)

**9099 1859 MS63 PCGS.** PCGS Population (33/70). NGC Census: (24/130). Mintage: 340,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$300. (#4371)

**9100 1860 MS64 NGC.** NGC Census: (137/164). PCGS Population (102/145). Mintage: 799,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$330. (#4377)  
*From The Diotte Collection.*

**9101 1862 MS63 PCGS. CAC.** PCGS Population (110/246). NGC Census: (111/307). Mintage: 1,492,550. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$225. (#4381)

**9102 1869-S AU58 NGC. Ex-Pitman.** NGC Census: (7/59). PCGS Population (3/26). Mintage: 230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$210. (#4395)

**9103 1870 MS64 PCGS.** PCGS Population (36/28). NGC Census: (60/40). Mintage: 535,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$315. (#4396)

**9104 1871 MS63 PCGS.** PCGS Population (69/133). NGC Census: (86/164). Mintage: 1,873,960. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$200. (#4398)

**9105 1871-S MS64 NGC.** NGC Census: (32/17). PCGS Population (25/8). Mintage: 161,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$450. (#4399)

**9106 1872 AU58 NGC.** NGC Census: (40/255). PCGS Population (49/247). Mintage: 2,947,950. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$90. (#4400)

**9107 1872 MS64 NGC.** NGC Census: (84/35). PCGS Population (56/37). Mintage: 2,947,950. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$315. (#4400)

**9108 1872-S Mintmark Below Bow AU58 NGC.** NGC Census: (59/597). PCGS Population (54/519). Mintage: 837,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$94. (#4401)

**9109 1872-S Mintmark Below Bow MS62 PCGS.** PCGS Population (77/425). NGC Census: (79/483). Mintage: 837,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$150. (#4401)

**9110 1872-S Mintmark Below Bow MS63 NGC.** NGC Census: (119/364). PCGS Population (125/300). Mintage: 837,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#4401)

**9111 1873-S MS63 PCGS.** PCGS Population (49/100). NGC Census: (44/133). Mintage: 324,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$210. (#4405)

## PROOF SEATED HALF DIME

**9112 1862 PR63 NGC.** NGC Census: (42/97). PCGS Population (51/82). Mintage: 550. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$425. (#4445)

## EARLY DIMES

**9113 1796—Obv Scratched—NGC Details. Fair. JR-6.** NGC Census: (1/198). PCGS Population (4/283). Mintage: 22,135. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fair 2 : \$841. (#4461)

**9114 1798/97 16 Stars on Reverse—Scratches—NGC Details. VG. JR-1.** NGC Census: (1/42). PCGS Population (3/53). Mintage: 27,550. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$875. (#4468)

**9115 1801—Rev Damage—NGC Details. Fair. JR-1.** NGC Census: (3/28). PCGS Population (2/50). Mintage: 34,640. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fair 2 : \$219. (#4471)

**9116 1803—Obverse Graffiti—NGC Details. Fair.** NGC Census: (0/32). PCGS Population (1/51). Mintage: 33,040. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fair 2 : \$254. (#4473)

**9117 1805 4 Berries—Improperly Cleaned—NGC Details. VF. JR-2.** NGC Census: (9/188). PCGS Population (24/206). Mintage: 120,780. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,225. (#4477)

## BUST DIMES

- 9118 1811/09—Cleaned, Scratches—NGC Details.** XF. JR-1. NGC Census: (4/32). PCGS Population (2/30). Mintage: 65,180. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,125. (#4487)
- 9119 1814 Large Date XF45 PCGS.** PCGS Population (4/100). NGC Census: (6/134). Mintage: 421,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$486. (#4488)
- 9120 1820 Small 0—Improperly Cleaned—NGC Details.** AU. JR-11. NGC Census: (0/0). PCGS Population (0/7). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$510. (#4493)
- 9121 1821 Small Date VF35 PCGS.** PCGS Population (3/34). NGC Census: (1/36). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$331. (#94496)
- 9122 1827 PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 1,300,000. (#4504)
- 9123 1827—Cleaned—ANACS.** XF45 Details. JR-6. NGC Census: (11/212). PCGS Population (13/200). Mintage: 1,300,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$394. (#4504)  
*From The Diotte Collection.*
- 9124 1829 Small 10C XF45 PCGS. CAC.** PCGS Population (16/176). NGC Census: (7/214). Mintage: 770,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$257. (#4511)
- 9125 1831 PCGS Genuine.** The PCGS number ending in .92 suggest Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 771,350. (#4520)
- 9126 1831 AU50 NGC.** PCGS Population (21/200). NGC Census: (5/227). Mintage: 771,350. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$300. (#4520)
- 9127 1832 AU55 PCGS.** Ex:Norweb. PCGS Population (35/148). NGC Census: (19/192). Mintage: 522,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$360. (#4521)
- 9128 1835 AU55 PCGS.** PCGS Population (40/198). NGC Census: (25/318). Mintage: 1,410,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$350. (#4527)

- 9129 1835 AU58 NGC.** NGC Census: (73/245). PCGS Population (42/156). Mintage: 1,410,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$425. (#4527)
- 9130 1837 AU55 NGC.** NGC Census: (6/97). PCGS Population (16/60). Mintage: 359,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$375. (#4529)

## SEATED DIMES

- 9131 1837 No Stars, Large Date—Corroded—ANACS.** XF40 Details. NGC Census: (13/305). PCGS Population (32/284). Mintage: 682,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$400. (#4561)  
*From The Diotte Collection.*
- 9132 1838-O No Stars XF45 PCGS.** PCGS Population (22/80). NGC Census: (16/75). Mintage: 406,034. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$747. (#4564)
- 9133 1838-O No Stars—Scratches—NGC Details.** AU. NGC Census: (5/71). PCGS Population (12/68). Mintage: 406,034. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$900. (#4564)
- 9134 1839 No Drapery AU58 PCGS.** PCGS Population (20/98). NGC Census: (25/144). Mintage: 1,053,115. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$250. (#4571)  
*From The Diotte Collection.*
- 9135 1840-O No Drapery VF35 ANACS.** NGC Census: (1/16). PCGS Population (2/39). Mintage: 1,175,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$163. (#4574)  
*From The Diotte Collection.*
- 9136 1844 VF35 PCGS. CAC.** PCGS Population (14/51). NGC Census: (6/18). Mintage: 72,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$715. (#4585)
- 9137 1845-O VF25 PCGS. CAC.** PCGS Population (7/35). NGC Census: (3/21). Mintage: 230,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF25: \$382. (#4587)
- 9138 1852-O XF40 PCGS.** PCGS Population (6/28). NGC Census: (0/42). Mintage: 430,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$275. (#4598)
- 9139 1853 Arrows MS64 PCGS.** PCGS Population (136/122). NGC Census: (163/117). Mintage: 12,078,010. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$750. (#4603)
- 9140 1856 Large Date AU55 PCGS.** PCGS Population (3/14). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$185. (#4610)
- 9141 1856-O XF45 PCGS.** PCGS Population (3/34). NGC Census: (2/43). Mintage: 1,180,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$128. (#4612)
- 9142 1857 AU55 NGC.** NGC Census: (10/244). PCGS Population (8/183). Mintage: 5,580,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$140. (#4614)
- 9143 1857 MS63 PCGS.** PCGS Population (56/69). NGC Census: (48/136). Mintage: 5,580,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$450. (#4614)  
*From The Diotte Collection.*
- 9144 1860-S—Improperly Cleaned—NGC Details.** AU. NGC Census: (1/21). PCGS Population (5/23). Mintage: 140,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$690. (#4622)
- 9145 1860-O—Improperly Cleaned—NGC Details.** Fine. NGC Census: (5/25). PCGS Population (5/41). Mintage: 40,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$750. (#4632)
- 9146 1861 MS63 PCGS.** PCGS Population (40/75). NGC Census: (15/62). Mintage: 1,884,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$300. (#4633)

- 9147 1861-S VF20 NGC.** NGC Census: (2/17). PCGS Population (2/28). Mintage: 172,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$300. (#4634)
- 9148 1864 Good 4 PCGS.** PCGS Population (3/48). NGC Census: (0/36). Mintage: 11,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$200. (#4639)
- 9149 1866—Damaged—NGC Details. XF.** NGC Census: (1/36). PCGS Population (2/38). Mintage: 8,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$945. (#4643)
- 9150 1871-S XF45 PCGS. CAC.** PCGS Population (3/21). NGC Census: (0/24). Mintage: 320,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$227. (#4655)

**10106 1846—Improperly Cleaned—NCS. XF Details.** NGC Census: (19/316). PCGS Population (56/344). Mintage: 110,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$500. (#6932)  
*From The Diotte Collection.*

**10107 1846 XF45 PCGS. CAC.** PCGS Population (73/274). NGC Census: (50/266). Mintage: 110,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$582. (#6932)

**10108 1846-O XF40 NGC. CAC.** NGC Census: (12/110). PCGS Population (30/127). Mintage: 59,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$665. (#6933)

**10109 1847—Polished—NGC Details. XF.** NGC Census: (17/297). PCGS Population (43/364). Mintage: 140,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$500. (#6934)

**10110 1847 XF45 NGC.** NGC Census: (43/256). PCGS Population (85/280). Mintage: 140,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$561. (#6934)

**10111 1849—Obv Improperly Cleaned—NGC Details. VF.** NGC Census: (0/221). PCGS Population (3/280). Mintage: 62,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$310. (#6936)

**10112 1859-O—Damaged—NGC Details. Fine.** NGC Census: (5/429). PCGS Population (3/692). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$260. (#6947)

**10113 1859-O—Scratched, Improperly Cleaned—NGC Details. VF.** NGC Census: (3/424). PCGS Population (4/686). Mintage: 360,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$310. (#6947)

**10114 1860-O—Improperly Cleaned—NGC Details. VF.** NGC Census: (2/630). PCGS Population (6/1023). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$325. (#6950)

**10115 1860-O—Improperly Cleaned—NGC Details. VF Details.** NGC Census: (2/630). PCGS Population (6/1023). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$325. (#6950)

**10116 1860-O—Rim Damage—NGC Details. VF.** NGC Census: (2/630). PCGS Population (6/1023). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$325. (#6950)

**10117 1860-O—Improperly Cleaned—NGC Details. XF.** NGC Census: (18/593). PCGS Population (46/934). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#6950)

**10118 1860-O—Damaged—NGC Details. XF.** NGC Census: (18/593). PCGS Population (46/934). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#6950)

**10119 1860-O—Whizzed—NGC Details. AU.** NGC Census: (18/539). PCGS Population (55/822). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$640. (#6950)

**10120 1860-O—Plugged—NGC Details. AU.** NGC Census: (18/540). PCGS Population (55/823). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$640. (#6950)

**10121 1860-O—Improperly Cleaned—NGC Details. AU.** NGC Census: (18/541). PCGS Population (55/828). Mintage: 515,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$640. (#6950)

**10122 1864—Holed—NGC Details. VG.** NGC Census: (0/65). PCGS Population (2/124). Mintage: 30,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$350. (#6954)

**10123 1864—Improperly Cleaned—NGC Details. XF.** NGC Census: (6/52). PCGS Population (14/86). Mintage: 30,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$925. (#6954)

**10124 1865 XF40 PCGS.** PCGS Population (12/88). NGC Census: (3/53). Mintage: 46,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$825. (#6955)

**10125 1866 Motto—Improperly Cleaned—NGC Details. AU.** NGC Census: (7/58). PCGS Population (11/97). Mintage: 48,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$825. (#6959)

**10126 1869—Improperly Cleaned—NGC Details. AU.** NGC Census: (4/61). PCGS Population (13/93). Mintage: 423,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$800. (#6962)

**10127 1869—Improperly Cleaned—NGC Details. AU.** NGC Census: (4/61). PCGS Population (13/93). Mintage: 423,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$800. (#6962)

**10128 1870—Graffiti—NGC Details. VF.** NGC Census: (1/147). PCGS Population (5/219). Mintage: 415,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$340. (#6963)

**10129 1870—Improperly Cleaned—NGC Details. XF.** NGC Census: (18/120). PCGS Population (14/185). Mintage: 415,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$475. (#6963)

**10130 1870—Improperly Cleaned—NGC Details. XF.** NGC Census: (18/120). PCGS Population (14/185). Mintage: 415,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$475. (#6963)

**10131 1870-CC—Graffiti—NGC Details. Fine.** NGC Census: (5/152). PCGS Population (6/327). Mintage: 12,462. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$835. (#6964)

**10132 1871—Cleaned—ANACS. Fine 12 Details.** NGC Census: (9/445). PCGS Population (8/634). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$270. (#6966)

**10133 1871 Fine 12 ANACS.** NGC Census: (9/445). PCGS Population (8/634). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$270. (#6966)

**10134 1871—Cleaned—ANACS. Fine 15 Details.** NGC Census: (4/442). PCGS Population (8/629). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$298. (#6966)  
*From The Diotte Collection.*

**10135 1871—Improperly Cleaned—NGC Details. VF.** NGC Census: (7/434). PCGS Population (15/611). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350. (#6966)

**10136 1871—Improperly Cleaned—NGC Details. VF.** NGC Census: (7/434). PCGS Population (15/611). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350. (#6966)

**10137 1871—Rim Damage—NGC Details. VF.** NGC Census: (7/434). PCGS Population (15/611). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350. (#6966)

**10138 1871—Graffiti—NGC Details. VF.** NGC Census: (7/434). PCGS Population (15/611). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350. (#6966)

**10139 1871—Obverse Damage—NGC Details. XF.** NGC Census: (24/370). PCGS Population (67/466). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#6966)

**10140 1871—Improperly Cleaned—NGC Details. XF.** NGC Census: (24/370). PCGS Population (67/466). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#6966)

**10141 1871—Holed—NGC Details. XF.** NGC Census: (24/370). PCGS Population (67/466). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#6966)

**10142 1871—Improperly Cleaned—NGC Details. XF.** NGC Census: (24/371). PCGS Population (67/468). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#6966)

**10143 1871—Improperly Cleaned—NGC Details. AU.** NGC Census: (21/289). PCGS Population (72/289). Mintage: 1,074,760. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$675. (#6966)

**10144 1872 VG8 ANACS.** NGC Census: (0/316). PCGS Population (5/441). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$240. (#6968)

**10145 1872—Improperly Cleaned—NGC Details. VF.** NGC Census: (6/298). PCGS Population (12/406). Mintage: 1,106,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$340. (#6968)

**COMPLIMENTARY SUBSCRIPTION**

# SESSION FIVE

Heritage Live!™, Internet, Fax, and Mail Only Session  
Sunday, October 31, 2010, 10:00 AM CT, Lots 10173-12283  
Dallas, Texas

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots  
To view full descriptions, enlargeable images and bid online, visit [HA.com/1145](http://HA.com/1145)  
Viewing for lots in this Session will only be available in Dallas.

## SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at [HA.com](http://HA.com) two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live™, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

### MORGAN DOLLARS

**10173 1878 8TF MS61 ANACS. VAM-17.** NGC Census: (272/5808). PCGS Population (354/7681). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$110. (#7072)

**10174 1878 8TF MS63 NGC.** NGC Census: (2180/2140). PCGS Population (3310/2688). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)

**10175 1878 8TF MS63 PCGS.** PCGS Population (3320/2695). NGC Census: (2361/2216). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$150. (#7072)

**10176 1878 8TF MS64 NGC.** NGC Census: (1786/354). PCGS Population (2208/480). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$335. (#7072)

**10177 1878 8TF MS64+ PCGS.** PCGS Population (2208/480). NGC Census: (1786/354). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$335. (#7072)

**10178 1878 8TF MS64 NGC.** NGC Census: (1786/354). PCGS Population (2208/480). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$335. (#7072)

**10179 1878 8TF MS64 NGC.** NGC Census: (1853/363). PCGS Population (2214/481). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$335. (#7072)

**10180 1878 8TF MS64 NGC.** NGC Census: (1853/363). PCGS Population (2214/481). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$335. (#7072)

**10181 1878 8TF MS64 PCGS.** PCGS Population (2208/480). NGC Census: (1785/354). Mintage: 699,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$335. (#7072)

**10182 1878 8TF MS61 Prooflike PCGS.** PCGS Population (58/551). NGC Census: (48/456). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$140. (#7073)

**10183 1878 7/8TF Strong MS63 PCGS.** PCGS Population (2203/1553). NGC Census: (1355/1031). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#7078)

**10184 1878 7/8TF Strong MS63 NGC.** NGC Census: (1351/1029). PCGS Population (2190/1555). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#7078)

**10185 1878 7/8TF Strong MS63 ANACS.** VAM-37. NGC Census: (1355/1031). PCGS Population (2203/1553). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#7078)

**10186 1878 7/8TF Strong MS63 PCGS.** PCGS Population (2190/1555). NGC Census: (1351/1029). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#7078)

**10187 1878 7/8TF Strong MS63 ANACS.** VAM-38. NGC Census: (1355/1031). PCGS Population (2203/1553). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#7078)

**10188 1878 7/8TF Strong MS63 ANACS.** VAM-38. NGC Census: (1356/1035). PCGS Population (2201/1553). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$220. (#7078)

**10189 1878 7/8TF Strong MS64 NGC.** NGC Census: (944/91). PCGS Population (1348/205). Mintage: 544,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$400. (#7078)

**10190 1878 7/8TF Weak MS63 PCGS.** PCGS Population (1041/894). NGC Census: (0/0). Mintage: 544,000. (#7070)

**10778 1894-S MS62 PCGS.** PCGS Population (669/1937). NGC Census: (415/949). Mintage: 1,260,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$675. (#7232)

**10779 1894-S MS62 PCGS.** PCGS Population (669/1933). NGC Census: (415/949). Mintage: 1,260,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$675. (#7232)

**10780 1895-O PCGS Genuine.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 450,000. (#7236)  
*From The Diotte Collection.*

**10781 1895-O Good 6 ANACS.** NGC Census: (44/3227). PCGS Population (74/3776). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6 : \$201. (#7236)

**10782 1895-O VG8 ANACS.** NGC Census: (46/3174). PCGS Population (100/3669). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$220. (#7236)

**10783 1895-O Fine 12 ANACS.** NGC Census: (63/3066). PCGS Population (99/3483). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$260. (#7236)

**10784 1895-O Fine 12 NGC.** NGC Census: (63/3073). PCGS Population (99/3489). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$260. (#7236)

**10785 1895-O Fine 15 PCGS.** PCGS Population (126/3357). NGC Census: (52/3014). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$292. (#7236)

**10786 1895-O—Cleaned—ANACS. VF20 Details.** NGC Census: (52/2962). PCGS Population (136/3221). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350. (#7236)

**10787 1895-O—Environmental Damage—NGC Details. VF.** NGC Census: (52/2965). PCGS Population (136/3227). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350. (#7236)  
*From The Diotte Collection.*

**10788 1895-O VF20 ANACS.** NGC Census: (52/2969). PCGS Population (136/3227). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$350. (#7236)

**10789 1895-O—Improperly Cleaned—NGC Details. XF.** NGC Census: (254/2435). PCGS Population (370/2338). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#7236)

**10790 1895-O—Improperly Cleaned—NGC Details. XF.** NGC Census: (254/2435). PCGS Population (370/2338). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#7236)

**10791 1895-O—Cleaned—ANACS. XF40 Details.** NGC Census: (254/2428). PCGS Population (369/2334). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#7236)

**10792 1895-O—Improperly Cleaned, Obverse Rim Filed—NCS. XF Details.** NGC Census: (253/2426). PCGS Population (369/2328). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$450. (#7236)  
*From The Diotte Collection.*

**10793 1895-O—Cleaned—ANACS. XF45 Details.** PCGS Population (691/1643). NGC Census: (608/1820). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$630. (#7236)

**10794 1895-O—Improperly Cleaned—NGC Details. AU.** NGC Census: (326/1494). PCGS Population (427/1216). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$965. (#7236)

**10795 1895-O AU50 NGC.** NGC Census: (326/1500). PCGS Population (428/1219). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$965. (#7236)

**10796 1895-O AU50 NGC.** NGC Census: (326/1500). PCGS Population (428/1219). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$965. (#7236)

**10797 1895-O—Improperly Cleaned—NGC Details. AU.** NGC Census: (326/1492). PCGS Population (427/1211). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$965. (#7236)

**10798 1895-O—Improperly Cleaned—NGC Details. AU.** NGC Census: (326/1497). PCGS Population (427/1219). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$965. (#7236)

**10799 1895-O—Cleaned—ANACS. AU50 Details.** NGC Census: (326/1500). PCGS Population (428/1219). Mintage: 450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$965. (#7236)

**10800 1895-S—Scratches—NGC Details. VG.** NGC Census: (41/1346). PCGS Population (77/2404). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$360. (#7238)

**10801 1895-S—Scratched—ANACS. VG8 Details.** NGC Census: (41/1345). PCGS Population (75/2408). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8 : \$360. (#7238)

**10802 1895-S Fine 12 PCGS.** PCGS Population (96/2228). NGC Census: (43/1268). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$400. (#7238)

**10803 1895-S Fine 12 PCGS.** PCGS Population (96/2228). NGC Census: (43/1268). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$400. (#7238)

**10804 1895-S—Harshly Cleaned—NGC Details. Fine.** NGC Census: (42/1268). PCGS Population (96/2225). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$400. (#7238)

**10805 1895-S Fine 15 ANACS.** NGC Census: (48/1219). PCGS Population (102/2121). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$426. (#7238)

**10806 1895-S—Improperly Cleaned—NGC Details. VF.** NGC Census: (25/1195). PCGS Population (81/2044). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$475. (#7238)

**10807 1895-S—Cleaned, Damaged—NGC Details. VF.** NGC Census: (25/1195). PCGS Population (80/2042). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$475. (#7238)  
*From The Diotte Collection.*

**10808 1895-S VF35 PCGS.** PCGS Population (112/1751). NGC Census: (38/1062). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$750. (#7238)

**10809 1895-S—Improperly Cleaned—NGC Details. XF.** NGC Census: (61/1002). PCGS Population (110/1636). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$925. (#7238)

**10810 1895-S—Improperly Cleaned—NGC Details. XF.** NGC Census: (61/1003). PCGS Population (110/1637). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$925. (#7238)

**10811 1896 MS66 PCGS.** PCGS Population (643/25). NGC Census: (587/53). Mintage: 9,976,762. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$440. (#7240)

**10812 1896 MS66 NGC.** NGC Census: (587/53). PCGS Population (643/25). Mintage: 9,976,762. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$440. (#7240)

**10813 1896-O AU53 ANACS.** NGC Census: (471/3034). PCGS Population (378/2748). Mintage: 4,900,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$140. (#7242)  
*From The Diotte Collection.*

**11220 1914 AU58 NGC.** NGC Census: (1213/4760). PCGS Population (568/2005). Mintage: 240,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$340. (#7946)

**11221 1914 AU58 NGC.** NGC Census: (1208/4745). PCGS Population (570/2002). Mintage: 240,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$340. (#7946)

**11222 1914 MS61 NGC.** NGC Census: (1476/3130). PCGS Population (317/1644). Mintage: 240,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$650. (#7946)

**11223 1914 MS61 NGC.** NGC Census: (1470/3122). PCGS Population (317/1641). Mintage: 240,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$650. (#7946)

**11224 1914 MS61 PCGS.** PCGS Population (318/1645). NGC Census: (1467/3123). Mintage: 240,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$650. (#7946)

**11225 1914 MS61 NGC.** NGC Census: (1470/3122). PCGS Population (317/1641). Mintage: 240,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$650. (#7946)

**11226 1914-D AU58 NGC.** NGC Census: (1264/7216). PCGS Population (943/3706). Mintage: 448,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$295. (#7947)

**11227 1914-D—Reverse Damaged—NGC Details. Unc.** NGC Census: (134/7109). PCGS Population (104/3598). Mintage: 448,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$335. (#7947)

**11228 1914-D—Cleaned—ANACS. MS60 Details.** NGC Census: (134/7109). PCGS Population (104/3598). Mintage: 448,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$335. (#7947)

**11229 1914-D MS61 PCGS.** PCGS Population (543/3059). NGC Census: (1803/5279). Mintage: 448,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$465. (#7947)

**11230 1914-D MS62 NGC.** NGC Census: (3026/2253). PCGS Population (1529/1530). Mintage: 448,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$540. (#7947)

**11231 1914-D MS62 PCGS.** PCGS Population (1541/1530). NGC Census: (3028/2257). Mintage: 448,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$540. (#7947)

**11232 1914-D MS62 NGC.** NGC Census: (3021/2281). PCGS Population (1523/1531). Mintage: 448,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$540. (#7947)

**11233 1915 MS62 PCGS.** PCGS Population (1401/1789). NGC Census: (3044/2875). Mintage: 606,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$525. (#7948)

**11234 1915 MS63 NGC.** NGC Census: (1500/1375). PCGS Population (998/791). Mintage: 606,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$925. (#7948)  
*From The Glenwood Landing Collection.*

**11235 1925-D—Improperly Cleaned—NGC Details. Unc.** NGC Census: (177/15897). PCGS Population (258/9925). Mintage: 578,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$315. (#7949)

**11236 1925-D MS62 PCGS.** PCGS Population (3236/5483). NGC Census: (5406/7957). Mintage: 578,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$500. (#7949)

**11237 Short Set including 1925-D, 1926, 1927, 1928 and 1929. All graded MS62 NGC.**  
*From The Glenwood Landing Collection.*  
(Total: 5 coins)

**11238 1925-D MS63 NGC.** NGC Census: (3857/4127). PCGS Population (2880/2594). Mintage: 578,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7949)  
*From The Glenwood Landing Collection.*

**11239 Short Set including 1925-D, 1926, 1927, 1928 and 1929. All graded MS63 NGC.**  
*From The Glenwood Landing Collection.*  
(Total: 5 coins)

**11240 Short Set including 1925-D, 1926, 1927, 1928 and 1929. All graded MS63 NGC.**  
*From The Glenwood Landing Collection.*  
(Total: 5 coins)

**11241 Short Set including 1925-D, 1926, 1927, 1928 and 1929. All graded MS63 NGC.**  
*From The Glenwood Landing Collection.*  
(Total: 5 coins)

**11242 1926—Reverse Improperly Cleaned—NGC Details. Unc.** NGC Census: (200/14559). PCGS Population (206/9645). Mintage: 446,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$315. (#7950)

**11243 1926—Scratches—NGC Details. Unc.** NGC Census: (201/14605). PCGS Population (206/9656). Mintage: 446,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$315. (#7950)

**11244 1926 MS61 ANACS.** NGC Census: (2166/12418). PCGS Population (1033/8619). Mintage: 446,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$420. (#7950)

**11245 1926 MS62+ NGC.** NGC Census: (4952/7487). PCGS Population (2805/5820). Mintage: 446,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$500. (#7950)

**11246 1926 MS63 NGC.** NGC Census: (3710/3748). PCGS Population (2852/2955). Mintage: 446,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7950)

**11247 1926 MS63 PCGS.** PCGS Population (2853/2958). NGC Census: (3705/3749). Mintage: 446,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7950)

**11248 No Lot.**

**11249 1926 MS63 NGC.** NGC Census: (3726/3761). PCGS Population (2861/2959). Mintage: 446,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7950)  
*From The Glenwood Landing Collection.*

**11250 1927 MS62 PCGS.** PCGS Population (2390/4711). NGC Census: (4212/6044). Mintage: 388,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$500. (#7951)

**11251 1927 MS63 PCGS.** PCGS Population (2590/2117). NGC Census: (3272/2793). Mintage: 388,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7951)  
*From The Glenwood Landing Collection.*

**11252 1928 MS62 PCGS.** PCGS Population (2858/4143). NGC Census: (4805/6484). Mintage: 416,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$500. (#7952)

**11253 1928 MS63 NGC.** NGC Census: (3778/2707). PCGS Population (2576/1567). Mintage: 416,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7952)

**11254 1928 MS63 NGC.** NGC Census: (3789/2724). PCGS Population (2577/1569). Mintage: 416,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7952)  
*From The Glenwood Landing Collection.*

**11255 1929—Obverse Scratched—NGC Details. Unc.** NGC Census: (211/15855). PCGS Population (413/10311). Mintage: 532,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$315. (#7953)

**11256 1929 MS62+ NGC.** NGC Census: (6339/7358). PCGS Population (3851/4843). Mintage: 532,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$500. (#7953)

**11257 1929 MS62 PCGS.** PCGS Population (3852/4847). NGC Census: (6328/7347). Mintage: 532,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$500. (#7953)

**11258 1929 MS63+ NGC.** NGC Census: (4897/2482). PCGS Population (3347/1498). Mintage: 532,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7953)

**11259 1929 MS63 NGC.** NGC Census: (4896/2462). PCGS Population (3348/1495). Mintage: 532,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7953)

**11260 1929 MS63 NGC.** NGC Census: (4897/2482). PCGS Population (3347/1498). Mintage: 532,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$775. (#7953)

### THREE DOLLAR GOLD PIECES

**11261 1854—Improperly Cleaned—NGC Details. XF.** NGC Census: (66/3299). PCGS Population (79/2456). Mintage: 138,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,200. (#7969)

**11262 1854—Mount Removed—NGC Details. AU.** NGC Census: (159/2960). PCGS Population (298/1924). Mintage: 138,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,200. (#7969)

**11263 1854-O—Improperly Cleaned—NGC Details. XF.** NGC Census: (78/594). PCGS Population (81/310). Mintage: 24,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$2,400. (#7971)

**11264 1855—Scratches—NGC Details. XF.** NGC Census: (27/990). PCGS Population (44/670). Mintage: 50,555. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,200. (#7972)

**11265 1855-S—Harshly Cleaned—NGC Details. VF.** NGC Census: (1/139). PCGS Population (5/110). Mintage: 6,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,200. (#7973)

**11266 1856-S—Improperly Cleaned—NGC Details. VF.** NGC Census: (5/459). PCGS Population (16/322). Mintage: 34,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,200. (#7975)

**11267 1857-S Good 4 NGC.** NGC Census: (3/171). PCGS Population (1/141). Mintage: 14,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$1,200. (#7977)

**11268 1869—Improperly Cleaned—NGC Details. AU.** NGC Census: (8/116). PCGS Population (22/91). Mintage: 2,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,550. (#7990)

**11269 1874—Scratched—ANACS. XF45 Details.** NGC Census: (77/2308). PCGS Population (130/1723). Mintage: 41,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$1,200. (#7998)

**11270 1874—Reverse Damage—NGC Details. AU.** NGC Census: (88/2213). PCGS Population (161/1560). Mintage: 41,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,200. (#7998)

**11271 1874—Obverse Damaged—NGC Details. AU.** NGC Census: (88/2220). PCGS Population (161/1562). Mintage: 41,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,200. (#7998)

**11272 1874—Cleaned, Scratches—NGC Details. AU.** NGC Census: (88/2211). PCGS Population (161/1560). Mintage: 41,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,200. (#7998)

**11273 1878—Polished, Rim Filing—NGC Details. AU.** NGC Census: (55/4870). PCGS Population (196/4858). Mintage: 82,304. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,200. (#8000)

**11274 1878—Scratched—ANACS. AU58 Details.** NGC Census: (1256/3137). PCGS Population (889/3266). Mintage: 82,304. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$1,500. (#8000)

### CLASSIC HALF EAGLES

**11275 1834 Plain 4—Improperly Cleaned, Damaged—NGC Details. VF.** NGC Census: (6/1755). PCGS Population (4/1064). Mintage: 657,460. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$500. (#8171)

**11276 1834 Plain 4—Scratches—NGC Details. AU.** NGC Census: (124/1192). PCGS Population (137/448). Mintage: 657,460. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$975. (#8171)

**11277 1834 Plain 4—Improperly Cleaned—NGC Details. AU.** NGC Census: (124/1192). PCGS Population (137/448). Mintage: 657,460. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$975. (#8171)

**11278 1835 XF40 NGC.** NGC Census: (46/508). PCGS Population (58/282). Mintage: 371,534. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$675. (#8173)

**11279 1835—Scratches—NGC Details. AU.** NGC Census: (45/375). PCGS Population (57/167). Mintage: 371,534. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,150. (#8173)

**11280 1836—Improperly Cleaned—NGC Details. XF.** NGC Census: (70/824). PCGS Population (81/459). Mintage: 553,147. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$750. (#8174)

**11281 1836 XF45 NGC.** NGC Census: (136/690). PCGS Population (124/335). Mintage: 553,147. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$873. (#8174)

**11282 1837—Scratches—NGC Details.** XF. NGC Census: (38/326). PCGS Population (21/129). Mintage: 207,121. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$800. (#8175)

## LIBERTY HALF EAGLES

**11283 1839—Improperly Cleaned—NGC Details.** XF. NGC Census: (23/191). PCGS Population (21/90). Mintage: 118,143. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$500. (#8191)

**11284 1846 Large Date AU50 NGC.** Ex: Pittman. NGC Census: (30/256). PCGS Population (30/67). Mintage: 395,942. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$410. (#8226)

**11285 1846 Small Date VF25 NGC.** NGC Census: (0/0). PCGS Population (0/11). (#88226)

**11286 1847—Repunched Date—AU58 PCGS.** PCGS Population (50/112). NGC Census: (223/160). Mintage: 915,981. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$535. (#8231)

**11287 1851-C Fair 2 PCGS.** PCGS Population (0/101). NGC Census: (0/136). Mintage: 49,100. (#8247)

**11288 1851-D PCGS Genuine.** The PCGS number ending in .98 suggests Damage (Mount Removed) as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable.

**11289 1853 AU50 PCGS.** PCGS Population (32/149). NGC Census: (42/351). Mintage: 305,770. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$410. (#8253)

**11290 1856-D—Improperly Cleaned—NGC Details.** VF. NGC Census: (1/104). PCGS Population (1/103). Mintage: 19,786. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,325. (#8268)

**11291 1856-S—Improperly Cleaned—NGC Details.** XF. NGC Census: (14/106). PCGS Population (14/82). Mintage: 105,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$550. (#8270)

**11292 1857-O—Improperly Cleaned—NGC Details.** XF. NGC Census: (12/72). PCGS Population (8/41). Mintage: 13,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,350. (#8274)

**11293 1861—Improperly Cleaned—NGC Details.** AU. NGC Census: (83/1198). PCGS Population (80/523). Mintage: 688,150. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$430. (#8288)

**11294 1861 AU55 PCGS.** PCGS Population (142/318). NGC Census: (291/798). Mintage: 688,150. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$460. (#8288)

**11295 1861-S—Improperly Cleaned—NGC Details.** VG Details. NGC Census: (1/45). PCGS Population (1/29). Mintage: 18,000. (#8291)

**11296 1871-S—Improperly Cleaned—NGC Details.** XF. NGC Census: (9/79). PCGS Population (9/47). Mintage: 25,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$925. (#8324)

**11297 1872-S—Improperly Cleaned—NGC Details.** XF. NGC Census: (12/105). PCGS Population (14/38). Mintage: 36,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$750. (#8327)

**11298 1874-CC PCGS Genuine.** The PCGS number ending in .98 suggest Damage/ Surfaces Tooled as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 21,198. (#8334)

**11299 1878 AU55 PCGS.** PCGS Population (68/182). NGC Census: (30/291). Mintage: 131,740. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$405. (#8345)

**11300 1879-S AU58 PCGS.** PCGS Population (50/101). NGC Census: (284/179). Mintage: 426,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$420. (#8350)

**11301 1879-S MS61 NGC.** NGC Census: (72/75). PCGS Population (22/71). Mintage: 426,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$650. (#8350)

**11302 1880-S AU58 NGC.** NGC Census: (200/1364). PCGS Population (146/803). Mintage: 1,348,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$420. (#8353)

**11303 1880-S MS63 PCGS.** PCGS Population (215/72). NGC Census: (238/127). Mintage: 1,348,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$965. (#8353)

**11304 1881—Reverse Damage—NGC Details.** Unc. NGC Census: (544/11027). PCGS Population (478/4603). Mintage: 5,708,802. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$435. (#8354)

**11305 1881 MS62 ANACS.** NGC Census: (4532/2984). PCGS Population (2046/1366). Mintage: 5,708,802. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$640. (#8354)

**11306 1882 AU58 PCGS.** PCGS Population (250/2692). NGC Census: (423/5605). Mintage: 2,514,568. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$420. (#8358)

**11307 1882-S MS62 PCGS.** PCGS Population (409/393). NGC Census: (671/519). Mintage: 969,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$640. (#8360)

**11308 1883-S MS61 PCGS.** PCGS Population (21/60). NGC Census: (41/52). Mintage: 83,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$785. (#8363)

**11309 1885-S MS63 PCGS.** PCGS Population (618/372). NGC Census: (707/591). Mintage: 1,211,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$975. (#8368)

**11310 1886 MS61 NGC.** NGC Census: (140/172). PCGS Population (46/120). Mintage: 388,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$550. (#8369)

**11311 1886-S MS63 PCGS.** PCGS Population (698/209). NGC Census: (902/400). Mintage: 3,268,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,025. (#8370)

**11312 1887-S MS63 PCGS.** PCGS Population (249/42). NGC Census: (369/70). Mintage: 1,912,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$1,025. (#8371)

**12171** 1996-P Jefferson Nickel—Double Struck Flipover In Collar—MS64 NGC.

*From The New England Collection of Jefferson Nickel Errors.*

**12172** 1999-P Jefferson Nickel—Double Struck 2nd Strike 60% Off Center—MS65 NGC.

*From The New England Collection of Jefferson Nickel Errors.*

**12173** 1999-P Jefferson Nickel—Quadruple Struck Clashed Dies Obverse Brockage—MS65 NGC.

*From The New England Collection of Jefferson Nickel Errors.*

**12174** 1999-P Jefferson Nickel—Broad Struck With Obverse Indent—MS66 NGC.

*From The New England Collection of Jefferson Nickel Errors.*

**12175** 1999-P Jefferson Nickel—Broad Struck With Obverse Indent—MS66 Full Steps NGC.

*From The New England Collection of Jefferson Nickel Errors.*

**12176** 1999-P Jefferson Nickel—Reverse Die Cap—MS67 Full Steps NGC.

*From The New England Collection of Jefferson Nickel Errors.*

**12177** 1999-P Jefferson Nickel—Broad Struck With Obverse Indent—MS67 Full Steps NGC.

*From The New England Collection of Jefferson Nickel Errors.*

**12178** 1999-D Jefferson Nickel—Struck On a Elliptical Planchet—MS66 Full Steps NGC. 4.1 GR.

*From The New England Collection of Jefferson Nickel Errors.*

**12179** 2004-P Jefferson Nickel, Keel Boat—On Improperly Annealed Plan—MS66 NGC.

*From The New England Collection of Jefferson Nickel Errors.*

**12180** 2004-P Jefferson Nickel, Keel Boat—Improperly Annealed Plan—MS66 NGC.

*From The New England Collection of Jefferson Nickel Errors.*

**12181** 1891-O Seated Dime—RPD & RPM, Obverse and Reverse Dies Clashed—MS63 PCGS.

**12182** 1945 Mercury Dime—Broadstruck Out of Collar—AU58 PCGS.

**12183** 1926-S Standing Liberty Quarter—Die Break @ Obverse Center—AU50 PCGS.

**12184** 1966 Washington Quarter—Struck on 5C Planchet—AU58 ANACS. Weight 4.91 Grams.

**12185** 1967 Washington Quarter—On 5C Planchet, Cleaned—ANACS. AU58 Details. WT 4.99 Grams.

**12186** 1999-P Statehood Quarter, New Jersey—Struck Through Grease, Scratched—ANACS. AU55 Details.

- 12187** 2000-P New Hampshire Statehood Quarter—55% Off Center—MS65 NGC.
- 12188** 2000-P New Hampshire Statehood Quarter—30% Off Center—MS66 NGC.
- 12189** 2000-P New Hampshire Statehood Quarter—Broadstruck with Obverse Brockage—MS66 NGC.
- 12190** (2000)P New Hampshire Statehood Quarter—Struck 35% Off Center—MS68 NGC.
- 12191** 2000-D Virginia Statehood Quarter—Die Adjustment Strike—MS61 ANACS.
- 12192** 2000-S South Carolina Statehood Silver Quarter—On a Defective Planchet—PR69 Ultra Cameo NGC.
- 12193** 1962 Franklin Half Dollar—5% Curved Clip—AU58 NGC.
- 12194** 1989-P Kennedy Half Dollar—Off Center—MS63 NGC.
- 12195** 1990-P Kennedy Half Dollar—10% Off Center—MS63 NGC.
- 12196** 1843 Seated Dollar—Planchet Defect @ 7:00—XF45 PCGS.
- 12197** 1880-S Morgan Dollar—Minor Struck Thru Reverse—MS65 PCGS.
- 12198** 1921 Peace Dollar—Reverse Lamination—AU58 PCGS.
- 12199** 1972 Eisenhower Dollar—Incomplete Punch Plan +3% Double Clip Plan—Type One MS63 PCGS.
- 12200** 2000-P Blank Sacagawea Planchet Type 2 NGC.
- 12201** 2001-P Sacagawea Dollar—US Mint Experimental Rinse Anti-Tarnishing Agent—MS67 PCGS.
- 12202** No Lot
- 12203** 1923 Saint-Gaudens Double Eagle—Reverse Struck Thru—MS61 NGC.
- 12204** 1924 Saint-Gaudens Double Eagle—Obverse Struck Through—MS63 PCGS.
- 12205** 1905 Lewis and Clark Dollar—Cleaned, Mount Removed—ANACS. AU50 Details.

- 12206** 1991-S Silver Eagle—Die Crack Reverse—PR68 Deep Cameo PCGS.

## WASHINGTONIA

- 12207** (circa 1860) R. Lovett, Jr. Washington Token MS64 NGC. Brass, Baker-556B.

## U.S. PRESIDENTS & STATESMEN

- 12208** (Circa 1805) Benjamin Franklin, Samson, Beaver—Environmental Damage—NGC Details. Unc. Bronze, 40 mm.
- 12209** 1860 Abraham Lincoln Campaign Medal MS61 NGC. Silvered, DeWitt-AL-1860-41.
- 12210** 1860 Abraham Lincoln Campaign Medal, MS63 Red and Brown NGC. Copper, DeWitt-AL-1860-41.

## U.S. MINT MEDALS

- 12211** "1801" Jefferson Indian Peace Medal, Bronze, 20th Century Restrike—Reverse Scratched—NGC Details. AU. Julian-IP-3.

## SO-CALLED DOLLARS

- 12212** 1906 Southwest Expedition, Pike's Peak Centennial PR62 NGC. CO HK-335.
- 12213** 1920 HK-449 Wilson Dollar MS61 NGC.
- 12214** 1896 Bryan Dollar, Uniface, Gorham—Improperly Cleaned—NGC Details. Unc. S-7, HK-781.
- 12215** 1933 Pedley-Ryan Dollar—Obverse Scratched—NGC Details. AU. CO HK-825.

## EARLY AMERICAN TOKENS

- 12216** "1796" Castorland Medal, Copper Restrike, Reeded, Wing and Cuirve on Edge, PR65 Brown NGC. Breen-1067, Rulau NY 40.

## HARD TIMES TOKENS

- 12217** 1834 Running Boar, Jackson MS63 Brown NGC. Copper, Low-8, HT-9, DeWitt-CE-1834-9, R.1.
- 12218** 1841 Daniel Webster MS63 Brown NGC. Low-64, HT-22, DeWitt-CE-1838-6, R.1.
- 12219** 1837 Half Cent of Copper XF45 NGC. Low-49, HT-73, R.2.
- 12220** 1838 Am I Not A Women and A Sister AU53 NGC. Low-54, HT-81, R.1.
- 12221** 1837 Feuchtwanger Cent AU55 PCGS. Low-120, HT-268, Breen 3-E, R.3.
- 12222** 1837 Feuchtwanger Cent—Cleaned—ANACS. AU58 Details. Low-120, HT-268, Breen 5-G, R.2.

## U.S. TRADE TOKENS (1866-1889)

- 12223** 1868 New York NY, R-NY-NY-243C, Parmelee, Webster & CO. Token MS64 Prooflike NGC.

## ALASKA TOKENS

- 12224** 1902 Octagonal 1/4 Pinch Alaska Gold Charm, Head Right, 16 Stars, MS63 NGC.
- 12225** 1910 Alaska 2 Toowah, Nathan Joseph Original—Reverse Tooled—NGC Details. Unc. 1.23 gm, 14.9 mm. Gould-Bressett 108.

## CALIFORNIA GOLD CHARMS

- 12226** “1857” California Gold Charm, Indian, Wreath, Octagonal MS66 NGC.
- 12227** “1859” California Gold, Indian, Wreath, Round MS66 NGC.
- 12228** “1880” 1/2 Cal Gold, Indian, Wreath, Round—Bent, Straightened—NGC Details. Unc. 0.25 gm.

- 12229** “1883” California Gold Charm, Miner With Pick, Q Reverse, Round Token MS66 NGC. 0.13 gm.
- 12230** “1884” California Gold Charm, Arms of California, Octagonal, MS65 NGC. 0.13 gm.
- 12231** “1885” California Gold Charm, Arms of California, Round MS65 NGC. 0.18 gm.
- 12232** 1932 1/2 California Gold, LA Olympics, Sprinter, Bear MS64 NGC.

## WORLD TOKENS

- 12233** (1790's) Am I Not A Man And A Brother Couder Token MS63 Brown NGC. GB D&H-1038b Middlesex Halfpenny, Payable In Lancaster Edge.

## MISCELLANEOUS MEDALS AND TOKENS

- 12234** (1861) Brass Robinson New England Elephant Token MS62 NGC.

## GSA DOLLARS
